ABBREVIATIONS.

Add.—Addition.
Alt.—Alteration.
Assn.—Association.
B. & L.—Building & Loan.
Bk.—Bank.
B. B.—Back Building.
Dwg.—Dwelling.
Est.—Estate.
E. J.—Ejectment Suit.
E. S.—Equity Suit.
Exr.—Executor.
Exrx.—Executrix.
K. & B.—Kitchen & Bath.
M L. D.—Mechanics' Lien Docket.
Nat. Bk.—National Bank.
Sav. Bk.—Savings Bank.
t. t.—Terre Tenant.
S. F.—Scire Facias to revive Judgment.

Sum C.—Summons in Case—A form of action invented to meet all civil cases, the form of which is not specially provided for.

Where there are no figures to indicate the amount of the judgment, the damages have not been assessed.

The first name in each line is that of the judgment debtor.

An asterisk (*) denotes judgment confessed or bond and warrant conditioned.

The figures 1 2 3 and 4 immediately after the name of the plaintiff indicates the number of the Court. The letters D. M. J. and S. after the number of the Court indicate the Term as D., December Term, M., March Term, as J., June Term and S., September Term.

An examination as to the nature of judgments and suits will be made for subscribers without extra charge on application.

The State Sanitary Convention.

The State Sanitary Convention, which will be held on May 12, 13, 14, at McCaul's Opera House, on Broad street, the object of which is to afford an opportunity for an expression of opinion on matters relating to the public health and the discussion of methods looking towards an advancement in the sanitary condition of the Commonwealth, the prevention of sickness and avoidable death, and the improvement of the condition of living. The opening address will be delivered by His Excellency, Hon. Robert E. Pattison, Governor of Pennsylvania. Joseph F. Edwards, M.A., Chairman of Committee of Arrangements.

President, Dr. William Pepper, Vice Presidents: Hon. James T. Mitchell (Judge), Samuel C. Perkins, President of Public Building's Commission, Hon. Jerome B. Niles, Auditor General, John Gay, President of Commissioners of Fisheries, General Geo. R. Snowden, Dr. F. S. Wilson, Hon. Lewis C. Cassidy, Hon. J. T. Hartranft, Hon. Henry M. Hoyt, William Dixey, Commissioner of Markets and City Property, Dr. P. D. Keyser, A. H. Fetterolf, PhD., President of Girard College, W. B. Land, Secretary of Public Buildings, A. A. Hirst, Board of Health, Henry Leffman, Port Physician, Hon. Richard Vaux, Charles Emory Smith, Editor of *The Press*, James Simpson Africa, Secretary of Internal Affairs, Christopher Stewart Patterson, General J. P. S. Gobin, John Wanamaker, Hon. James Pollock, Frederick Collins, Dr. D. M. Welch, Major Moses Veale, Health Officer, H. G. Sickel, President of Board of Health, Hon. W. B. Smith, Right Reverend William Bacon Stevens, Hon. James Gay Gordon, Dr. D. Hayes Agnew, Hon. S. G. King, A. M. Spangler, Samuel H. Smedley, Hon. W. S. Stenger, Secretary of the Commonwealth, Hon. J. H Campbell, Robert S. Davis, Hon. A. K. McClure, Editor of *The Times*, L. M. Megargee, Editor of *The News*, Dr. R. J. Levis, William H. Pancoast, W. M. Singerly, of *The Record*, Dr. A. R. Thomas, W. Heyward Drayton, Dr. W. B. Atkinson, Colonel Richard S. Edwards, Dr. P. H. Barthache, Hon. F. A. Meziner, Mayor of Erie, James R. Gates, President of Select Council, Chas. Lawrence, Colonel William Ludlow, Mrs. E. D. Gillespie, Right Reverend Edmund de Schwisnitz, Bethlehem, Dr. Daniel G. Brinton.

The following is a list of papers to be read: Prevention of Disease in the Commonwealth, to be discussed by P. H. Barthache, M.D. Municipal Sanitation, Morton Prince, Boston. Disposal of Human Excreta by Fire, Dr. W. S. Ross. Tests of Impurities in Water, Dr. H. F. Formad. Drainage and Sewage of Cities and Towns, Colonel George E. Waring. A paper by Dr. C. W. Chancellor, Baltimore. Necessity of Physical Education, by D'Carl H. Horsch, Dover. Economic Sanitation, Dr. A. H. Gibson, Washington. Importation of Foreign Rags into American Ports, Dr. F. S. Wilson. Water Supply of Philadelphia, Dr. J. Cheston Norris. Heating and Ventilation of Public School Buildings, as illustrated by the system introduced in the New High School Buildings at Chester, Dr. D. W. Jefferies, Chester. Hygiene of the Home, W. B. Land. Our Drugs and Medicines, Dr. J. Wolff. The duties of Sanitary Authorities in reference to the general use of Alcohol, Dr. Henry Leffman. Narcotic Appetites, J. Lowry Sibbell, Carlisle. Hygiene of the Home, George N. Bell, Newport. Vaccination, Dr. William M. Welch. Municipal Sanitation, discussed by Dr. H. B. Hoolbeck. Defective Vision in School Children, discussed by Dr. P. D. Keyser. Artificial Feeding of Infants, Dr. A. J. B. Janner, Detroit, Mich. Sanitary Plumbing and Drainage, Dr. J. G. Richardson. Hygiene of the Home, discussed by Dr. A. R. Thomas. The Obligation of States and Citizens to Preserve the Health of the People, Hon. Erastus Brooks, West Brighton, N. Y. Artificial Feeding of Infants. Dr. John M. Keating, also by Dr. Albert R. Leeds. Mistakes on School Architecture, discussed by Dr. P. D. Keyser. Healthy Dwellings, Dr. V. C. Vaughn, Ann Arbor, Mich. The Influence of Overwork on the Production of Nervous Diseases, Dr. C. K. Mills. Hygiene of Old Age, Dr. H. C. Wood and Mrs. E. D. Gillespie.

HYDRAULIC-LIME CONCRETE.—A kind of concrete, hard and solid, is now being used for building purposes in Paris. It is composed of eight parts of sand, gravel and pebbles; one part of common earth, burnt and powdered; one part powdered cinders, and one and a-half parts unslacked hydraulic lime. These materials are thoroughly beaten up together, their mixture giving a concrete which sets almost immediately, and becomes in a few days extremely hard and solid, which property may be still further increased by the addition of a small quantity, say one part, of cement. Among other constructions to which this material has been applied is a house three-stories in height, sixty-five by forty-five feet, standing on a terrace, having a perpendicular retaining-wall 200 feet in length and 20 feet high. Every part of this structure was made of the hard concrete, including foundations, vaults of cellars, retaining-walls and all walls, exterior and interior, as well as the cornice-work, mouldings, string-courses, balustrades, parapets, and the building is without band-iron, lintels of wood throughout.

—The Committee on Foreign Relations reported, on the 22d inst., to the Senate a bill appropriating $150,000 to indemnify the Chinese for the losses and damages inflicted upon them by the rioters at Rock Springs, Wyoming Territory, in September last. It authorizes the President to designate, not to exceed three officers of the United States, to investigate and take the testimony of witnesses as to the nature and extent of the damage done to the persons and property of the Chinese.

GUARANTEE

Trust & Safe Deposit Co.

CAPITAL, - - $1,000,000.

316, 318 and 320 Chestnut Street,

Rents Safes in its Burglar Proof Vaults at $9 per year and upwards.

Also receives for safe keeping valuables of every description, and Deed Boxes at $5 per year.

OTIS BROTHERS & CO.
MANUFACTURERS OF
PASSENGER and FREIGHT
ELEVATORS,
HYDRAULIC and STEAM.
No. 6 S. MERRICK ST., Philad'a,
OPPOSITE NEW CITY HALL.
Otis Brothers & Co. manufacture the "Standard" Hydraulic Passenger and Freight Elevators; also, all forms of steam, passenger and freight elevators, hoisting machinery for mines, breweries, etc. The record of the Otis Elevator proves them to be unequalled in the world for safety, speed durability and economy.

THE BLATCHLEY
Is carefully made by men who know how to construct a
PUMP

When desired they are lined with specially heavy Porcelain or Copper, or with Drive Well Cylinders, at small additional cost.

When ready to buy, *insist* on seeing and examining them. Use your own judgment, and don't be persuaded to act contrary to your own interests.

They are sold by some good house near you.

Special terms to builders buying in quantities.

CHARLES G. BLATCHLEY,
MANUFACTURER,
308 MARKET ST., Philad'a.

GUARANTEED.

"GILBERTSON'S OLD METHOD."

EXTRA HEAVILY-COATED ROOFING PLATES.

WE guarantee **"GILBERTSON'S OLD METHOD"** Roofing Plates to contain 36 to 40 pounds of metal coating to a box of IC 20x28, and 18 to 20 pounds to IC 14x20.

To be a **better and heavier coated plate** than **"MF"** or **"O'd Style,"** and if not found so, all boxes to be held subject to our order.

The manufacturers of the **"GILBERTSON'S OLD METHOD"** Guaranteed Roofing Plates are now stamping each sheet with the name of the brand and also the thickness, IC or IX.

To Architects and others specifying our **"GILBERTSON'S OLD METHOD"** or **"Camoret"** brands of Guaranteed Roofing Plates, we would suggest that the specification be made to read as follows:

"Every sheet to be stamped—not only with the name of the brand, but also with the thickness, IC or IX."

(REAL ESTATE PUB. CO.)
JOHN N. GALLAGHER, Prop'r.
Refers with permission to William M. Singerly, Proprietor of Phila. "Record."

PHILADELPHIA, MONDAY, MAY 3, 1886.

THE New York Real Estate Exchange has a membership of over five hundred. How many belong to the Philadelphia Real Estate Exchange?

THE money market, we are told, is liberally supplied with money at low rates of interest. Railway speculation is attracting less capital than usual and, therefore, there is more for building progress.

SOME of our real estate operators say that building has been checked by labor agitations. A few cases have been mentioned. No doubt there would have been more building had there been less talk of eight hours and higher wages. Fortunately for the building interests Philadelphia is not an exception, and all trades seem to be similarly effected. This advancing tendency in cost is calculated to check enterprise.

ACCORDING to Mr. Gowen there has been no dissension among the Board of Managers of the Philadelphia and Reading Railroad Company, or any difference of opinion between him and any member of the Board, he says that all reports about the withdrawal of financial support from the company's plan of reorganization or of the alienation of friends heretofore coöperating with him are utterly unfounded.

IF Philadelphia proposes to keep pace with other cities, it will find itself under the necessity of investing somewhere from $2,000,000 to $5,000,000 in improvements; of course, these improvements cannot be made without the assistance of special legislation, but there is no good reason why this legislation should not be asked for and secured. It is not every legislator that likes to champion schemes for increased taxation, but the necessity is yearly becoming more and more urgent. Real estate would be benefitted by the expenditure that could be wisely made.

SPEAKING of American architectural journals a writer in the *Century* recently remarked that, although "the very best work of the very best hands is not always illustrated, yet they represent the general tendencies of our art in all quarters of the land." This statement may be true, but it ought not to be taken as a reproach to architectural journals. They are, no doubt, one and all, ready to publish "the best work of the best hands." It is decidedly the fault of the "best hands," if their "best work" is not reproduced.

THE rage for high priced houses has gone forever. Cheap houses will sell at a poor market while dear houses will not. A $2,000 or a $3,000 house will sell where a $6,000 or a $8,000 house will not. Hence, the strength of the cheap house building movement. If everything goes right, the early summer will witness the inauguration of a dozen or two more schemes for building houses on a large scale. There is plenty of money and enterprise is waiting for the word "go." Let us hope that nothing will interfere with the word of command.

THE growth of the protective sentiment in the South is even more rapid than its manufacturing development. Owners of properties which they wish to have utilized have come to understand that if protection could be absolutely assured for a term of years there would be much greater progress than at present, and a feeling of intense dislike against free trade politicians, and advocates has been aroused that will soon be thoroughly understood by Southern Congressmen, if by no one else. As an old man from North Alabama expressed it the other day, "any Congressman that puts a block in the way of protection will get run over."

THE REAL ESTATE RECORD has no desire to pry into the secrets of real estate dealers. It aims, however, to publish everything of interest to the public which the public should know. The desire to maintain extreme secrecy which is manifested by some dealers is not in the long run the wisest policy. When transactions have been consummated it would be an advantage to the individuals concerned and to the trade at large to have them mentioned. We ask the coöperation of the real estate interests in this matter. In New York city every considerable transaction in real estate is promptly mentioned, with the result of increasing the interest in such transactions and in real estate operations generally.

THE condition of the streets, according to the reports of the police lieutenants last week show a slight improvement. All of the districts are reported "good," "fair" or "clean," with the exception of the Tenth and Twenty-first. The latter has thirteen streets reported "very dirty."

REAL estate dealers in several Western cities report quite an active demand for city lots and for properties along the lines of the railroads. A great deal of property has been bought for manufacturing sites. Small house building is being pushed with wonderful activity in large and small towns and these houses are quickly bought up on the installment plan. This activity is due largely to the fact that Eastern capital is creeping Westward after employment and is finding it at remunerative prices. Interest is low and loans are much more easily effected than a few years ago. Capitalists and money lenders are more willing to permit their money to go into industrial enterprises than a few years ago.

TWO or three long headed real estate agents have been quietly ascertaining the prices at which some of the old rickety houses in the older portions of the city could be bought for. Whether these inquiries are made through mere curiosity or not does not appear. The probabilities are that somebody sees an opportunity for a good investment in picking up some of these old dilapidated properties at relatively low prices. It is, of course, a matter of opinion as to whether it will pay to buy up and tear down and rebuild on these old sites. There seems to be really no good reason for the difference in prices of properties within six or eight squares. The old Post Office property remains without a buyer, and there are several other properties within three or four minutes' walk of that place which could be bought on reasonable terms; there they stand producing scarcely any revenues, while properties not ten minutes' walk distant in the other direction are in demand at exceptionally high prices. The only reason for this is that the tide of enterprise is setting westward. It is not safe to assume this on too broad a basis. Front street and Second street from Vine to Pine are not as desirable for building purposes as some other sections of the city. At the same time, this locality is by no means dead, and a proper spirit of enterprise will no doubt some day take hold of some of these reasonable properties and give this locality a new lease of active life.

THE eight hour agitation certainly threatens, if it does nothing worse, the prosperity of the building trade and the general prosperity of the country. Possibly we will pass through this transition which practically amounts to a revolution without suffering any real harm, but there are thousands of employers of labor who feel that this change cannot be made without the infliction of damage, which will not be easily gotten over. This agitation fortunately extends from one end of the country to the other. Philadelphia does not suffer alone, nor even Pennsylvania, nor the Middle States, but the movement extends from Boston to San Francisco, and from Duluth to New Orleans. To-day the contest opens. Employers have, in hundreds of instances, agreed to the reduction of either one or two hours, and have made terms as to the rates of pay. In some cases, paying a corresponding reduction, and in other cases, paying ten-hour wages for nine or eight hours' work. The situation condensed into the fewest words possible, is as follows: The building trades start in this week in most cities on a nine-hour basis, and, in the most cases at a corresponding reduction of pay. In Philadelphia, the wages of carpenters continue this year at $2.75 and the wages of other building labor is also on the last year basis, with some few exceptions. The boss painters voted against nine hours; the hod carriers have been granted, some $2.25 per day and some $2.50, for nine hours' work. Stonemason laborers want $2.00 for nine hours. The bricklayers have settled upon thirty-nine cents per hour and nine hours per day. Similar action has been taken in some other trades, but the trouble is not yet over.

In New York, in the building trades, nine hours has become the rule and many others have followed. The building trades are almost a unit for nine hours and with corresponding reductions. The furniture workers, to the number of 10,000, have adopted the eight-hour day and will strike if it is not allowed. The joint arbitration committee of the Mason-Builders' Association and the bricklayers' unions have agreed to forty-five cents per hour for nine hours, excepting Saturday, which will be an eight-hour day. Their relative gain is $1.59 per week. The 2,500 piano makers in fifty-three shops asked for eight hours, and will strike for it. The cigar makers, furriers, German printers and carriage makers have all secured shorter hours. Ten thousand machinists in three labor unions have notified their employers that nine hours will constitute a day's work, from to-morrow. The bluestone cutters and flaggers of that city will enforce the nine-hour rule and $4,00 per day. The eight-hour day prevails in all municipal work in Brooklyn. The adoption of this rule will be quite general throughout the West.

The New York carriage makers have adopted the nine-hour rule, and will stop work on Saturday at 3.45 P. M.; they pay ten-hour wages. In scores of industries of New York and Pennsylvania the shorter hour rule will be established this month. The Chicago bricklayers and masons, 8,000 strong, have adopted the eight-hour rule, and in Troy the journeymen carpenters have agreed with the bosses for an eight-hour day, at 30 cents per hour. In Milwaukee the boss carpenters have agreed to the eight-hour rule, and the bricklayers, masons and hod-carriers have also adopted it. Last Tuesday several of the largest furniture factories in that city closed because of the determination of the employers to not yield to the demand. In St. Louis many industries have adopted the eight- and nine-hour day, with pay by the hour as recommended by the Trades Assembly. The master plasterers agreed to the eight-hour system, and will pay their men $3.50 per day for eight hours instead of $4.50 per day for ten hours. The contractors and builders generally have agreed to consider eight hours a day's work, at 30 cents per hour. In Rochester, N. Y., the bricklayers and other members of the building trades will strike for eight hours to-day. In Ohio the eight hour bill has become a law. In Cincinnati the fresco painters and cabinet makers and furniture workers have given notice for an eight-hour day. In Grand Rapids, Mich., the furniture workers, numbering several thousands, held a mass meeting last week, and determined upon eight hours from to-morrow.

In Baltimore many meetings have been held, and on Thursday last 10,000 men, representing 45 trades, paraded for eight hours, and to-day a larger parade is taking place. The Granite Cutters' Union of Baltimore will work only nine hours, but accept a reduction of 25 cents per day from the wages paid for ten hours. In Galveston, Texas, the eight-hour day begins to-morrow. In Pittsburg the plumbers start in on nine hours and eight on Saturday. The carpenters, bricklayers and other branches of the building trade do the same. In Chicago the eight-hour agitation has assumed enormous proportions, and all trades are drawn into the movement, with the certainty of strikes where the demands are refused. 75 furniture employers of Chicago, employing 4,000 hands, have resolved to resist, and a strike is probable. 1,100 employés in the Crain Wrought Iron Works will not go to work this morning unless on their own terms. Thousand of men quit work last week in order to emphasize their determination for shorter hours.

In Boston the bricklayers, carpenters and other members of the building trades have held over 100 meetings within the past year, and it was thought that to-day there would be a general suspension unless terms were made on Saturday, which at present writing cannot be said.

In Washington all classes of mechanics, including carpenters, bricklayers and other trades in the building line are unanimously in favor of the short-hour movement, but the builders and contractors have organized to resist its enforcement, and a strike seems inevitable. The resolution of the carpenters demands eight hours, at $3 per day, and provides for the trial and fining of any member who violates this rule, and prohibits all overtime and Sunday work, except for double pay.

Statements of this kind concerning labor agitations for shorter hours and higher wages could be multiplied indefinitely. The whole world of labor seems to be aroused. In times past no serious damage was done in the reduction from 14 hours to 12 and from 12 to 10, and hence many are inclined to take the charitable view, that the reduction from ten to nine or eight will not be attended with any disastrous consequences. It is no use to draw general conclusions from individual opinions, or from isolated cases. It is too soon to form opinions, and it is unnecessary to enter into guess work. Labor organization is a fact; it is upon us; its authority cannot be cast aside, and the nine or eight hour day has come to stay, and we have to make the best of it. Considering the enormous productive capacity of the country, our enormous machinery capacity and the frequent boasts made by manufacturers that we have capacity to make as much in six months of all kinds of products as we can use in twelve months; very little harm ought to follow from a reduction of the hours of labor. So far as higher cost of labor is concerned, that is an evil which will correct itself gradually and effectually.

REAL ESTATE.

Charters Granted.

Charters were issued at the State Department as follows: Disston Utility Company, of Philadelphia, capital, $10,000, John H. Currier, Treasurer, and the Thorn Oil Company, of Pittsburg, capital $100,000. Sharon Electric Light Company, capital $5,000, and South Chester Manufacturing Company, capital $20,000.

The Solicitors' Company of Philadelphia.

The organization of the Solicitors' Company of Philadelphia was perfected on Thursday last. The stockholders met at St. George's Hall and organized, by electing Mr. Richard W. Clay as chairman and Mr. Angelo T. Freidley as secretary. The following gentlemen were elected to serve as directors for the ensuing year: Henry W. Brown, Charles T. Parry, William B. Scott, William L. Wagner, William Hacker, Richard W. Clay, William T. Tiers, Richard S. Hunter, Alexander P. Purves, Lewis H. Redner, J. Carroll McCaffrey, William B. Robins. All matters connected with the organization were referred to the Board of Directors with instructions to report at a stockholders meeting to be called for the purpose.

The objects of the Solicitors' Company are to guarantee mortgages, insures titles to property and make mercantile collections.

Fire Escapes.

The Board of Fire Escapes are considering the best means of bringing about a uniform and improved system of outside fire escapes. It is suggested to have all escape balconies for factories having more than 20 employés on one floor, at least 4 feet wide and 6 feet in length, and to take in at least the windows of each floor. The steps it is suggested be 24 inches wide, at an angle of 45 degrees and the side rails to be 3 feet high. The Board of Fire Commissioners will meet on Tuesday to take, perhaps, final action on this question. The Law and Order Society requests that certificates be refused to hotels where the provisions of the law are not strictly enforced. No specified appliances have been defined by law, but the Act of Assembly gives each hotel proprietor the right to select for himself. The authorities recognize that some uniformity is advisable, and will consider this phase of the case next week.

Lumber Dealers Assign.

Messrs. A. M. Greene & Co., dealers in lumber and coal, have failed. The members of the firm are A. M. Greene, W. H. Clark and Wm. H. Tasker. An assignment was made on Friday to the Philadelphia Trust Company. The partnership was formed in March, 1880, and the firm has been doing an extensive business ever since. Originally the capital was $50,000, but it is said that the liabilities will largely exceed that amount. The firm owns real estate valued at $25,000 and carries stock to the amount of $20,000 or $25,000. No figures are given out by the firm, and no cause was assigned for the failure. The firm has been engaged in removing the buildings at Twenty-fourth and Callowhill streets for the Baltimore and Ohio Railroad Company under a contract by which they received the materials for their compensation. The work there is now about completed.

A New Design Patent Law Reported.

A bill to provide that hereafter, during the term of letters patent for a design, it shall be unlawful for any person other than the owner or the licensee of the patent to apply the design or any colorable imitation thereof to any article of manufacture for the purpose

of sale, or to sell any article of manufacture to which such design has been applied without authority from the owner, was reported by Representative Mitchell, from the committee on patents, on Tuesday. The bill further provides that violators of its provisions shall be liable in the amount of $250, and to a greater amount in case the total profits from the operations exceed that sum. It appears that the design patent laws, as recently interpreted by the Supreme Court, provided no effectual money recovery for infringement. Since that decision the receipts of the Patent Office from designs have fallen off upward of 50 per cent. To fail to pass this or a similar bill, the report says, will be a virtual repeal of the design patent laws.

Matrons for Police Stations.

The proposition to place matrons in police stations to attend the women which may be brought there as prisoners, or otherwise, should not be cast aside by Mayor Smith and President Lawrence as unworthy of attention. An influential delegation of ladies held a conference with Mayor Smith and Mr. Lawrence on Tuesday, during which it was stated that in each station house, except probably the Central, a matron was needed, and there should also be a superintendent of matrons. They said that the total number of arrests in the year 1883 was 45,612, of whom 7,896 were women. In some of the centrally located police districts fifty per cent. of the arrests were of women. They thought the most difficult part of the work would be to get the proper kind of women to act as matrons.

Mayor Smith said he approved the project of having matrons. He was convinced that it would improve the morals of the station houses. He trusted that at least enough money would be appropriated to give the proposed system a trial in some of the station houses.

Mr. J. H. Linville Beats the Telephone.

Mr. J. H. Linville, formerly President of the Keystone Bridge Company, has invented a machine which, in point of usefulness, promises to eclipse the telephone. Quite a company of capitalists, lawyers, merchants and brokers witnessed several interesting experiments made with Mr. Linville's apparatus, at 327 Walnut street, on Tuesday last. The machine seemed like type writers with telegraphic attachments. A wire led from one machine to the city of Reading and back again to another instrument sitting a few feet away. At the touch of the operator the message was flashed to Reading and back again instantaneously, and was repeated in bold plain letters before the operator. Unlike the telephone, if the receiver happens to be absent when "called up," the message is not lost, but it automatically records itself, even though it should be 1000 words in length. It is impossible to read by sound or tap the wires over which a message from this invention is sent. At the Associated Press office the operators receive all the messages upon type writers. They find it beats handwriting both for speed and legibility. With one of Mr. Linville's machines the type writer would be dispensed with and much time saved. The apparatus is the property of the International Printing Telegraph Company, which proposes to establish a central office or exchange, and have subscribers after the manner of the telephone companies.

C. McCulloch Beecher & Co., commission merchants, in May, 1884, made an assignment to H. P. Bartlett, giving a preference of $75,000 to Drexel, Morgan & Co. There were liabilities of $275,000, with $40,000 assets. The assignment has been set aside, suit to that end having been brought by other creditors.

Items of News.

—In New York the demand for vacant lots has fallen off.

—Philadelphians are erecting a dozen cottages at Longport.

—The weekly real estate sales at auction in New York foot up $1,500,000.

—$10,000 has been appropriated by Park Commissioners for the necessary repairs to Momorial Hall.

—The United States Senate has passed a bill appropriating $300,000 for an extension of the White House.

—The Eastern Pig Iron Association met last Wednesday and passed resolutions condemning the proposed tariff legislation.

—Mr. W. C. Houston, Jr., of the wool firm of W. C. Houston, Jr., & Co., has been elected President of the Produce National Bank.

—Proposals were opened on last Monday, relative to the repairing of paved streets, grading certain thoroughfares and repairing bridges.

—The Board of Fire Commissioners have decided to close their repair shops at 1 o'clock on Saturday during May, June, July and August.

—The coal and lumber firm of W. M. Lloyd & Co., of Twenty-ninth street and Ridge ave., has advanced the wages of its employés $1 per week.

W. H. Cavanaugh, a real estate broker, was held on a charge of embezzlement of funds entrusted to him by Samuel Harkness, of 617 Washington avenue.

—An asphalt pavement is being laid on the upper deck of the Callowhill street bridge, at the expense of the Hestonville Passenger Railway Company.

—The stockholders of the Bordentown and Columbus Turnpike Company contemplate surrendering their charter, as the road does not pay over 2 per cent. per annum.

—The managers of the Presbyterian Orphanage, Fifty-eight street and Kingsessing avenue, are appealing to the public for donations for the new school property.

—The journeymen house painters have agreed with their employers to accept $2.70 per day for nine hours work. The new arrangement goes into effect to-day.

—Application has been made at the State Department for a charter to the Chicopee Natural Gas Company, of Pittsburg, capital of $250,000. The incorporators are from Massachusetts.

—The Receiver of the defunct savings bank of Gloucester on Monday last began paying an additional dividend of 25 per cent. to the depositors, and will continue the payments until May 1.

—Announcement is made of the death of John A. B. King, late President of the Marine Engineers' Association, and a native of Philadelphia, in San Francisco on the 19th inst., aged 46 years.

—Official figures from the Denver Mint show the mineral output for Colorado in 1885 to have been as follows: Gold, $5,000,000; silver, $13,500,000; copper, $700,000; lead, $3,361,000. Total, $22,561,000.

—The Board of Health on Tuesday ordered the Baltimore and Ohio Railroad Company to abate the nuisance caused by the discharge of sewage from the cut now being made by the company on the line of Twenty-fifth street.

—George W. Thorn, and old brick manufacturer, died at Atlantic City last Monday, aged 69 years. He some years ago became a member of the bar and attained considerable distinction as council for some street railway companies.

—There are evidences of some little trouble in the building trades. A number of master bricklayers held an informal meeting on last Tuesday and agreed to resist the demands of hod carriers and laborers.

—The Comptroller of the Currency has declared a final interest dividend of $13.04 in favor of the creditors of the Second National Bank of Scranton, Pa., making in all 100 per cent. and interest in full paid on the claims proved.

—The New York Chamber of Commerce has gone into the discussion of the question of strikes. The Chamber feels that it is necessary for some influential and responsible body to give some expression of opinion on the labor question at this time.

—Mr. Springer, of Illinois, introduced a bill last week in the house to establish a department of labor and create a board for the arbitration of controversies and disputes, and in general proposes to carry out the recommendation of the President's recent message on the labor question.

—The Citizens' Committee considered the matter of an improved water supply at John Wanamaker's office last Tuesday. Additional meetings are to be held and the subject will be thoroughly discussed. As soon as the sub-committee can come to conclusions, a general meeting will be called.

—The fresco painters on Saturday evening formed an organization to be called the Fresco Painters' Union of Philadelphia. A resolution to notify their employers, through the Central Labor Union, that after May 1 they would only work nine hours a day at the old rates was carried by acclamation.

—On Monday last, Chief Commissioner McDonald annulled a contract with Joseph S. Marshall for the unsatisfactory manner in which work was performed. Mr. McDonald notified a number of contractors last week, that he would hold them strictly accountable for the work called for in their specifications.

—George Ott, sash, door and blind manufacturer, of Davenport, Iowa, made an assignment on the 27th inst. Liabilities, $156,656; assets, nominally $184,386. The principal creditors are lumber firms in Chicago. He also owes considerable sums to parties in Ohio, Pennsylvania, New York and Wisconsin.

—The policy-holders in the defunct Millville Mutual Fire and Marine Insurance Company are paying an assessment of $1 in order to defend themselves from the payment of the outstanding claims against the concern. Central committees for protection have been formed at Millville, Salem, Bridgeton and other places.

—The spirit of combination still prevails. The manufacturers composing the American Flint and Lime Glass Association, organized at Pittsburg this week. The Association controls 43 furnaces, of a daily out-put of 1,000 tons of glassware. 17 out of the 20 glassware factories of the United States are in Pittsburg and have signed the agreement.

—Mr. Henry Kline, the owner of a furniture store on the Southeast corner of Front and Norris streets, objects, in Judge Mitchell's Court, through a bill in equity, to the order of the building inspectors to tear down his wall in order to accommodate the Ninth National Bank Directors, who propose to build on an adjoining lot. Mr. Kline says that the wall is thirteen inches thick, nine inches of which is upon his own ground. He is willing for the bank to use it as a party wall, but objects to it being taken down, as it will result in suspending his business and depriving him of space in which to conduct it. Judge Mitchell has granted an injunction against the officers of the bank, the board of building inspectors and Wm. Steele, the builder.

—The Washington Manufacturing Company, of Gloucester City, has adopted the Saturday half-holiday.

—The Board of Highway Supervisors have been asked by the Lombard and South Street Passenger Railway Company for permission to take up the cobble-stones and to extend its tracks on Front street from Dock to Market. The matter was referred to the City Solicitor. Several permits were granted for minor improvements in different parts of the city.

—A home is being erected for indigent women on Chestnut street, west of Thirty-sixth, on a site which has a frontage of 300 feet and a depth of 215 feet. The structure will be built of brick, trimmed with stone. Every modern convenience will be introduced, and a fine garden will surround the new home. In the rear will be located a chapel.

—Robert A. Gordon, of the former Girard House firm of Moore & Gordon, has brought an acton of replevin against the Union Trust Company to recover from that corporation a bond of the Southern Maryland Railroad Company and two bonds of the new river division of the Norfolk and Western Railroad, of which he claims to be the owner.

—The South Mountain Water Company had its proposition before a special meeting of the Water Committee last Wednesday. The company, as is known, wants to lease the water plant of the city for fifty years and use the Delaware Water Gap supply. The matter was talked over, but nothing will be done before September, as there are bigger fish to fry for the next few months.

—The sixty-sixth annual report, presented to the Apprentices' Library Company on Tuesday evening, showed that 89,910 books, or an average of 291 per day, had been loaned during the year, an increase of 8,209 over the previous year, to an average of 3,794 readers, and that there had been 37,189 visitors, a gain of 3,102 for the year. The number of books on the library shelves was 18,500, 1,282 of which were added in the twelvemonth. The receipts were $5,587.30, and the balance on hand, $823.49.

—A kind of labor agitation that is productive of much good is shown in the report of the St. Mark's Workingmen's Club and Institute, at the celebration of its sixteenth anniversary, last Monday evening, at Seventeenth and Kater streets. The annual report showed a membership of 420; library, 2,600 volumes; receipts, $1,509; sick benefits paid out, $1,080. The coöperative store has 100 members, and is in successful operation. More such agitation would be productive of great good.

—The Managers of the Franklin Institute are considering plans for the extension of the sphere of usefulness of that old institution. The report of the committee appointed to report upon what should be the future work of the society, and how a suitable building can be secured, was considered at a recent meeting, at which the committee were instructed to prepare drafts for a new building. There are some $40,000 available for this purpose besides what might be secured from the Seventh street property.

—Some members of the Board of Health and of the City Councils have been inspecting a system of drainage and ventilation which has been recently placed in the house of Dr. John E. James, 1521 Arch street, by Thos. F. Brock. The advantages claimed for this system of "house-side" ventilation are that a draft is given every fixture from the air in the room in which it is located; that there are no traps on the main drain and as few as possible in other places, and that only well-known laws of pneumatics are employed in its construction.

BUILDERS' ITEMS.

Among the Builders and Real Estate Agents.

F. H. VOGDES, 3959 Lancaster avenue has several contracts on hand, of which he will speak later on.

GEORGE CARSON, 1916 Columbia avenue: Is making making extensive alteration to his house and adding a mansard roof.

JAMES DALLAS, 1840 Federal street has very few vacant houses on his list. Stores and small houses are greatly in demand.

D. Z. EVANS, 619 Walnut street: There seems to be a better feeling in the real estate market, there is a larger inquiry for unimproved land; prices are fully sustained:

DENT & KERN, 3959 Lancaster avenue, were about commencing several building operations, but have decided not to do so on account of the unsettled condition of labor.

ADAMS & BAKER, 709 Walnut street: Their lots at Clifton, Pa., are selling quite lively. Rents are in good demand and the feeling in the real estate market is good and prices firm.

L. MIDDLETON, Walnut street: He finds the demand for country properties on the increase. There is also an active demand for six or seven rooms houses—the demand being for new properties.

J. T. JACKSON & Co., 711 Walnut street: Sold the house, No. 841 North Broad street, for $10,000 and several suburban properties within a few days, the demand for the latter naturally being greater at this time of the year.

WM. MATTICK, 3878 Lancaster avenue, is contemplating the erection of twelve houses in West Philadelphia. Out of their extensive rental list they have but two houses vacant. They claim that there is more building operations going on in West Philadelphia this year than ever.

C. F. HALL, 3944 Lancaster avenue:—Rents are very active, both in small and medium sized houses. Sales are not as brisk as they might be in large properties, though there are a good many inquiries for small houses. Considers that the labor troubles will not interfere with any of the building operations in West Philadelphia.

E. V. LANSDALE, 210 South Fourth street: Is working up a new Trust, to be called the Commonwealth Title, Insurance & Trust Company, for conveyancers, lawyers, etc. The subscriptions will be limited to twenty shares each in order to prevent monopolizing; it is destined to be exclusively for professional men.

J. P. MORNEN, 925 Walnut street; Has within the last two months sold considerable property in the Southwestern part of the city and has even now a large demand for property in that district, which will command good prices. He has sold since the first of March thirty-four single houses at about $2,500 each.

J. G. FRANCIS, 705 Walnut street: Has never been busier than he has been for the past two months. Has sold several properties lately; sold a Maryland farm on Friday for $17,000. Considers that real estate is looking up. There is a very great demand for small houses. Does not find the labor troubles interfering with business any.

P. W. SMITH, 407 Locust street: Has a large number of lots at Nicetown for sale, has sold quite a number and is about to organize a land company. There is a large and increasing demand for small houses in this section of the city. Out of a large rental list has no vacancies. He lately sold several houses at North Penn Viliage and has a great deal of trust property for sale at low figures.

J. M. PULLINGER, 3955 Lancaster avenue:—Rental list reduced to one vacant house. Several operations under way, but not sufficiently advanced to speak about. Has heard of several large operations being stopped on account of the labor troubles, but did not inquire as to location. There is still a great scarcity of brick. The demand still continues for small houses and exceeds the supply.

JOHN H. GOLDBECK, 4217 Lancaster avenue, has sold all his houses at Forty-second street and Brown but three, and has good prospects for selling these. Has no vacant houses on the rental list, and rents are coming in as well as can be expected at this time of the year. He contemplates several operations before the season is over. Is making improvements on several old properties.

FRIEL & SIMPSON, 1300 S. Ninth street, have had to stop several of their operations on account of the scarcity of brick, salmon brick in particular; but they expect to start up again to-morrow and get all the brick they want for the future. There never has been such a demand for houses in this section as at present; out of nearly four hundred they have not a vacant house.

JOHN WHITE, 1840 Federal street, is putting up fifty houses—thirty-three on Dorrance street and seventeen on Nineteenth street. Fifteen of these contain, and the two corner stores, nine rooms and bath. Those on Dorrance street are all six-roomed houses, with the exception of the three corner houses, which contain nine rooms. These houses are well located, handsomely fitted up, finely papered, hot and cold water, cement pavements, and every modern convenience. The houses will sell from $2,000 to $3,000, and the stores from $5,000 to $6,000.

JAMES C. LYNCH, 3611 Locust street, has for sale, at the corner of Powelton and Lancaster avenues a row of twenty-two brick houses. These houses are hardwood finish all through; ebony and oak mantels, open fire grates, novelty heaters, improved excelsior ranges, hot and cold water, bath-room, pneumatic bells, crystal gas fixtures, Demorest water-closets, and every modern convenience. They are built of peerless brick, brown stone trimmings, and have thirteen-inch walls. There will be granolithic pavements, and the houses will sell from $5,700 to $10,500.

WE are informed, on good authority, that Mr. Gardner, the brewer, was about erecting forty or fifty houses down town, not so much for speculation as for the improvement of his property, but has concluded not to do so on acccount of the labor troubles. The brick manufacturers are daily looking for a strike amongst their employés; this occurring, most, if not all, of the yards would close. A large building operator down town discharged a colored hod-carrier; said hod-carrier went to the boss bricklayer and, catching him by the arm, demanded that he should be at once put to work again; he was not put to work, however.

L. E. PFEIFFER & Co., 1251 Long lane:—It seems that the unsettled condition of the weather and the labor troubles have caused a little slackness in the real estate market, which we presume will only be temporary. Very little property is changing hands, though the building operations are going on as usual. The demand for rentals, especially stores, on Long lane, which is a regular thoroughfare, is something wonderful. The imperfect condition of the paving, which they expect the city soon to repair, is a great drawback to the business interests and improvements in this locality. L. E. Jarden & Co., Jacob Jarden, Henry C. Webster and Muriel Dobbins, brick manufacturers, are about entering suit against the city for damages to their horses and wagons caused by the condition of said paving.

D. L. LEEDS, 619 Walnut street: There is a very large amount of building going on along the line of the Pennsylvania Railroad as far as Paoli. The number of city people moving in that direction is perfectly astonishing. Last Fall a new station called Eagle was erected. One of the company's officers is now erecting a dwelling there, and there are several others going up in its vicinity. Rosemont is rapidly improving. St. David's is growing; this is another new station. There are a number of new houses going up around Devon. The demand for land is increasing all the time and prices have an upward tendency. The style of improvements along the road is entirely first class. The trip to Eagle Station, fifteen miles, costs but nine cents by the quarterly ticket.

Building Permits.

A back kitchen, 16 ft. by 10 ft., 2026 North Twenty-second st., to James L. Branson, 1722 Oxford st.

One three-story brick house, 18 ft. by 30 ft., 1946 North Twentieth st., to F. P. Tolbert, 2160 Lambert st.

One-story addition, 19 ft. by 44 ft., Broad, above South st., to Thomas Little & Son, 718 South Eleventh st.

Alteration and addition, 14 ft. by 14 ft., 2029 Frankford ave., to E. W. Richards, same place.

Front and interior alterations, 813 Carpenter st., to G. B. Brutta, 815 Carpenter st.

Three-story back building, 14 ft. by 14 ft., 1820 Wallace st., to John W. Pearce, same place.

Three three-story houses, 15 ft. by 50 ft., Berks, above Seventeenth st., to George F. Gibson, 2248 Master st.

A two-story store and dwelling, 22 ft. by 23 ft., Lancaster ave., above Forty-second st., to Lewis Smith, 619 Brooklyn st.

Two two-story houses, 15 ft. by 28 ft., Orkney, above Fifth st., to Conrad Bachle, 1711 Fawn st.

Two three-story houses, 15 ft. by 44 ft., Fifth, above Cambria st., to same party.

Fourth-story addition, South st., above Passyunk ave., to N. Snellenburg & Co., Fifth and South sts.

A house, 14 ft. by 14 ft., North side of Venango st., Charles Roth, No. 5 East Silver st.

Home for Indigent Widows, 218 ft. by 130 ft., North side of Chestnut st., between Thirty-sixth and Thirty-seventh sts., Wm. C. McPherson, 325 and 327 Cherry st.

One-story brick building for boiler-house, 16 ft. by 18 ft., back of 330 North Fourth st., A. Benner, No. 3164 Richmond st.

Two two-and-a-half-story brick houses, 16 ft. by 48 ft., Southwest side of Morris st., between Schoolhouse Lane and Winona ave., David D. McNabb, 208 Mill st.

Two dwellings, 18 ft. and 15 ft. front by 46 ft. and 48 ft. deep, Southwest side of Forty-eighth st., near Seneca, W. F. Paddock, 4312 Fairmount ave.

A one-story back building, 14 ft. by 9 ft. 9 in., West side of North Fifth st., near Poplar, Baumann & Leeds, Eighth and Parrish sts.

Two-story back building, 12 ft. by 17 ft., Northwest side of Jefferson st., near Washington, Frank Gillet, 4707 Smirch st.

Six dwelling houses, 20 ft. by 85 ft., West side of Thirty-ninth st., between Walnut and Sansom, B. Ketcham & Son, 1029 Brown st.

Twelve dwelling houses, 20 ft. by 65 ft., North side of Walnut, between Thirty-ninth and Fortieth sts., B. Ketcham & Son, 1029 Brown st.

One house, 35 ft. by 53 ft., Northeast corner of Forty-seventh st. and Chester ave., W. K. Dougherty, 1419 Sansom st.

One house, 21 ft. by 57 ft. 8 in., Southeast side of McKean ave., near Clapier st., Germantown, W. K. Dougherty, 1419 Sansom st.

Alterations to house on Third and Grape sts., Albert Schneff, 2731 North Second st.

Two-story back building, 10 ft. by 16 ft., Northeast side of Green Lane, near Manayunk ave., Frank Gillet, 4707 Smirch st.

One back building, 14 ft by 16 ft., 24 Bridge st., Amos W. Linn, 4767 Garden st., Bridesburg.

One two-story dwelling, 16 ft. by 42 ft., South side of Edgemont st., near Bockius st., Amos W. Linn, 4767 Garden st.

Two-story back building, 12 ft. by 8 ft., 821 Columbia ave., H. M. Martin, 521 Diamond st.

Two two-story brick houses, 16 ft. by 30 ft., Northwest side Mulberry st., near Harrison, Joseph E. Shoch, 4549 Paul st., Frankford.

New front to 234 Duponceau st., John F. Green, Marshall and Poplar sts.

One two-story dwelling and school, 37 ft. by 62 ft., Allegheny ave., above Gaul st., to George Wolff, same place.

Ten two-story houses, 15 ft. by 35 ft., Mountain, above Twentieth st., to William Forbes, 1404 South Twentieth st.

Six three-story houses, 18 ft. by 60 ft., Sumac and Wetherill sts., to A. A. Harmer, Ridge ave. and Sumac st.

One two-story stable, 13 ft. by 17 ft., 417 Washington ave., to John C. Atkinson, 417 Dickinson st.

One three-story factory, 40 ft. by 50 ft. Washington st. and River rd., to Jas. Davis, Wissahickon.

One two-story back building, 8 ft. by 19 ft., Twelfth and Norris sts., to J. L. Detwiler, same place.

Two two-story houses, 16 ft. by 30 ft., Moore, below Front st., to Ann Carroll, Otsego and Moore sts.

One three-story store and dwelling, 16 ft. by 43 ft., Twentieth, above Mountain st., to John Gibson, 1323 Reed st.

One one-story back building, 12 ft. by 18 ft., Allen lane and Quinizey st., to W. F. Sperry, Germantown.

Two two-story houses, 18 ft. by 28 ft., Jessamine, above Broad st., to Alexander Armstrong, 1428 Christian st.

A two-story kitchen, 12 ft. by 10 ft. 2053 North Eighth st., to Thomas McCarty, 1935 North Seventh st.

One two-story house, 15 ft. by 24 ft., Mt. Pleasant st. and Chelsheim rd., to Henry Rankin, 2104 Fitzwater st.

Two three-story houses, 18 ft. by 46 ft., Harvey and Green sts., to Stephen Morris & Son, 123 North Sixth st.

Two two-story back buildings, 14 ft. by 37 ft., 217 South Ninth st., to L. Koder, 1520 Fairmount ave.

A three-story house, 18 ft. by 60 ft., Broad, above Wharton st., to McFetridge & McConnell, 1608 Spruce st.

One two-story stable, 51 ft. by 155 ft., Thirty-first and Jefferson sts, to Jacob Riemer, 2739 Poplar st.

ABBREVIATIONS.

Add.—Addition.
Alt.—Alteration.
Assn.—Association.
B. & L.—Building & Loan.
Bk.—Bank.
B.B.—Back Building.
Dwg.—Dwelling.
Est.—Estate.
E.J.—Ejectment Suit.
E.S.—Equity Suit.
Exr.—Executor.
Exrx.—Executrix.
K. & B.—Kitchen & Bath.
M L.D.—Mechanics' Lien Docket.
Nat. Bk.—National Bank.
Sav. Bk.—Savings Bank.
t. t.—Terre Tenant.
S.F.—Scire Facias to revive Judgment.

Sum C.—Summons in Case—A form of action invented to meet all civil cases, the form of which is not specially provided for.

Where there are no figures to indicate the amount of the judgment, the damages have not been assessed.

The first name in each line is that of the judgment debtor.

An asterisk (*) denotes judgment confessed or bond and warrant conditioned.

The figures 1 2 3 and 4 immediately after the name of the plaintiff indicates the number of the Court. The letters D. M. J. and S. after the number of the Court indicate the Term as D., December Term, M., March Term, as J., June Term and S., September Term.

An examination as to the nature of judgments and suits will be made for subscribers without extra charge on application.

Labor News Among the Building Trades.

Several weeks ago the Brotherhood of Carpenters and Joiners, presented some grievances to their employers. A meeting of employers was called last Monday, at Industrial Hall, for the purpose of considering whatever grievances might be presented. Communications were received from the Amalgamated Society of Carpenters and the Journeymen Carpenters'and Joiners'Protective Association, setting forth their grievances, but a comparatively small number of employers were present at the meeting. The only thing considered was the length of the working day and it was agreed that nine hours should be accepted as a day's work. Employers took steps to organize a Master Carpenters' Association that would be able hereafter to deal with their employés in an organized capacity.

The Hod Carriers' and Laborers' Union held a meeting last Monday evening, at Juniper and Lombard streets, on which occasion 150 were enrolled, making the total number 1,200. On Monday 250 men quit work because of the refusal of their employers to grant an advance of twenty-five cents per day. The demand was for $2 50 instead of $2.25. It was stated that twenty-one master bricklayers refused to grant the increase. The Society appropriated $1,000 of its funds for the benefit of those on strike. It was voted that members of the Plasterers' Laborers' Association be permitted to carry hods of bricks, provided they work for no less than union rates and that the members of the Hod Carriers' Union be allowed to carry hods of mortar to plasterers on condition that they receive $2.75 per day, was carried unanimously, and will be presented to the Building Trades' Council at its next meeting.

On Monday evening the Journeymen Bricklayers' Association reported that the nine hour day had been successfully inaugurated on that day, and that $3.50 per day was paid for ordinary labor. Special work was paid from $4.00 to $4.50 per day and no reduction was made.

The Lumber Trade.

The lumber dealers are in quite good spirits over the large sales they are making, the fair prices they are getting and the enlarging demands which appear on all sides. At the same time, there is a fair percentage of complaint made. Tom and Dick says business is good, and Harry thinks it is a little off. The receipts of distribution by rail and water indicate that an immense amount of lumber is going into use, not only in the city, but through all the outlying dependant markets. Everybody seems to have confidence, as it is noticed that both wholesalers and retailers are carrying heavy stocks. Large receipts of white pine continue to arrive, and traveling agents from the northwest who have been with us during the past week, sold very heavily. The yellow pine dealers along Delaware avenue are receiving lumber by the cargo, and find a ready demand for all they can handle. Yellow pine is gaining in popularity; a good many Pennsylvania lumber men have been buying heavily in Alabama and Louisiana. Warren county men have bought very heavily. The purchases within the past year of Southern timber land will foot up nearly a million and a half acres, most of which was bought at $1.25 per acre; most of it was State land. The lumber men are pursuing the same course which the iron manufacturers and coal miners have been obliged to do. A good many lumber men say, that while yellow pine alone cannot replace white pine, yet, taken in connection with cypress it gives better satisfaction. The advantages in yellow pine are durability, strength, and freedom from insects and "shakes;" it has been found to be superior for flooring. Carpenters and builders sometimes object to it because of its hardness and the pitch which melts and throws out paint. The cost of pine land in the South is much less, of course, than in this State. The south will soon be the chief source of supply in this market, according to some authorities. A good many dealers have been looking up purchases along the South Atlantic coast Cypress wood, which is receiving more attention than usual, is easily worked and commands a good price in the market. The extensive building operations that we may count on during the next year or two will, no doubt, bring a large amount of Southern wood into the market, and this supply will likely be increased by the change of guage on the Southern roads from broad to standard.

Our Water Supply.

According to Colonel Ludlow, the daily average amount of water pumped during the year 1885 was 68,945,260 gallons, making for the year a total of 25,165,020,072 gallons. Estimating the population of the city at 947,000, these figures show that the daily consumption was 72·8 gallons for each individual.

Colonel Ludlow figures that a saving of $126,563.48 was made in the matter of pumping during the time that he was at the head of this department. He bases this calculation upon the cost of pumpage during the year 1882, the last year of Dr. McFadden's incumbency of the office of Chief Engineer.

Consulting Chemist Albert R. Leeds furnishes a report to Colonel Ludlow regarding a chemical investigation into the present and proposed future water supply of the city. He says the present supply is not satisfactory in regard to purity; that the water taken from the river at Frankford is superior to that taken from the Schuylkill, and that the supply taken from the latter should either be abandoned or subjected to purification, and suggests the following measures to accomplish this:

The exclusion to the greatest practicable extent of the sewage at present entering the river.

The construction of the intakes in such a manner that surface water should not find its way into the pump wells at the pumping staticns. This precaution, indeed. should be observed on the Delaware river as well.

The thorough aeration of the water, followed by storage and sedimentation in reservoirs of large capacity, properly cleansed at reasonable intervals.

The removal of earthy and other suspended impurities by the application of suitable methods of filtration, so that the water may be rendered at all times clear and limpid.

Concerning the future supply the Consulting Chemist reports as follows: "In the selection of a new water supply for the city of Philadelphia, the Blue Mountain tributaries of the Delaware and Lehigh rivers are to be preferred before all others; and, while of the Delaware river waters that at the Water Gap is entitled to the first place, that gathered at Byram (Point Pleasant) is uniformly wholesome and of satisfactory purity and quality."

Sale of Reading's Bonds.

On Wednesday the sale of the Reading Collateral, first and second series, Consolidated Bonds took place in New York. These bonds were pledged for the floating debt of the New Jersey Central Railroad Company. The bonds consisted of $1,000,000 Reading first series consolidated 5s and $2,000,000 Reading second series consolidated 5s. Wharton Barker, of this city, purchased the entire block of the first series, of which $2 0,000 were knocked down to him at 55 per cent., $100,000 at 56¼ per cent., $100,000 at 56½ per cent., and $100,000 at 56¾ per cent. The balance of the first series bonds were then offered in $100,000 lots, and these were also secured by Mr. Barker, $400,000 selling at 60 per cent. and $100,000 at 58½ per cent. Of the $2,000,000 of the second series, $100,000 were sold to Mr. Valentine, of New York, for 25½ per cent., and the balance were withdrawn for the day.

The amount of the floating debt for which they were pledged was $1,500,000. and the sale was stopped, as it was seen that if allowed to go on enough would not be realized to meet the required sum. The amount realized from the sale was less than $400,000. No time has been fixed for the sale of the remainder of the securities, and holders of the floating debt will be paid on account from the proceeds of the sale. It is understood that the first series 5s were purchased in the interest of Joseph Wharton and William H. Kemble, who are large holders of that loan.

Business Prospects.

A prominent builder said last Tuesday that it must have taken a very powerful magnifying glass to find the rosy state of business as depicted in a morning paper. "Of course," said he, "the retail trade in most lines is what might be called good, how could it be otherwise? Extreme dullness prevailed throughout the winter and now with the advent of an early spring it would be strange indeed if an improvement was not noticed. I seriously suspect, however," continued he, "that the story of the 'booms' in the different lines of trade referred to are slightly exaggerated. The retail merchant, for instance, after setting around waiting for customers becomes enthusiastic on the approach of a dozen or so customers for goods, the purchase of which was suggested purely by—well simply by a change of weather, and they at once cry 'boom.' Then it is only natural that the wholesaler would also find a slight improvement in business at this time. The manufacturer, however, cannot boast of any such thing as a 'boom.' Prices are not improved in the least, and only where a large volume of business is done, or a good demand for specialties are found, can any money be made at all. Lumber dealers, planing mill proprietors and contractors report 'little doing,' and attribute the apathy prevalent in a great measure to the agitation of the labor troubles. In many cases, for instance, firms will not bid on contracts until it is determined what compensation skilled labor will demand the ensuing quarter." "Perhaps the most unfailing signs of the dullness of trade generally, is the large amount of idle capital now seeking investment," said one business man in concluding a talk on trade generally.

—The bill dividing Long Branch and Elberon, and creating a separate township of the latter, passed the Legislature, depite the opposition of Senator Chattle, of Monmouth county, who had striven to smother it in committee. The friends of the measure were disappointed, however, in failing to kill an amendment to it providing that the division question must be submitted to a popular vote of the electors. This will rule out all the non-resident property-holders, who are directly interested in the measure.

—Chief Engineer Ogden, of the Water Department, is personally examining all the reservoirs in the department. He has discovered a big leak in the Roxborough basin, and in consequence the latter can only be filled to the depth of sixteen feet, when its ordinary capacity is twenty one feet deep. He also discovered the reason why the water mains in Manayunk burst, and shut off the supply in that section a few months ago. The man in charge of the valves had gone away and left them in the care of a boy, who shut down the valves and caused a big break at School lane and Ridge avenue, while several boilers in Manayunk came near exploding. The city spent several thousand dollars repairing the damages caused by the employé's negligence.

GUARANTEE

Trust & Safe Deposit Co.

CAPITAL, - - $1,000,000.

316, 318 and 320 Chestnut Street,

Rents Safes in its Burglar Proof Vaults at $9 per year and upwards.

Also receives for safe keeping valuables of every description, and Deed Boxes at $5 per year.

Executes trusts of every kind, allows interest on deposits of money. Also, acts as Registrar and Transfer Agent of Corporation Stocks.

BLANK BOOKS.

Blank Books have always been sold by the quire. Twenty-four sheets make a quire; but the Blank Book Makers have been selling from 12 to 20 sheets for a quire. The Public have been deceived. We shall inaugurate a new system, and sell our Blank Books by the hundred pages. Before doing this we offer our stock at a **REDUCTION OF 10 PER CENT.**

A PERTINENT QUESTION.

Why will you continue to buy Writing Papers by the quire, when you can save so much money by buying by the pound? Come see and be convinced; you can get almost double the quantity for the same money.

A First-class Plated Paper, 25 Cents per Pound.
A Linen Paper, 25 Cents per Pound.

IF YOU WANT

Any article in STATIONERY it will pay you to call and inspect our stock. We can sell at prices that will surprise you. Have the largest, best assortment and cheapest Papers ever offered for sale by anyone. This we will prove if you call.

All Grades of Writing Papers by the Pound.

PLAYING CARDS

From 6 Cents per Pack up.

PROGRESSIVE EUCHRE, in sets or separate parts.
POKER SETS, POKER CHIPS,
EUCHRE and WHIST COUNTERS,
CARD BOXES.

WM. H. HOSKINS,

913 ARCH STREET, PHILADELPHIA.

MY extensive facilities and small expenses enable me to compete with any establishment in the United States.

Wood Turning in all its branches. House trimmings, new and riginal designs, a great specialty.

All orders delivered free on board at Jersey City.

Estimates for Philadelphia and vicinity cheerfully given.

Address,

JOHN NESBITT,

Yonkers, N. Y.

A Most Delicious and Elegant POUND Box of CANDY

CROFT & ALLEN,

1226 Market Street.

BILLMAN'S

Indestructible Waterproof Roof Paint.

You are invited to inspect the following buildings, on which the paint has been used for years:—Record Building, Ledger Building, Philadelphia Press Building, University of Pennsylvania, Evening Item Building, Academy of Music, Traymore House, Atlantic City, Metropolitan House, Atlantic City, United States Hotel, Atlantic City.—Send for Price List. Roofs repaired and painted at shortest notice and guaranteed for five years. Paints shipped to all parts.

1903½ Oxford Street, Philadelphia.

COMMON-SENSE SCREWDRIVER.

This unrivaled Screwdriver was awarded a Silver Medal at the Novelties Exhibition, Philadelphia, 1885.

Start and drive the screw with one hand, while the other holds the work. Has sliding grip that holds the screw firm to the driver. By pushing the grip back it releases the screw, to drive home. No slipping, no gimlet; works easy. It is a well-made, strong tool, useful in every house; indispensable to mechanics. **PRICE, 50 CENTS.** For sale at the Hardware Stores, and by the Patentee, **G. F. KOLB, No. 732 Sansom St., Philadelphia.**

PHILADELPHIA, MONDAY, MAY 10, 1886.

THE REAL ESTATE RECORD has not as yet been informed as to what action has been taken concerning the establishment of the Real Estate Exchange. There seems to be no opposition to this project, occasionally a little indifference is expressed in the way of doubts as to its value to the real estate interests, but even in these quarters approval is expressed, and those who have the matter in hand are encouraged by words, at least, to push on in the good work. If Philadelphia was Chicago, a Real Estate Exchange would be holding the tenth anniversary of its organization with a big dinner and big speeches; there would be delegations from the New York Real Estate Exchange, and the Continental Hotel would be overflowed with resident and visiting members; the papers would be full of the proceedings, speeches, toasts and resolutions; Philadelphia and its Exchange would be talked about in New York and Boston papers, and in the papers all over the country. Philadelphia, as a manufacturing and commercial point, would be well advertised; Philadelphia real estate operators would be as well known as Philadelphia lawyers. But how is it? An inquiry as to what progress is being made generally brings a yawn and a look ceilingwards, and a "Well, I guess we will have it going after awhile." If the real estate people of Philadelphia put a tithe of the same energy into the organization of this Exchange which they put into their individual business concerns we would have a first-class Exchange in a week. If Chicago was Philadelphia that city would not have all the building papers in the country talking about it. Western cities and Eastern cities are crowding ahead. We have no desire to reflect on Philadelphia enterprises, because it has its full share of enterprise, and is the manufacturing metropolis of America; it turns out nearly $2,000,000 worth a day, and is covering more ground per head of population than any city in the Union, but, at the same time, in this particular instance we are asleep, we are losing advantages, we are not accomplishing what we ought to, we are permitting interests to suffer which need to be protected; what is everybody's business is nobody's business. If those gentlemen who are carrying this Real Exchange mustard seed in their vest pocket will lay it out where the sunlight of enterprise can shine upon it, a great many men who are anxious for the organization of this Exchange will be thankful. A good many are holding back because they know, or at least they think, that a few gentlemen have the matter in hand. It is about time they were being heard from. Stand up, gentlemen.

STONY CREEK empties into the Schuylkill river at Norristown. It is the natural drainage for the State Asylum at that place. The water in the creek is reeking with filth; it is of a densely black color, and gives forth a stench that is simply disgusting. It possesses such virulence that it kills the fish by thousands. A prominent builder of this city, who can be produced at any time, says that during the past week he has seen bushels of fish, dead and dying, floating upon the surface of the water. It is said that the greater part of this filth comes from the Asylum, and that the well that was constructed to receive its drainage is simply a blind. Whether this is so or not, it is a self-evident fact that the wholesale pollution of the water our citizens are compelled to use is still going on, notwithstading assurances to the contrary.

No one can fail to be struck with the steady improvement for a number of years back in the development of such of our architecture as has not been subject to the old and rigid rules of officialism, and with the stationary character, in comparison, of our public work. Take our domestic work, for instance. It is not only true that our interiors—particularly our city interiors—are more convenient, at least as regards the habits of a country which has neither a peasantry nor a legal aristocracy, but only a middle class, than those of the dwellings of the corresponding bourgeoise in Europe (whatever may be the case in relation to European palaces and great houses with reference to the habits of courts and titular aristocracies); but as regards the exteriors of country and suburban houses—though there is a great deal of crude and extravagant work of that kind to be seen here, rubbish in fact—there is also a very much larger per centage of work embodying original and really good architectural expression than is to be found in the current domestic work of Europe.

THE deterioration of our most accessible localities for residences for business men has become a serious question. Within a few minutes' walk of our principal business streets there are neighborhoods which were highly esteemed a few years ago because of their proximity to the centre of business. The houses are of the better class, and were formerly occupied by families of wealth and high social character, nearly all of whom have been crowded out because of the inroads of vice in its various phases, and a serious depreciation in the value of property has been the natural consequence, in many cases the depreciation amounting to fully 50 per cent. The encroachments of business upon neighborhoods devoted to dwellings is a healthy innovation, indicative of prosperity, and generally very largely enhances the value of the real estate in the locality, but the coming of assignation houses is a sure precursor of loss and degeneration; and the quiet, order-loving, respectable people of the neighborhood, notwithstanding their love for their old homes, at first make a weak protestation against the innovation, or none at all, become reconciled after a time, bear with it until the evil becomes too glaring, and then sell out at a great loss and quit the neighborhood.

This is not as it should be. Self-protection is the first law of nature, and it holds just as good in the defence of property—both in law and in equity—as in the protection of one's person.

The law regards these houses of vice as simply dens of iniquity and shame, and the citizen who will allow his family to be either insulted by their patrons or driven from the neighborhood on account of their proximity is either childishly weak or wickedly neglectful of his duties as a citizen. He has a right, through process of law, to command the protection of the authorities, and where the character of the house can be fully established he has the power, through magisterial authority, to eject the occupants. There are no ifs nor buts about this question, for it has been done, and well done, very recently. At the first appearance of one of these houses in a neighborhood the property owners should give the parties notice to quit; when, if the summons is not instantly obeyed, aggressive and vigorous measures should be commenced at once, and even carried on against the owner of the property as well as the poor wretch engaged in her loathsome traffic.

IT is said that an important real estate transaction has just been closed for a property on Walnut street, between Seventh and Broad, but the details are withheld.

THE police of large cities should be furnished with short breech-loading shot-guns, to be held in reserve for such emergencies as the Chicago riots. Shot-guns, loaded with buck shot, in the hands of men trained to use them, would discount the revolver, and prove more than a match for the most expert bomb-throwers.

THE real estate dealers throughout the city report that for the past few days there has been a lull in transactions that was expected would be terminated this week. One Camden builder has found it necessary to postpone large operations on account of the uncertainty of the labor question. For some time past a half dozen large operations have been pending for real estate in two or three of the outlying Wards. Investors are a little cautious, and real estate dealers who are relied upon for their advice are in the dark as to what it is best to do. Had it not been for the industrial disturbances, it was said, recently that transactions amounting to about a quarter of a million of dollars would have been closed. This may be an exaggerated estimate, but after all the figures are not in the extreme. Real estate is in demand. Considering the amount of building that has been done and will be done this year, a minimum rather than a maximum amount of business has been done. With all that there is to be said about labor troubles and the uncertainty of investments, a fair amount of business is being done, and there is abundant reason for asserting that a great deal of property will change hands this season for future building operations. Wise men are picking up desirable properties and holding them. No kind of property will pay better.

AND there is, therefore, every probability that the arrogant refusal to pay its share for the improved pavement round the City Hall will meet with fitting rebuke in the result of the suit which the Public Buildings Committee has instructed the City Solicitor to institute.—*North American.*

On the contrary, there is every reason to believe that the Public Buildings Commissioners and the contractors will be taught the lesson that they have no business to pay out the city's money for work not meeting contract conditions. The Traction Company is entitled to the thanks of taxpayers for having, at private expense, and by three separate scientific analyses, demonstrated that the pavement was a fraud, and should not be paid for until the contract under which it was laid is made good.—*Daily News.*

The language of the *Daily News* does not seem at all strange when it is remembered that Elkins & Wiedener are its proprietors.

—The Saturday half-holiday question was brought before the Clearing House Association at its monthly meeting, on Monday, and, while the majority advocated the closing of the banks at 2 P.M. on Saturdays during June, July and August, no definite action was taken.

REAL ESTATE.

A Dispute over Sea-shore Property.

Beach Haven, situated on Long Beach, N. J., has been made the scene of considerable excitement, occasioned by a dispute over the title to lands. The dispute reached its height when the owners of the Harvey Cedars property attempted to make a survey of the beach under the claim of what is known as the "Council of Proprietors." Mr. Parry, President of the Beach Haven Land Company, together with Colonel Smith and C. F. Dixey, succeeded in driving off the surveyors.

Broad Street to Have a Brewery.

A new five-story fire proof structure, with a frontage of 76 feet on Broad street, and a depth of 80 feet, is to be erected on the property formerly owned by Philip J. Lauber, on Broad street above Columbia avenue. The building when erected is intended to be used by Mr. Betz as a brewery. The malt-house now standing on the rear of the property is to be utilized. This will give an entire depth of 115 feet. Brick with brown stone trimmings and fancy terra cotta decorations will be used. The structure will cost about $125,000. Mr. Betz will procure the machinery in Europe. The building is to be completed before the 1st of November next.

A Chinese Dwelling.

Cookingham & Clarke, architects of Chicago, are engaged upon the plans for a rather unique structure, a Chinese dwelling. It is something entirely new, there being nothing of the kind in this country as far as known. The rooms are irregular in shape, none of them being square. Where the gables appear in the Queen Anne style their place is taken by hip and Chinese parasols made of ornamental shingles. There is only one chimney; a huge one in the centre is all that is necessary. The bath-rooms and plumbing are also arranged in the centre. It is to be built in Ravenswood by a prominent citizen of that suburb, and will cost about $5,000.

Charters Granted.

People's Electric Light Company, of York; capital, $25,000. Harris Building and Loan Association, of Harrisburg; capital, $400,000. Shenandoah Valley Railroad Company, of Mercer county, to extend from Hickory township to Sharpsville, six miles; capital; $60,000. The Erie Real Estate Title Company, of Erie; capital, $12,000. Baltimore and Ohio Telegraph Company, of Pennsylvania; capital, $200,000. The principal office is in Philadelphia. The Directors are Frank W. Griffin, Joseph R. Kenney, Jacob S. W. Phillips, of Philadelphia; David H. Bates New York, and Charles Selden, Baltimore. The West Pennsylvania Gas Company, of Pittsburg; capital, $5,000

New Mortgage and Trust Company.

The newly organized Philadelphia Mortgage and Trust Company elected the following officers: President, George D. Krumbhaar; Vice-President and General Manager, Benjamin Miller; Secretary and Treasurer, R. T. McCarter, Jr.; Solicitor, George Junkin; Chairman Executive Committee, Charles Platt; Directors — Charles Platt, General Isaac J. Wister, Francis B. Reeves, Charles Huston (Coatesville), George D. McCreary, Charles W. Henry, William Hacker, Charles L. Bailey (Harrisburg), Joseph S. Harris, George D. Krumbhaar, Edward Hoopes, J. H. Catherwood, Colonel Charles Banes, Winthrop Smith, William H. Ingham.

The Jewish Orphan Asylum.

At the thirty-first annual meeting of the Jewish Foster Home and Orphan Asylum Association, held, on the 2d inst., at the institution, on Mill street, Germantown, the following officers were elected: I. Binswanger, President; Mason Hirsch, Vice-President; Philip Lewin, Treasurer, and Benjamin F. Teller, Secretary; Managers, for three years—A. E. Massman, Henry L. Strouse, Myer Frank and A. Bachrach, and members of the ladies' Board—Mrs. Henry Frank, Mrs. Jacob Kaufman, Mrs. Adolph Rosenbaum, Mrs. Eva Wolf, Mrs. I. Rossham and Mrs. I. Saller.

Hundreds of visitors from the city visited the institution.

Reports of the officers were read and the following interesting statements were made: The total receipts for the past year were $20,212.57, and expenditures, $18,757.31. Legacies amounting to $4,000 were received during the year. The Home has seventy-one children under its charge, of whom ten boys are apprenticed in the city. During the year forty-two new members, twelve patrons and three life members were added to the list.

The Telephone Beaten.

No living man can forsee the outcome of an idea expressed by mechanical ingenuity, frequently the original purposes are absorbed and a new and entirely different field from that at first intended is opened to the inventor. At other times, in contradiction to the shrewdest estimates of the most comprehensive minds, an improvement is made upon an invention or even something better is produced which, in point of usefulness and practical merit, entirely eclipses the first idea and renders it of but little if any value. The telephone when first brought to notice excited and astonished the civilized world; it was readily accepted into all phases of mercantile life and it soon became a popular and well patronized medium of communication. The company owning the Bell patents soon became rich, and as a natural consequence grew arrogant and arbitrary, the efficiency of its service became impaired and its plethoric purse enabled it to crush out all competitors.

Until the invention of Mr. J. H. Linville, the telephone has had no rival for public favor. Abandoning the idea of the telephone entirely and comprehending the necessity for something better, Mr. Linville, aided by his great experience as an electrician, has succeeded in producing an instrument which is not only superior to the telephone in point of usefulness, but which must, through its own merit, entirely supersede it.

The type writer has become indispensable to business men, and if the reader fully appreciates the utility of the type writer he can easily comprehend the magnificent range of Mr. Linville's invention which is nothing more or less than a type writer possessing the power of transmitting what is written to any distance, registering the message on a duplicate instrument in plain letters or figures, in such a way that mistakes are positively impossible, and the presence of a person at the receiving point is not even necessary. Here then is a type writer and a good one, and yet a mere boy who can spell out in his own crude way the words he writes, has the power of instantaneously transmitting those identical words thousands of miles.

Mr Linville's instruments can be connected with a central office, and to use a clipping from his circular "any person can call any subscriber anywhere and talk with him at leisure; or he can talk to several persons over the same wire, individualizing each instrument and cutting out any or all other instruments in the same circuit or keeping them all in. Anything that can be done by any existing telegraph or telephone

system can be done better, quicker and cheaper by the International Printing Telegraph, which is now presented to the public. The International Printing Telegraph is not an experiment. It has worked successfully over wires hundreds of miles long and, in its practical results, may be justly described as wonderful."

The office of the International Printing Telegraph Company is at 327 Walnut street.

New Rules to Govern the Construction of Fire Escapes.

The following rules for the construction of fire escapes have been adopted by the Fire Escape Board: They provide that all buildings where twenty or more persons are employed or located in each story shall have one, or more if necessary, outside escapes, to consist of iron balconies not less than four feet wide, taking in two windows at each story, and more if required. The balconies must be connected by iron stairs with an iron drop ladder from the lower one. Where a less number of persons are employed in each story the size of the balconies may be designated by the Fire Marshal and Fire Commissioner of the district, provided no balcony be less than six feet long and all to have direct access from the floor as far as practicable. The dimensions and standard of strength to be observed in the various structural parts of the escapes are also specified in detail. In all cases the stairs are to be not less than twenty-four inches wide and the openings for the stairways in all balconies must be at least 24x36 inches. The height of railing around the balconies shall not be less than three feet.

Orphans' Court.

Widow's exemption granted in the estate of T. W. Bahor, H. Meyer; petition to sell real estate to pay debts granted in the estate of David H. Gouchon; inquest in partition granted in the estate of E. Pabst; petition to amend schedule granted in A. Sallada's estate; estate of C. M. Bohlen, petition to satisfy mortgage by trustees granted; petition to open adjudication of John Silvinus' estate granted; sale of real estate of A. McCullough confirmed; citation of B. F. Bond et al., executors of L. C. Bond's estate, to file account granted; sales of real estate confirmed in M. Graham and W. Hay's estate; order of sale in partition granted in J. B. Bellerjeau's estate; petition for partition of real estate of M. Barlow's estate granted; petition of administrator of C. A. Carr's estate, for leave to mortgage to pay debts, granted; estate of J. Stephens, petition granted for order on administrator to pay award; Chas. Noon appointed guardian of Farren minors; Wm. Summers, of Gersitz; L. Buzby, of Flavin; H. J. Freeman, Jr., of Freeman; M. Dallett, of Fuguet; J. Moorman, of Clayton; Fidelity Trust Company, of A. M. Haas; Girard Trust Company, of J. H. Hibbard; John H. Fow, Esq., of W. Teichmann, and Charles Murray, of J. H. Berry's estate.

—Philip Gosset, Manager of the Jersey Bank, of London, which failed early last January, has been sentenced to penal servitude for five years on conviction of embezzling $185,000.

—The Finance Committee of the Hahnemann Medical College have been requested by the Board of Trustees to make arrangements for the raising of the necessary funds to complete the new college and hospital buildings on Broad street. About $30,000 will be required to finish the work. The college will be opened about the 1st of July, and the preliminary hospital some time during September.

Items of News.

—Secretary Manning says he will not resign.

—M. S. Quay was sworn into office as State Treasurer at Harrisburg on Monday.

—Over 40,000 children under 14 years of age work in mills and factories in New York city.

—A silk mill is to be erected in West Bethlehem which will give employment to 400 hands.

—On last Friday evening 400 journeymen plumbers and gas-fitters organized into the Knights of Labor.

—Over 100 acres of timber land, between Buena Vista and Newfield, N. J., were destroyed by fire last Sunday.

—The Gas Trust has approved contracts for new works for the regenerative system at the Market street manufactory.

—The estate of Harry Ingersoll is valued at $100,000, that of William Heaton at $75,000, and John Hall, M.D., colored, at $40,000.

—A resolution was adopted that on and after May 10 the sessions of the House of Representatives shall be from 11 A.M. until 5 P.M.

—The United States Treasurer has received a conscience contribution of $100 from a resident of Philadelphia who signs himself "B. A. C."

—The Camden Board of Education report a balance of $19,676.60 on hand, and a daily average attendance of 4,735 pupils at the schools.

—The building contractors of Camden have accepted the nine-hour system. A number of incompetent mechanics were discharged.

—The personal estate of Mary H. Newbold is valued at $41,347.92, of Frances Paxon at $35,583.68, and of Eliza A. Shuster at $26,538.64.

—The Board of Health have passed a resolution requesting Councils to have a sewer constructed on Camac street, from Norris to Diamond.

—The Comptroller of the Currency has authorized the Southwestern National Bank of Philadelphia to begin business with a capital of $200,000.

—The granite submitted for paving purposes in Cincinnati by the contractors is to be scientifically tested, by order of the Board of Public Works.

—Controller Dechert is after the three last incumbents of the office of City Treasurer for commissions they received for collecting the State Taxes.

—The State Board of Health has made an appeal to citizens for pecuniary aid to the State Sanitary Convention, which meets in this city on Wednesday next.

—C. M. Anstell, of Pennsylvania, has been appointed Law and Contract Clerk in the office of the Supervising Architect of the Treasury, at Washington, D. C.

—The Universal Peace Society have asked the Public Building Commission not to allow the erection of statutes of military men around the City Hall Square.

—The City Electric Light Company, with a capital of $100,000, and Heber Robinson, Frank Kane and M. Cohlman as Directors, has been incorporated in Camden.

—Mr. Cameron has introduced bills in the U. S. Senate for the erection of public buildings at Franklin and Chester, Pa., at a cost of $100,000 and $75,000 respectively.

—A series of resolutions commenting upon the great personal worth and sterling integrity of the late John Welsh were passed by the Maritime Exchange on Tuesday.

—The bids for leasing the Atlantic City iron pier not being satisfactory the company has determined to retain the management of the pier in its own hands for the present season.

—The citizens of Cape May have united in a card denying the published statement that the water supply is inadequate for fire protection and unwholesome for drinking purposes.

—The State Board of Health, in conjunction with the Sanitary Convention, will meet, at 9 o'clock, on Wednesday morning, in McCaull's Opera House, Broad street near Locust.

—The Citizens' Representative Committee, which was organized about a year ago with a view to supplementing the work of the Law and Order Society, has united with the latter body.

—Recorder of Deeds Pierie says the Land Title and Trust Company, who have desk room in his office, have a separate meter, and that the company pays its gas bill the same as other consumers.

—Mrs. Hugh G. Harrison, of Minneapolis, some years ago persuaded her husband to purchase a house in that city, for which he paid $1,200. The other day he refused $165,000 for the house and ground.

—The city of Paris has bought out the horse railroads. The purchase money will probably come to $2,800,000. The necessary repairs and additions to rolling stock will impose an expenditure of $1,600,000 more.

—The McCready Bag and Paper Company will remove its bag printing and hand-made flour sack works from Philadelphia to Lambertville, it having leased the buildings of the old iron works there for the purpose.

—The suit of the Commercial National Bank against Joseph Beckhaus as indorser of a note for $25,000, made by his son-in-law, William T. Ladner, terminated yesterday in Judge Mitchell's Court in a verdict in favor of the bank for $27,389.50.

—The Fairmount Park Superintendence Committee have refused an appropriation to erect a toboggan slide in the Park. The Committee have decided to ask for an appropriation to build new bridges at Belmont Landing and Hermits Lane.

—C. L. Young and a number of gentlemen residing in Wissahickon have purchased quite a large tract of land in Valusia county, Fla., and intend building winter residences thereon. They also expect to erect an Episcopal chapel on the same ground.

—Judge Coning, in charging the Grand Jury of the Court of General Sessions for the May term, in New York, on Monday, said that all persons who engaged in the business of boycotting, if sufficient evidence could be obtained against them, should be indicted and punished.

—The Court of Errors convened in special session at Trenton, on Monday, to hear the appeal from the decision of the Supreme Court declaring the general railroad tax law unconstitutional. Mr. Gummere and ex-Mayor Collins, of Jersey City, occupied the day with arguments.

—Jay Gould has purchased a plot of land on Penn street below Fifth, at Camden, N. J., 60x150, at the cost of $6,000, on which he will erect a three-story stone front dwelling, with large school-room in rear, at the cost of $15,000, for his sister. The school-room will be used by his niece.

—At the meeting of the Board of Port Wardens, on Monday, a resolution was adopted requesting the Select and Common Councils to pass an ordinance authorizing the Survey Department to renumber the wharves on both the Delaware and Schuylkill rivers.

—The opinion is expressed that in the great railroad tax appeal case before the Court of Errors, at Trenton, N. J., the issue being upon the constitutionality of the Act of 1884, that Chief Justice Beasley's decision declaring the Act unconstitutional and void will be reversed.

—The Committee on Ways and Means has ordered a favorable report on a bill that will allow distilled spirits to remain in warehouse without payment of tax as long as the owner desires, instead of the payment being made compulsory at the expiration of three years, as now provided by law.

—The Public Building Commission, on motion of Mr. Hill, have agreed to pay the full bill for the paving around the City Hall Square, and have directed the Solicitor of the Commission to bring suit against the Traction Company for its share of the bill, which is one-fifth of the entire amount.

—Carpenters and Joiners Union, No. 8, is endeavoring to induce Allen B. Rourke, contractor for the carpentry work on the Hood, Bonbright & Co. new building, Eleventh and Market streets, to settle some dispute about the employment of 23 non-union hands whom he pays $2.50 per day for nine hours' work.

—John F. Betz, with Mr. E. L. Schoenberg, sailed for Europe in the steamer *Aliere*, of the North German line, on Saturday. Mr. Betz goes to Europe for the purpose of purchasing the machinery for his new Broad street brewery. The American mechanic can drink Mr. Betz's beer, but he cannot make his machinery.

—The will of the late George W. Thorn was admitted to probate on Tuesday last. His estate is estimated to be worth $500,000, all of which is bequeathed to relatives. Mr. Thorn directs his executors to place his bay horse, Bill, in the country with some kind person, and to allow him to live a life of ease for the remainder of his days.

—The Home for Consumptives erected on Summit street, Chestnut Hill, by the P. E. City Mission, was dedicated by Bishop Stevens on Monday. The ground was presented by Mr. William Bucknell, and the buildings thus far erected have cost $40,000. Dr. Robert Bolling has been appointed resident surgeon in charge, and Mrs. Borden matron.

—The New Jersey bill in favor of labor arbitration has been passed. It provides for a Commission of five persons to sit as a Court and hear both sides in labor disputes, and decide finally in every case, except where railroad interests are concerned. Two of the Commissioners will be appointed by the employers, two by employés, who shall be State Labor Inspectors, and these four shall name a fifth.

—The fact that a bill to provide for the purchase of a site for a new library building for the library of Congress has, after many years' delay and defeat, passed both House and Senate, is a cause for congratulation by all literary people. The proposed building will cost about $2,300,000, and will be a credit to the country, which has the sixth largest library in the world.

—The total amount of capital, including capital stock of incorporated companies, invested in new manufacturing and mining enterprises at the South, and in the enlargement of old plants and the rebuilding of mills destroyed by fire during the first three months of 1886, aggregated about $36,557,000, against only about $21,000,000 for the corresponding period of 1885.

—A material called asphalted jute is being largely employed in Germany for covering roofs, for isolating damp walls and floors, and for preventing bad odors from reaching apartments situated over stables, etc. It consists of strong jute cloth, coated with specially prepared asphaltum, and covered on each side with strong asphaltum-coated paper. In order to obtain a very compact product the whole is submitted to a very strong pressure.

—Third Auditor Williams, of the Treasury Department, in his report of the operations of his office from April 30, 1885, to May 1, 1886, the first official year of his service, shows that $14,446 was saved in compensation to clerks (while there was a reduction, compared with the corresponding previous year, of 2,677 in the number of days clerks were absent), and he estimates that $28,200 can be saved during the next fiscal year in reduction of clerical force.

—Lorin Blodget's great suit for the recovery of several millions of dollars worth of property, known as the Jamaica Tract, Washington, D. C., is drawing to a close. Mr. Blodget started the suit in 1853, it involves some of the finest properties in the most aristocratic part of Washington. Frequent offers of compromise have been rejected. It is expected that the Court will make a decree deciding all of the points in dispute in Mr. Blodget's favor.

—The difficulty and expense of laying hardwood flooring has been one of the greatest obstacles to its common use. Particularly is this felt in maple. To do a neat job, and avoid the waste of lumber through splitting, it is necessary to bore holes for the nails or brads. In one case of which we know, a carpenter took seven hours to lay a maple floor, and five of the seven hours were spent in boring the flooring. That may be an extreme case, but maple is always an expensive material to lay.

—Three sites have been picked out for the new Stock Exchange building. These are the lot in the rear of Drexel & Co.'s banking house, fronting on Fifth street; the northeast corner of Third and Chestnut streets, and the building now occupied by M. Thomas & Sons. A vote will be taken on these three places, and afterwards a vote will be taken as to whether the one of these three sites receiving the highest number of votes shall be used. If the latter measure is not carried the whole matter will be gone over again. The following information is given in regard to the three sites under consideration: No. 1, Fourth street and Harmony court; area, 22,140 feet; cost, $315,000. No. 2, northeast corner Third and Chestnut streets; area, 6,084 feet; cost, $200,000. No. 3, northeast corner Fifth and Library streets; area, 9,775 feet; cost, $125,000.

—Judge Penrose last Saturday granted a citation, returnable on the 22d inst, upon B. Frank Eshleman, of Lancaster, to show cause why his account as executor of the estate of Mary E. Heister Levis should not be reviewed. The petitioner is Mrs. Lillie G. E. Bates, of Lancaster, sister of Mr. Eshleman. She alleges that Mrs. Levis, who died in July, 1882, bequeathed to the petitioner and Mr. Eshleman the residue of her estate after the payment of certain specific legacies and charges; that by the account of her executor, audited by the Court, in March, 1884, the net balance on hand for distribution was shown to be $46,150.80, of which $30,000 was paid over to Dr. Richard J. Levis, and the balance, amounting to $16,150.80, divided between the petitioner and the accountant; and that some $11,000, in addition to the last-named sum, was, or ought to have been collected by Mr. Eshleman.

BUILDERS' ITEMS.

Among the Architects.

CULVER & ROGERS are putting up a fine stone and brick dwelling for Mr. Hughes at Eagle Station, Pa.

MR. J. H. HOBBS is putting up a fine ornamental frame dwelling for Mr. David Brainard Case at Marrietta, Pa.

MR. WILLIS G. HALE, Chestnut street: Will shortly commence on some extensive alterations at the Temple Theatre.

MR. B. LENFOOT, Walnut street: Is remodeling the Carlton Hotel, at Spring Lake, N. J., to cost $20,000, adding two new stories, towers and other improvements.

MR. G. T. PEARSON is erecting a fine dwelling for Mr. Reeves at Germantown. Also, fine stone dwelling for Dr. Lutz on Chelten avenue, Germantown. Also, stone dwelling for Mrs. Kay, High street, Germantown.

MR. J. F. STUCKER, 534 Walnut street: Is building a synagogue for the Hebrew Congregation of Adath Jeshurum, 65 ft. by 100 ft., of brick and brown stone and filled up with hard wood. It will be two stories and be situated at Seventh street and Columbia avenue.

THEOPHILUS P. CHANDLER, JR., Walnut street: Is building the Orthopœdic Hospital, Seventeenth and Summer streets; it will be four stories and basement, 114 ft. by 72 ft., and accommodate 132 patients and cost $50,000. The builders are Pennock Bros. and the sanitary portion is in the hands of Messrs. Watson & Peale, Chestnut street.

M. A. DEL VAN HORN, 907 Walnut street: Has lately sold five acres of land at Haverford College Station, Pa., to Wendel & Smith, builders, who will erect twelve houses of brick and stone, and put in a thorough system of drainage. The houses will be worth from $8,000 to $10,000 each. Real estate in this immediate neighborhood and Bryn Mawr has advanced during the past twelve months $1,000 per acre.

MESSRS. ROBERTSON & COHEN, Camden: Have just made sale of eighteen houses on Fulton place, for $2,250 each. Also, six three-story houses on Front, above Penn street, for $5,000 cash. Also, three four-roomed houses for $1,200 each, at Camden. This firm had intended building from 150 to 200 houses in Camden this season, but, in consequence of the labor question, they have decided only to complete those already started, 89 in all.

DEERY & KEERL, Walnut street: Are building a three-story store, at 117 and 119 Arch street, it will be 33 ft. by 98 ft., at the cost of $18,000. Also, business building at Eighth and Filbert streets, 32 ft. by 74 ft., four stories and basement, for J. W. Halahan, who will use it as a shoe store. It will be a very handsome structure and cost $25,000. They are also building the Assumption School House, Twelfth, above Spring Garden street; it will be built of brick with brown stone trimmings, and will accommodate 500 pupils; it will have attached to it a fine exhibition hall, costing in all about $25,000.

MR. L. C. BAKER, one of the firm of Messrs. Furness, Evans & Co., has in course of erection a fine dwelling, at Lake Hopatcong, New Jersey, for the well-known actress "Lotta." It is to cost $15,000. It will be fitted up with billiard room, library, spacious dining room and hallway and all modern conveniences. He is also just completing a fine hotel (The Breslin) at the foot of Lake Hopatcong, New Jersey, which will accommodate about 300 persons; it is 312 feet long by 100 feet in width. The sanitary arrangements have had additional care shown. It is lit by electric light and all modern improvments have been put in. It contains 175 rooms and will cost $70,000. This will be a

very fashionable resort, and rooms are already being sought after.

R. C. KENNEDY is building three dwelling houses at Twenty-second and Chestnut streets, three stories, brown stone and brick, cost $35,000. Also, one for Mr. Harry Peale, Forty-seventh and Chestnut streets, cost $18,000. Also, country residence, at Haverford, for J G. Darlington, of stone, to cost about $50,000. Also, fine stone dwelling for R. W. Davids, at Merion, $9,000. Also, stone dwelling at Upsal, New Germantown Road, for C. C. Rhodes, $9,000. Also, building a Bicycle House for the Philadelphia Club, at Twenty-sixth and Perot streets, of brick and stone, at the cost of $14,000. Also, a new fire engine house at Bridesburg, of brick with stone trimming, to cost $12,000. Also, putting up six brick houses at Forty-ninth and Chestnut streets, to cost $7,000 each. Also, building for Mr. G. M. Steinmen, of Lancaster, large brick store, to cost $60,000; it will be used as a hardware store.

Building Permits.

Two three-story houses, 18 ft. by 50 ft., Twenty-sixth and Jefferson sts., to Wm. H. Lower, 864 Bambrey st.

A two-story building and stable, 18 ft. by 20 ft., Twenty-seventh above Jefferson st., to P. H. Somerset, 1513 N. Twelfth st.

Two two-story houses, 12 ft. by 37 ft., Hope above Master st., to James Quigley, 1514 N. Front st.

A one-story brick kitchen, 10 ft. by 12 ft., 1711 Franklin st., to Benar and Right, 1716 Lambert st.

Two-story addition, 16 ft. by 11 ft., 918 Master st., P. J. Reilly, 741 Erie st.

Corner alteration, 18 ft. by 45 ft., Sixteenth and Filbert sts., to Jacob Glause, 3242 Sansom st.

Front alteration, Branch above Third st., to Thomas McCarty, 1935 N. Seventh st.

Four two-story houses, 13 ft. by 37 ft., Lingo above Reed st., to Wm. Blair, 2050 Reed st.

Three two-story houses, Waterloo above York st., to George Reutler, York and Cumberland sts.

A one-story stable, 40 ft. by 38 ft., Gowen ave. and Mt. Airy Station, to William R. Dougherty, 1419 Sansom st.

Two three-story houses, 17 ft. by 50 ft., Ontario above Twenty-first st., to Benjamin Walker, 3869 Germantown ave.

Two-story addition, 60 ft. by 10 ft., Otis above Memphis st., to same party.

To move a brick building, 16 ft. by 32 ft., Downton, above Germantown ave., to same party.

To move a brick building, 17 ft. by 40 ft., Fifteenth above Cayuga st., to same party.

One two-story brick building, 12 ft. by 14 ft., No. 19 North Third st., to John Klibert, 2228 North Eleventh st.

One two-story back building, 11 ft. by 14 ft., 1741 North Third st., to same party.

A one-story store, 20 ft. by 35 ft., Lancaster ave., above Thirty-eighth st., to Frank H. Vogdes, 3828 Warren st.

Four two-story houses, 16 ft. by 44 ft., Paschall ave. and Say st., to H. L. Suplee, 253 South Thirty-seventh st.

Two two-story houses, 17 ft. by 40 ft. Cotton, above Wood st., to Wm. Goodfellow, 405 Lyceum ave.

One one-story storage building, 20 ft. by 36 ft., Lesher, above Orthodox st., to S. W. Evans & Son, 4725 Paul st.

One brick stable, 16 ft. by 18 ft., Waterloo, above Culvert st., to C. H. Masland, 2027 East Allegheny ave.

One one-story store, 17 ft. by 42 ft., Main and Jefferson st., to Jno. D. Caldwell, Wistar st.

Six two-story houses, 12 ft. by 27 ft., Hope, above Cambria st., to Joseph McNutt, 2320 Sepviva st.

One one-story addition, 12 ft. by 15 ft., 285 East Girard ave., to same party.

Twenty-two two-story houses, 11 ft. by 32 ft., Lawrence, above Cambria st., to Charles Possert, 2114 Marshall st.

One two-story house, 16 ft. by 45 ft., Sixty-second and Locust sts., to Jacob Zell, Fernwood.

Concert hall and store, 40 ft. by 99 ft., Ninth, above Cherry st., to John Beurer, 320 Fairmount ave.

One three-story house, 18 ft. by 50 ft., Twelfth, above Dickinson st., to Jno. T. Wilson, 1319 Dickinson st.

One two-story house, 18 ft. by 43 ft., Tacony, above Tucker st., to J. I. Taylor & Son, 5030 Tacony st.

One two-story dwelling, 16 ft. by 42 ft., Melrose, above Bridge st., to same party.

One wall, 1813 South Front st., to Wm. K. Hallowell, Jr., 205 Williamson st.

One gable wall, 18 ft. by 30 ft., 2328 Townsend st., to George Burton, 2218 Cedar st.

One two-story house, 16 ft. by 28 ft., 4539 Worth st., to Samuel R. Eckert, Frankford.

Two three-story houses, 18 ft. by 40 ft., Fifth st., and South City Line, to R. J. Kinby, 6 Vine st.

A back building, 10 ft. by 10 ft., Wallace above Fortieth st., L. W. Goodwin, 3602 Sansom st.

Two two-story houses, 17 ft. by 44 ft., Twenty-second below Clearfield st., to Isaac Scales, 2519 N. Twenty-third st.

Front alteration, Coulter and Main sts., to Wm. E. Carr, 15 Queen st

Two-story addition, 34 ft. by 80 ft., Burk and Palethorp sts., to Chas. Ashoff, 2020 N. Second st.

One two-story house, 14 ft. by 24 ft., 2134 Wright st., to Joseph F. Myers, 516 Willow st.

One three-story brick building, 18 ft. by 45 ft., High above Morton st., to Walter Bowditch, Germantown.

Three two-story houses, 15 ft. by 34 ft., Lawrence above Somerset st., to John J. Torpey.

Three two-story houses, 15 ft. by 24 ft., Orkney above Somerset st, to same party.

Six two-story houses, 13 ft. by 44 ft., Somerset above Lawrence st., to same party.

One brick wall, Thirty-third and Gray's Ferry Road, to C. E. Robinson & Bro., 1307 Filbert st.

One two-story brick building, 10 ft. by 14 ft., 1137 Germantown ave., to F. Uhlman, 2043 Howard st.

One two-story house, 20 ft. by 61 ft., Allegheny ave. and Emerald st., to William C. Haddock, 2427 Sepviva st.

One one-stcry store, 18 ft. by 40 ft., 1422 S. Second st., to Weed & Smith, 1020 Gross st.

Two two-story houses, 12 ft. by 28 ft., Spring and Wood sts., to George W. Hormtag, Manayunk.

A three-story building, 80 ft. by 82 ft., Race, below Eighteenth st., to E. F. Durang, 1200 Chestnut st.

One two-story house, 15 ft. by 30 ft., Second st. Pike and Cayuga st., to B. Frank Harper, same place.

Three three-story houses, 18 ft. by 47 ft., Fairmount ave., above Nineteenth st., to John Gibsen, 1323 Reed st.

Addition to back building, 10 ft. by 7 ft., 2123 Melcher st., to E. Thompson, 1609 Nth. Eighth st.

A new front, 1617 Bouvier st., to B. Z. Lippincott, 1911 Oxford st.

One three-story house, 17 ft. by 54 ft., 507 Tasker st., to John S. Benson, 1222 South Seventeenth st.

Six first-story kitchens, Huntingdon, above Howard st., to Porter & Thompson, 2037 Filbert st.

One one-story brick building, 16 ft. by 12 ft., 1818 Mt. Vernon st., to Henry Taylor, 922 Filbert st

One one-story back building, 13 ft. by 9 ft., 2315 East Sergeant st., to John P. Allan, 2301 East Cumberland st

One three-story house, 18 ft. by 73 ft., 1147 South Broad st., to same party.

One three-story store and house, 19 ft. by 56 ft., 520 Lehigh ave., to F. Lambrecht, 2620 North Fifth st.

Seven three-story houses, 16 ft. by 50 ft., Seventeenth st., above Montgomery ave., to George F. Gibson, 2248 Master st.

One three-story store and dwelling, 20 ft. by 40 ft., Emerald and Clementine sts., to Hiram A. Miller, 1210 Ridge ave.

A three-story clubhouse, 26 ft. by 80 ft., Twenty-sixth and Perot sts., to William R. Dougherty, 1419 Sansom st.

Two three-story cottages, 24 ft. by 30 ft., Leahman, above Morris st., to C. F. Wells & Son, 5424 Vine st.

Two two-story houses, 14 ft. by 70 ft., Tagert, above Norris st., to Lewis J. Segrest, 2369 Cumberland st.

One two-story house, 18 ft. by 46 ft., Gorgas and Chew sts., to Martin Hetzell, 45 Church st.

One two-story house, 15 ft. by 32 ft., Lawrence, above Buttonwood st., to Anton Weiss, 3829 North Fifth st.

One two-story kitchen and bath, 14 ft. by 8 ft., 2917 Ridge ave., to Benjamin Craig, 2217 Westmoreland st.

One six-story factory, 54 ft. by 24 ft., Mascher, above Jefferson st., to H. M. Martin, 521 Diamond st.

Two one-story stores, 2235 Germantown ave., to George G. Hube, 2559 Reese st.

One two-story shop, 15 ft. by 13 ft., Duval, above Johnson st., to George Marvill, same place.

Sixteen two-story houses, 15 ft. by 52 ft., Swain, above Twenty-fifth st., to John M. Sharp, 1936 South College ave.

One three-story and four two-story houses, 14 ft. by 40 ft., Hare, above Twenty-fifth st., to same party.

Seventeen two-story houses, 15 ft. by 40 ft. and 15 ft. by 52 ft., Twenty-fifth st., above Fairmount ave., to same party.

Sixteen two-story houses, 15 ft. by 52 ft., Swain, above Twenty-fifth st., to same party.

A two-story building, Thirty-fourth and Spruce sts., to Lewis Havens, 113 South Fifth st.

One-story warehouse, 75 ft. by 107 ft., Seventh, above Cherry st., to same party.

One three-story store and dwelling, Kensington ave. and G. st., to Elizabeth Lukens, same place.

One two-story house, 27 ft. by 37 ft. Janette, above Manayunk ave., to James H. Boone, Cedar st.

Nine three-story stores and dwellings, 16 ft. by 44 ft., Kensington ave., and Wensley st., to Joseph Stuckey, 832 Reed st.

Five two-story houses, 16 ft. by 26 ft., Mascher st. and Columbia ave., to John Malarnen, Roxborough.

Three two-story houses, 14 ft. by 43 ft., Forty-second st. and Haverford road, to Louis C. Smith, 619 Brooklyn st.

One stack and boiler-setting, 4 ft. by 4 ft., Chestnut, above Sixth st., to Isaiah James, 2104 Master st.

One two-story back building, 10 ft. by 14 ft., Wallace, above Twenty-third st., to Rush J. Whiteside & Son, 2228 Mt. Vernon st.

One two-story house, 14 ft. by 26 ft., 1045 Sarah st., to Charles G. Harris, 908 East Norris st.

Two two-story houses, 16 ft. by 40 ft., 137-9 Greenwich st., to John C. Atkinson, 417 Dickinson st.

One three-story factory, 40 ft. by 85 ft., Fifth and Wilder sts., to John S. Raggio, Fifth and Wilder sts.

Eight two-story houses, 14 ft. by 35 ft., Mountain, above Nineteenth st., to James Rainey, 1825 Wharton st.

One two-story house, 15 ft. by 30 ft., Dilmore and McKean sts., to Patrick Power, Ninth st. and Snyder ave.

One two-story back building, 12 ft. by 15 ft., Federal, above Sixteenth st., to Harris & Shurlock, 933 Federal st.

Gossip of the Week.

The property at 1001 Green street brought $14,000.

The large store at 246 and 248 North Delaware avenue sold for $55,000.

Dr. Thomas B. Rayner is going to build a large double house on Highland avenue, Chestnut Hill.

E. H. Fitler has purchased Crowther's farm, on Second street, in the Twenty-third Ward, for $30,000.

The property Nos. 1219 and 1221 Arch street, 36x180 feet, sold for $60,000. Henry Lea was the purchaser.

A. L. Lumb has purchased the lot, Main and Arrott streets, Frankford, and expects to erect a store and dwelling there.

Improvements are being made to the stations and grounds along the line of the Camden and Atlantic Railroad Company.

The Eighteenth Street Methodist Episcopal Church has raised $3,200 towards erecting a new building at Eighteenth and Wharton streets.

Thos. McDowell is erecting, at Seventeenth and Federal streets, Camden, fifteen houses, for Mr. Geo. Pfeiffer. That porton of Camden is building up rapidly.

The Trustees of the Cooper Hospital of Camden have contracted for the erection of a laundry and boiler-house, to cost about $10,000, and to be erected upon the grounds.

It is reported that a stock yard will be established in connection with the Baltimore and Ohio Railroad, and that there will be places for delivery of stock in the northern and central parts of the city.

Betz, the brewer, is going to erect a building, 100 feet deep and four stories high, on a lot on the east side of Ninth street, below Race street. It is to be devoted to hall purposes, and is to have an elevator.

The Catholics of the Eighth Ward, Camden, are about to break ground for a church and school building; Broadway and Ferry avenue. From what is said of their intentions the building will be quite a fine one. It is situated on a triangle and is a first-class location.

Among the Architects and Builders.

The architects report, in a general way, a slight, though they say, a temporary lull in building activity. The builders report substantially the same condition. The question of wages and of the hours of labor have been fixed in part. All builders have as yet not come to terms with their workmen, it is admitted that the nine hour day will be generally established and that ten hour wages will be paid for the shorter day. The builders are generally anxious to settle differences as fast as possible in order that work may go on quietly. Permits have not been taken out with as much frequency during the past two or three weeks as earlier in the season. Some of our best posted architects and builders say that a revival will set in as soon as matters are settled, that is to say, the work which was projected early in the season will be pushed just as soon as people feel it is safe to do so. The builders, while not wishing to see the cost of labor advance, are glad that the question has been and is being settled. They can now calculate with some certainty. Investors can figure on the cost of operations with more satisfaction. Just now some important work is being held back, but it will all come out right. A good many speculative operations will be pushed through this year. Speculative enterprises have not been frightened out of the way altogether.

Real estate is rather slack; one of the best posted operators of thirty years' experience, said this week, that a good deal of business that would have been closed by this time, is held back. He stated that the inducements to purchase real estate were not quite as strong now as some time ago, but that circumstances would likely change and inducements would be presented which would bring a large number of transactions to a close during the summer. The rate of interest on building investments is, of course, steadily declining. Years ago from ten to sixteen per cent. was realized on small houses, but now the rate will run from eight to ten per cent.; interest on money has also declined, leaving the investor about in the same position. Cheap money increases investments, and the increased building reduces returns. While real estate is not moving off quite as freely as it has, there is no cause for discouragement. Philadelphia is growing steadily as a manufacturing centre, and more house and shop room is wanted constantly. Trade and industrial conditions are all favorable. Architects feel no apprehension and builders are anxious to crowd ahead; investors are as anxious as ever to throw their money into building operations and houses are renting and selling with as much activity as ever.

Iron Cornicing.

Cornicing is finding increasing favor among architects and builders for its evident advantages, both from the architectural standpoint and from the standpoint of cost. A great deal of work that to the ordinary eye is solid brick or stone is in reality simply architectural iron—light, lasting, cheap and beautiful. The manufacturers of architectural iron work, corrugated iron work and cornice work are meeting with a steady demand from the builders of the finer class of houses, manufacturing establishments, and frequently from the builders of banks and churches. The fronts of houses can be greatly improved at a very small cost. There are numerous illustrations of this on some of the principal streets of Philadelphia. Ornamentation of iron work is largely used in smaller towns and cities, where it is made to serve in the place of solid stone or brick work, and to answer for other requirements, and in many cases to answer far better than could be done by solid masonry. The manufacturers of cornice and corrugated iron are doing a large business in this vicinity, filling orders every day, which are being crowded in upon them from local and outside markets. The ordinary work of this character is no more expensive than wood. The original business is one element of cost which does not enter into wood. This work can be painted to look like brick or stone, and cannot be easily detected. It can be erected so as to avoid the expense, in many cases, of heavy walls, which stone work requires. All work done by our local manufacturers is from architects' designs, and the cost and quality depend upon their plans. This work, if not in all cases fire-proof, is partially so, and is by all odds a more desirable substitute than wood or stone. It is a non-conductor, and will not carry fire to other premises; this has been demonstrated in numerous instances.

Apprenticeship Schools.

Apprenticeship schools are largely adopted on the continent of Europe, superseding apprenticeship wholly or partially. In France we may take the apprenticeship school of the Rue Tournefort, Paris. Here children from six to ten years old are taught, getting three hourly lessons per week in manual work. Boys of ten or eleven are taught drawing, modeling, carving, joiners' work, smiths' and fitters' work generally, but in their twelfth year the instruction is specially directed to the trade the boy decides to follow. School hours are from eight to six, and in the highest class eighteen hours a week is given to manual work. The school of La Villete, Paris, is a municipal apprenticeship school for workers in wood and iron. The instruction is free, including a literary and scientific education in continuation of the primary school, and also a special technical training by instruction in tools, materials, and workshop processes, and by practical manual work in the workshops. Visits are paid by the pupils to factories in Paris, and written accounts of the processes seen there are required from the pupils. Many of the boys become engine fitters and pattern makers, and are said to earn 60 cents to $1.25 a day on leaving the school.

In Switzerland apprenticeship schools do not seem to exist.

In Germany the technical school system was established by Dr. Von Steinbeis, as a consequence of the observations he made at the London exhibition of 1851. They have spread over Germany, north and south.

One of the best is the Fach schule of Iserlohn, in Westphalia, in a great coal and iron district, where industrial art adapted to metal-work is combined with handicraft teaching. The pupils are trained during three years as designers, modelers, wood carvers, moulders, founders, turners, chasers, engravers, gilders and etchers. Each pupil states at entrance what branch of manufacture he desires to excel in, and the teaching is made special.

Remscheid trade school, eighteen miles from Dusseldorf, is established for instruction of apprentices in construction of edge tools and other implements and hardware made in that district. The town was till recently a small village, but now competes with Sheffield and Birmingham. The trade is carried on in small shops extending for miles into the country. In the school workshops, pupils are taught drawing in connection with ironwork, as well as the practical handicraft of the iron trade as it is carried on in small factories, so that, on leaving the school, they may at once earn their living. The fees paid by students amounts to $20 a year.

A pottery trade school at Hohe, about six miles from Coblentz, was established by the Prussian government to assist a small local industry, and, although it has been but a short time in existence, the instruction and practice is producing marked improvement in the local manufacture.

JUDGMENTS.

PHILADELPHIA.

ABBREVIATIONS.

Add.—Addition.
Alt.—Alteration.
Assn.—Association.
B. & L.—Building & Loan.
Bk.—Bank.
B.B.—Back Building.
Dwg.—Dwelling.
Est.—Estate.
E.J.—Ejectment Suit.
E.S.—Equity Suit.
Exr.—Executor.
Exrx.—Executrix.
K. & B.—Kitchen & Bath.
M.L.D.—Mechanics' Lien Docket.
Nat. Bk.—National Bank.
Sav. Bk.—Savings Bank.
t. t.—Terre Tenant.
S.F.—Scire Facias to revive Judgment.

Sum C.—Summons in Case—A form of action invented to meet all civil cases, the form of which is not specially provided for.

Where there are no figures to indicate the amount of the judgment, the damages have not been assessed.

The first name in each line is that of the judgment debtor.

An asterisk (*) denotes judgment confessed or bond and warrant conditioned.

The figures 1 2 3 and 4 immediately after the name of the plaintiff indicates the number of the Court. The letters D. M. J. and S. after the number of the Court indicate the Term as D., December Term, M., March Term, as J., June Term and S., September Term.

An examination as to the nature of judgments and suits will be made for subscribers without extra charge on application.

—Mrs. James Eldredge has sold her fine property near Haverford College Station to J. Whittaker Wright, the mining broker, of this city, for $40,000.

—The street cleaning contractors have received warrants and suffered fines imposed upon them by Chief Commissioner of Highway McDonald for dereliction, as follows: First district, Thomas S. Smith, warrant, $4,100; fine $150. Second, Francis Kilpatrick, warrant, $1,848.83; fine, $150. Third, Mich'l O'Rourke, warrant, $5,633.33; fine, $200. Fourth, August Ruff, warrant, $2,501; fine, $150. Fifth, Michael O'Rourke, warrant, $3,966.67; fine, $200. Sixth, D. T. McNichol, warrant, $1,625. Eighth, Mich'l O'Rourke, warrant, $5,633.33; fine, $200. In addition to these the Chief approved a warrant for $1,458.34 in favor of Michael O'Rourke for work done during February. The fines are at the rate of $3 per day for every day the contractors failed to put on sprinkling carts, and also for neglecting to comply with other terms in their contracts. The Comptroller compelled each contractor to agree not to sue the city for the deficiency before he would cash warrants.

City Councils.

Common Council finally passed the ordinance for the appropriation of the Gas Trust surplus, as recommended by the Finance Committee, transfering $25,000 for the completion of the Mill creek sewer, of the Twenty-fourth Ward, to rebuild a section in the Twenty-fourth Ward from Aspen street to Forty-eighth. The resolution offered by Mr. Mehan, appropriating $440,000 to the Board of Education for school-houses was rejected. Mr. Bardsley took decided grounds against it, saying in effect: "This is an appropriation of the taxpayers' money, and the Councils desire to have a say as to how it shall go. If they do not have that say then the money will not be appropriated at all. If we do not see how the money goes it will not go far enough. The Board of Education has been too lavish in its architecture."

$4,000 was taken from the $150,000, set aside for the new county prison, for completing the pavement around Washington Square.

The following ordinances were introduced and appropriately referred:

By Mr. Claridge, to grade Palmer street from Beach street to the Delaware river; to repave Plum street from Beach to Richmond street. By Mr. Wisler, to pave Tyson street from Eighth to Ninth street. By Mr. Wilde, to grade Paoli avenue to Washington street; to pave Grape and Mechanic streets from Main to Cresson; Harrison and Thompson streets from Oak to Gay street; Cresson street from Penn to Cedar, and Cotton from Main to the Schuylkill Navigation Company's line; to lay water-pipe in Hermit from Sharp to Manayunk avenue, and to lay water-pipe on Cresson from Penn to Cedar. By Mr. Holeman, to pave Salmon street from Bockius to Ash; to grade Thompson from Bockius to Ash, and Williams from Ash to Church. By Mr. Williams, to lay water-pipe on Fifty-fourth street from Lancaster avenue to Paschall, and to open Fairmount avenue from Markoe to Forty-seventh street. By Mr. Jenks, to lay water-pipe on Wallace from Thirty-second to Thirty-third; on Mount Vernon from Mantua avenue to Thirty-third, and on Thirty-second from Haverford to Mantua avenue. By Mr. Meehan, to pave Centre from Hancock to Wilson. By Mr. Morrow, to place an electric light at Seventeenth and South. By Mr. Albrecht, to lay water-pipe on Hermann from Twenty-ninth to Thirty-first, and on Thirty-first from Hermann to Dakota. By Mr. Smithers, to repave Twenty-eighth from Oxford to Columbia avenue, and authorizing the Centennial Baptist Church to continue its frame chapel at Twenty-third and Turner. By Mr. D. Thompson, to place electric lights on Broad street from Reed to Passyunk avenue. By Mr. Hanifen, to repave Oxford from Broad to Twenty-eighth. By Mr. Bardsley, to grade Diamond from Twenty-second to Twenty-third. By Mr. James, for a sewer on Camac from Norris to Diamond street; By Mr. Loeble, for water-pipe on Broad street from Snyder avenue to Wolf. By Mr. Upperman, to place electric lights at Frankford avenue and York, Norris and Trenton avenue, Cumberland and Kensington avenue and Cumberland and Trenton avenue, and for a fire-alarm box at the North Philadelphia Droveyard. By Mr. Mechan, to Macadamize Adams' street from Johnson to Walnut lane; to grade Morton from Upsal to Haines; Centre from Hancock to Wilson; Emlen to Quincy, and Adams to Johnson, from Walnut lane to Green street, and to Macadamize Highland avenue, from Twenty-ninth street to Germantown avenue. By Mr. Purnell, to set aside $10,000 for the extension of the school-house at Nineteenth and Addison streets. By Mr. Weyman, to pave Susquehanna avenue, from Beach to Cedar street. By Mr. Mackie, to permit the Bell Telephone Company to extend its wires in Germantown. By Mr. Cleaver, to grade Berks street from Seventeenth to Eighteenth. By Mr. Clay, to appropriate $20,000 to lay water-pipe on Girard avenue east of Sixth street.

Mr. Etting, of the Select Council, offered a resolution, the object of which is to secure a judicial opinion as to the ability of the city to borrow money. He desires a judicial construction of section 8, article 9, of the Constitution, which provides that the debt of any city shall never exceed 7 per cent. of the assessed value of its taxable property. Philadelphia's debt is $63,000,000; of this, $30,000,000 is in the sinking fund for redemption. One of the points to be decided is whether this $30,000,000 in the sinking fund is to be regarded as a debt or assets. The matter has been referred to the Law Committee.

The City Solicitor has been requested, by a resolution of Common Councils, to inform that body whether it was practicable under the laws to compel railway companies to reduce their fares to five cents before granting them the use of the proposed new bridge at Market street, and what proportion of the expense of maintenance and repairs of such bridge the companies can be held liable for.

Water pipes are to be laid on the following streets: Hancock street, from Centre to Price; Reynolds street, from Richmond to Garden; William street, from Ash to Church; Garden street, from Bridge to Jenks; Jenks street, from Garden to Richmond; Thompson street, from Bockius to Ash; Hicks and Mole streets, from Tasker to Castle avenue; Tasker street, from Broad to Sixteenth; Morris street, from Fifteenth to Sixteenth; Thirty-fifth street, from Crawford to Queen's lane; Sunnyside street, from Thirty-fourth to Thirty-fifth.

The Select Council passed an ordinance approving the plan and specifications for the improvement of Jefferson Square.

Proposals are to be received for ground on which to erect a new almshouse, at a price not to exceed $500 per acre. Twenty-five acres or more are wanted.

Patrol boxes are to be placed on the bridges across the Schuylkill river at Spring Garden, Chestnut, Market and South streets.

A resolution was passed by Common Councils authorizing the Highway Department to proceed with the grading of Paschall avenue, in the Twenty-fifth Ward.

In Common Councils the following ordinances and resolutions were presented and referred: To permit poles and electric lights to be placed on Pennsylvania avenue; for the removal of two market sheds on Callowhill street; to lay water pipe on Crown street, in the Fifteenth Ward; to repave Blackberry alley, in the Eighth Ward; to permit the electric light company to carry on the business of furnishing light; to pave Hill street, between Amber and Evans streets, with Belgian blocks; to Macadamize Seventeenth street, from Tioga to Venango; to exchange a piece of land at Twentieth and Federal streets for the erection of a school-house; for the erection of fire escapes on the school-house at Quince and Pine streets; for the restoration of the bridge over the Wissahickon Creek, in the Twenty-first Ward; changing Aramingo Canal, in the Eighteenth Ward, into a public street; authorizing the Mayor to confer with the Board of Education with a view of taking a census of the city.

The Water Committee has before it a petition from the employés for a half holiday on every Saturday until September.

A bill was approved by the Fire Committee of Councils on Friday, providing for the lease of property on the N. W. corner of Kirkbride and Richmond streets, Bridesburg, at an annual rental of $700.

The Philadelphia Electric Light Company will be permitted to built a plant necessary to locate lights in different parts of Fairmount Park.

Citizens are petitioning Councils to enforce the running of city night cars.

The Finance Committee has before it a bill empowering the Mayor to increase the police force, by appointing fifty additional patrolmen for duty in the new districts.

$23,500 will be required for salaries and expenses in connection with the establishments of the new station houses authorized by Councils, and they will be ready for occupancy by July 1st.

A meeting was held on Friday in the Select Council Chamber, relative to the rebuilding of the Insane Department of the Blockley Almshouse.

—Chief Engineer Smedley has submitted an ordinance to the Survey Committee of Councils giving specifications for a new Market street bridge. A slot is to be built in the bridge for the use of the cable road. The structure is to be not less than 75 feet wide, to be built on the present piers, with an opening of 75 feet for navigation, and the Cable Company must pay the cost of laying the conduit. But who's going to make the Cable Company pay if it won't agree to it?

—At a meeting of the Councils Highway Committee, on Monday last, Mr. Bardsley advocated an ordinance to reimburse Mr. William M. Singerley in the sum of $3,468 for grading Seventeenth, Eighteenth, Nineteenth, Twentieth, Twenty-first, Twenty-second, Dauphin, Berks, Norris and Judson streets, in the Twenty-eighth Ward, the amount being much less than the actual cost of the work. The matter was referred to a sub-committee composed of Messrs. Patton, Thornton and Hart.

GUARANTEE

Trust & Safe Deposit Co.

CAPITAL, - - $1,000,000.

316, 318 and 320 Chestnut Street,

Rents Safes in its Burglar Proof Vaults at $9 per year and upwards.

Indestructible Waterproof Roof Paint.

You are invited to inspect the following buildings, on which the paint has been used for years:—Record Building, Ledger Building, Philadelphia Press Building, University of Pennsylvania, Evening Item Building, Academy of Music, Traymore House, Atlantic City, Metropolitan House, Atlantic City, United States Hotel, Atlantic City.—Send for Price List. Roofs repaired and painted at shortest notice and guaranteed for five years. Paints shipped to all parts.

1903½ Oxford Street, Philadelphia.

"GILBERTSON'S OLD METHOD."

Takes the Contract for the WHITE HOUSE roof at WASHINGTON,

at 70 cents per box over the so-called "Genuine 'Old Style'" for the IC 14x20 size (equal to $1 40 per box for the 20x28 size).

The award not made with reference to price alone, but also from tests made as to the BEST QUALITY.

The guaranteed weight of the "Gilbertson's Old Method" offered was 120 pounds net per box of 112 sheets; while the so-called "Genuine 'Old Style'" was offered at 112 pounds.

In order that consumers may more thoroughly understand WHY the "Gilbertson's Old Method" was accepted AT SUCH AN ADVANCED PRICE OVER THE SO-CALLED "GENUINE 'OLD STYLE,'" we quote the following from the specifications made by the Government for the Roofing Plates to cover the roof of the Executive Mansion:

"The Government desires to secure the BEST QUALITY OF DIPPED ROOFING PLATES, and samples showing surface imperfections or irregularities in size or weight will be rejected.

"Comparative tests will be made for weight, ductility, uniformity of plates and thickness and quality of coating, ALL of which, as well as the prices, will be considered in making the award.

"The United States desire ONLY THE BEST CLASS OF MATERIALS, and parties who imagine that any other class will be received are respectfully requested not to bid."

"WHOLESOME WATER FOR CITIES AND TOWNS,"

By DR. CHARLES SMART,

MAJOR AND SURGEON U. S. A.,

Read before the Sanitary Convention.

"The purest and most wholesome natural water," the essayist said, "is derived from springs that are distant from human settlements. The rain-water falling from the clouds and precipitating with it the impurities that have accumulated in the atmosphere is absorbed by a porus stratum of the earth's crust through which it is filtered until it again reaches the surface as a clear and sparkling spring-water. During this process of percolation through a virgin soil all causes of turbidity are removed and the nitrogenous organic matters existing in solution are converted into harmless inorganic compounds. In its progress the water becomes more or less charged with inorganic gases and mineral salts, but these, so long as they do not interfere with potability and economic uses, are not only harmless, but endue the water with a wholesome sapidity. The foully saturated soil of our growing settlements at the present time renders it imperative that we either go to the springs like the early settler or have the spring water brought to us. In choosing the latter method a certain deterioration in the quality of the supply is accepted in part payment for the convenience of tapping the springs on every floor of our houses. When the water is taken lower down from the river current the impurity is increased because the larger area of the water-shed cannot be so well protected from the harmful effects of its settlement. Besides vegetable decay and fine mineral particles, a certain quantity of the waste of human life and human industries will contaminate the supply. Vegetable matter washed down from the uplands or draining into the current from stagnant ponds, swamps and marshy bottoms, and animal matters contributed by the sewage of the upper settlements, are the dangerous substances that enter the water supply derived from the river current.

"The quantity of infected sewage necessary to the spread of typhoid fever by well-water is so small as to evade detection by chemical methods, as the influence of a filtration which effects the destruction of organic matter leaves the specific poison unaffected and in full potency. Looking at the typhoid statistics of certain cities, in which the complicating elements appear to be at a minimum, we cannot fail to be struck by the fact that the prevalence of typhoid fever is in a measure proportioned to the sewage pollution of the water supply."

PHILADELPHIA'S TYPHOID RATE.

Comparing the death-rate from typhoid fever of several of the larger cities of the United States, Dr. Smart said: "Philadelphia, supplied chiefly by the Schuylkill, had a typhoid rate in 1885 of 64 in 100,000, and an average of 66 for the past ten years. These rates for Philadelphia mean that during the past ten years there died of typhoid fever 4,400 persons who would not have died of that disease had the Brooklyn rate (15 per 100,000) prevailed, and that over 50,000 people suffered from a dangerous and debilitating illness, who would have escaped attack had Brooklyn causes operated on them instead of those of Philadelphia. If the views that have been submitted are correct, we would infer the presence of an infected sewage in the Schuylkill water, or the presence in Philadelphia of typhoid causes that don't exist in Brooklyn, New York or London. According to the records of the Water Department of the city a notable sewage inflow has existed since 1860, when complaints were made of the foul taste and odor of the water, and when certain sewers were specially mentioned as occasioning the impurity. A recent report says: "The Schuylkill, above Fairmount dam, is the natural sewer, first and last, for a population of 350,000, largely engaged in manufacturing, and whatever may be the varying judgments of physicians as to the power of a running stream to purge itself of foreign contamination, it is certain that the river itself has, from time to time, furnished the most convincing evidence of its inability to digest or dispose of the extraneous and injurious matters discharged into it.' With regard to other assumed causes of typhoid, it does not appear that Philadelphia is specially its habitat. The aggregation of susceptible individuals on a given area undoubtedly facilitates the spread of this disease, but the area of Philadelphia is less crowded than that of most cities of its size—certainly less so than that of New York or London. The progress of sewer construction has kept pace with the growth of the city. It has been demonstrated by many statistical comparisons that the introduction of a system of sewerage has invariably lessened the death-rate of a city, and particularly the rate occasioned by the zymotic diseases; yet Philadelphia, so far as regards typhoid fever, retains or even exceeds the rates that prevail in certain unsewered cities."

Then followed a comparative statement of the annual death-rate from typhoid fever in the sewered city of Philadelphia, and in the unsewered cities of Baltimore and New Orleans. The rates of each for the past twenty years were given, yielding an average for Philadelphia of 61, slightly lower than that for Baltimore, 65.4, and considerably larger than that for New Orleans, 33. Restricting the inquiry to the rates of the past ten years, it was found that Philadelphia has a higher mortality than either of the two other cities, 66.1, as compared with 52.5 and 24.6.

THE ONLY METHOD OF AVOIDING TYPHOID.

Dr. Smart, arguing from his premises, held that "the only method by which typhoid communicated by a general water supply may be avoided to procure a supply of water that is free from sewage and preserve it in its condition of natural purity. The propagation of malarial diseases by means of the drinking water has of late years been generally accepted by the profession. It is notable that the disease when introduced in this way is always of a more aggravated type than when caused solely by exhalations—the poisonous water appearing in a general way to be a more concentrated and deadly agent than the poisonous air. Moreover, and this is of grand importance from a preventive point of view, the prevalence of these fevers has decreased with an improvement in the water supply. Filtration is capable of removing from a surface-water the essence of the remittent fevers that may be present in it. Spring water, issuing from an unsullied soil, is destitute of morbific qualities. The rain-water becomes impure in carrying out the purpose of its fall in the economy of nature; but all its impurities are removed from that part of it which penetrates the soil to feed the springs. The experience of all the ages testifies to the purity and desirability of the spring supply. Under the conditions of our modern civilization it seems impossible to bring the spring water in its pristine purity to our homes; but it is only a question of money and an intelligent and watchful superintendence to have a water which will be its equal in wholesomeness. Animal matter, with its typhoid possibilities, must be excluded by the selection of a suitable source, the area of which must be afterward protected to the full. But the most careful surveillance will fail to exclude the malarial possibilities associated with the vegetable matter of an otherwise healthful surface. To remove these nature's process of filtration must be initiated. Thus only will a water be obtained free from the danger of typhoid fever on the one hand and of malarial diseases on the other—a pure, clear and wholesome supply, which, by preserving the community from unnecessary sickness, will in a short time amply repay the expenditure involved in its introduction."

PHILADELPHIA, MONDAY, MAY 17, 1886.

THE present agitation of the Water Question must ere long culminate in one of two things, a new and improved water supply must be decided upon or we must quietly submit ourselves to an acceptance of what we have got, no matter how poor in quality or limited in quantity. Agitation soon expends itself and is certain to be followed with abject and lasting torpitude. In this case, unfortunately for ourselves, torpitude means disease and perhaps a large and alarming increase in our death-rate. It is not only false economy, but an economy bordering on criminality itself, to further delay the solution of this water problem, when, for aught we know, we may have through our own stupidity and the fear of responsibility, a visitation of some pestilence which may cost us a third of our entire population in a single summer.

The fear of incurring debt for the consummation of projects which involve the health and life of a million human beings is both cowardly and inhuman. New York, in the worst phases of Tweed-ring thraldom, received benefits and improvements which, if not commensurate with the extravagant and munificent sums which were recklessly expended, stand to this day as creditable monuments to the minds who conceived and the men who executed them It is worse than folly to further tamper with the Schuylkill; its bed is a mass of reeking filth ; it is the receptical of the worst elements of sewage, both organic and soluble, and it seems to us that the much vaunted civilization of the nineteenth century is but a travesty, a delusion and a myth. Rome had an acqueduct which reached many miles into the country. Pure and wholesome water even in the early centuries was considered worth going after no matter how great the cost. New York's aqueduct winds its way through the beautiful valleys and under the magnificent hills of old West Chester County for over forty miles, in order that pure and wholesome water may be obtained; and yet, in order that the supply may be still increased, there is another now being built of even more magnificent proportions than the first.

Have we become a people of puny minds? Are we so entirely indifferent to the absolute necessities of this great city that we must because, forsooth, the expense is great, drink the percolations of privy vaults and grave yards, the offal of slaughter houses and the dye stuffs of huge mills? What a burning shame there are not in Councils a dozen men equal to the emergency. Why cavil about the expenditure of a few millions when our water necessities should be supplied if the cost was ten fold greater.

Water companies and such other ambiguous arrangements are mere speculations upon our municipal weakness and political demagoguism. They should be given to understand that we can manage this affair without their assistance.

Let us have no more trifling ; let us make up our minds that we must have good water no matter how great the cost to obtain it, and if it cannot be had nearer than the Water Gap, go there, or if need be go still further after it. If Legislation is denied us in order that we may build our aqueduct, then let us throw what moral and political prestige we may possess as the second city in America against the legislators themselves. Build an aqueduct we must, and one of such pigmy proportions as the intercepting sewer would be but a waste of money and an evidence of municipal stupidity and characteristic short-sightedness and folly.

THE admission of Mrs. Kilgore to practice as an attorney in the Supreme Court of this State, secures to her the right to practice in the lower Courts. This is just as it should be, for Mrs. Kilgore has shown herself to be both worthy and competent. The tenacity and perseverance she has shown in her efforts to obtain recognition, is not only commendable but it should be her highest recommendation to those needing her service. She has our warmest wishes for her success, and the man who fears the innovation her admission represents had better seek some other profession.

PHILADELPHIA will in due time have more than one railroad strung to its bow. Last Tuesday afternoon Robert Garrett stood on the West side of the Schuylkill River in company with his chief officers to see personally the progress made in establishing terminal facilities here. He came here over his own line. By midsummer we are assured traffic will be opened up between Philadelphia and Baltimore and the great South.

Nor is this all. It may be that the South Penn road will never be built; certainly it will not be built if the selfish and monopolistic tendencies of the Pennsylvania company prevails. But the movers in this Southwestern scheme mean to push construction. That road will be completed sooner or later under some management or other. The Southern tier of counties need the road; Philadelphia needs it and Pennsylvania needs it. The road cannot be very long delayed. There is abundant capital to build it and abundant traffic to sustain it as a good-paying investment when built, many less traffic-producing sections are overrun with railway facilities.

MR. JOHN WANAMAKER struck the key-note of progress when he stated the other day, according to an interview, that we wanted bigger wholesale stores to attract buyers hither. Mr. Wanamaker's enterprise in retail matters is wanted in wholesale circles. Who stands in the lead? What names are known throughout the land as is Mr. Wanamaker's? Our wholesale interests are quiet. Who cannot in a moment recall the names of New York wholesalers in any branch of trade? But who is able to recall even right here in Philadelphia any of our wholesale merchants? Of course any business man can recall a few. But pick out ten men in a crowd and ask them to name our wholesale merchants in Philadelphia and how many of them could reply. Philadelphia is a shop, it manufactures; New York is a store, its genius is the genius of the salesman ; its two eyes are always bent in the direction of business ; it thinks and talks business, Sunday and Saturday; its half hundred exchanges are strong and compact; it has no time for side issues. New York is all the world to New Yorkers. Philadelphia can be greater. We have all the elements, capital, commercial skill and experience and every needed faculty. We need more Wanamakers; we need more young men at the head, men who have their records to make.

CONTRACTS for about eight miles of 12-inch cast iron pipe were awarded Friday by the Trustees of the Gas Works for pipe to be laid from the holders at Ninth and Diamond streets to the Germantown and Chestnut Hill districts. The McNeil Pipe & Iron Co. and the Gloucester Iron Co. secured the work in about equal proportions.

THE REAL ESTATE RECORD management meets occasionally with some strange opposition in its effort to furnish information to its readers. Here is a sample reply as to what is going on in real estate. After considerable hesitancy, frequently, the statement is made: "We have sold a few houses at different prices." This information is not very enlightening. It would do the individual no harm to state what the operations were, where located and what prices were paid; yet, with a false sense of shrewdness and wisdom, all these details are withheld, probably under the idea that the purchaser or seller is unwilling to have known, or, for instance, to have the next door neighbor to know the prices paid.

This is an extremely narrow and provincial view to take of real estate interests. Real estate operators in other cities do not pursue this course. If they sell a house or land the fact is made known and the price given. What possible advantages there are in withholding these interesting facts are not apparent to the ordinary mind.

THE REAL ESTATE RECORD aims to give news. It cannot fumble over the office records, but it can ask and do more than ask for the facts. The question is here asked, Is this a wise and sensible procedure? We have no desire to read a homily to the real estate operators, because some of them are liberal, open and anxious to forward the best interests of the city. There are many others, however, who consider that secrecy is essential to success, and who decline to give any details whatever concerning their operations. Of course, in time these operators will learn differently and see differently, but in the meantime much valuable information is lost. THE REAL ESTATE RECORD comes to these operators with the request that they look at this subject as it ought to be looked at, and furnish information of interest to the public, even though it is not strictly their business to know it.

"WHAT authority is there in Girard's will for teaching the boys of Girard College a trade?" inquired Mr. B. B. Comegys at the last meeting of the Board of City Trusts. "Stephen Girard wanted the boys taught facts and things, and a shoe is a fact and thing," Mr. Vaux replied.

It will be a surprise to the people of Philadelphia who think they understand the motive and purpose of Stephen Girard when he had his will prepared, to know that there is any one who could doubt what that will contemplated with regard to the boys. If the will does not mean that they are to be taught a trade, what does it mean? If there is no authority in that will for teaching the boys a trade, then Stephen Girard's purpose has never been understood. What possible objection, in the will or out of it, can there be to the boys of that institution learning something that will fit them for the batter of life? Does Mr. Comegys want a few hundred genteel loafers turned out every year fit for nothing but counter hoppers, book peddlers and street car drivers? Is a trade such a disreputable acquisition? Are there such a host of opportunities for young men to enter life? It is strange that this question should be asked. The great and urgent demand of the hour is technical and mechanical education. Our common school system is defective. It is turning out boobies by the thousand, half-educated young men, who know just enough to learn to despise work, yet not competent to do anything else. The question of the establishment of technical and mechanical schools has been agitated for years. The trade unions of the country are barring their doors against apprentices. The employing mechanics of the country are calling for help, for young men who have some knowledge of tools. Here are 1,000 or more in Girard College, kept there and educated there with the money of Stephen Girard, and yet it is intimated that they ought to be kept there in ignorance, and the most urgent and important duties of life, viz., how to use their hands and intelligence in the direction where their abilities can be most profitably employed, neglected. Such nonsense as this ought not to be tolerated. If the Board of City Trusts understand the purposes of Girard so little, it would be well if different men be found to fill their place. This is not a time to split hairs over the constitutional interpretation of the will. That will, for instance, strictly prohibited ministers from entering the college, yet hairs were split and a minister resides there and instructs the boys, clearly against the intention of Girard, but our hair-splitting lawyers and judges permitted it and still permit it. The boys of Girard College should be and must be taught trades. They can be more useful to themselves and to the public thereby. Their latent capacity can be developed, and those who array themselves in opposition to such a purpose will find themselves in opposition to the common sense of the community, and in hostility to the evident purposes of the testator.

Communication.

In justice to Mr. John F. Betz, we publish the following letter:

OFFICE OF OTTO C. WOLF, *Engineer and Architect*,
419 Walnut street, Philadelphia, May 12, 1886.

To the Editor of the Real Estate Record.

DEAR SIR:—I note in your issue of May 10th two articles in reference to the new brewery to be erected by Messrs. Betz & Schoenberg on Broad street.

The statements made in both of these articles concerning the purchase of machinery in Europe are absolutely incorrect, and without any foundation whatever.

The purpose of the before-mentioned trip to Europe has, to my knowledge as the architect, no connection whatever with the proposed structure, as all necessary machinery and other appurtenances for the new brewery are to be supplied by "the American mechanic," regardless of whose beer he drinks. Your sarcastic allusion to the contrary is both unkind and uncalled for, and, to my mind, requires an emphatic correction in your next issue.

Yours truly, OTTO C. WOLF.

—The Health Officer has been directed to employ an expert to make a thorough examination of the interior of the old Girard avenue sewer and report its exact condition with reference to the discharge of any sewage into it.

REAL ESTATE.

Charters Granted.

Quaker City Oil Company, of Philadelphia; capital, $100,000. The incorporators are John G. Willits, Haddonfield, N. J.; J. Murray Bacon, John Gill, Jr., Morris W. Strouse, B. K. Jamison, J. H. Kershaw, of Philadelphia. The Stewart Granolithic Paving and Roofing Company, of Pittsburg; capital, $50,000. Scott Spring Company, of Philadelphia; capital, $250,000.

The Citizen's Moving.

The City's Municipal Association has been quite busy during the past two or three weeks organizing for active work. A meeting was held at 927 Chestnut street on Tuesday morning, Joel J. Baily presiding. Committees were appointed by the Executive Committee on Finance, Membership, Abuses and Complaints, Law and Legislation and on Room and Library.

A number of complaints were received and referred to the proper committees, and a resolution was passed requesting that a circular be issued to the citizens informing them that all complaints and communications be sent to Chairman Baily, any member, or to T. B. M. Addis, the agent, at 927 Chestnut street. The sub-committee will organize at once and begin the active work of looking after the contractors.

New Building for the Almshouse.

It was stated at last Monday evening's meeting of the Councils' Finance Committee that the architect's estimates of the cost of the buildings contemplated is $64,000 exclusive of heating and plumbing services, which would probably add, it was thought, $12,000 to $15,000 more. Mr. Lawrence said the Guardians first asked $45,000 but afterwards thought $65,000 would be needed, owing to the increased cost of labor and materials, and, as the insurance money had gone into the City Treasury, Common Council voted $30,000 additional. Now there was a third estimate from $12,000 to $15,000 higher than the second.

Ex-Governor Hoyt and Philip C. Garrett, of the Lunacy Committee of the State Board of Charities, in explanation of the increase, said that the Committee were opposed to a three-story building for the insane if it were not made "slow-burning." Instead of laths, therefore, the architect proposed to use wire to hold the plaster.

Advantages of Low Ceilings.

Rooms with low ceilings, or with ceilings even with the window-tops, are more readily and completely ventilated than those with high ceilings. The leakage of air, which is always going on, keeps all parts of the air in motion in such rooms, whereas, if the ceiling is higher, only the lower part of the air is moved, and an inverted lake of foul and hot air is left floating in the space above the window-tops. To have the currents of fresh air circulating only in the lower parts of the room, while the upper portion of the air is left unaffected, is really the worst way of ventilating, for the stagnant atmospheric lake under the ceiling, although motionless, keeps actively at work under the law of the diffusion of gases, fouling the fresh currents circulating beneath it With low ceilings and high windows, no such accumulation of air is possible, for the whole height of the room is swept by the currents as the dust of the floor is swept with a broom. Low ceilings have also the advantage of enabling the rooms to be warmed with less expenditure of heat and less cost for fuel.

Sinecures for Politicians.

The Cost of Collecting Customs in Fifty-four Districts.—$149,564 *Collected at a Cost of* $284,572.

Assistant-Secretary Fairchild in his letter to the House, in answer to a resolution of inquiry, says:

I enclose a list of customs districts and ports of delivery at which the expenses for the past fiscal year exceeded the receipts during that period. Except as hereafter stated, I know of no good reason for the continued maintenance of them as independent districts and ports. In my judgment, they should be abolished, and the territory comprehended in them consolidated with contiguous customs districts where the amount and nature of the business done are sufficient to justify the employment of a Collector and a corps of subordinate customs officers. The exceptions referred to are Mobile, Brazos de Santiago and Alaska. Mobile has a large export and a considerable import trade, and while the expenses have exceeded the receipts this is due to the fact that a large proportion of the imports were free goods and that the district embraces a large extent of coast to be protected from smuggling. Brownsville, the port of entry for Brazos de Santiago, is an important commercial point on the Mexican frontier, and although the receipts of the district for the last two years have fallen short of the expenses, the collections have somewhat increased during the current fiscal year and the expenses have been reduced. It is believed, therefore, that in the future this district will be self-sustaining. Alaska is so far distant from other customs districts that its retention as an independent district seems necessary. If unproductive districts should be abolished, as suggested, it would be necessary to provide for subordinate officers to be stationed at such places in the consolidated districts as may be required to issue documents to vessels, and render other needful services in connection with the enforcement of the revenue and navigation laws, and for the convenience of commerce.

The list of customs districts and ports wherein the expenses were in excess of receipts during the fiscal year ended June 30, 1885, are as follows:

	Receipts.	Expenses.	Cost to collect one dollar.
Alaska	$3,003	$14,371	$4.78
Albermarle, N. C.	905	3,019	3.33
Alexandria, Va.	1,313	2,595	1.97
Annapolis, Md.	876	2,204	2.51

The Provident Home Purchasing Company.

Joel Cook, E. A. Hancock, R. A. Wilkinson, Charles T. Hallowell, J. O. McHenry, Wilson Welsh, W. D. Harbours, Frank Asbury, Chas. A. Chase, Chas. H. Adams, John M. Errickson, William Trimble, Jr., Samuel J. Clevenger, Chas. L. Bourguignon, A. G. Murphy, Henry R. Edmunds, George H. Kyd and Edward W. Sharp, and others have made application through their solicitor, Henry R. Edmunds, for the charter of an intended corporation to be called "The Provident Home Purchasing Comp ny," the character and object of which are for the purchase and sale of real estate, and for holding, leasing and selling real estate, and all business incident thereto, and for these purposes, to have, possess and enjoy all the rights, benefits and privileges of the said Act of Assembly and its supplements.

Orphans' Court Decisions.

Guarantee Trust Company was appointed trustee of the estate of S. S. Gaw and H. Ward, and Provident Trust Company of the estate of E. Lewis. Citation of R. Porter, administratrix of the estate of J. Porter, to file account granted; widows' allowances granted in estates of F. R. Theobold and H. Weidt; sale of real estate confirmed in estate of A. R. Cooley; rule to intervene in partition granted in estate of R. Wistar; minor's exemption granted in estate of W. Hay; petitions for allowances granted in minor estates of M. Nugent, J. B. Hast, Robinson and McDevitt minors; petition of guardian to satisfy mortgage in the estate of Shaw minors; petition for leave to pay purchase money to executors granted in estates of R. Staley and B. Reilly; petition of H. B. May et al., administrators of the estate of A. H. Cain, for discharge granted; estate of W. W. Cook, petition of administrator to make investment granted; petition of trustees of estate of E. Greble to improve real estate granted; citation sur appeal from register to grant issue in estate of W. Stewart granted; Fidelity Trust Company appointed guardian of estate of Wright minors, German American Trust Company of Kalitz minors, J. Morrow of Konegan minors, S. M. Scott of Scott minors and W. J. Robbins of Supplee minors.

Items of News.

—Real estate sales at auction show a considerable activity in the real estate market.

—Building operations in Rochester, N. Y., are said to be suspended on account of the strikes.

—The stone rubbers of this city have applied for admission into the Knights of Labor.

—The Quincy, Missouri and Pacific Railroad has been sold to the bond holders for $1,000,000.

—The Weston & Wells Manufacturing Company has declared a dividend of twenty cents a share.

—The cabinet makers are causing a good deal of trouble through their efforts to establish eight hours.

—The Board of Health is quite active in its operations against the possibility of any sort of an epidemic.

—By the will of Thomas Horan, $40,000, out of an estate of $61,093.11, was bequeathed to charitable institutions.

—Twenty carpenters, who were employed at John Kessler's building, Third and Somerset streets, struck on Tuesday.

—Wages in the car shops of the People's Passenger Railway Company have been advanced from $2 to $2.25 per day.

—The personal estate of Henry H. Shillingford is appraised at $25,173.27, and that of Catharine Wenzell at $32,970.05.

—W. L. C. Biddle bought the old Merchant Hotel on Fourth street, below Arch, at auction, last Tuesday for $74,000.

—A new financial concern has been established in the city with a capital of $250,000. It is known at the City Trust Safe Deposit.

—On last Tuesday the Fire Commissioners passed a resolution providing for the inspection of the department from the first of next month.

—If the extension contemplated by the Bethlehem Iron Company to their works is carried into effect it will involve a cost of $3,000,000.

—The Journeymen Plumbers' Protective Association desired to name two members for appointment on a committee for plumbing and sanitary drainage.

—The *St. James' Gazette* says that over $5,000,000 is spent yearly by the Moors, Prussians, Maylays, Indians and Turks in pilgrimages to Mecca and Medina.

—The Trustees of the Camden Home for Friendless Children have elected Charles Rhoads, President; W. Groves, Treasurer; and Joseph De La Cour, Secretary.

—The Reading and Lebanon Railroad Company re-elected its old officers. Work on the line will begin soon after the Reading and Pottsville Railroad has been finished.

—At Troy, the carpenters' strike ended in a compromise. Work will begin at 7.30 A. M. and end at 4.30 P. M., except on Saturdays, when work will end at 4 P. M.

—The plumbers of Troy, New York, struck last Monday by direction of the Knights of Labor. They say "they have no grievances, but are out merely to sustain the others."

—The Methodist Episcopal Church at Glassboro, which had just been rebuilt, was struck by lightning on Saturday and damaged to the extent of $2,000, one entire side being torn out.

—About ninety employés of the Schomacher Piano Manufactory, at Eleventh and Catharine streets, went out on strike on Tuesday for a reduction of working hours from ten to eight.

—By the will of Hester Craig Green her estate of $1,500 is bequeathed to Christ Church Hospital. A memorial window to her mother is to be placed in the hospital, the cost not to exceed $400.

—At the meeting of the Lathers' Protective Union on Wednesday night, at Lewar's Hall, it was reported that all the boss plasterers had granted the demand for $1.75 per 1000 except Thomas Finley.

—Councils' Committee on Surveys on Tuesday referred to a district committee a communication from the Poor Guardians asking that the low meadow land in front of the Almshouse be filled in.

—The packing-box factory of John Fife, in Frankford, was burned on Tuesday morning, causing a loss of $3,000. The roofs of several dwellings on Josephine and Church streets were partly burned off.

—Owing to the large surplus that existed after the last dividend had been declared, it is probable that the Pennsylvania Railroad Company will hereafter declare a regular annual dividend of five per cent.

—The Commonwealth Mutual Fire Insurance Company, of Lancaster county, has been cited by the State Insurance Commissioner to show cause why it should not be declared insolvent and a Receiver appointed.

—Judge Butler, in the United States Circuit Court, has appointed ex-Governor James Pollock Examiner to take testimony in Wm. M. Robinson's foreclosure suit against the Philadelphia and Reading Railroad Company.

—The firm of Yerkes & Plumb, manufacturers of edge tools, Frankford, has increased the wages of their employés 5 per cent.

—The Western Nail Association, on the 12th inst., adopted a resolution reducing the price of nails to $2.50 per keg for tens, 10 cents per keg off in car lots, sixty days, or 2 per cent. off for cash. The association will meet in Chicago on June 16.

—It is stated that the date for calling assessments upon the stock of the Buffalo, New York and Philadelphia Railroad Company, under the plan of reorganization, will be extended from the 15th of this month to the same date of next month.

—The Atlantic City Council on Monday night passed an ordinance granting the right of way on Baltic avenue to the Philadelphia and Atlantic City Railroad. This ends a contest that has lasted for months, and permits the company to reach the Inlet.

—At Boston, eighty-four employers have agreed to the painters' demands, and 750 men are at work on the eight-hour basis, while three coöperative shops, employing over sixty men, have been started. Two-thirds of the original strikers are now at work.

—The Secretary of the Fire Commissioners has been instructed to send to hotel proprietors a copy of the fire-escape law, with that part underlined which requires that red lights shall be displayed at the head and foot of each stairway and at the intersection of corridors.

—At Reading the slaters have decided to work for not less than $2.25 a day this season, and refuse to work with apprentices. They formerly received $2. The hat manufacturers unanimously decided on Tuesday not to advance the wages of their finishers and other employés.

—It is stated that the revenue of the Submarine Cable Trust thus far for 1886 was £4,656 less than that of the same period in 1886, in consequence of the diminished dividends of the Anglo-American Cable Company and the competition of the Commercial Cable Company.

—JudgeButler, in the United States Circuit Court has granted a preliminary injunction to the American Bell Telephone Company restraining Albert F. Congdon from making, selling and using telephones alleged to be infringements upon the complainant company's patents.

—The United States Supreme Court has decided against the stockholders of the Boston, Hartford and Erie Railroad, they sought to recover possession of the road from the New York and New England Railroad Company who were its purchasers under a mortgage foreclosure.

—These sums were paid into the City Treasury on Monday: $30,442.29 taxes of 1886, $19,768 delinquent taxes and $116.20 search fees, by Receiver Hunter; $311 65 by the City Solicitor; $40 by city property, and from magistrates as follows: Lennon, $260.15; Lloyd, $119.35; Ahern, $58.85, and Riley, $40.85.

—The Atlantic county, N. J., Freeholders on Wednesday last organized by electing George F. Currie, Director; Albert W. Irving, clerk; Allen B. Endicott, collector, and Joseph Thompson, solicitor. The appropriations for the year reached about $23,000. The county is out of debt and has $7,000 in the treasury.

—Elwood Allen & Son, sash and door manufacturers, on Main street, Frankford, have granted the reduction of working hours from ten to nine, at $2.75 per day, to the stair-builders in their employ, and it is expected that on June 1 he will grant the same reduction to the forty other employés.

—The handsome remodeled dwelling at "Taworth," formerly the Merrick property, corner of School Lane and Township Line, is receiving the finishing touches prior to the occupancy in two weeks of the family of Mr. J. C. Strawbridge, its present owner. The ground and improvements are estimated to have cost $150,000, $80,000 in improvements alone.

—The Directors of the new Produce National Bank have leased the building No. 104 Chestnut street, and as soon as necessary alterations are completed business will be commenced. Mr. Thad. C. Yates, now assistant to the Cashier of the Consolidated National Bank, has been elected Cashier of the new institution.

—The State's financial officers say that the revenue of the State will be increased to $1,500,000 under the new Tax act just declared constitutional by the Supreme Court. The revenue now is about $500,000, and it would probably amount to $2,500,000 were it not for the fact that some of the large counties will be allowed credits for overpaid taxes of former years.

—The Manufacturers Association of Brass, Iron, Steel and Gas Fitters, representing 98 per cent. of the manufacturers in these lines in the United States, met in Pittsburg on Tuesday afternoon, and unanimously resolved that hereafter ten hours should constitute a day's work for their employés, and that they would also be allowed five hours each, weekly, for moral, social and physical improvement.

—The Philadelphia Petroleum and Mining Exchange has changed its name to the Philadelphia Petroleum and Stock Exchange. All the active stocks dealt in at New York have been placed upon the list. Fractional lots of stocks for ten shares up, will be sold. The announcement of this change caused the value of seats to jump from $80 to $100. The American Loan and Trust Company of New York will act as the transfer agent of the Exchange.

—The thirty-third annual meeting of the Northern Home for Friendless Children and Soldiers' Orphan Institute, at Twenty-third and Brown streets, was held on Tuesday. MacGregor J. Mitcheson presided. The Treasurer's report showed that there was a balance of $815.08 on hand at the close of the school year. There are now 395 children in the home, against 417 at the same time last year. The present officers and Directors were re-elected.

—The Property Committee of the Camden Board of Education met on Tuesday night and opened the following bids for the new schools house, to be erected at Broadway and Clinton street: A. H. Williams, $29,997; Charles Johnson, $29,551; William T. Mead, $28,040; G. K. Holloway, $27,200; William Severns, $26,493; John C. Rogers, $25,900. The committee decided to recommend to the Board the awarding of the contract to John C. Rogers, who was the lowest bidder.

—Representative Everhart has introduced a bill in the House, and Senator Cameron has presented a similar bill in the Senate, directing the Secretary of the Treasury to purchase a suitable site, and cause to be erected thereon, at Chester, a substantial building for the use of the United States Post-office, Internal Revenue and other Government offices. The cost of the proposed building, including the site, is limited to $75,000.

—Councils' Committee on Markets and City Property awarded the following contracts on Tuesday: Erecting a bath-house at Twenty-seventh and Master streets, James Bradley, $8,000; Improvement of Jefferson Square, Vulcanite Paving Company, $14,975; paving south side of Passyunk Square, Vulcanite Paving Company, $955; resetting coping of Independence Square, John Maxwell's Sons, $470; painting bath-house at Twelfth and Wharton streets, Michael Snee, $329.

—The Union Passenger Railway Company want to lay single and double tracks on Twenty-first and Twenty-second streets, and also on Montgomery and Susquehanna avenues. The Board of Highway Supervisors on Wednesday referred the ordinance granting these privileges to the Councils' Committee on Surveys. A number of citizens protested against double tracks on Twenty-second street between Norris and Diamond streets, the People's Line already having a track there.

—The twenty-nine striking carpenters employed by Stewart Brothers, contractors, in the new buildings in process of erection at Third street and Lehigh avenue, Second and Somerset streets and Seventh and Somerset street, did not return to work on Tuesday, because their demands of $2.75 per day of nine hours were not complied with by their late employers. They had hitherto received $2.50 for nine hours' work, and, in accordance with the rule of the Carpenters' Brotherhood, made a demand for $2.75.

—The Hayes Mechanics' Home, at Bala Station, was formally dedicated on the 12th inst. Addresses were made by D. T. Batt, Esq., Judge Kelly and Charles Emory Smith. The institution is intended as a home for aged and disabled mechanics. Applicants of sixty years of age are required to pay $500 for admission; those between sixty-five and seventy, $250, and over seventy, $150. This will secure a home for life. William H. Johnson, ex-Chief Engineer of the Philadelphia Fire Department, has been appointed Superintendent of the home, and his wife is the matron.

—The *Evening Star* of this city says that the city of Manchester, England, is very far from being as prosperous a city as Philadelphia, but its people appreciate at its full value the blessings of a full supply of wholesome water. The present works of that city cost $20,000,000, and now it is proposed to expend $15,000,000 in order that there may be no deficiency. The water to be introduced additional will be brought from Lake Thulmere, 120 miles distant from the city, by gravitation. The daily increase in the supply will be 50,000,000 gallons. The Birminghamers are evidently a wide-awake and very sensible set of people.

—Attorney-General Cassidy has filed in the Dauphin County Court an information prepared by Insurance Commissioner Foster, asking for the forfeiture of the charter of the New Era Life Association, a concern which has done business in Philadelphia for about ten years. It is charged that the association has parted with its franchises to a private person, who manages it for his own gain, and that the concern is no longer conducted in conformity with the law. The association has been in the Philadelphia Courts continuously for years, either striving to collect assessments from its policy-holders or contesting policies upon the most technical and trivial grounds.

—The carpenter contractors included in the Master Builders' Association of Allegheny County propose to effect a new organization. They will then take into this organization all stone-mason, stone-cutter and plasterer contractors, to be known as the Builders' Exchange. By having all the building contractors united they think that they will be better able to fight the demands of the different journeymen assemblies who are now on a strike. The organization has been talked of quietly ever since the strike was inaugurated. As no compromise has been made with the journeymen by the contractors, they have finally resolved to make this united fight against the strike.

—The committee on city property protests against the distribution of $449,000 appropriated by the Finance Committe of Councils' for the erecting of schools without consulting the Board. The committee passed resolutions requesting Councils to repeal the appropriation of $40,000 and $35,000, the portions to the 28th and 29th districts respectively.

—The East Park, which was injured by the construction of the intercepting sewer, is to be improved by the expenditure of $50,000. The work will begin at a point in the vicinity of the archway under this bridge, over which the Philadelphia and Reading Railroad trains cross, and will run alongside the river to Strawberry landing, making a length of 7,400 feet. The width of the drive for one-third of the distance will be fifty feet, and for the rest of the length it will be forty feet, while there will be a footwalk eight feet wide along the entire road on the river side. The fence protecting this footwalk will be built of sound upland red cedar. Specifications have been completed.

—The committees representing the Contractors and Builders' Union, and Local Union No. 20, of Carpenters and Joiners, of Camden, met on Tuesday night to discuss the demand for the nine-hour system. It was agreed that nine hours shall constitute a day's work, for which $2.50 shall be paid "to all good mechanics." It is stipulated that builders and contractors shall have the right of saying whom they will hire at that figure, and to employ men for less than $2.50. It was also agreed that the Carpenters' Union shall not demand a higher rate of wages than $2.50 unless a notice to that effect shall be published in December and January of any year, such advance not to take effect within three months thereafter.

—Mr. W. B. Powell, a Philadelphia architect, speaking of the late H. H. Richardson, of Boston, says his loss is irreparable. No one living, certainly no one gone before, has done as much towards rasing the standard of American architecture as he. In laying the foundation of *his style* upon a conscientious adherence to the capabilities of the "Romanesque," his splendid compositions, alike modern in plan and satisfying in exterior, exemplified in the various structures with which he has enriched our cities and towns, is sufficient evidence of the public's appreciation of true genius, and the success he so well merited. The charm of Mr. Richardson's style was its truthfulness; nothing is masked; the several parts are left to tell their own tale and details lost in the masculine dignity of the whole conception. With him ornament was a thing to be discouraged unless used to emphasize construction, hence his designs were always chaste and effective.

—The State Department, at Washington, has been informed by Erhard Bissinger, consul at Begroot, Syria, that an immense strike of petroleum has been made in Egypt, on the western shores of the Red Sea. He states that the well is located a short distance from the sea at a depth of about 120 feet, and is said to throw a jet of six feet above the sea level. "From information received by telegraph to his Excellency Nubar Pasha I learn that the daily yield of this well is 500 tons of petroleum mixed with water, 150 tons of which is said to be pure oil. People in Egypt believe that this discovery if followed up with energy on the part of their Government, of which there is very good prospect with such an energetic man as Nubar Pasha at the head of the preliminary work of exploration now progressing, will in time prove to be a real treasure and a source of great wealth to that country. I shall use my best endeavors to obtain fuller particulars respecting this discovery, which, should the result prove as is now confidently anticipated, cannot fail to exert a very powerful influence on the American petroleum markets."

BUILDERS' ITEMS.

Building Permits.

Five three-story houses, 15 ft. by 50 ft., Berks st., above Germantown ave., to John Enochs, 1930 N. Seventh st.

One one-story office, 9 ft. by 20 ft., Berks, above Sixth st., to same party.

One two-story building, 18 ft. by 31 ft., Wissahickon, above Naomi ave., to James J. Sharp, Germantown.

One two-story building, 14 ft. by 14 ft., 2335 N. Second st., to Henry Gill, 2330 Hancock st.

Four three-story stores and dwellings, 17 ft. by 54 ft., Palethorp st., above Lehigh ave., to John M. Buchanan & Bro., 1618 Vienna st.

One three-story store and dwelling, 17 ft. by 44 ft., Thirteenth and Mt. Vernon sts., to A. A. Harmer, Sumac st.

Interior alteration, 134 East Cumberland st., to T. J. Hamsler, M. D., same place.

Second-story addition, Rush, above Twenty-second st., to Terence McAntel, Twenty-second and Rush sts.

Seven two-story houses, 12 ft. by 28 ft., Ireland, above Hanover st., to Mary A. Bosler, 2330 East Dauphin st.

To move a three-story building, 60 ft. by 50 ft., 4227 Chestnut st., to John A. Palmer, 233 S. Fortieth st.

A mansard roof, 20 ft. by 30 ft., Spring Garden, above Twentieth st., to F. W. Tweed, 2630 Brown st.

Two three-story houses, 20 ft. by 56 ft., Thirty-seventh, above Sansom st., to same party.

Rebuild front, 1236 Washington avenue, to John Russell, 1026 Tasker st.

One two-story house, 19 ft. by 32 ft., Marshall, above East st., to James Harper, Terrace and Hermit sts.

One two-story back building, 16 ft. by 28 ft., Penn, above Harrison st, to Horace T. Fries, 5031 Penn st.

One one-story back building, 13 ft. by 10 ft., 525 North Thirteenth st., to C. G. McMullen, 1232 Melon st.

Front alteration, 210 South Third st., to Kemp & Garrison, 1320 Olive st.

Front alteration, 1202 North Second st., to Thos. McCarty, 1935 North Seventh st.

A church building, 56 ft. by 100 ft., Seventh, above Collins ave., to Chas. C. Casmer, 1546 North Twelfth st.

One two-story house, 16 ft. by 30 ft., Dilmore street, above Snyder ave., to E. Cubberly, 821 Wharton st.

One two-story house, 18 ft. by 32 ft., Ammon, above Cumberland st., to John Mours, 3519 Germantown ave.

Four two-story houses, 14 ft. by 28 ft., Wildey, above Marlborough st., to G. McDevitt, 530 Belgrade st.

Two three-story houses, 22 ft. by 69 ft., Chelten ave. and Main st., to George Hearst School lane.

Two two-story kitchens, 13 ft. by 10 ft., Eighteenth st. above Columbia ave., to Chas. M. Baker, 1724 North Eighteenth st.

One-story back kitchen, 15 ft. by 13 ft., 826 North Seventh st., to M. Myers, same place.

Five two-story houses, 16 ft. by 30 ft., James, above Bridge st., to J. S. Taylor & Son, 5030 Tacony st.

One two-story back building, 13 ft. by 15 ft., 2340 Adams st., to Thos. Holt, 113 North Second st.

One two-story and one three-story house, 18 ft. by 45 ft., Master, above Twenty-eighth st., to Hallbach & Auchten, Twenty-sixth and Thompson sts.

One-story addition, 14 ft. by 8 ft., 459 Marshall st., to Stephen Morris & Son, 121 North Sixth st.

One one-story building, 20 ft. by 30 ft., Dutton, above Moore st., to Wm. C. Pritchett, same place.

One two-story bath, 8 ft. by 10 ft., 455 Marshall st., to same party.

A. R. Crosta, Salmon st., Bridesburg, two-story house, Church st., near Richmond, 30 ft. by 30 ft.; also new front, Richmond st., near Hedley, 16 ft.

J. T. McNee, No. 3104 Market st., two-story kitchen and bath, No. 1216 Melon st., 12 ft. by 10 ft.

W. C. McPherron & Sons, No. 326 Cherry st., five-story brewery, Broad st., near Columbia ave., 70 ft. 2 in. by 34 ft. 7 in.

A. Schrieber, No. 2036 Howard st., two-story kitchen and two-story stable, No. 1504 Harrison st., 15 ft. by 28 ft. and 16 ft. by 34 ft.

Kemp & Garrison, No. 1320 Olive st., bay window, No. 1515 Broad st., 10 ft. by 4 ft.

A. Overturf, No. 1915 Oxford st., eight two-story houses, Germantown ave. and Angle st., 14 ft. by 27 ft.

J. Dorlan, 1033 Shackamoxon st., three-story store and dwelling, Girard ave., near Palmer st., 20 ft. by 54 ft.

A. Hindle, No. 1522 North Twenty-first st., one-story addition, No. 1812 Vanpelt st., 14 ft. by 30 ft

W. Roelof, Twenty-eighth and Nicholas sts., two-story addition, Twentieth and Nicholas sts., 17 ft. by 14 ft.

Amelia Wilkinson, 4528 Miller st., addition to shop 4528 Miller st.

John W. Leamy, 533 S. Forty-second st., addition on front of 2223 Bainbridge st.

J. E. & A. L. Pennock, 1901 Wood st., hospital building, west side of Seventeenth st., between Race and Vine sts., 72 ft. by 106 ft.

C. Ohronglowicz, one four-room house, southwest corner Cambria and Bath sts., 16 ft by 25 ft.

Joseph Park, contractor, one two-story stable, west side of Hutchison street, between Somerset and Cambria sts., 26 ft. by 28 ft.

J. E. & A. L. Pennock, 1901 Wood st., a warehouse, east side of Thirtieth st., between Spruce and Walnut sts., 52 ft. by 82 ft.

Robert G. Black, Sixty-third and Race sts., three two-story houses, east side of Forty-seventh st., between Westminster and Lancaster aves., 14 ft. by 42 ft.

A. Naudascher, 1644 Park ave., a kitchen, 1644 Park ave., 9 ft. by 11 ft.

M. N. BAKER writes in the last issue of *Building* how to improve business among the architects. He says:

"Let the architect teach the farmer, as opportunity affords, the economy of a house designed by a professional man. Let the architect show him that to build a house after a set of plans need not plunge him hopelessly in debt, as some have been by unscrupulous architects. Show the farmer that on his own farm, in the heaps of stone encumbering the ground, in his wood-lot, are most of the materials he will need for a house. Show them how they can get not only necessary material from their land, exchange a superfluity of one kind for what they lack of another, but also how they can themselves fashion much of the material for use. Have talks with every farmer you see upon architecture—practical and interesting talks; take a little run out to some country village, get a breath of fresh air, and give the people a short lecture on the subject.

"If such efforts as these are made, we may hope to see rural architecture improved, the condition of the country people advanced, and the importance of the architectural profession better understood and appreciated by all."

—The introduction of wood-working machinery does not appear to have been as disastrous to the artisan class of this country as some agitators occasionally represented, for in 1860 the wood industries employed 130,000 persons; to-day they employ 240,000, while the value of the annual product has trebled.

Among the Builders and Real Estate Agents.

W. H. HAMM, is putting up 37 dwellings (two stores) on Ontario and Smedley streets.

MR. HENRY will shortly erect a lot of 30 or more houses on Eighteenth and Ontario streets.

MR. CLARK, of Columbia avenue, sold the corner store, 1312 Columbia avenue, for $12,600.

W. H. BILYEU is building six three-story dwellings on Seventh street above Berks, on the west side.

MR. CAREY is just finishing 30 houses, two and three stories, on Smedley and Venango streets.

GEO. W. BLABON will erect 12 semi-detached houses, of 12 rooms, in the vicinity of Tioga street.

A NEW Baptist church (the Temple) will be erected at the corner of Twenty-second and Tioga streets.

MR. FREE is building two fine dwellings at Clifton, Pa.; cost, $6,000 each. L. O. Howell will do the plumbing.

CHAS. T. BROWN, 2156 Mervine street, will build two twelve-room houses on Thirteenth street above Columbia avenue.

MR. BOOTH is building two houses on Graver's Lane Station, at the cost of $7,000 each. L. O. Howell, sanitary plumber.

MR. WEGAN is building 14 houses, Twentieth and Berks streets, from Woodstock to Twentieth street. L. O. Howell, plumber.

J. RILEY will build two three-story houses on Twentieth street below Berks. S. B. McDowell, contractor. L. O. Howell, sanitary engineer.

W. R. BROWN, 1702 N. Thirteenth street, made sale of dwelling house 1836 N. Twelfth street for $4,200, also 1723 North Thirteenth street for $6,000.

GEO. GIBSON will build 10 houses, three on Berks street and seven on Seventeenth street, and will cost about $5,500 each. L. O. Howell, plumber.

C. H. SHOWAKER, Twenty-first and Columbia avenue, has sold, this week, to W. L. Horn three dwellings, 2000, 2005 and 2016 N. Eleventh street, for $15,000.

CHAS. J. MATHEWS, 1701 North Fifteenth street, made a sale of the dwelling at 1726-28-32 Camac street, $2,050 each; also one at 1829 Camac street for $2,300.

THE demand for houses, both large and small, and all grades, at the east end of the Twentieth Ward is great, and, in cases of sales, good prices are being made.

JOHN H. HUDSON, 1428 Columbia avenue, made sale of a house, 2509 Sherwood street, $2,850; also two lots on Eighth street, and two on Franklin street below Norris, for $14,000.

C. F. BOLTON, Columbia avenue, is at present remodeling the sanitary departments of a house, 1633 N. Fifteenth street, also one on the northwest corner of Fifth street and York avenue.

A. E. ROTH will build six houses on Baily street, between Columbia avenue and Oxford street, which he intends to make model cottages of, both in style and finish. L. O. Howell, plumber.

W. R. BROWN, 1702 N. Thirteenth street, sold three houses on Camac street for $2,050 each; also one on the northeast corner of Camac street and Montgomery avenue (store) for $6,000.

A. P. BILYEU sold a house at 1808 Franklin street, of three stories, for $6,750; also three small houses on Sheridan street for $1,500 each; also two on Montgomery avenue for $3,600 each.

SAMUEL T. FOX, corner of Ninth and Callowhill streets, has sold a house, 1714 Ontario street, for $5,250; also a large stone dwelling on Tioga street and south side of Seventeenth for $1,250; also sold two new stone houses on Tioga street for $7,500 and $8,000 each.

P. H. SCHAFER, 1307 Columbia avenue, has sold a dwelling, No. 1644 Park avenue, with 10 rooms, for $3,500. Mr. Schafer remarks that rents are very excessive in Columbia avenue, and that many removals take place, but in spite of rents they are soon retaken and sales daily taking place.

C. H. SHOWAKER, Twenty-first street and Columbia avenue, made sale of a lot on north of Jefferson and Twenty-sixth streets for $1,050, 17x85, to Annie McGonigle; also sold dwelling 1527 Garnett street to John Hayes for $2,450; also sold house on Fox street for Miss Annie McGonigle to Tillie Roberts for $1,650.

JOHN H. HUDSON & C. G. HENDERSON, 1428 Columbia avenue, made sale of two lots on the east side of Eighth street and two on the west side Franklin, below Norris street, for $5,200; also sold farm at Southampton, Montgomery county, of 52 acres, for $9,250; also sold dwelling 962 N. Eighth street for $9,000.

L. O. HOWELL has the sanitary arrangements of two fine dwellings to be erected at Oak lane for Mr. Willard. Everything throughout will be of the most improved style, and they will cost about $6,000 each. He is also fitting up a fine country seat, the property of G. W. Myers, two miles from Burlington, the cost of which is estimated at $20,000.

CHAS. P. FARNER, 126 S. Sixth street, has just completed the sale of a beautiful country seat of 21 acres, on the Laurel and Norristown pike, to Mr. C. H. Showaker, real estate agent, Twenty-first street and Columbia avenue. The dwelling, which is modern, is fitted up with all conveniences—gas, hot and cold water, stables, coach-house, ice-house, bowling alley, and an abundance of fruit, the cost of which was $15,000.

KLINE & KEYS, 1112 Ridge avenue, say that there is a heavy demand for houses averaging from $20 to $40 in the following Wards: 6th, 9th, 10th, 12th, 13th, 14th, 15th, 16th, 17th, 20th and 29th, and they find it impossible to supply the demand. They sold a house on Ontario and Myrtle streets for $2,200; another, Twelfth street below Fairmount avenue, $3,500, and another on Fairmount avenue above Twelfth for $7,000, last week.

WILLIAM HOWELL is laying out the square of ground bounded by Thirty-eighth, Thirty-ninth, Aspen and Brown streets for building purposes, and is cutting a street through the centre, which he will call Linwood street. L. O. Howell, sanitary engineer, of Columbia avenue, is putting the water and sewer connections to the curb line, and when finished the street will be paved with Belgian blocks, so that when building operations commence the street will not be disturbed.

RICE & GILBERT, 2150 Ridge avenue, made sales of properties, 1807 N. Twenty-fourth street for $3,800; also 1812 Bucknall street for $2,200; also 700, 702 and 704 Cherry street, Camden, N. J., for $4,050; also S. W. corner Twenty-fourth and Jefferson streets (store and dwelling) for $5,500.

This firm have on their books upwards of 400 houses, all of which are rented, and the demand for houses with them from $12 to $25 is greater than ever. Properties that twelve months ago were sold on Ridge avenue for $5,100 cannot to-day be bought for $6,500.

G. W. CARSON, 1906 Columbia avenue, made sale of large brown stone dwelling, of 12 rooms, 22x150, for $11,500; also another, for $1,100; also dwelling house 1730 Columbia avenue, 16x84, $6,100; also six-room house, 14x57, at 1539 Page street, $2,700; also four eight-room houses, 2216, 2222, 2224 and 2226 Fifteenth street, for $3,450 each.

Mr. Carson says that the renting of houses with him just at present ranges from $20 to $25, but that the sale of property is made much easier than has been the case for some time.

CHAS. J. MATHEWS, 1701 North Fifteenth street, has sold a three-story house, 237 Mervine street, for $2,600; also a two-story dwelling, 540 Coulston street, for $1,125; two two-story houses, 1720 and 1722 Arlington street, $2,000 each; also one, 1912 North Thirteenth street, for $1,025; Nos. 2616, 2618, 2620 Sartain street, for $1,600 each; also 1731 and 1733 Monument street, each for $3,100; 1935 North Eighteenth street, for $6,800; 1508 North Fifteenth street, for $3,750.

Mr. Mathews gives it as his experience that the buying and selling of property is somewhat dull just at present, buyers not feeling anxious to pay fair prices. He has some fine properties on his books for sale, but the bids are so excessively low that it is impossible to make sales.

W. L. CRAVEN & SON, 1546 North Seventh street, made sales of the following within the last few days: one on Tusculum street for $1,350, also one on Centennial avenue and Jefferson street for $8,000; also sold ten of Mr. Sharp's houses, containing five rooms, with all modern conveniences, for $2,000 each; also two on Woodstock street and Columbia avenue, $2,500 each; three on Wellington street above Columbia avenue, $3,500 each.

Mr. Craven will build 44 five-room houses on Lawrence street north of Cambria, also 13 two-story four-room houses at Tusculum and Kip streets. There is a demand, he says, for lots in this immediate vicinity; several large mills being erected. The land is fetching from $2 to $4 per foot, according to location.

SCOTT & ROBERTS, 831 N. Sixteenth street, are building 24 houses at Nineteenth street and Montgomery avenue, of two stories, of four and six rooms, which will rent from $15 to $20; also building six dwellings, of three stories, on Swain street west of Sixteenth, in the Fifteenth Ward, which will sell for about $3,300 each, for the Real Estate Association, which has now been in operation for about three years, and which, with the united efforts of Messrs. Scott and Roberts, has become quite a success. The association started off with a capital of $2,500, but has now been increased to $100,000. This firm made sales within the last few days of house 316 and 318 N. Twenty-second street for $1,000; also 212 Columbia avenue for $1,450, subject to ground rent; also house on Turner street, 1952, for $2,500; also 2203-5-7 Pearl street for $5,000; also 812 N. Forty-sixth-and-one-half street, West Philadelphia, $850.

The demand for small properties with this firm, both to purchase and rent, is great with them.

The Sanitary Convention.

The Sanitary Convention which has been in session several days this week has developed a great deal of interest. The sessions were well attended. The papers read were for the most part full of interest, and showed that the authors of them had given close attention to the subjects discussed. Among the papers read were the following: one by Dr. Woodbury, on "Physic, Tippling and Medicine Bibbing;" another by Professor Henry Hartshorn, on the "Continuous Preventive Disinfection and House Drainage;" one by Dr. Hugh Hamilton, Harrisburg, on

"Relations between the Topography of this city and the Drainage and Sewerage;" one by Dr. V. C. Vaughn, of Ann Harbor, Michigan, upon "Healthy Dwellings." He took the ground that pleasant and healthy homes were among the chief preventatives of crime and intemperance, and confined his discussion to the dwellings of the laboring classes, treating of suitable locations, the movement of ground, air, construction, heating, ventilation, etc., and the care of the house after it is constructed. Another by the Rev. Dr. J. Andrews Harris, on the "Majesty of Law in Sanitation;" one by H. Wharton Amerling, on the "Means of Elevating the Standard of Supplies;" one by Dr. Jenner, of Detroit, on "The Transmission of Disease;" another by Professor Wood, on the "Hygiene of Old Age;" another by General Thayer, "Enforced Ventilation," and one by Col. George E. Warring, Jr., of Newport, on "Drainage and Sewerage of Cities and Towns." The two aims of this work, he said, are the increase of the convenience to the public and the decrease of danger. The question of the quantity of storm water to be removed was an economic one, it being rarely worth the expense to construct works large enough to carry off all the water of the heaviest storms. Street drainage, he held, was not to be considered as sewage at all and can be safely delivered into water courses. The immediate removal of putrescible matter from the city was urged as the vital point in solution of the problem, involving the reconstruction of 99 out of every 100 house drains; the abondonment of every cesspool and the reconstruction of every sewer not large enough to remove at once the matter discharged into it. Where there is close at hand a safe outlet, both storm water and sewage can be discharged together, but elsewhere the separate system was urged as essential.

Among the other papers read were one by Professor Mills, on "Influence of overwork in the Production of Disease;" one by Professor Keyser, on "The Defective Vision of School Children;" another by Dr. Mary Hennesey, on "Vaccination." A paper read by Dr. Charles Smart, of the United States Army, on "Water Supplies of Towns and Cities," was full of interest.

Dr. Smart discussed at some length among other points the question of self-purification of polluted water. He claimed that aeration and infiltration did not purify water infected with fevers. The death-rates from typhoid fever in different cities were cited, and their relation to the character of the water supplies was pointed out. During the past ten years the rate in Philadelphia per 100,000 was 66, and in Brooklyn (which has good water), only 15, or 5,695 deaths in Philadelphia as against 1,294 in Brooklyn. Dr. Smart said that Philadelphia retains and even exceeds the annual death rates from typhoid in "un-sewered" cities, the rates for the last ten years being: Philadelphia. 66.1; Baltimore, 52·5, and New Orleans, 24·6

Mr. Germer asked whether boiling water for domestic purposes would not destroy disease germs. Major Smart replied that it would. Dr. Germer added that he thought that the location of cemeteries in many cities had much to do with the pollution of water supplies.

JUDGMENTS.

Where there are no figures to indicate the amount of the judgment, the damages have not been assessed.

The first name in each line is that of the judgment debtor.

An asterisk (*) denotes judgment confessed or bond and warrant conditioned.

The figures 1 2 3 and 4 immediately after the name of the plaintiff indicates the number of the Court. The letters D. M. J. and S. after the number of the Court indicate the Term as D., December Term, M., March Term, as J., June Term and S., September Term.

An examination as to the nature of judgments and suits will be made for subscribers without extra charge on application.

Satisfied Judgments.

Filters Extraordinary.

Captain Symonds, a distinguished engineer, has prepared a project for a system of filters, by which he proposes to filter the water for all Washington. The plan is to use these in connection with the new water works just being constructed here. It is proposed to use fourteen filters, each thirty feet in diameter and seventeen feet high, built of steel. Each filter is divided by a steel diaphragm into two parts, the lower one eight feet ten inches high, being entirely enclosed, and capable of sustaining all the hydrostatic pressure which is required in the process of filtering. The upper compartment is eight feet two inches in height, and is open to the air at the top. In the lower compartment is the filtering material, and here the operation of filtering is carried on. The upper compartment is used for cleansing and washing the filtering material, which is all transferred to it in a state of violent agitation by hydraulic currents. The water to be filtered is let into the upper part of the lower compartment by pipes which distribute it at various points of the area The pressure then forces the water downward through the filtering material to the outlet system at the bottom, where it is collected in pipes, which gradually enlarge and join until the main outlet pipe is reached. The operation of filtering is carried on uninterruptedly until it is desired to wash the filters. This is accomplished by opening and closing certain valves, and thus changing the direction of the current and forcing the water into the filter through the outlet system at the bottom. The material used for filtering is a mixture of sand and powdered coke, and the water is forced through about eight feet of this mixture.

THE eyes of the Northern mill men are turning eagerly to the comparatively virgin forests of the South, and heavy sales of timbered land are being constantly announced. If the ravenous saw mills must be fed, and no better material than wood can be devised, then the people of the South should not dispose of their heritage for a mere pittance of its value. These huge tracts of yellow pine can be converted into yellow gold, and should not be sacrificed as a worthless possession. We should make the most of our opportunities, and not yield too readily to the pressure of greenbacks. These huge acres of undisturbed trees are daily enhancing in value and importance, as the supply in the North and West diminishes. It is idle to talk of the "inexhaustible" forests of the South, when Mr. Little, of Montreal, an authority on the subject, estimates that the sawing capacity of the North is sufficient to consume the merchantable pine of a State in less than a year. The South possesses mines of wealth in her noble forests, and they should not be disposed of carelessly and without full appreciation of their value.

—About ten miles North of Philadelphia on the P. & R. road is a deposit of feldspar and ledge granite about 150 feet above the Schuylkill. The feldspar has been mined and some of it sold for city paving purposes. The granite is now being developed. The feldspar is sold at $1.00 per ton on the ground. The deposit is a rare one and likely to prove quite valuable to its owners, especially in view of its accessibility to contracters and street pavement builders.

F. R. Buell's New Fire Extinguisher Severely Tested.

Mr. F. R. Buell the Patentee of the Buell Fire Extinguisher and Force Pump gave a very successful exhibition of the powers of his apparatus on Tuesday afternoon at the corner of Thirteenth and Thompson streets. A large box containing wood and other inflammable substances was set on fire, when the fire was at the highest point the extinguisher was set at work, and in just one and a quarter minutes the fire was conquered. The remnants of the box and contents were then saturated with coal oil and set on fire, and, in one quarter of a minute, this fire was also extinguished. This test did not seem to suit the committee present and a number of barrels and large pieces of wood were laid in the remains of the box and set on fire and entirely extinguished in two minutes. Several representatives of the fire department and Councils and also a party from Palmyra, N. J. witnessed the exhibition and pronounced it a great success.

The Loeb Estate Again.

Judge Penrose, of the Orphans' Court filed an adjudication of the account of Nanny Swartz et al., executors of the estate of Albert Swartz, who died in April, 1885, leaving over $63,000 in trust for the benefit of his relatives. A claim was presented against the estate on behalf of William Loeb, the testator's son-in-law, as the next friend of his two minor children, and as administrator of the estate of the claimant's deceased wife, Mrs. Lottie Loeb, for moneys alleged to have been loaned by Mrs. Loeb to the decedent. The claim was the subject of a lengthy decision by the Court and was rejected. When Mr. Loeb's account as administrator of the estate of his wife, Mrs. Lottie Loeb, who died intestate in March, 1884, was adjudicated by Judge Ashman in the same court last month, credits taken for the decedent's funeral expenses, medical attendance in her last sickness and board and nursing of her children after her death, amounting in all to $590.50, were stricken out because they were debts for which the husband was primarily liable, and a credit of $3,062.50 claimed for money said to have been paid to the father of the accountant, growing out of the transfer of a stock of goods, was also disallowed.

New Bill of Wages for Brickyard Employees.

Last Tuesday the brickyard employees, in six assemblies of the Knights of Labor, presented to their employers a new bill of wages which it was desired to go into effect on Saturday and remain in force until January 1, 1887. About 4,000 men and boys are employed, it is stated, about seven months in the year.

In the proposed new scale first-class brickmakers, sorters and setters ask for $3.25 per day; pressers, $2.62; second-class moulders, $2.75; bottom brick moulders, $2.25; wheelers and tossers, $2.25; tossers in steam yards, $2; burners, wheelers, laborers, an advance of 25 cents per day over present wages; offbearers and carriers-off an advance of 10 per cent. over present wages.

In making the request of the manufacturers the employees say: "We desire to call your attention to the fact that, owing to the advanced wages now being paid all classes of working men, we are compelled to pay increased prices for the necessaries of life without any corresponding increase in our wages, and with the hope that our positions will be properly understood by you, we present, through our committee, a bill of wages which we trust you will carefully consider and grant. In preparing the bill we have been careful to consider the rights of all employers as equal, and, knowing that the large majority of your goods are disposed of in the one market, we have endeavored to so arrange the price of labor that one manufacturer will not have an unfair advantage, but that all can enter the market and compete fairly one with another. We hope that our efforts will be appreciated, and that you will kindly sign our bill of wages, which, so far as our own members are concerned, will protect you from strikes or trouble of a like character until January 1, 1877."

Decision in Favor of the City.

A decision has been rendered in favor of the city in a suit brought by Samuel C. Perkins the Solicitor against Carmany & Wrigley, who carry on the dyeing business in the old Gorgas mill outside the boundary of Fairmount on Gorgas Run.

The defence of Carmany & Wrigley was that the mill has been used for such purposes for the past fifty years, and they had a right by prescription to so use it; that the Court cannot interfere because the transparency of the water is lessened; and that as to the effect for drinking purposes, the water cleared itself of injurious ingredients in its flow from the mill to the Belmont pumping station, a distance of over five miles.

The decree of the matter in equity was that the defendants must stop running such refuse into Gorgas Run, and orders that the decree go into force on August 1st, so as to enable the defendants to make the necessary arrangements in view of the decision.

A New Hotel Wanted.

The criticisms and scoldings which have been indulged in perhaps too much by the Philadelphia papers about the provincialism of their town are being followed by some good results, whether produced by that agitation or not. A communication was read at the Wednesday's meeting of the Board of City Trusts, signed by John Wanamaker, Hood, Bonbright & Co., Strawbridge & Clothier, Edmund P. Steel & Co., Riegel, Scott & Co., Joel J. Bailey & Co. and Henry C. Gibson, asking the Trust to erect a hotel at 12th & Market sts. No plans regarding the structure are offered. The signers merely give it as this opinion that a handsome and commodious hotel is needed in that locality, and that the trustees are the only ones having control of a site suitable for such an edifice. One of the trustees stated the other day that the two buildings they are erecting now —one that of Hood, Bonbright & Co., and the other at Girard College—would cost about $500,000, and that no further improvements would be made on the Twelfth and Market streets property at any time in the near future.

No doubt, Philadelphia needs better hotel accommodations, not simply an immense barn with 1,000 or 1,500 rooms, but a hotel modern in every respect, that will make Philadelphia talked about, as is Chicago, St. Louis and San Francisco. We have nothing comparable to a New York hotel, excepting in size. After following out our utilitarian notions we have been beaten by other cities, especially in hotels, and there is no doubt but what we are suffering the consequences. A great many jobbers and manufacturers complain that buyers are more and more going through Philadelphia to New York. This statement is true. It is to be hoped that the right sort of enterprise will be developed and that more commodious hotel accommodations will be furnished within the next year or two.

—The Old Cathedral Cemetery is to be proceeded against for the violation of the law which requires all bodies to be buried eight feet below the level of the street. There are 7,700 bodies buried in 6,500 graves in this cemetery, some of the interments being within two feet of the surface.

Underground Wires.

Our City Councils have wrangled over the underground wire system for a long time. On last Tuesday another meeting was held to consider the ordinance intended to regulate the underground system. A bill was recommended on Thursday which is a consolidation of a previous ordinance on the subject. It is thought the new ordinance will cover the ground sufficiently. Under it the Supervisors shall have the power to change the plans and route, and when these are approved by the Board, the latter shall formulate a bill to be presented for passage by Councils. Branch lines not more than five squares long may be laid, with the approval of the Board of Supervisors and the consent of the Chief of the Electrical Department, without a special ordinance; but this feature of the bill can be revoked at any time by an ordinance or a resolution. It is provided that no company shall consolidate with or merge into another, under penalty of being deprived of all the privileges granted by Councils.

GUARANTEE

Trust & Safe Deposit Co.

CAPITAL, - - $1,000,000.

316, 318 and 320 Chestnut Street,

Rents Safes in its Burglar Proof Vaults at $9 per year and upwards.

Also receives for safe keeping valuables of every description, and Deed Boxes at $5 per year.

Executes trusts of every kind, allows interest on deposits of money. Also, acts as Registrar and Transfer Agent of Corporation Stocks.

PHILADELPHIA, MONDAY, MAY 24, 1886.

A LEADING architect of Philadelphia rates his loss from the labor strikes at one quarter of a million, and others of his profession speak of the probable loss of from four to five millions in all. The reflex action on real estate will be felt as an evil. It will not sell as well, and the consideration that building must go on later, carries with it poor consolation. It will go on of course, but at our loss. The eight-hour system has many sides, and less work at the same pay means higher rents, higher markets, higher prices everywhere. To make the income the same, that lesser quantity must sell at an advanced rate, as he who purchases at retail will discover to his bitter satisfaction. Once set in motion, the wheel of prices rolls up hill as easily as down.

THE question of an elevated railroad has a different hold on us from that of a few years ago. The slowest moving mind among us has admitted the conviction that, sooner or later, it must come, and our wisest course is to hasten that coming. The routes lie along Front or Second Street and out Market Street. Resolutely bending our plans and intentions for the future in reference to that change will be the sensible determination of every clear head among us. The gain to the city will be incalculable. There are thousands of business men now who spend from one to two hours a day in horse-car travel, and even then are not carried into the full enjoyment of country air and country quiet after business hours. An elevated road would give them at least half of that time for other uses, and would exchange an hours discomfort in a horse-car for fifteen minutes in a comfortable steam carriage. New York's elevated road helps to advertise New York. It is one of the curiosities and wonders of that wonderful city in foreign eyes. We need the advantages such an attraction would give us. We cannot do without what adds to New York's success.

IF Dr. Bray, the proprietor of the Summerdale Mills, Holmesburg, succeeds in his civil suit against the strikers who have been stationed at his gates to prevent his employés from going to work, it will certainly influence other manufacturers to appeal to the civil law for the protection they cannot obtain through criminal proceedings. The suits will not be tried until the September term.

PHILADELPHIA'S street mileage is extending rapidly. An enormous amount of paving is to be done this season. Councils have been liberal, and have recognized the urgency of the demand for more streets and good roadways. Water and gas pipes are going down by the mile. Bridge work is being done where needed, and new streets are being opened up in outlying sections. All this is well. Philadelphia has a grand future before her.

BUILDING material continues low. The brick-yard workers threaten to make an advance necessary. The price of lumber continues low, and the supply abundant, both from the Northwest and the South. Plaster, cement, stone, lath, shingles, etc., are all selling at substantially last year's prices, though here and there higher quotations are made, and sometimes better prices paid. Nails are $2.00@$2.25, even with 2,000 mills idle in the West. The supply of building material is sufficient for all wants. Much work that was put off will be quietly taken in hand again. More houses are a necessity.

THE Gas Trust people will not openly fight the transfer of management June next to the Superintendent, but the public can rest assured that no political chicanery will be unused to prevent this source of power from being lost. The political power of the Trust will of course in time be broken, but it will find some other but perhaps less complete shelter. This question is not easily solved. The appointing power will be placed under some sort of obligation, if it is possible, to the power represented by the Gas Trust. If there is no other remedy, an election of a Manager or Superintendent by the people may be necessary. The city is about to swing from one extreme to the other—from a government of trusts and commissioners to a one man power. The politicians have not given up hope. They still have two, in fact, three chances: first, to select their Mayor; second, to control Councils, and, third, to control the actions of the appointees under the Bullitt bill system.

THE State Sanitary Convention closed on Friday, May 14, with a larger attendance at the closing session than any of the preceding days. Great interest has been shown in its proceedings, and in particular the discussions upon the use of wholesome water. The second paper of the last session was on the "Water Supply of Philadelphia," by Dr. J. Cheston Morris. He advocated the filtering of water through mother earth before becoming fit for human use. Sufficient pure water, he thinks, could be provided by the construction of rain water cisterns, but it is not refreshing to the taste and is wanting in those ingredients which promote tissue metamorphosis and developments. He prefers river water to spring water, but adds that when it is allowed to become the receptacle of filth and the poisonous matters from factories it may even become pestilential. Miasmatic, typhoid and choleratic diseases afflict communities which disregard the purity of their water supply. Sources of contamination may be guarded against and sewage from the largest towns can and should be prevented from entering the rivers on which they are placed. He stated that 80,000,000 gallons daily is our present need for 1,000,000 souls. In the near future we shall need 120,000,000 and the present condition of our supply is not satisfactory. Even the East Park and Cambria reservoirs when completed will not afford sufficient subsidary supply. Supplies coming through long aqueducts the doctor does not look at favorably from a sanitary standpoint, and he advised that the city of Philadelphia control the whole watershed of the Schuylkill, accumulating in suitable storage reservoirs upon its larger tributary a sufficient supply to meet an emergency. The subject was discussed at length and there was a difference of opinion as to the impurity of the Schuylkill water. Dr. Morris's assertion that spring water leaves deposits of polluted matter was also commented. Colonel William Ludlow objects to the scheme of Dr. Morris as impracticable. At present water can be obtained from South Mountain and in the future from the Blue Mountain Ridge between the Schuylkill and Delaware. The subject of the water supply led naturally to the results of a failure to increase and better it and the last part of the session was devoted to ventilating the subject of typhoid fever.

EIGHT hours work for the strikers, but sixteen hours household drudgery for their wives. This is compensation with a vengeance.

REAL ESTATE.

Does It Empty Into the Schuylkill?

The Wingohocking creek is an open sewer, and the residents of Germantown are greatly exercised over its filthy condition. It is the receptacle for garbage, refuse from water-closets, and foul smelling liquids from the mills and factories along its banks. Fifteen thousand dollars has been appropriated to make a sewer of the creek, but the owners of the property have failed to dedicate the land.

Why Philadelphia Looses Her Trade.

A Nashville merchant buys $100,000 worth of dry goods every year in the Eastern market. Calico prints constitute a large proportion of his purchases. The railroad rate from Philadelphia to Nashville on this class of shipments is $1.09 per 100 pounds. The rate for the same goods over the same railroad from New York to Nashville is 73 cents per 100 pounds. Although the Philadelphian can manufacture as cheaply as his New York rival, the Nashville merchant can save money by buying in New York, and he buys there.

Charters Granted.

Charters have been issued to the following companies: J. C. Burns Spice Company; capital, $20,000. Columbia Gas Company; capital, $50,000. The Scranton Illuminating, Heat and Power Company; capital, $100,000. There was a protest against this company on the ground that another company in Scranton had the exclusive right to furnish electric light. It was decided in favor of the applicant. The Easton Steam Heating Company; capital, $50,000. The Sewickley Valley Electric Light Company; capital, $15,000. The Philadelphia Mortgage and Trust Company; capital, $500,000. Feister Printing Company, of Philadelphia, capital $300,000, and the Scranton Suburban Railway Company, capital $20,000.

Baltimore is Ahead of Us.

A Real Estate Exchange has just been opened in Baltimore for the following objects:

1. To secure uniform rates of brokerage in real estate transactions.
2. To protect the business from the encroachments of unlicensed and unauthorized persons who profess to act as real estate brokers.
3. To maintain principles of honesty and fair dealing in the operations of licensed real estate brokers.
4. To stimulate greater activity in real estate by joint effort in effecting sales and transactions rather than by scattering individual work.
5. To discourage and prevent the unfair division of the broker's commissions by persons not in the business who have no real claim upon him for a share of his living.
6. To restore the calling of the real estate broker to its former position of dignity and responsibility in this community, and to initiate measures to place it upon a foundation of influence and permanance in the future.

The Reading Railroad Tracks on Broad Street.

Attorney General Cassiday has been asked to assist in ridding North Broad street of the Reading Railroad tracks, between Callowhill and Willow streets, and lawyers John B. Johnson and Jerome Carthy have prepared twenty-four suggestions for a writ of quo warranto, addressed to the officers of the company, directing them to show their authority for exercising their present privileges. The franchises of other railroads were examined and the conclusions arrived at that the Reading has no right in fee simple in the case of Pennsylvania avenue, Noble street or Willow street. No authority is found for the company occupying more than twenty-five feet of Pennsylvania avenue; and it is claimed that the appropriation of the street for more than two tracks is utterly without the authority of law. The same is charged of their appropriation of Broad street, and the obstruction of the streets is claimed to be dangerous to the public. For these and other reasons, the Attorney General is asked to apply to the Court for a writ of quo warranto, requiring the company to show their authority for thus encroaching on the rights of the public. A hearing on the application will be held in about two weeks.

Protest Against Laying More Tracks.

At the regular meeting of the Board of Surveyors, on Monday afternoon, the citizens residing on or near the proposed line of the Philadelphia Traction Company, in the Twenty-second Ward, and certain streets in the Twenty-eighth, petitioned against the intention of that company to lay a track on Twenty-second street, from Norris to Susquehanna avenue. There being one track already there, they asked the Board to withhold its approval of any plan providing for another. William H. Kemble, the president of the Philadelphia Traction Company, offered, among other reasons for its laying, the fact that the company "did not want to run on another man's track," referring to the People's Passenger Railway, and insisted on the right to lay a track on Twenty-second street. John Overn and other petitioners were heard from, and George W. Ward representing W. M. Huey, protested against the project, contending that the right to lay the new track had been obtained under false pretences, upon the supposition that the company's cars would run up Twenty-first and down Twenty-second street. Consideration of the matter was postponed until May 31, when the officers of the two railway companies interested are requested to be present.

A New Electric Motor Car.

Since May 5th, the Union Electric Company have been successfully experimenting with an electric motor car. Each afternoon a car filled with passengers has been run backward and forward, on Ridge avenue between Thirty-second and Thirty-third streets, at a speed of nine miles per hour. This is the first experiment in running cars with under-ground wires. Surface or overhead wires have been used heretofore. A conduit with a slot extends under ground. It is four and a half inches wide by nine inches deep, laid on concrete, and covered with a layer of Portland cement. Sewer connections are formed at intervals. On each side of the slot in the conduit is a copper conductor one-fourth of an inch deep by one inch wide, fastened at the bottom to a grooved piece of channel iron. What is called a traveler, supported by four wheels, runs in the slot. Two springs running along channel irons on either side receive the electric current, and this traveler is fastened to the car by small chains. Wires extending from its center into the car connect the motor on the car with two electric currents. Of the two conductors in the conduit, one carries the current from the generator to the motor, and the other from the motor to the generator. A regulator in the car controls the electricity, moving the car forward or backward, and a brake acting on the wheels is an additional safeguard. An engine at the depot furnishes the necessary power. The estimated cost of the power per day is $1.84 per car, that of a horse car $4.74, both exclusive of salaries. It is calculated that an electric railway ten miles long, having fifty cars, would cost $175,000.

A Correction.

Last week a statement crept into a reference to Girard College, based on a belief, entertained by not a few in this city, that there is a resident minister in Girard College. The name of the minister was asked, and the falsity and injustice of this belief was at once shown. No minister resides there, and the allegations, so often made, that sectarian instruction is given there, cannot be substantiated by the assertion that Girard College has a resident minister. The article referred to was intended to point out urgent necessities, not to assert popular delusions, and we are glad to correct the error of pen.

Manufacturers Organizing.

An organization of the textile manufacturers of this city has been formed. It has adopted a plan which, it is hoped, will settle strikes and bring the employer and the workingman closer together.

On Monday afternoon the association met in the Continental Hotel and adopted a constitution and by-laws. About 150 firms were represented. The Rhode Island Manufacturers' Association was taken as a model. The laws as adopted provide for the appointment of a committee from each branch of trade represented in the association, to which all questions of wages and trouble between workingmen and employers in that particular branch shall be referred for arbitration. In addition to the committees representing the various trades, there is to be an aid association composed of a limited number of members from each branch, the trade having the largest number of employés and the greatest amount of capital to have the largest representation in that association. This will give the carpet manufacturers the largest representation in the aid association.

Each member of the Textile Association pledges himself by note or bond to pay in 2 per cent. of the gross amount of his wages list, to be used by the aid association for the benefit of the members. This will place at their disposal over $400,000. This amount is not to be paid in immediately, but the members obligate themselves to pay 5, 10 or 15 per cent. of the amount whenever called upon by the aid association.

In case a strike takes places and the trouble cannot be adjusted the manufacturer closes his mill and places it under the directions of the aid association, which pays all the expenses he incurs while the factory is closed, such as insurance, watchman and superintendent's salaries, &c. In the event of a mill being closed by a strike all the manufacturers in that branch of trade are bound to close their mills until the difficulty is settled in order to prevent their employés from furnishing assistance to the striking hands and prolonging the strike.

The members say they have no intention of antagonizing the workingmen, or to interfere with the present rate of wages. The association compels all its members to pay the same scale of wages.

According to the Annual Report of the Fire Insurance Patrol of this city, the number of fires during the year 1885 amounted to 1,170. This is the greatest number that has ever occurred in a single year in Philadelphia. The loss presents an average of nearly $1,500 for each fire. The deductions to be drawn from these facts inasmuch as they represent a large increase over former years in the number of fires and a decided decrease in the average loss, speak well for the efficiency of our fire department, but is not at all creditable to the occupants of dwelling houses, for nearly double the number of fires occurred in dwellings in 1885 over the record of 1884.

Serious Trouble Apprehended.

The brick manufacturers threaten to close their yards. A schedule of wages was recently presented by a committee of the Knights of Labor to the brick manufacturers of this city, but they refused to recognize them on the ground that they were neither in their employ nor brickmakers, at the same time expressing a perfect willingness to treat with representatives of their own men. A meeting of the Master Brickmakers' Protective Union was held in Industrial Hall on Friday evening, at which meeting forty-three manufacturers were present. A communication was received from a committee representing the employés requesting the appointment of a committee of manufacturers to confer with a like representation of the men in regard to an advance in wages. Messrs. McAvoy, Flood, Siner, Lloyd, Webster and Dowler were appointed as the committee. The advance asked for by the men averages about ten per cent. for all classes of laborers. Chairman McAvoy says that "the majority of the manufacturers are adverse to granting any increase, and I think the few who are willing will be overruled by the rest. If our men insist upon an advance and strike we will all close our yards, and will not deliver any bricks. This will not only throw out all our men, but will practically force a halt in building operations and throw out 15,000 or 20,000 more mechanics." The master brickmakers have adopted the following resolution: "That should our men refuse to work for the scale of wages fixed on May 20, and to go into effect June 1, 1886, we, the undersigned, agree to close our yards until the next meeting of this body." The resolution was signed by forty-seven of the fifty-one master brickmakers in the city. The scale of wages fixed is as follows: Burners and firemen to receive discretionary wages. All first-class brickmakers, $3; sorters, $3; setters, $3; pressers, $2.25; second-class molders, $2.50; third-class molders, $2; wheelers and tossers, $1.75 to $2; wheelers, $1.50 to $1 90; off bearers, $1.25, $1.50 and $1.60; carriers off, $1.20. All men around machines and claymen to receive discretionary wages.

City Councils.

The $496,000 which has been appropriated to the Water Department out of the Gas Trust surplus, Chief Engineer Ogden desires expended as follows: For a 20,000,000 gallon pumping engine at the Spring Garden station, with foundation, boilers and connections, $100,000; two steel boilers at the Roxborough station, $7,500; a 48-inch pumping main from the Spring Garden station to Twenty-fourth and Parrish streets, 5,400 feet, $72,000; a 48-inch supply main from Twenty-fourth and Spring Garden streets to Twenty-first and Bainbridge streets, 8,800 feet, $110,000; a 36-inch main on Bainbridge street, from Twenty-first to Broad, 3,300 feet, $28,000; a 30-inch main on Bainbridge street, from Twenty-first to Twenty-second, 448 feet, $3,500; a 20-inch supply main on Broad street, from Snyder avenue to Wolf street, 950 feet, $3,500; a 16-inch pumping main on Allen's lane, from Germantown road south, 1,200 feet, $2,000; a 30-inch pumping main from the southeastern to the northeastern corner of the Roxborough reservoir, 510 feet, $2,500; a 16-inch supply main on North College avenue, from Twenty-second street, 1,200 feet eastward, $3,000; a 36-inch supply main on Lehigh avenue, from American street to Kensington avenue, 3,100 feet, $26,000, and a 30-inch supply main from Kensington avenue to Cedar street, 3,600 feet, $21,500; a 20-inch main on Girard avenue, from Front street to Otis, 3,500 feet, $12,000, and a 12-inch pipe on the same avenue, from Front street to Lawrence, 2,200 feet, $4,500; for replacing pipes less than six inches in diameter with larger pipes in the old city and in the districts of Moyamensing and Southwark, and for setting new fire hydrants in these districts, $60,000; for doing the same work in the Sixteenth, Seventeenth, Eighteenth, Nineteenth, Twenty-fifth and Twenty-first wards, $40,000.

The Chief claims that by this distribution the wants of the Kensington and Richmond districts would be met; that part of the city below South street would be given an abundant supply of water, and considerable would be accomplished in getting rid of the old and unserviceable pipe in the older parts of the city.

Councils' Water Committee have approved the plan and will recommend the above allotments as suggested by Chief Engineer Ogden.

Chief Engineer Ogden has been given power to act upon the question of giving the employés of the Water Department a half holiday on Saturdays, during June, July, August and September.

Councils' Water Committee have agreed to report favorably upon an ordinance for laying water-pipe on Diamond street, from Twenty-second to Thirty-third.

Councils' Committee on Surveys met Tuesday for the reference of various petitions and ordinances for the Board of Surveys. An ordinance to revise the lines and grades of Forty-seventh street from Woodland avenue to Gray's Ferry was approved, with the understanding that all the bridge crossings over the railroads should have an elevation of at least twenty feet above the rails where practicable. The request of the Board of Port Wardens that the piers along the Delaware river front should be numbered was reported favorably by the Special Committee to whom it had been referred, and the resolution was ordered to be sent back to Councils with an affirmative recommendation.

After hearing argument on Tuesday the Police Committee of Select Council agreed to favorably report an ordinance for two frame sheds on the northeast corner of Columbia avenue and Randolph streets.

Gossip of the Week.

The warehouse 114 South Front street sold for $23,800.

A farm of fifty-nine acres on Fisher's lane sold for $12,000.

Cape May, N. J., residents propose to invest $30,000 in a race course.

The dwelling N. E. cor. Columbia avenue and Mervine street, 19x89, sold for $10,000.

Rhein Building Association of this city will be chartered with a capital of $1,000,000.

The store and dwelling, 333 Green street, with six court houses in rear, sold for $8,550.

The property N. W. corner Forty-second street and Baltimore ave., 24x120, sold for $10,500.

The corner-stone of a new Catholic church will be laid on California avenue, Atlantic City, on July 11.

A Priestly & Co. of Philadelphia will soon begin the erection in Camden of a woolen textile mill at Broadway and Jefferson street

The marble-yard and three-story brick dwelling 1721 and 1723 Penn street, subject to a mortgage of $10,000, sold by auction for $7,400.

Mr. Samuel J. Homer, Jr., is building the foundation for his brown-stone mansion on Bread street, below Master, It is to cost $78,000.

At a meeting of the Gloucester City Council last night the Fire Commissioners were instructed to receive estimates for the rebuilding of the fire head-quarters recently burned.

The contract for furnishing the new heating and ventilating apparatus for the new Court House at Woodbury has been awarded to James P. Wood & Co. of this city for $1,962.

A charter will be granted to the St. Anthony Real Estate Association, the charter and object of which is for the purchase of real estate, and for holding leasing and selling real estate, etc. The incorporators are: John J. Ridgway, Jr., Thomas G. Morton, Alexander Wood, Robert Adams, Jr., Hugh Craig, Jr., John R. Fell, Henry R. Hatfield, Henry T. Dechert, Butler Kenner Harding.

Mr. Owen McKenna is now engaged in making the excavations and building the walls for fifty-four houses on Hare and Swain streets, and six cellar walls on Thirteenth street, and six on Park avenue near Berks street, and cellar walls for forty-nine houses on Diamond and Fontain streets, between Seventeenth and Eighteenth streets, all for J. M. Sharp, the builder. He has also just finished thirty-five cellar walls on Poplar and Thirtieth sts., for Mr. John L. Shoemaker.

Labor Doings.

—The twenty-eight bricklayers who went from Philadelphia and Wilmington to take the place of strikers in Washington, D. C., have returned home.

—The strike of the men engaged in the planing mills at Chicago has ended, the men have been taken back at the old terms but are to be paid weekly.

—The members of the Carter's Union south of Market street held a meeting Tuesday night at Sixteenth and Lombard streets in view of the election next week.

—The lockout at E. Darby & Sons' wire works, No. 231 Arch street, was settled on Monday. An advance in wages ranging from $1 to $3 per week was granted.

—The Gray's Ferry Iron Works of Edward S. Buckley was closed on Wednesday, and thirty-five or forty men thrown out of work on account of strikes in the mines.

—The Addison manufacturing works are closed on account of a strike. Strikes in the mines are reported to be over, but the work will not start until the present labor agitations are quieted.

—The furniture manufacturers of Grand Rapids, Mich., have become very tired of the eight-hour system, several factories having already gone back to ten hours and the rest will shortly follow.

—The contractors and builders of Camden have decided to form a permanent organization. A committee has been appointed to report a constitution and rules, and it has been decided to make employing bosses in all the building trades eligible to membership.

—On Friday afternoon the 250 employés in Thomas Kent's Son's mill, at Clifton Heights, struck because the firm had not come to an agreement with the Executive Board of District Assembly No. 1, Knights of Labor, concerning the grievances complained of by the hands.

—A committee of the Plasterer's Mutual Protective Association met with a large number of non-union men at the hall Ninth and Girard avenue on Monday night, and succeeded in inducing forty men, representing eight shops, to join the union. Meetings will be held in other parts of the city.

—A mass meeting of carpenters was held on Wednesday evening at Lincoln Hall, Broad street and Fairmount ave., under the auspices of Local Union No. 8, Brotherhood of Carpenters and Joiners of America, to ratify the nine-hour movement as applied to the workers in the planing-mills of the city who have postponed the urging of their demands until June 1.

Items of News.

—The Boston Board of Trade has become bankrupt.

—A company to insure against cyclones has made its headquarters at Reading.

—The mail subsidy bill was defeated in the House by more than a two-thirds vote.

—The Legislative, Executive and Judicial House appropriation bill appropriates $20,558,119.

—Archbishop Gibbons, of Baltimore, has been made an American Cardinal by Pope Leo XIII.

—The American Institute of Mining Engineers began a five days session at Bethlehem on May 18th.

—A new pier is being erected by the Disstons at Taconey. It extends into the Delaware river 580 feet.

—The annual inspection of the Water Department by Councils' Committee on Water will be made on Friday, the 28th.

—A thorough test of iron ties by the Pennsylvania Railroad Company has resulted in the company refusing to adopt them.

—An effort is being made to obtain sufficient money to build a $10,000 gymnasium for the Young Men's Christian Association of Germantown.

—The President has approved the act granting the Kensington & Tacony Railroad Company's right of way through the Arsenal grounds at Philadelphia.

—The members of the Petroleum and Mining Exchange on Saturday ratified the action of the Governing Committee in deciding to list all stocks dealt in at New York.

—Governor Pattison has appointed Mr. Charles J. Harrah a member of the Board of Public Charities to succeed Mr. Mahlon H. Dickinson, the President of the Board, whose term has expired.

—The President of the Lumbermen's Union at Chicago, acknowledged that the men, for the most part, lived from hand to mouth, and, having no money, were compelled to return to work.

—The Board of Health on Tuesday declared the flooded cellars on Palethorp street, from Berks to Norris, a nuisance prejudicial to public health, and directed that Councils be petitioned for a sewer.

—The Senate in Executive Session on Tuesday confirmed the nominations of General W. E. Rosecrans to be Register of the Treasurer, and W. W. H. Davis to be Pension Agent at Philadelphia.

—One hundred and forty delegates, representing the Passenger Railroad Life Insurance Association of the United States, met in convention at the Washington Hotel on Chestnut street on Tuesday last.

—Milton Treston, the supposed Chicago millionaire, will probably be pardoned by the Pardoning Board, a petition signed by 14,236 citizens from all parts of the State having been presented in his behalf.

—Pittsburg cannot accept Mr. Carnagie's munificent gift of $250,000 for a public library because of the Constitutional restrictions as to the limit of indebtedness which it has already reached on account of the riots.

—The creditors of John E. Putnam, the Clearfield county lumber-dealer, have refused to allow trustees to continue the business, and his vast timber possessions in Elk county, together with all his personal property, will be sold by his assignee, Colonel Corcoran, of Williamsport, Pa., on May 27th inst., at Caledonia, Elk county, Pa.

—On Tuesday of last week the Real Estate Assessors of Philadelphia enjoyed a planked shad dinner at Thompson's Hotel, Gloucester. They had as their guests Justices Clark and Greene of the Supreme Court.

The *Insurance Times* says that gloomy forbodings are indulged in by some as to the effect of strikes and labor troubles on fire insurance. Idleness, discontent and revenge will, it is feared, lead to arson and incendiarism.

—Ex-Judge Elcock has completed his report as auditor of the accounts of the assignee of the Shackamaxon Bank. He finds that the total liability of the bank is $775,239.56, and the assets $346,921.83, leaving a deficiency of $428,448.73.

—The gentlemen who contributed the money to lay the Telford pavement on Twenty-second street are asked by the Citizens' Municipal Association to repair it, as its surface has become so badly worn as to make traveling dangerous.

—The Smith & Wesson revolver for the equipment of the police force has been decided upon by Mayor Smith. Each patrolman will be charged $9.04 for the weapon. This sum will include fifty cartridges and an enameled-leather cover.

—The merger of the Schuylkill River East Side and the Philadelphia, Newton Square and Chester County Railroads has been effected, and the mortgage covering them will be issued at an early day. The subscriptions to the mortgage have been paid in, but only receipts therefor issued.

—Ten thousand dollars more have been tacked on the River and Harbor bill as an amendment, to continue the improvement of St. Jones' creek, Delaware. Senator Saulsbury is the father of the amendment, and has consequently distinguished the creek with the high-sounding title of the St. Jones River.

—It seems that the statement made in one of the daily papers that there were very few savings banks in the Southern States was wrong for the Charleston, S. C., *News and Courier* states that there are 117 of these institutions, with a capital of $10,728,900, a surplus of $3,350,800, and deposits amounting to more than $100,000,000.

—The *New York Sun* says: The first insurance company in America was the "Philadelphia Contributionship," organized in 1752. This grew out of a system of private underwriting through brokers, which began at least as early as 1721. It was not until 1792 that the first marine insurance company, as such, was organized.

—The report of the Apprentice's Library Company states that there was an increase of 8,209 over the previous year and an increase of 277 readers, a decrease of 275 in the number of new applications, an increase of 1232 books, and an increase of 3,102 visitors to the reading-room. Seventy new contributors were received during the year.

—The Collector of Customs at Philadelphia has been informed that allowances may be made in cases of increase in weight of importations of iron ore caused by absorption of moisture of sea water on the voyage of importation, provided the importers make due application for allowance under the regulations within ten days after the landing of the goods.

—It is stated that the heirs of the late John Dubois, the millionaire lumberman of Dubois, none of whom were left anything by will, propose to test the validity of the deed of his entire estate to his nephew, John E. Dubois, for $1. A niece (Mrs Flood) was paid $25,000 through her husband some time since, but it is said she will join in the legal contest.

—Drexel & Co. have commenced issuing engraved receipts for the deposits of the Reading general mortgage bonds under the syndicate's plan of reorganization, and it is understood that the Governing Committee of the Stock Exchange has agreed to list them. The receipts are countersigned by the Guarantee Trust Company, the custodian of the bonds deposited.

—On Monday last Councils' Committee on Highways unanimously ordered the ordinance appropriating $3,468 to reimburse Mr. William M. Singerly for grading streets in Twenty-eighth Ward to be favorably reported. It was stated that these improvements had cost over $11,000, and that taxable property amounting to $3,000,000 had been added to the city assessment.

—Twenty-five casting-dealers employed in R. D. Wood & Co.'s iron works, Camden, quit work on Saturday because the firm had discharged three cleaners without assigning any reason for the act. It is understood that the firm had received reliable information that the men in question were Knights of Labor, and their discharge was in accordance with a notice posted in the works some time ago.

—Court of Common Pleas No. 4 on Saturday made an order confirming the sales, so far as the Pennsylvania property is concerned, of the Postal Telegraph and Cable Company to Edward C. Platt. The company being in the hands of receivers, the sale was made under the decree of the Supreme Court of New York. Eugene M. Howell was the only Pennsylvania creditor. The sale was confirmed subject to his judgment, which has been transferred to Mr. Platt.

—Forty of the leading citizens of Chester, Pa., visited Washington this week to emphasize the request for a new $75,000 public building for that place. They showed the amount of business done in the city, and represented the insufficient accommodation of the public buildings. The Senate Committee made no response, but were evidently favorably impressed. Later, a special meeting of the House Sub-committee on the Public Buildings and Grounds heard their arguments repeated.

—It is probable that the Cambria basin, the much needed reservoir, which will occupy the highest land in the Twenty-eighth Ward, will soon become more than a name. Its cost will be in the neighborhood of $1,000,000. If work is begun at once and pushed vigorously, it can be finished in three years. Its storage capacity is to be 210,000,000 gallons, and from its elevation of 166 feet it will supply the rapidly growing populous ward in which it is situated as well as the Twenty-ninth adjacent.

—The Franklin Institute Re-organization Committee have had the greater part of their plans adopted. Consideration of the eighth clauses relating to the Endowment Fund was postponed, and the eleventh clause, which provides that the institute shall not report upon any art, machine or composition of matter that is the subject of a patent, was rejected. The rest of the report, with trifling exceptions, was adopted. The consideration of proposed amendments to the by-laws was postponed until the next stated meeting.

—To test the humanity of her relatives, it is said that Mrs. Dr. Dickey, a wealthy lady of Atlanta, Ga., wrote to them that she was in destitute circumstances, none of whom, however, gave her any attention, except Dr. Y. Steelwagon, a professor in a dental college. The doctor sent her a contribution, in consequence of which she willed to him her entire estate. Being in bad health she came north, and took up her residence in the doctor's family. Two days after her arrival she died. The discarded relatives now talk of contesting the will.

—According to the House Committee on Public Lands there are 20,000,000 acres of land held in this country by foreigners. The Holland Company own 4,500,000 acres in New Mexico; an English syndicate 3,000,000 acres in Texas; Sir Edward Reid and a syndicate 2,000,000 acres in Florida; an English syndicate 1,800,000 acres in Mississippi; the Marquis of Tweedale 1,750,000 acres; Phillips, Marshall & Co., London, 1,300,000; a German syndicate, 1,000,000 acres; Lord Dunmore, 120,000 acres; Dundee Land Company 247,000 acres and Lord Dunraven, in Colorado, 60,000 acres.

—The Philadelphia Stock Exchange on Thursday finished voting on the three sites proposed for the erection of a new building. Two hundred and thirty members voted. Fifth and Library streets proved to be the favorite location. It received 101 votes. Third and Chestnut streets received 60, and Fourth street 11. Polls will be opened today and continued June 1 to 3 P. M., for voting on the question of removal to Fifth and Library streets. The sentiment of the majority of the brokers is now in favor of remaining at the old quarters on Third street for the present.

—The annual examinations for admission to the Manual Training School are announced to take place, at the school building at Seventeenth and Wood streets, on Friday, Monday, and Tuesday, June 18th, 21st and 22d. Applicants to be examined in geography, drawing, reading, penmanship, arithmetic, spelling, grammar, composition, and United States history. Boys belonging to the grammar, consolidated and combined schools, of fourteen years of age or over, who have finished the course of study in the twelfth, or any higher grade, are entitled to examination to the school.

—In John Spry's lumber-yard, the foreman, a Bohemian, went to Mr. Spry yesterday and said that he wanted to go to work, but was afraid to on account of threats made by the strikers. He said he was entirely out of money, and did not know what he was going to do. Mr. Spry drew a $10 bill out of his pocket and said: "Here, I'll lend you this." "Well, if that's the way you feel toward me I'll go to work anyway," replied the foreman, with tears in his eyes. He pulled off his coat at once and went to work, and fifty of the men followed him into the yard and went to work also.—*Chicago News, May* 14.

—The House Committee on the Laws Regulating the Election of President has reported a joint resolution proposing a Constitutional amendment creating and defining the office of Second Vice-President of the United States. It provides that in case of the removal from office, death, resignation or constitutional disability both of the President and Vice-President shall devolve upon the Second Vice-President of the United States, who shall be voted for on a distinct ballot at the same time and in like manner and for the same term as the President and Vice-President by the Electors appointed by the several States.

—When the doings of Tweed and his gang were under investigation in New York, shortly after their downfall, *Harpers' Weekly* published a cartoon in which the illustrious party were ranged in a circle and the right hand of each man was pointed significantly at his neighbor as the offender. In the same way the twelve Trustees of the City Gas Works are trying to shift the responsibility for the employment of one thousand useless laborers and the annual waste of nearly two million dollars of the people's money. With a Superintendent in charge of these works the responsibility would be placed upon one man.—*Philadelphia Record.*

—Mr. Alfred H. Love, President of the Universal Peace Union, in conjunction with the representatives of the Peace Society of Pennsylvania, appeared before President Perkins, of the Public Buildings Commission, in the Supreme Courtroom, on Wednesday last, and pleaded against the erection of the McClellan and other statues at the entrances to the City Hall, while Major Moses Veale, Rev. Dr. Henry L. McCook, chaplain of the Second Regiment, Chaplain H. Clay Trumbull, Major Lambert and State Senator Osborn made eloquent appeals in behalf of the proposed statues. President Perkins said that the Commission would give the matter proper attention.

—The report of Receiver Varnum of the German Insurance Company of Erie, Pa., has been passed upon by Messrs. S. J. M. McCarroll, Robt. Snodgrass, of Harrisburg, and Senator Walling, of Erie, who were appointed auditors and who have made their report in court at Harrisburg. The auditors found a balance in the hands of Receiver Varnum of $60,816.39, of which $8,082.25 goes for expenses. The balance, $52,733.14, is distributed among the claims allowed at the rate of 29 35-100 per cent. The auditors charge $6,000 for fees and $600 for expenses. Exceptions to their findings were made by George W. Decamp, who objects to the findings generally and the fees and expenses of the auditors particularly. The matter will be argued in June.

—The appropriation of $15,000 to the Board of Health for salaries of the Inspectors to see that new rules for drainage and ventilation are carried out will meet with considerable opposition. Several plumbers have entered a protest, claiming that these rules remove responsibilities from the plumbers without placing it on the Board of Health. It is also claimed that it will prevent progress in plumbing, and cause a great increase in cost to both plumber and citizen. It is said that in New York, from whence the regulations have been adopted, that they are to be abandoned because defective and new rules framed. The regulations are very strict, and allow only one style of plumbing, and complaint is made that the plumbers must give up systems which are practicable for one which is not.

—A special meeting of the Trade Union Representatives of Carpenters and Joiners' Unions of America was called by T. J. Maguire, General Secretary, and opened Tuesday morning at Donaldson's Hotel, Broad and Filbert streets. Its object was to prevent encroachments by the Knights of Labor and prepare a plan to secure harmony between that body and the open labor organizations. Twenty-two delegates, representing twenty-two national and international unions were present. Sympathetic letters promising support from twelve others were read. These thirty trade unions have an aggregate membership of 367,736. After the organization, a list of grievances to be remedied were presented. A committee of five was elected to prepare the text of a treaty with the Knights of Labor, and to present an address to the coming convention of the Knights setting forth the views of the trade unions.

MARKET STREET, west of the Public Buildings, seems to have a blight upon it. A slow-consuming dry mould, as it were, which has made certain buildings look as though they were intended for a museum of antiquities and were only waiting to be carried indoors. What is the cause of this? Have the real estate men looked into it? Unless the properties are held at exorbitant prices, a good thing lies concealed there. The elevated railroad, in a few years, will change all that.

BUILDERS' ITEMS.

Among the Architects and Real Estate Men.

CHAS. E. HENRY is building 18 houses on Eighteenth and Ontario streets.

GEO. LOWELL is building a handsome cottage at Bryn Mawr. J. Hutton architect.

SOME of our leading architects have had the principal portion of their work literally stopped.

THE Bingham property situated northwest corner of Seventh and Cooper streets, was sold last week for $23,000.

E. D. LEWIS is building three houses on Twenty-second street above Chestnut. R. G. Kennedy is the architect.

EXTENSIVE alterations are being made to the St. James Hotel, Asbury Park—putting on new wings and generally improving it.

DEERY & KEERL, Walnut street, are building new entrance, stable and outbuilding for the cemetery at Richmond and Bristol streets.

JANNEY & ANDREWS are building a fine dwelling and stable at Twenty-second and Race streets. Kline Bros. are doing the plumbing.

NATIONAL bank southwest corner of Broad and South streets is being built by J. K. Yarnell & Son, S. Broad street. Kline Bros. are the sanitary engineers.

BAILY, BANKS & BIDDLE, jewelers, are about building a large watch case factory, Twelfth and Sansom streets. Furness & Evans are the architects.

WILLIS G. HALE, Chestnut street, is building a fine country dwelling at Hagerstown, Md., for S. M. Bloom. It will be three-story and of brick and local stone.

CONRAD BACHLE, builder, is putting up a large house, 909 N. Eighth street, with all modern conveniences. Kline Bros. are doing the sanitary engineering.

ADDISON HUTTON, Chestnut street, is erecting a boarding school for the Friends at Westover. It is of brick, and is three stories, with a frontage of 520 feet, and will cost $200,000.

S. M. RAMSEY, late of Fifteenth street and Ridge avenue, real estate agent, who for many years represented many prominent householders, died at West Chester last week while on a visit.

FRANK J. BURR, 430 Federal street, Camden, has on his books over 900 houses, and out of the whole number he has only 15 to rent. The demand with them for houses to rent is for six or seven rooms.

J. H. HUDSON & C. G. HENDERSON, JR., of Columbia avenue, have purchased a lot, Nineteenth and Berks streets, 177x81 feet, fronting Berks street, and are intending erecting 13 ten-room houses, of brick and brown stone.

F. H. MCCANN, 3811 Lancaster avenue, has within the last few days made sale of 3812 Spring Garden street, for $5,000; also two houses on Girard avenue, west of Fifty-first street. Mr. McCann has but few houses left on his book for rent.

WM. A. TURNER, 904 Broadway, Camden, real estate and insurance agent, has been established twelve months, and has been doing an increasing business right along. He has considerable properties for sale throughout New Jersey.

MR. SNOWDEN, real estate agent, Eighteenth street below Girard avenue, says that the demand for small houses in the Twenty-ninth Ward is great at rentals from $16 to $20. Out of 250 houses which he has on his books only one is vacant.

YOUR reporter while interviewing the real estate gentlemen is astonished at the number of inquiries for properties of medium size, both in Camden and West Philadelphia, and much business might be done if the want of this kind of house was filled.

A. PRIESTLY & Co., manufacturer of cassimeres, will, on the 1st of July, commence to build a mill on the south side of Camden, N. J., on the corner of Jefferson and Fillmore streets, which will have a capacity of employing upwards of 400 hands.

YARNELL & COOKE, 4 S. Broad street, are erecting large store and warehouse, 65x130 feet, at 715, 717 and 719 Arch street; also business store between Race and Vine streets, in rear of 518 Vine street. The same firm are very busy with small properties.

JOHN MITCHELL, 309 Kaighn's avenue, Camden, like all of his brother real estate agents, complains of the scarcity of small houses within easy distance of the ferries. The demand for them is rapidly growing. He made a small sale this week of a house on Liberty street for $900.

C. WESLEY THOMAS, 3903 Lancaster avenue, has just opened up a suite of offices, and is intending going into the real estate and insurance business. Mr. Thomas has already received from his many friends in West Philadelphia much encouragement, and so far things look good for him.

B. F. GLENN & SON, conveyancers and real estate brokers, 560 N. Seventeenth street, have within the last week made some considerable sales of fine dwellings at good prices on both Green and Spring Garden streets. They are also building 11 three-story houses on Perkiomen street as an investment.

A. S. WADE, 212 N. Seventeenth street, is erecting 20 frame cottages at Merchantville for F. B. Bleakly; also building 10 three-story houses, Twenty-seventh and Oxford streets, for J. A. Forepaugh. They will be of ornamental peerless brick and mortar, with brown stone trimmings, and will cost about $30,000.

CHAS. F. HALL, 3944 Lancaster avenue, made sale of dwelling for $3,900, 631 N. Thirty-eighth street; also three houses on Girard avenue above Forty-ninth street.

Mr. Hall says that large properties are not selling as briskly in West Philadelphia as might be wished. His house renting of small houses is very satisfactory, and his key board has but few on it.

FARR & SON, 412 Kaighn's avenue, Camden, N. J., have been established only three months, but are having a fair share of the real estate business. Mr. Farr has considerable properties on his sale board in both Camden and Atlantic City, and others. His Camden properties range from $2,000 to $3,500. He has 100 lots of 25x140 at Atlantic City, four squares below Chelsea, which he offers for $2,500 each.

ALBERT F. BROWN, insurance and real estate agent, 125 Market street, Camden, has just opened up some fine offices, and intends to confine his business solely to selling and renting of properties. Mr. Brown was for many years with Mr. Frank J. Burr, of Camden, who is well known to real estate people, having been established upwards of 30 years. Mr. Brown has already had good success with his new undertaking.

HOLLINSHEAD & NEWKIRK, real estate agents, 927 Broadway, Camden, N. J., made sale of frame dwelling on Liberty street below Broad for $650; also brick house, 717 Broadway, for $2,600, and another, 713 Spruce street, for $950; also sold plot at Collingwood, 50x75 feet, for $300, and 19 four-room houses on Berkeley street and 19 on Senate street for $33,000. They have several very desirable houses on their books for sale, ranging from $900 to $3,200.

THAD. P. VARNEY, 284 Kaighn's avenue, Camden, says that the outlook for real estate in South Camden is bright, and that great sanitary improvements are talked of. He further says that during the sixteen years of real estate business he never saw it look brighter than at this present, and that the demand for houses (small) has already commenced. This demand is brought about in consequence of many new mills having been built and others building in that neighborhood.

WILSON BROS. & Co., 435 Chestnut street, are making extensive alterations and additions at the hotel at Chesapeake Bay for the Bay Ridge Company, putting up restaurant pavilion, band pavilion, 300 bath houses and bath pavilion, also an extensive skating rink, grand stand and other outbuildings connected with the mile race course; also building two cottages at Woodbury, N. J., for B. W. Andrews, Esq.; also frame house for Mr. Watkins, at Norristown; also putting up hotel at Lancaster, for James Stuart, of stone and brick.

E. HURST BROWN, 1430 S. Penn Square, has just completed contract to erect a house at Haddonfield, N. J., for M. A. De Haven, corner Cottage street and Washington avenue. The builder is L. J. Stone. Also house and stable near Radnor Station, P. R. R., for Thos. P. Twibill; also making sketches for a block of five stores, corner of Erie and Walnut streets, Cleveland, Ohio. Owner, James Parsons. He is also making drawings for proposed alterations at Thirty-fourth and Wallace streets, West Philadelphia, for Samuel I. Knight.

CHAS. H. FELTON, 203 Federal street, Camden, is putting out considerable sums of money on real estate mortgages—on Saturday last, on one transaction, $7,500—and has considerable calls for more, at 6 per cent.; but he experiences some difficulty in procuring it. Mr. Felton made sale of two dwellings on Penn street, Camden, for $2,800 each, which will pay from 8 to 9 per cent., and has many more which will bring in a similar interest. He says that the demand with him for properties is for four-room houses, from $9 to $13, in the neighborhood of the ferries.

A. A. HARMER, Twenty-first Ward, is building four houses on Woodville avenue, 16x24 feet, eight rooms, and all modern conveniences, and will sell for $2,800 each; also building 12 thirteen-room houses (semi-detached), on Camac street, which will sell for about $5,000 each; also building a saloon for J. F. Betz, at Thirteenth street and Ridge avenue; also making extensive alterations at 1311 Ridge avenue, for J. F. Betz; also will shortly build on the country residence of J. F. Betz, Jr., spacious billiard rooms, ten-pin alley, carriage house, hothouses, etc.

TWINING & SON, 2133 Columbia avenue and 430 Walnut street, are the writing agents for the Girard Fire Insurance Company, also for the Queen Insurance Company, and in both instances do a considerable business.

Within the last few days they made sale of a three-story dwelling, 1930 N. Twenty-second street, for $5,100; also store and dwelling at Berks and Camac streets, for $7,000; also store and dwelling, 1833 Ridge avenue, for $9,500.

They are having a good demand for small dwellings, of four to five rooms, both for purchase and rent. The business of this house, this last year, has grown very extensively.

WM. GETTE, 404 Crown street, has in course of erection a fine boiler house and stables for the Prospect Brewing Company, 120 feet frontage and 73 feet deep, with a height of 38 feet, with centre gables and two corner towers. It contains four boilers, each of 100 horse-power. The chimney in connection with this house is 140 feet high, and 10x6 at the bottom. The stables, which are on the second story, will accommodate 60 horses. The first story is for wagons, and holds 37. The third story is used for harness, hay and straw, etc. The structure of the boiler house is of brick and iron, and the stable flooring is also of iron.

Mr. Gette is now erecting for Mr. J. F. Betz a fine hall, which he will term the "Victoria Hall," between Race and Vine streets, on Ninth street, at the cost of $35,000. It will be built of strong, heavy brick work. The front will have an iron ground floor, and the upper portion will be of fancy brick, It will have large hallway entrance, with a stove on either side. The hall which is in the rear is 2,500 square feet, and will have a spacious gallery round it. The upper portion of the building will be used as lodging rooms (42), and be filled up with bath and wash rooms, and other necessary accommodations. The basement, which will cover 4,600 feet, will be used as an ale cellar. The building throughout will be heated by steam.

Building Permits.

Andrew Gordon, 1732 North Thirteenth st., bathhouse, S. W. cor. Thirteenth and Poplar sts., 11 ft. by 9 ft.

S. W. Evans & Son, 4725 Paul st., Frankford, two-story brick building, 4727 Paul st., 28 ft. by 39 ft.

William F. Read, 2000 Spring Garden st., addition to mill, W. s. of Twelfth st., between Snyder and Jackson sts.

John Klebe, agent, 2228 North Eleventh st., a bathroom, N. E. cor. Bodine and Jefferson sts., 9 ft. by 9 ft.

John L. Thomas, 225 Levant st., extension of back building, 1429 North Eighteenth st.

Four three-story houses, 15 ft. by 40 ft., Nineteenth, above Fairmount ave., to John Gibson, 1323 Reed st.

WILLIAM PAUL GERHARD, 6 Astor place, New York, the sanitary engineer and author, has prepared a little work, entitled "A Plan for Sanitation in Factories and Workshops." The author dwells with more than his usual strength upon the necessity for more care, both in the construction and ventilation of factories, the maintenance through sanitary observances of health and cleanliness, the driving off of noxious effluvia, and last, though not by any means the least, he touches upon the structure itself and the material the factory should be made of.

—The statement of the United States Treasurer shows gold, silver, United States notes and other funds in the United States Treasury, on Friday, as follows: Gold coin and bullion, $238,119,086; silver dollars and bullion, $179,659,659; fractional silver coin, $28,897,513; United States notes, $36,724,805; National Bank notes, $456,400; National Bank notes in process of redemption, $4,095,417; deposits with National Bank depositories, $13,642,427; total, $501,595,307. Certificates outstanding—Gold, $81,735,485; silver, $89,725,395; currency, $14,250,000.

t. t.—Terre Tenant.
S.F.—Scire Facias to revive Judgment.

Sum C.—Summons in Case—A form of action invented to meet all civil cases, the form of which is not specially provided for.

Where there are no figures to indicate the amount of the judgment, the damages have not been assessed.

The first name in each line is that of the judgment debtor.

An asterisk (*) denotes judgment confessed or bond and warrant conditioned.

The figures 1 2 3 and 4 immediately after the name of the plaintiff indicates the number of the Court. The letters D. M. J. and S. after the number of the Court indicate the Term as D., December Term, M., March Term, as J., June Term and S., September Term.

An examination as to the nature of judgments and suits will be made for subscribers without extra charge on application.

Among the Plumbers.

J. E. EYUNSON, 207 South Tenth street, has the plumbing of a large factory and stores at Seventh and Arch, for H. C. Lea. Also, large dwelling at Merion, for Mrs. Matthew Baird.

CLARK BROS., 218 South Twelfth street, are working on a fine building on Chestnut street, near Front. Also, putting up water mill and doing the general plumbing work of a fine country residence a few miles out of town on the North Penn Road. He is very busy with his jobbing trade.

HAINES, JONES & CADBURY, 1136 Ridge Road, are doing an extensive business, but in consequence of being so busy were compelled to ask us to call in again when they will have much to say to us. Mr. Fowlks, of this well-known firm will shortly leave for Europe, when he will combine business with pleasure

KLINE & BRO., 430 and 432 North Twelfth street, are having large operations; amongst them we give a few: Fine dwelling house on Broad street below Master, adjoining the Forrest Mansion. It is built for Samuel Horner, Jr. It will have three English porcelain tubs, set with tiles; the drainage is to be of the most complete with concrete covering, and the plumbing generally will be of the most approved character with thorough ventilation. A stable will be built in the rear and will be thoroughly ventilated. The entire cost of the building, when completed, will be about $150,000. Five houses at Eighteenth and South streets; P. J. Essick & Son are the builders. Also, large warehouse for G. S. Harris, between Eighth and Ninth, on Cherry street. Also, making extensive alterations at Marks Bros., at Eighth and Arch. Thirty houses for Wm. Charlton, Twenty-eighth and Brown streets, of two and three stories. Putting Williams' Patent Exhaust Steam Machinery in the glue works of Talberts and Tunnell, at Gaul street and Wheat Sheaf Lane, Richmond. The business of this house has never looked so satisfactory. They have estimates out by the dozen and their anticipations are great. Also, are doing the plumbing and general sanitary work at the New Jewish Synagogue at Seventh and Columbia ave. They are also making extensive sanitary alterations at the St. James' Hotel, Asbury Park, putting in new water supply, water closets, washstands and other modern improvements.

This firm have lately been fortunate enough to gain the services, as foreman, of Mr. J. Packwood, who, for some considerable time, practiced in Wilmington as a sanitary engineer. The services of this thoroughly practical man will greatly add to their already extensive business.

A Cheap Concrete.

A kind of concrete made without cement is said to be coming into favor with Parisian architects. It is composed of eight parts of sand, gravel and pebbles, one part of burnt and powdered common earth, one part pulverized clinkers and cinders, and one and one-half parts of unslacked hydraulic lime. These materials are thoroughly incorporated while dry into a homogeneous mixture, which is then wetted up and well beaten. The result of this is a hard and solid mass, which sets almost immediately, becoming exceedingly strong after a few days. It may be made still stronger by the addition of a small proportion—say one part—of cement. Among other constructions to which this material has been applied is named as an example a house 65 feet by 45 feet, three stories high, standing on a terrace which has a retaining wall 200 feet long and 20 feet high. Every part of this structure is made of hard, economical concrete, including foundations, cellar vaulting, retaining wall, and all exterior and internal walls, together with their cornices, mouldings, string courses, balustrades and parapets. No bond iron was used in the walls; and no wood lintels, beams or posts were required. It is claimed for this material that it is not liable to crack or scale, and is extremely cheap, as it can be made almost wholly from materials to be found everywhere.

"GILBERTSON'S OLD METHOD."

Takes the Contract for the WHITE HOUSE roof at WASHINGTON,

at 70 cents per box over the so-called "Genuine 'Old Style'" for the IC 14x20 size (equal to $1 40 per box for the 20x28 size).

The award not made with reference to price alone, but also from tests made as to the BEST QUALITY.

The guaranteed weight of the "Gilbertson's Old Method" offered was 120 pounds net per box of 112 sheets; while the so-called "Genuine 'Old Style'" was offered at 112 pounds.

In order that consumers may more thoroughly understand WHY the "Gilbertson's Old Method" was accepted AT SUCH AN ADVANCED PRICE OVER THE SO-CALLED "GENUINE 'OLD STYLE,'" we quote the following from the specifications made by the Government for the Roofing Plates to cover the roof of the Executive Mansion:

"The Government desires to secure the BEST QUALITY OF DIPPED ROOFING PLATES, and samples showing surface imperfections or irregularities in size or weight will be rejected.

"Comparative tests will be made for weight, ductility, uniformity of plates and thickness and quality of coating, ALL of which, as well as the prices, will be considered in making the award.

"The United States desire ONLY THE BEST CLASS OF MATERIALS, and parties who imagine that any other class will be received are respectfully requested not to bid."

PHILADELPHIA, MONDAY, MAY 31, 1886.

THE labor agitations still continue to be a very exciting thing to builders and investors. So far as local matters are concerned we are nearly out of the woods. A few strikes will obstruct harmonious movements in the building trades, but it is thought that in a week or so everything will be adjusted. The cabinet makers and furniture workers are still holding out and the employers are not a unit to any concessions. The brick yard employés who have been threatening to strike for some time, ratified the recent conference had with their employers and postponed the strike for the present. The painters, bricklayers, masons, plasterers and others are all working quietly upon the terms agreed to, and to all appearances will continue to do so throughout the season. *Bradstreet* reports $5,000,000 worth of suspended operations in this city and a loss of $60,000 in wages, with a loss of $50,000 profit in current business. The total loss in wages throughout a dozen of the leading cities is put at $3,000,000 in round numbers. The loss in business during the past 30 days is estimated by this same authority to be not less than $25,000,000. Most of this effects building operations. The agitation for shorter hours has been practically a failure. It is impossible to present the result in figures. Figures and approximations are deceiving. A great many working men have secured nine hours, comparatively few eight. Some of the few who have secured eight have voluntarily returned to the ten-hour day and others are likely to follow. One reason for this failure is that the movement did not receive the endorsement of the Trades Unions or the Knights of Labor, but was carried on in an independent fashion. The greatest harm has been done in Chicago, the least in Eastern cities. The Master Builders' Association of Boston, thinks the losses in that neighborhood will foot up not less than $5,000,000 and at Providence, $1,000,000. The losses at Pittsburg are put at $300,000; at Louisville, $500,000; at Chicago, $300,000; throughout New England, $6,000,000. Fortunately a great deal of this work will be done as soon as investors and builders feel safe. The factors of safety are not simply that no more strikes will take place, but that a reaction is not probable; that there will still be a demand for houses; that people will be able to rent them and pay rent, and that the general industrial condition will be as it has been. Of course as to this there are different notions. Some are predicting that we are on the eve of another depression, that capital must take warning; that organized labor must be taught a lesson, and that capital cannot exist upon its present margins, or that at least it will not leave its present hiding places and seek investment. A fair and reasonable view of the situation is that the industrial agitations are about over; that a large amount of suspended work will be undertaken; that capital will be anxious for employment and that the business of the country will go on smoothly from this out.

THE opinion is gaining ground that some water system must be adopted which will be comprehensive enough to anticipate the wants of this city for the next fifty years at least.

The Sanitary Convention recently held here has resulted in presenting to our citizens our true status from a sanitary standpoint; impending and threatened danger have been pointed out, and we now see our true situation, and are consequently better able to appreciate our necessities.

Party issues and factional contentions must give way to the imperative and incontrovertible certainties and consequences which are sure to follow unless something is done.

Of course we must wait until a scheme can be decided upon which will positively fill the bill in every particular; experiments will not do, and we must make up our minds to listen to no proposition that involves a mere tinkering with what we have got, for the sake of expediency, or on the score of economy.

Such works as are necessary to give us the water supply and the quantity of water we need will take—with plenty of money—five years to complete; hence it is necessary that the initiatory proceedings, having in view the conception and consummation of whatever plan we may adopt, should be begun now.

It would be a good idea for our leading business men to meet, and quietly and carefully discuss the subject. Great practical good would come out of such a gathering. As it stands now we are no nearer a settlement of the question than we were months or even years ago.

IT makes every man who had anticipated grand things for the spring of 1886 feel mad clean through, that so little has been done, when the opportunities were so great, and so many capable men were ready to act, capital hungry for investment, operations contemplated, commenced and, if not altogether abandoned, allowed to rest, owing to the uncertainty of the situation and the fear of loss; and what have the strikers gained? Not much, certainly, unless idleness, debt, suffering and loss of employment, for a time at least, can be counted on as gains.

A PLETHORIC treasury seems to increase imaginary wants. Blessed be they that have nothing, although not a pleasant aphorism when the larder is empty; yet in the case of the national treasury lots of money would have been saved if there was none in it. There's a good chance now to kick up a war with England about the Canadian fisheries. Such a war would have one commenable feature at least—it would save the tired brains of the people's representatives from worrying over the money in the United States treasury, and concocting schemes to get it out.

ISN'T it about time that some of our enterprising capitalists should form a company with the view of applying for a charter for a steamboat company on the Schuylkill?

The Fairmount Steamboat Company, imagining that their monopoly will last forever, have but one view, and that is to glean from the public the greatest amount of shekels, without regard to the accommodations necessary to make a trip on the Schuylkill anything but a trial of patience and an infliction of suffering. On Sunday, when the weather is fine, the boats are crowded, many beyond their seating capacity, and a trip up the Schuylkill on a fine day is anything but pleasant.

The boats of the Fairmount Steamboat Company are little better than tubs, and are neither roomy enough for comfort, or at all suitable for the business.

The time between boats is entirely too long, and the arrangements of the company are about as poor all around as they well could be.

The traffic in summer is exceedingly profitable, and the day has gone by for the present imposition to be tolerated any longer.

A little competition is needed, and the sooner it comes the better.

It is a great inconvenience to the business men to not be able to drive through unfrequented portions of the Park to deliver goods in Germantown, Chestnut Hill, Roxborough, Manayunk and other suburban towns. Considerable trade is carried on between these points and if unable to take that route, the business men will be obliged to drive several miles.

The Saturday afternoon early closing movement is gradually working its way into favor among the dealers and manufacturers of building material. Many have already agreed to close their stores on Saturdays at 1 P. M. during the summer months. The following firms closed as per agreement on Saturday last: A. W. Allen, T. B. Bickerton & Co., C. A. Blessing, Brown, Owen & Taylor, Cox & Sons, Ford & Kendig, Froelich Bros., William H. Green, Getze & Reeves, Haines, Jones & Cadbury, A. S. Hills, Hunter & Dickson, Jenkins Bros., McCambridge & Co., John Maneely, Reading Iron Works, Stambach & Love, A. D. Troxell & Co., Williamson & Cassedy and Whetstone & Co.

Building material keeps cheap. The labor situation keeps muddled. Investors and builders are still on the anxious bench. The situation to-day is not materially improved. Architects promise considerable news in a week or two. The iron workers are apprehensive of trouble with their workmen over a demand for an advance of 7 per cent. Even the pork butchers are striking for higher wages. The malady must run its full course. Employers everywhere are organizing. The hosiery and knit good manufacturers to the number of fifty, employing 10,000 men, have agreed to stand together. The cabinet manufacturers are still firm and quite a number of strikers have returned to work. The saw and planing mill men are having trouble with their workmen; a strike is threatened June 1st. One half of the planing mill work used in this city is made in the interior of the State, because of cheaper labor, material and lower freights; to advance wages is to still further decrease the business done. The nail makers report a declining tendency in nails; quotations are now $2 and in some cases sales are made at less. Lumber holds up pretty well, but now and then bargains are heard of in it. The arrivals continue quite large; yellow pine has been selling very freely; the hard woods are rather scarce, especially for the better qualities. The Brick Manufacturers' Association held a meeting on Thursday evening in Industrial Hall to arrive at some understanding on the wages question The Master Metal and Slate Roofers and Metal Cornice Workers' Association met on the same evening and appointed a committee to meet their employés. The Building Trades' Council met and talked over the sash and door mill workers case. As to summer prospects it is impossible to arrive at any harmonious conclusion, because of the contrariety of opinions expressed. The elements exist for a general revival of business and the probabilities point in that direction.

REAL ESTATE.

New Publication.

George P. Rowell & Co., the advertising agents, at 10 Spruce Street, New York, have now ready their annual Newspaper Directory. The book is the most elaborate work of its kind ever published in this country. It possesses a wonderful source of information pertaining to newspaper statistics in both the United States and the Canadas, besides which it gives a description of each place in which newspapers are published, stating name of county, population of place, etc. The price is $5 and can be obtained by addressing the firm.

A Valuable Quarry.

At Port Kennedy, Betzwood Station, on the Pennsylvania Railroad, there is a splendid quarry of granite, owned by Mr. Owen McKenna, the contractor. Large quantities of this stone are shipped to this city for building and other purposes, such as footing stone and curbing of every description.

Mr. McKenna is prepared to fill orders for large or small quantities, to be delivered on any siding on the line of the Pennsylvania Railroad. Builders and contractors can obtain the necessary information by addressing Owen McKenna, 1718 N. Twenty-seventh street, Philadelphia.

Gunner's Run Reeking with Filth.

One of our reporters says that if the editor of the Real Estate Record would only stray to the vicinity of Gunner's Run, in the Eighteenth, Twenty-fifth and Thirty-first Wards of this city, he would readily understand why that locality is so unhealthy. Our representative stood upon one of the bridges that crosses it to-day, and counted six dead animals, lots of filth of all kinds, dying vegetation, the water the color of ink, with a scum like oil upon its top, and a vapor arising therefrom that almost took away his breath, and all this filth emptying into the Delaware just a short distance from the pumping station of the Kensington Water Works. Is it not about time this canal of filth was filled up? The people in that locality say it is.

Our New Bridge.

There is a prospect of a new bridge across the Schuylkill at Market street. Councils have given their assent to the ordinance authorizing the expenditure of $300,000 for a steel bridge of the latest and best pattern, and there is no reason why the work should not be set in motion early in the coming summer. Certainly, it cannot be finished before it is needed. Not only at Market street, but at many another point, bridges are, if not absolutely required, at least they would be of great value. Philadelphia is worthy, from her rank among cities as to beauty and size and wealth, of the best in architectural adornment; but it would be far better, for the interests of citizens and city, to build three bridges, at $300,000 each, than one costing $1,000,000. It is the greatest mistake in economy to so long delay their building, and it would be far more sensible, and a saving in the end, to build one at every available point, than to study for months how to avoid building any. The truest economy in this instance is extravagance, and it would be well to consider, with the intention of effecting it, the building of the mighty bridge across the Delaware. Abundant communication with the suburbs is a necessity. It will increase the value of real estate from the start, and will bring Philadelphia up in the scale of business centres at an astonishing speed.

The Traction Company and Five-cent Fares.

The Traction Company boldly denies the city's right to require five cent fares. It has secured the very best legal talent, and will fight the case to the bitter end. Comments at this time are not in place. At the same time, it is no use to rest quietly under the programme marked out by the managers of the Traction Company. They seem to have the technicalities of the law on their side. It looks as though they had laid their foundations deep, as they have quietly; that the laws were made to suit them, and that while the people of Philadelphia were sleeping they were quietly at work at Harrisburg, with the ablest legal talent, so managing their affairs that while promising five-cent fares they could secure six. Of course there is an *alter ego* in the case.

The city's bill of complaint was grounded upon an act of Assembly of May 8, 1876, and an ordinance of Councils of May 31, 1883. The former provided that passenger railways might use other than animal power whenever authorized so to do by the Councils of such city, and that the limitations in their charters restricting them to the use of horse power should then be repealed; provided that Councils should not give such authorization except upon condition of a reduction in fare to five cents. Under authority of this act the ordinance authorized the West Philadelphia Company to substitute a cable motor on its line, upon condition that the fare should be reduced to five cents. The substitution was made, but the reduction did not follow.

The ground taken is that the assent of the city is not necessary to the substitution of a cable motor. This may be a fact, but it is strange if it is a fact, and yet not strange, because with the turn of the wrist, so to speak, the Traction managers could secure legislation at Harrisburg which would kick the city out of their way and let them do as they please. They indirectly assert that they have done this, and that the city can whistle while they laugh.

The railway company further avers that, "so far as its franchise of constructing railways and of collecting toll for the carriage of passengers is concerned, the same is held by it, and has been in no wise dedicated to the said Traction Company; that said company has not by its authority, nor does it so claim, been vested with any power to construct on any street any railway, or to establish any rate of fare for the carriage of passengers thereon; that, for the purposes of the economical and safe drawing of cars on and along Market street, the agreement between these corporations provides that the fare established by your respondent shall be collected by employés in the cars drawn by it, which income is made the subject of accountability satisfactory to each of the corporations to said agreement, and of no relevancy to anything as to which the complainant has the right to inquire."

The Court will now be called upon to decide whether the act incorporating the Traction Company and giving it authority to "construct, maintain and operate such motors, cables and necessary or convenient apparatus and mechanical fixtures as will provide for the traction of the cars of passenger railway companies," subject to "reasonable regulation for the protection and convenience of public travel," gives to either it or the railway company authority to use a motive power which the railway company did not originally have the right to use, and which Councils only authorized it to adopt upon condition that the fare should be reduced.

The Public School Board of Camden has begun the building of a new school-house at Broadway and Clinton street. They claim it will be second to none in appointment.

Tioga.

What is known as Tioga was originally a farm, mostly owned by Kenderton Smith. Some 35 years ago, ten gentlemen formed themselves into a land company and bought portions of his land, and named it Kenderton. The Germantown and Norristown, now the Reading Railroad, put a station on Tioga street, naming it Tioga Station after the street, to distinguish it from Nicetown Station, previously established at Nicetown lane.

Although such a short distance from the city, the place was of a very slow growth, owing to the short-sighted policy which kept only few trains running. The high fares of the old Germantown and Norristown Railroad helped to discourage its growth. When this road was leased to the Reading, a different policy was inaugurated at once—better cars were put on, more of them to the train, and more trains run. The fare was put to a price to compete with horse cars. This gave an immediate impetus to building operations.

Theo. Reger & Roberts, the builders, purchased land on the north side of Venango street, between Twenty-second street and Township Line road, and put up the row of houses since known as Paradise Row, on account of its beautiful appearance in the spring, summer and autumn. These houses set 40 feet back from the street, with green lawns, trees and flower gardens on the front. These were quickly followed by Theo. Megargee's row on the opposite side of the street, same square; of more expensive houses, and by two more rows by Reger & Roberts on the west side of Twenty-second street above Venango and the south side of Nicetown lane above Twenty-second street. Other rows followed rapidly, of the same character of houses, on Twenty-second street above and below Tioga, and on Venango below Twenty-second street.

Mr. George W. Blabon's very expensive house was built about this time on Venango street, followed by another handsome house for his son, and two more pointed stone, large houses, built by the same gentleman, alongside the others.

John Duncan built two handsome houses right opposite, adding to the variety of the place.

Some idea of the jump that has been made in real estate in Tioga can be formed when it is stated that a tract of 14 acres, running from Nicetown lane to Tioga street above Twenty-third, unimproved, without streets, curbing or grading or sewers, sold at auction for $5,000 an acre.

Last season, Theo. Megargee built four beautiful Queen Anne houses, with English walls in front; followed, this year, with a pair in the same style, but larger, by Miss Alice Smith, on Tioga street, and a row of twelve, something in the same style, on Nicetown lane, by G. W. Blabon.

Mr. S. T. Fox, real estate agent, of this city, has also a very fine house at Tioga, standing on an acre of ground, with beautiful lawn, flower garden and vinery, and everything necessary to complete a gentleman's country retreat.

Great interest is taken in the cultivation of flowers, and on a fine day, throughout the season, it is a treat to pass through delightful Tioga.

Mr. Fox is interested in the development of Tioga, and has done much to attract buyers of lots and builders to that attractive suburb. Under his energetic management it is destined to become ere long one of the most delightful suburban resorts about Philadelphia.

—The Chicago wood-workers have considered the decision of the sash, door and blind manufacturers to return to the ten-hour day, and have decided not to return to that system.

Items of News.

—The sewer bricklayers have generally succeeded in obtaining more pay and fewer hours.

—The new Catholic church at South Bethlehem cost $60,000.

—An effort is being made to consolidate the different trade exchanges in this city.

—A slight fire occurred in the Public Buildings on Tuesday. No serious damage was done.

—The first service was held in the new Christ Reformed Episcopal Church on Sunday evening.

—The people of Bainbridge street are dissatisfied with the manner in which some contract work is being done.

—The French Cabinet, by a vote of 6 to 5, on Tuesday, adopted the principle of the expulsion of the Orleans princes.

—Charles S. Lowry, recently elected a member of the Board of Port Wardens, has been sworn in by Judge Allison.

—The majority of the Committee on Ways and Means has reported adversely the bill to carry into effect the Mexican treaty.

—The personal estates of the late Charles Wilt and Henry F. Murphy have been inventoried at $42,449.48 and $32,874 repectively.

—City Solicitor Warwick says that the act authorizing drainage inspectors is mandatory, and Councils must provide for their pay.

—A company has been formed at Berks, Huntingdon county, to bore oil in that section. Stock to the amount of $2,000 has been subscribed.

—Eli Garrett, Secretary and Treasurer of the Edgemoore Iron Company, died suddenly, on Tuesday, at Wilmington, Del., aged 56 years.

—A number of plumbers have protested against an appropriation to pay the new Drainage Inspectors to be appointed by the Board of Health.

—The cart owners of the city have united and applied for a charter under the title of "The Carters' Protective Association of the City of Philadelphia."

—It is said that the Senate Committee on Commerce, in its preliminary study of the River and Harbor bill, finds little in the measure as it came from the House to suit its views.

—Charles Simpson, colored, aged eighty-six years, recently died under suspicious circumstances. The deceased was Stephen Girard's body-servant, and as such accumulated some money.

—During the past three years 1,825 new buildings have been erected in Camden; additions, 344; alterations, 175. The number of houses entirely wrecked by the tornado of last August was 320.

—The Health Board has empowered Dr. J. G. Richardson to act as its representative to the several health authorities of Europe to inquire into the systems of plumbing and drainage in use abroad.

—It is stated that eleven English companies with an aggregate capital of $20,000,000, and owning 672,000 head of cattle, are engaged in cattle raising in this country. They own and lease 8,319,072 acres of land.

—The Philadelphia, Wilmington and Baltimore Railroad Company and the Lehigh Coal and Navigation Company have declared semi-annual dividends, the former of 4 per cent. and the latter of 2½ per cent.

—Betz & Sons, brewers, are to be dispossessed of some property leased from the city. The lower floor of the building leased has been turned into a beer saloon. The matter is in the hands of the City Solicitor.

—A lot has been purchased at Forty-third and Chestnut streets, 175 by 220 ft., for $60,000, on which to erect Christ Reformed Episcopal Church. Services are at present being held in West Philadelphia Institute Hall.

—The annual excursion of the State Editorial Association will go this year to Atlantic City, the time fixed being the week beginning on Monday, July 5. The rendezvous will be at the Girard House, in this city.

—The Grand Lodge of the Brotherhood of Railroad Brakemen have expelled twenty-six of its members for originating the strike on the Union Pacific Railroad, and have suspended thirty more for participating in the strike.

—The Alexander Stewart Lumber Company lost by the big fire at Warsaw, Wis., on Tuesday last, $150,000 in buildings, machinery and lumber. B. G. Plumer lost $50,000 in lumber. The lumber is said to be fully insured.

—Auditors' reports filed on Tuesday awarded dividends of 6½ per cent. to the creditors of Henry D. Moore, Jr., brush manufacturer, and 22½ per cent. to the creditors of Glading & Feitig, butchers and hotel proprietors.

—The Water Committee of City Councils of Camden met on Monday night and decided that an appropriation of $30,000 would be needed this year for that department. This is an increase of $5,000 over last year's appropriation.

—Mr. John E. Dubois, who has succeeded to the great estate of his uncle, is about to marry the daughter of Hon. Geo. A. Jenks, who has just resigned his position at Washington to become the legal manager of Mr. Dubois' business.

—The House Committee on Territories have voted to report adversely all bills relating to the admission of Dakota as a State except that introduced by Mr. Springer, providing an enabling act for the admission of the whole Territory.

—Most of the police lieutenants reported to the Mayor on Monday that the streets in their districts were in a fair condition; Third and Nineteenth, clean; Sixth, Eighth, Eleventh, Twelfth, Twenty-third and Twenty-fourth, good; Second and Tenth, dirty.

—Specifications regarding food and clothing and other necessary articles for the Soldiers' Orphans Schools of the State, were issued on Saturday, May 22d, by the new Inspector, General Louis Wagner. Monthly reports are to be made by the managers.

—The Reading officials are agitating an advance in the price of coal to the line and city trade and an increase in the freight rates after June 1. The other anthracite companies, however, are opposed to an advance, and it is not likely that one will be made.

—A number of stockholders of the Germantown Passenger Railway Company, who have become dissatisfied with the management of that corporation by the People's Company, propose to contest for the control of the road at the annual meeting next month.

—The telegraph system of the British Islands, under control of the Post Office, now amounts to 156,000 miles, and employs 17,000 instruments. The standard rate is twelve words for a sixpence, address included. Press messages alone now average a million words a day.

—During the storm of Saturday night lightning struck the saw and planing mill of R. W. Hulings & Son, at Fork Landing, two miles from Moorestown, totally destroying it, together with a large stock of lumber. The loss will reach $11,000, on which there is $6,000 insurance.

—The President of the Board of Poor Guardians has been authorized to advertise for proposals for rebuilding the burned portion of the Blockley Insane Department. It is intended to leave the end of the female department unfinished, until more money is appropriated by Councils.

—The Receivers of the Philadelphia and Reading Railroad Company have concluded not to issue new car-trust certificates except as the equipment which they are to cover is needed. The cars are to be built in the shops of the company, and the locomotives, twenty-five in number, at the Baldwin Works.

—Arrangements have been completed by Chief Walker, of the City Electrical Department, for laying an underground cable on Broad street, between Columbia and Lehigh avenues, for supplying electric light. Work was begun on Wednesday, and it is expected that it will be completed within ten days.

—The will of Mary H. Newbold contains bequests of $1,000 to the Woman's Suffrage Association of Philadelphia; $500 to the Home for Aged and Infirm Colored Persons; $500 to the Friends' Boarding-House Association, and $500 to the Home for Destitute Colored Children. The estate is worth $50,000.

—T. DeLemos and A. W. Cordes, New York, N. Y., claim they have made improvement in form of construction. The court wall of the building is made with step-shaped offsets for different stories. The walls of the offsets are supported on beams above the floors, and are covered on top by inclined skylights.

—Joseph Goodman, a wealthy machinist of Pittsburg, has decided not to build a large foundry which he had contemplated erecting at the foot of Fifteenth street, South Side. He states that he found it impossible, owing to the present strike of the building trades, to induce a contractor to undertake the erection of the building.

—On Friday afternoon a train was run over the new iron bridge and long trestle-work at Hamburg, on the line of the Pennsylvania Schuylkill Valley Railroad. The bridge is of wrought iron, 600 feet long and 20 feet above the river. The trestle-work west of the bridge is 1,200 feet long and 22 feet high. The bridge cost about $250,000.

—The net earnings of the Northern Central Railway Company for the month of April were $140,641.37, a decrease of $50,127 as compared with the same month of last year. The net earnings for the first four months of this year were $656,427.08, a decrease of $67,297.44 as compared with the corresponding period of last year.

—1,635,000 copies of speeches delivered this session in the House of Representatives have been sent out from the House folding-room. This is about 1,000,000 more than for the corresponding period in the long session of last Congress, and the tariff debate has not begun yet. The speeches sent out so far are chiefly on silver, labor and pension questions.

—The work of laying the new cable through the conduits of the Philadelphia Traction Company on Market street was completed on Monday, and the cable cars were started in the afternoon. A new auxiliary cable has been stretched around the depot and one of the large wheels at Twentieth and Market streets has been taken out and replaced by one of an improved pattern.

—A uniform rate of wages is now advocated by a number of employers belonging to the newly formed Textile Manufacturers' Association. In some instances this proposition, if adopted, will cause a material decrease in the amount of wages paid, while in other cases wages will be considerably increased. No decision is anticipated for several weeks. About 15,000 narrow looms will be involved.

—The citizens who are seeking to prevent the Traction Company from laying a second track on Twenty-second street from Norris street to Susquehanna avenue, have appointed a committee consisting of Messrs. Wm. A. Huey, Henry C. Stevenson and Dr. John T. Thomas to see that necessary action, even to taking the matter into the Courts, is taken to protect their rights. The Traction Company has repaved the street where it was torn up.

—The Plasterers' Union met on Tuesday night at Ninth and Spring Garden streets, Samuel Whitman presiding, and received a report from the Secretary of the National Union, stating that business in the line of the trade is generally in a very prosperous condition, with wages ranging from $3 to $4.50 per day. H. J. Donnelly and William Caldwell were elected delegates to the convention of the National Union, which will be held in Chicago on June 8.

—The works of the immense clock which has been put up in the Board of Trade building in Chicago, are pronounced a most perfect reproduction of those of the great Westminster Palace clock in London, but with some additions and improvements adapted to its commercial purpose. It is constructed of iron, bronze and steel, and weighs ten tons without the bell, the latter adding some 4,500 pounds more. The pendulum alone weighs 750 pounds.

—The work of removing old retorts at the Ninth Ward Gas Works has begun in order to introduce the regenerative system of gas making there. Some weeks ago the Gas Trust appropriated $136,000 for this purpose at the Ninth Ward Works. It is said that the new system will probably be put in operation before the middle of autumn. Several Gas Trustees express the opinion that the saving in the cost of production will pay the cost of the change within two years.

—Judge Tuley has rendered a decision at Chicago which sets aside the will of James Ward. The deceased left an estate worth about $322,000. After the will was made, but before Ward's death, a ninth heir was born to him. This heir brought suit as a post-testamentary legatee under Section 10 of the statute of descent. The Judge decided that the claim was a just one, and that, after deducting the share of the widow under the will, the minor be given one-ninth of the estate.

—On Tuesday Mr. T. B. M. Addis, of the Citizens' Municipal Association, personally investigated the cause of the overflow of water into the cellars of the properties on Filbert between Eighth and Ninth streets. It seems that the main sewer on Filbert street was broken at the St. Cloud Hotel fire, and was afterwards repaired with common drain pipe. The recent rains had choked up the pipe, and caused the water to back. The sewer had been broken and the cellars overflowed.

—John Bromley & Sons will probably have the largest carpet factory in this city when their new building is completed. It will occupy the square bounded by Lehigh avenue, Somerset, Leamy and Fillmore streets. The plant will consist of twelve buildings, all devoted to the manufacture of rugs and carpets. The greatest possible care is exercised in the construction of these buildings to obtain the best possible sanitation and ventilation. It will take several months to complete the buildings.

—Robert H. Sayre, Samuel Thomas and other Philadelphia capitalists have formed a company for the purpose of developing iron ore land in the neighborhood of Birmingham, Alabama. A plant is to be erected to produce the best grades of pig iron, and it is anticipated that the furnace will be in operation by the first of next year. The company will invest about $150,000. A number of New York and Philadelphia capitalists will visit Alabama in June for the purpose of thoroughly investigating the subject.

—Two old buildings, on Fifteenth street below Vine, that had to come down to clear the ground for the erection of the Hahnemann Hospital have caused considerable comment. Stephen Girard left a fund which was to be used to encourage people who owned frame structures in the city to tear them down, thereby adding to the beauty of the city and removing a source of danger from fire. The trustees of the Hahnemann Hospital, knowing of this fund, applied to the Board of City Trusts for an appropriation to tear down these old buildings and obtained $250.

—In the Superior Court of Massachusetts, in an action for rent against the tenant of rooms in an apartment house, it appeared that the steam heat which the landlord agreed to supply was inadequate; that additional heat became essential to a proper enjoyment of the premises; that the flues and chimneys were defective or improperly constructed; that her apartments were often filled with dense smoke; and that the elevator service was inefficient. The court held that these grievances were an obstruction to the beneficial enjoyment of the premises, constituting a constructive eviction, and justified the tenant's abandonment.

—The loss from the Harrison fire on the building, machinery, alum, etc., was roughly estimated at from $50,000 to $60,000. A portion of this insurance, it is said, is placed in the Mutual Fire Insurance Company of New York. The exact cause of the fire could not be definitely explained, although there were several theories advanced upon the subject. The building was considered thoroughly fire-proof and it is reported that no fire was allowed within it. It is said that Section 18 is only one out of twenty-nine departments of Messrs. Harrison Brothers & Co.'s Works, and that the fire will not prevent the firm from carrying on their business as usual.

—The requisition made upon Councils by the Board of Health for an appropriation of $6,158 to put into operation the act of Assembly regulating house drainage, the registration of master plumbers and the construction of cesspools was considered by the Finance Committee of Councils on Monday evening. A protracted discussion took place between Messrs. Vanderslice and Richardson, of the Board of Health, and Thos. F. Brock, representing protesting plumbers, as to the merits of the rules adopted by the Board. Without reaching any conclusion the Committee adjourned to meet at the call of the chair for the purpose of further considering the question.

—At a special meeting of the Tin and Slate Roofers and Sheet-iron Workers' Association, held May 13th, 1886, it was resolved that on and after May 31st the rate of wages shall be for slaters, $3.25 per day; for tin-roofers and cornice workers, $2 50 per day, and that nine hours shall constitute a day's work; that no member shall be allowed to work overtime except in a case of extreme necessity, and for such extra work time and half time shall be charged, and for Sunday work double time. No member must be compelled to catch a train in the morning earlier than 6.45 A. M., and in returning not later than 5.15 P. M., or the nearest train to this time within the nine working hours.

BUILDERS' ITEMS.

Among the Architects.

MR. D. FENNO CARLTON, draftsman, has been admitted to the staff of Furness, Evans & Co.

MR. JOSEPH M. HUSTON, architect, of the firm of Furness, Evans & Co., will build at Hart lane and Frankford road four dwelling houses of brick.

WILLIAM MASTERS CAMAC, of the firm of Furness, Evans & Co., has just finished a fine house at Bar Harbor, Mt. Desert, Maine, for Hon. James G. Blaine.

MR. WILSON EYRE, JR., 506 Walnut street, architect, is erecting a boiler and laundry house for the Cooper Hospital at Camden, N. J., it will be of stone and English tiles. Mr. J. C. Rogers is the builder.

MR. EDWARD HURST BROWN, 1430 S. Penn Square, is erecting eight stores and dwellings on Germantown avenue near Somerset street, 16x54 feet, for Frank A. Collamer, of brick with brown stone trimmings; two stories.

W. L. NICHOLS, architect, 1630 South street, is building two Queen Anne cottages for Mrs. J. M. Henderson, at Ridley Park, Delaware Co., on the P. W. & B. railroad, at the cost of $4,000. W. Hazzard is the builder.

ONE of the most quaint buildings in the country has just been completed by William D. Huston builder, the architect being L. C. Baker, Jr.; it is situated on Catharine, above Seventh street and is known as the Basilica of the Evangelists.

MESSRS. CULVER & ROGERS, 601 Walnut street, are erecting a drug store and dwelling at Hatboro, Montgomery Co., 50x62 feet, three stories, for the postmaster, Dr. Maukley; the second story will have a large room, 60x25 feet, which will be used as a Town Hall.

MESSRS. DEERY & KEERL, architects, Walnut street, report that they have on hand 16 different buildings, about one-half of them are under contract and will aggregate at least $300,000. Work has been resumed on St. Michael's Church and the interior of the Mother of Sorrow's school house is under way.

MR. ARTHUR TRUSCOTT, architect, 226 Walnut street, will erect a new public school on the Southeast corner of Broadway and Clinton street, Camden, N. J., it will be three stories and be of brick with stone trimmings and slate roof, and will be 106x67 feet. It will be heated and ventilated by the Ruttan system. J. C. Rogers is the builder.

MR. DOUGLAS, box manufacturer, is making extensive alterations to his warehouse, which fronts on Fifth, above Willow street, extending in the rear to York avenue 76 feet; three stories high with a frontage of 34 feet, the cost of which will be about $7,000. The builder and contractor is Mr. S. M. Emery, 14 South Sixteenth street. W. L. Nichols, 1630 South street, is the architect.

P. A. WELSH, architect, Walnut street, reports several buildings under study, but will not be ready before July, among which is a 12-room school building, outside walls entirely of stone. A stone building on Arch street of six stories. A dwelling on the P. W. & B. Railroad, exterior walls stone with slate and terra cotta roof covering. A frame dwelling at Cape May Point, eight rooms. And a stable at Ridley Park.

MOSES & KING, architects, 226 Walnut street, are putting up two stores of three stories, on Germantown avenue, above Broad, for E. B. Peale, Esq. They will be of brick and stone. Also, building and oil-cloth factory for W. M. Brasher & Co., Brooklyn, N. Y., it will be of brick and two stories, 92x146 feet and cost about $25,000. Also, building house at Morristown, N. J., for Mrs. E. F. Thompson, it will be of frame and shingles with slate roof, and will cost $4,000. Also, building offices for Messrs. Carr & Smith of Camden, N. J., it will be of brick with galvanized trimming and roof. Also, making extensive alterations on a row of dwelling houses on Mickel street, Camden, N. J., for Messrs. Roberts and Cohn. Also, putting up a dwelling house of frame for W. H. Rogers, Esq., at Merchantville, N. J., to cost $3,000. Also, making alterations to store at 307 Market street, for Mr. Asa Partridge; George F. Payne & Co. are the builders. Also, putting up four houses for workmen, for Miss. Helen Wingate, corner of Seventh and Jackson streets, cost $3,600. Also four houses of brick for workmen, at Sixth and Mount Vernon streets, Camden, N. J., for Mr. J. C. Toone, cost $4,200

Among the Real Estate Men.

JOHN H. HUDSON, 1428 Columbia avenue, has been doing an unusually large business in conveyancing, keeping his time fully occupied. He has also several large real estate sales nearly completed.

DANIEL BORING, 1407 Fairmount avenue, has sold within the last few days a house on Ringgold street for $1,700; also, 2409 Seybert street for $1,775. The demand with him for small houses exceeds any previous year.

WILLIAM L. CRAVEN & SONS, 1546 North Seventh street and 2019 Columbia avenue, have sale of a fine dwelling, 1703 Franklin street, for $10,000. They are being kept very busy indeed, conveyancing, and working late and early.

GEO. W. CARSON, 1916 Columbia avenue, sold two houses on Broad street above Berks for $12,000. He has also several properties for sale west of Broad street, on Columbia avenue, which he will turn into stores, if required. He has had many inquiries for purchase of small properties, but says they are scarce.

CHARLES F. KOLB, 928 Spring Garden street, real estate broker and conveyancer, is very busy in the latter and making a fair amount of sales. He is the secretary of several Building Societies, and has been not only secretary but organizer. Amongst them are The Relief, Randolph, True Plan, Protective Nos. 1, 2 and 3. All meetings are held at his office monthly.

DIXON & HALLOWELL, Ridge ave. and Fairmount ave., have made sale this week of a dwelling at 1209 Field street, for $1,050; also, store and dwelling on Southwest corner of Fourth and Norris, for $4,600. For some time back they have been selling large quantities of small properties as fast as they could get them, at good prices, and inquiries are still being made for them.

SCOTT & ROBERTS, 811 N. Sixteenth street, has made sale of properties, 1423 Susquehanna avenue, for $2,200; also 1613 Valeria street, for $3,200; also two dwellings in the rear of 483 and 485 York avenue, for $1,600. This firm have several small properties for sale, which will pay a large percentage, and the demand for houses to rent keeps up, and but few keys may be seen on the board.

CHAS. G. HENDERSON, JR., 1428 Columbia avenue, has just completed his arrangements to purchase a lot on the southeast corner of Nineteenth and Berks streets, and intends building 10 three-story dwelling-houses on it, of brick, with brown stone trimmings, and will complete them in a first-class style.

Mr. Henderson made sale of a house, 1718 N. Sixteenth street, for $7,000. With him, lately, houses of a medium size have been renting freely.

CHARLES F. EHRENPFORT, S. W. corner Fourth and Green streets, conveyancer and real estate agent, made sale of a large farm at Chelford on the P. R. R. Mr. Ehrenpfort represents the following associations: The Guarantee, Hancock, Harmony, Building and Loan, Cannstader and the Kensington Working Men's Building Associations, and others; have large business transactions amongst them all.

J. R. MASSEY, Thirteenth and Green streets, says that houses have been renting very freely and that out of hundreds of houses under his care only seventeen are at liberty. He has plenty of properties on his books for sale of all grades. Amongst them is a large factory at Fifteenth and Chestnut streets; another Fifteenth and Pine, running through to Lombard; and one at 1110 to 1116 Sansom street, of six stories with power.

MESSRS. CLARK BROS., 5 West City Hall Square (South Merrick street), commenced business as real estate brokers on the first of the month, and have on their hands a number of desirable properties for sale, some in immediate neighborhood of Twenty-second and Spruce streets and North Thirty-sixth, above Spring Garden street. Also, 10 building lots at Villanova, on the P. & R. railroad. Also, a farm of 29 acres, near Riverside, N. J. This firm has opened up with good prospects before them.

A. MINNICK, real estate broker, 1945 Ridge avenue, has sold a dwelling-house, 1836 Thompson street, for $3,666, which is subject to $54 per annum ground rent; also 1752 Thompson (store and dwelling), $1,900; also 1638 N. Eleventh street, for $5,600, subject to $72 ground rent. Mr. Minnick is the secretary and organizer of six building associations—the Mechanics and Workingmen's, Hope, Sun, Dawn, Deehaw, and the Olive—and has been connected with building societies for upwards of twenty years.

THE market house which stands on the Southeast corner of Sixth street and Columbia avenue and lately used as a skating rink, has been sold for $50,000 to a lithographic printer. The original cost of this building, say good authority, was $140,000. There was a mortgage on it for $35,000, so that our lithographic friend may be said to have gained a bargain. It seems quite a puzzle to the folks around that neighborhood to know what a printer can want with such a gigantic establishment, and others are feeling that they have lost a cheap lot.

C. HARRY SHOWAKER, Twenty-first street and Columbia avenue, has amongst his many real estate bargains a country seat containing 21 acres, located at Mount Laurel township, 12 miles from Philadelphia, on the Moorestown Pike, which he is commissioned to exchange for good city properties or property. The house is modern and has 16 rooms handsomely finished in walnut and oak, gas fixtures, water closets, bathroom, slate mantels, brick heaters, patent gas machine, patent pump and mineral spring, with lawn, orchard, and is beautifully situated.

B. F. BILYEU, real estate agent and conveyancer, 809 Columbia ave., made within the last ten days the following sales: A dwelling house, 1805 N. Ninth street, for $2,500; 1806 N. Sixth street for $3,200; 727 Montgomery ave. for $3,500; 1911 Franklin street for $5,500; also, property on the Northwest corner of Hancock street and Susquehanna ave. for $6,706. He is also building six houses on Seventh street, North of Montgomery ave. on the West side. They will contain eleven rooms, and be of brick with brown stone trimming, with all the latest improvements, 60 ft. front by 80 ft. rear. Mr. W. H. Belyeu is the architect and builder. They will sell at $6,500 each.

RICE & GILBERT, 2150 Ridge avenue, real estate agents and conveyancers, have just sold a property at 2237 Oxford street for $3,800, and are having a large number of inquiries. They say that a few days ago they were offered a price for five different dwellings, which they themselves considered a fair price, and further, that it was the exact amount the owners had offered them at, but on their notifying the owners of the fact they were told that the price must be raised according to the increased price of labor. Consequently they still stand unsold, as the prices asked is far in excess of a new modern house. They are finding the demand for renting houses far in excess of last year, and are keeping well up with their conveyancing business.

CHARLES MATHEWS, JR., 1701 North Fifteenth street, has within the last eight days made sale of the following properties: 1927 N. Eighteenth street, $6,000; 1929 N. Thirteenth street, $5,600; 2037 Madison avenue, $3,500; 1718, 2224 and 2226 Arlington street, $2,100 each; 1633 N. Fifteenth street, $8,000; 2106 N. Eleventh street, $5,000; 3430 Market street, store, $6,500. Also, sold 25 lots at Ocean City, Cape May, for good prices. He anticipates large sales of real estate within the next ten days, and the only difficulty he is meeting with at present is the scarcity of houses to meet the demand for the style sought after, what might be termed a workingman's house. He is also very busy in the conveyancing department. He has on his sale books $500,000 worth of property.

WE are pleased to find from our reporter that our real estate friends are becoming more and more pleased with our paper and are proposing to assist it all they can.

Building Permits.

A free bathhouse, 50 ft. by 125 ft., Twenty-seventh and Master sts., to James Bradley, 434 North Thirty-eighth st.

One-story addition, 9 ft. by 4 ft., 751 South Twenty-second st., to B. Harvey & Son, 2119 Fitzwater st.

Two two-story houses, 14 ft. by 32 ft., fronting on railroad, between Sixty-third and Sixty-fourth sts., to William M. Mills, Fifty-fifth st. and Woodland ave.

Four two-story houses, 12 ft. by 38 ft., Fifth, above Pike st., to B. Taylor Glading & Bro., 415 North Second st.

Two two-story houses, 13 ft. by 44 ft., Lisser ave., between Eighty-eighth and Eighty-ninth sts., to Francis Kelly, 2913 Norwood ave.

One two-story back building, 7 ft. by 14 ft., Broad and Race sts., D. W. Blagler, 1328 Olive st.

Eight two-story houses, 16 ft. by 54 ft., Germantown ave., above Somerset st., to F. A. Collamer, 2613 North Ninth st.

One frame shed, 32 ft. by 22 ft., Arch, abv. Sixty-fourth st., to Wm. & Jno. Sellers, Jr., 1600 Hamilton st.

Front alterations, 2446 N. Front st., to L. Lindsay, 115 East Cumberland st.

Two three-story houses, 14 ft. by 32 ft., Andress, above Wallace st., to Jacob J. Hazel, 2742 N. Front st.

One four-story factory, 72 ft. by 80 ft., Berks, above Hancock st., to E. Thompson, 1609 N. Eighth st.

Two two-story houses, 15 ft. by 40 ft., Deal st., below Kensington ave., to Joseph P. Yerkes, 4329 Frankford ave.

Two two-story houses, 15 ft. by 35 ft., Josephine, above Oxford st., to same party.

One back building, 16 ft. by 10 ft., Frankford ave. and Tacony Road, to same party.

Three three-story houses, 22 ft. by 81 ft., Twenty-second, above Chestnut st., to Jacob Myers, 1315 Sansom st.

Addition to building, 12 ft. by 8 ft., Twenty-second, above Chestnut st., to same party.

One two-story house, 18 ft. by 50 ft., Frankford ave. and Westmoreland st., to Edward Herbert, 236 Manderson st.

One back building and front addition, 14 ft. by 15 ft., 2411 Thompson st., to C. Joos, 504 Vine st.

Three-story addition, 18 ft. by 24 ft., Poplar above Sixteenth street, to R. D. Murray & Sons, 401 S. Juniper st.

Bay window and bath-room, 10 ft. by 9 ft., 1717 Seybert st., to James H. Young, 1904 South College ave.

One three-story house, 18 ft. by 48 ft., Richmond, above Lafevre st., to Wm. Kear, 4849 Penn st.

Two three-story stores, 16 ft. by 24 ft., 239 Girard ave, to Thomas McCarty, 1935 North Seventh st.

One one-story wash room, 8 ft. by 10 ft., 1145 Germantown ave., to Christian Kurtz, 966 Lawrence st.

Alteration and addition to factory, 30 ft. by 60 ft., Nineteenth and Westmoreland sts., to Hiram A. Miller, 1210 Ridge ave.

Three two-story houses, 14 ft. by 27 ft., Sellers, above Elmutz st., to Raynor & Brother, 4549 Frankford ave.

A one-story building, 20 ft. by 35 ft., Tasker, above Twentieth st., to Robt. W. Shode, 2131 Vine st.

One two-story brick building, 14 ft. by 36 ft., Broad st. and Susquehanna ave., to John West, 1508 Susquehanna ave.

One three-story house, 20 ft. by 60 ft., Arch, above Twenty-first street, to J. H. Carter, Lombard, above Eleventh st.

One two-story back building, 6 ft. by 15 ft., 319 North Twenty-fourth st., to William T. Stevens, 2323 Wallace st.

Front alteration, 1816 North Seventh st., to W. D. Blynn, 1725 Franklin st.

Front alteration, 1436 North Tenth sts., to W. H. Young, 1532 Parrish st.

Two two-story houses, 15 ft. by 42 ft., Moyamensing ave., below Christian st., to Steinmetz & Boorse, 2120 North Third st.

Three two-story houses, 12 ft. by 28 ft., Palethorp, above Morris st., to Christian Buehler, 2033 North Second st.

Twenty-three three-story houses, 17 ft. by 58 ft, Diamond, above Seventeenth st., to John M. Sharp, 1936 South College ave.

Sixteen two-story houses, 15 ft. by 52 ft., Fountain, above Seventeenth st., to same party.

Five three-story houses, 15 ft. by 52 ft., Eighteenth, above Diamond st., to same party.

Five three-story houses, 15 ft. by 52 ft., Seventeenth, above Diamond street, to same party.

One three-story factory, 34 ft. by 76 ft., 446 York ave., to E. D. Douglass, 437 North Fifth st.

Alteration, 4 ft. by 46 ft., 23 South Eleventh st., to Lewis Havens, 113 South Fifth st.

Two two-story houses, 15 ft. by 42 ft., Vine, above Fifty-fifth st., to L. W. Goodman, 3602 Sansom st.

One two-story back building, 12 ft. by 7 ft., 1853 North Thirteenth st., to James Hood, 212 New st.

One three-story store and dwelling, 15 ft. by 45 ft., Indiana and Marshall sts., to Chas. E. Meyers, 2436 North Sixth st.

Three three-story houses, 16 ft. by 56 ft., Spring Garden, above Thirty-eighth st., to Thomas C. Sloan, 37 North Fortieth st.

One three-story brick boiler house, 80 ft. by 90 ft., Waterloo, above Westmoreland st., to C. H. Masland, 2027 East Allegheny ave.

Six two-story houses, 13 ft. by 40 ft., Reese st., above Susquehanna ave., to William Tecklenburg, 1614 Cadwalader st.

One two-story back building, 13 ft. by 14 ft., Spring Garden, above Tenth st., to Jacob Lang, 2208 Columbia ave.

One two-story store and dwelling, 16 ft. by 48 ft., Long lane and Carp st., to H. C. Webster, 1811 Wharton st.

One three-story house, 16 ft. by 44 ft., Long lane and Reed st., to Sebastian Keveny, same place.

One three-story store and dwelling, 16 ft. by 44 ft., Long lane and Reed street, to Nicholas Keveny, 2036 Reed st.

One three-story brick building, 25 ft. by 60 ft., Moore st. and Passyunk ave., to Samuel P. Wright, 1800 Passyunk ave.

One two-story house, 14 ft. by 42 ft., Somerset, above Twenty-first st., to J. L. Tomlinson, Sixteenth and Tioga sts.

Four two-story houses, 16 ft. by 50 ft., Forty-fifth st., above Haverford road, to Robert G. Black, Sixty-third and Race sts.

Two four-story houses, 22 ft. by 81 ft., Broad st., above Girard ave., to W. T. B. Roberts, 1842 North Twenty-second st.

Five two-story houses, 16 ft. by 28 ft., Jackson, above Sixth st., to Wm. T. Carlin, 818 South Twentieth st.

One two-story house, 16 ft. by 28 ft., Carlton, above Fifteenth st., to J. B. Elliott, 3515 Wallace st.

Third-story addition, 18 ft. by 24 ft., 253 Carpenter st., to L. J. Carroll, 834 Ellsworth st.

Seven two-story houses, 12 ft. by 30 ft., Almond, above Cumberland st., to Charles Flood, 2240 Sepviva st.

Ten two-story houses, 13 ft. by 28 ft., Orleans st. and Kensington ave., to Jacob M. Peters, Frankford.

Three two-story houses, 14 ft. by 28 ft., Ruth, below Orleans st., to same party.

One two-story back building, 12 ft. by 20 ft., 1233 South Seventeenth st., to John McConaughy, 1710 Christian st.

A contract has been awarded by the West Chester Public School Board for the erection of a new building. It will be of brick and have serpentine base and cost $41,500.

—Chairman Wm. G. Huey, of the committee on the new site for the Philadelphia Stock Exchange, announce, in reference to the site at Fifth and Library streets, that the present voting has nothing to do with the financial details to be presented to the Board hereafter for approval. No contributions will be asked from the Exchange, there will be no individual liability and no increase in the annual assessments. The cost of the lot will approximate $125,000 and the building $175,000, and it is estimated that the rent of offices will yield a revenue of $33,500, out of which, after the payment of 4 per cent. interest on the value of the ground, and the taxes and water rent, there will be a net revenue of $15,500. This is clear of rent for telegraph and telephone offices, and without cost for rent of Board-room, which is now $6,000.

—At a meeting of the down-town section of the Carters' Protective Union, held on Tuesday evening at Sixteenth and Lombard streets, it was reported that carters employed by D. & P. McNichol at an excavation on South street above Ninth, were on a strike. A member present made the following statement: "We went to work on Monday of last week on condition that we would receive a fair day's pay for a fair day's work, which meant $3.50. The best any carter can do is to haul seven loads from the excavation to the dump at Twenty-fifth and Federal streets, and that would bring the price to 50 cents a load. On Saturday Mr. McNichol offered to pay us at the rate of 40 cents a load. We refused to accept this price, and went on a strike. Subsequently the firm offered 45 cents a load, but we still refuse and have not yet accepted his price. About 100 carters were employed on the excavation."

Chicago Building Notes.

The blockade in the building department which came with the eight hour movement and was stimulated by the strikes and riots which followed, has not yet been raised. In the opinion of many of the architects and contractors and builders, it will strongly operate against the building interests of the city during the remainder of the season. The opinions of several of the leading architects were secured last week upon the situation. They fairly reflect the condition of the architects generally, and are as follows:"

Architect C. O. Hansen, said:—" In my office four buildings were stopped which represented an aggregate value of $200,000, and four others that would have cost $50,000, besides a number of smaller structures. In my opinion at least sixty per cent. of the building that would have been done this year was stopped by the labor troubles."

Burnham & Root:—" The labor troubles have stopped a number of large buildings in our hands. In our opinion the trade promised to be better than that of last year, when the census of buildings was $20,000,000. On a prospective business of $25,000,000 worth of building for this season, I am satisfied that the labor troubles have stopped the erection of buildings equal in value to one-third of that amount."

Architect W. W. Clay:—" Fully $200,000 worth of expensive dwellings have been stopped in my office on account of the labor movement. We looked for a building season this year which would show at least $25,000,000 at its close, but the prospect is now that it will not exceed $18,000,000."

Architect W. W. Boyington:—" In round numbers the strikes and riots have stopped in my office $300,000 worth of buildings. Many of the largest building enterprises which have been stopped in consequence of these strikes and riots will never be heard of again."

Architect L. G. Hallberg:—"Buildings representing a valuation of fully $200,000 have been stopped in my hands, the owners having directed that the plans should be put away or not completed until further orders."

Architect W. L. B. Jenny:—" When the labor troubles came the building business was bit off short. No man can tell how much of the lost business will come back to us and no one can really tell how much went away."

There was a fair prospect for a building census this season of $25,000,000, and the opinions of the architects vary but slightly as to the amount of stoppage, and, from the general drift, it is fair to assume that the aggregate representative value of buildings erected this year will fall short of the estimate above $10,000,000. Of this amount forty per cent. represents labor, which would equal $4,000,000. If the season had not been interrupted this sum would have been divided among the nearly 15,000 persons who are employed in the construction of buildings, giving to them an average of about $206 each. Allowing the working days to be twenty-eight each month, it would have employed this army of workmen about three months, based on an average of $3 per day to each man, or $45,000 per day to the entire number.

ABBREVIATIONS.

Add.—Addition.	Exrx.—Executrix.
Alt.—Alteration.	K. & B.—Kitchen & Bath.
Assn.—Association.	M L.D.—Mechanics' Lien Docket.
B. & L.—Building & Loan.	Nat. Bk.—National Bank.
Bk.—Bank.	Sav. Bk.—Savings Bank.
B.B.—Back Building.	t. t.—Terre Tenant.
Dwg.—Dwelling.	S.F.—Scire Facias to revive Judgment.
Est.—Estate.	
E.J.—Ejectment Suit.	
E.S.—Equity Suit.	
Exr.—Executor.	

Sum C.—Summons in Case—A form of action invented to meet all civil cases, the form of which is not specially provided for.

Where there are no figures to indicate the amount of the judgment, the damages have not been assessed.

The first name in each line is that of the judgment debtor.

An asterisk (*) denotes judgment confessed or bond and warrant conditioned.

The figures 1 2 3 and 4 immediately after the name of the plaintiff indicates the number of the Court. The letters D. M. J. and S. after the number of the Court indicate the Term as D., December Term, M., March Term, as J., June Term and S., September Term.

An examination as to the nature of judgments and suits will be made for subscribers without extra charge on application.

George G. Browning to Maurice Browning, May 21, 1886, one-third interest in 2 tracts in Twenty-first Ward, containing respectively 9 acres and 28 perches and 16 acres 13 perches........ nom.

Dr. A. S. Erney has purchased the building, southwest corner Twenty-first and Reed streets, and is altering it from a two- to a three-story, and will also make a store of it.

Webster & Jackson have about finished six new houses, Long lane and Reed streets; very neat.

—The Pennsylvania Railroad Company will erect a five-story fire-proof building, 85 feet by 180 feet, at Eighteenth and Market streets. It is intended for a flour warehouse, and is to cost $150,000. It is to be leased to a corporation, which will be known as the Merchants' Storage Company, a charter for which has already been applied for. The company's incorporators are J. W. Supplee, James Hay, Wilson Welsh, James S. Bell and W. J. Latta. Nearly every prominent flour dealer in the city will be a stockholder, and enough stock has already been subscribed to insure the success of the enterprise. The capital stock of the company has been fixed at $125,000. The building will be finished by September 1.

City Councils.

The following appropriations were acted upon favorably by the Finance Committee, last Monday: To pay $843,227.09 in July as interest on the funded debt falling due that day, and for $446.97 as bills due from the city to the Northern Liberties Gas Company. The ordinance appropriating $12,500 as one-half the cost of building a bridge over the connecting railroad at Sixth street, Twenty-fifth Ward, was referred to the Highway Committee.

The following proposals for land for a site for the almshouse to be located in the Twenty-third Ward were opened and read: W. Hall Waxler, thirty-six acres, Castor and Township Line roads, at $325 per acre; W. Hall Waxler, thirty-five acres adjoining, at the same price; Charles H. Buckman, 108 acres, near Bustleton, at $300 per acre; Mrs. Mary Glackin, sixty-seven acres, at Welsh and Blue Grass roads, at $300 per acre; Edward C. Cheseborough, fifty acres, on the Delaware River, Pearson estate, at $500 per acre, and 140 acres of the same estate, on the Bristol Pike, at $350 per acre; J. Roberts Foulke, seventy-five acres, at $400 each; Alfred Willits, eighteen acres, at Ashton road, two miles from Holmesburg, at $500 per acre; R. J. Dobbins, thirty-two acres, on Adams road, near the Friends' Asylum, Frankford, at $400 per acre, and the remaining twenty-five acres North of the Pennypack Creek adjoining the site sold for the new County prison, at $500 per acre. The bids will be considered at a special meeting of the committee.

The motion of Mr. Hammett to appropriate $1,200 for four matrons was amended by Mr. Thompson, Fifteenth Ward, to give $1,500 for matrons in the following station houses: Union street, below Fourth; Lombard street, below Eighth; Eleventh street, below Vine; Filbert street, above Fifteenth, and at Second and Queen streets. In these districts, one-half the arrests made were of women. Mr. Clay said that he was much impressed with the importance of the subject, and at his suggestion the Mayor will be requested to appoint four matrons from a list submitted by the ladies of the six societies making the appeal.

The protest of the master plumbers against enforcing the rules of the Board of Health in regard to registration and providing for sanitary regulations in dwelling houses and places of business was postponed to a future meeting.

At the meeting of Councils' Committee on Surveys, on Tuesday afternoon, Chief Engineer Smedley submitted a report regarding an ordinance providing for the erection of a wooden bridge over the Norristown Railroad tracks at Spencer street, in the Twenty-eighth Ward. He believed that there was "no economy" in building a wooden bridge at this location, but thought a light iron structure, which would cost, with necessary masonry, from $2,000 to $2,500, "would be better adapted to the place." He understood that there was an unexpended balance of $2,-295.26 belonging to an item of the appropriation made to the Highway Department for the completion of South street bridge, and, having consulted the Chief Commissioner of Highways, he suggested that this money might be used for the erection of an iron bridge with stone abutments. The recommendation was ordered to be reported favorably to Councils. Similar action was taken with a communication from the Chief Engineer, asking for authority to appoint an additional leveler, rodman and chainman, at a cost of $180 per month, to enable him to make extra surveys in connection with the building of the Manayunk sewer, and for which work money has been appropriated.

A protest against the construction of a sewer on Mill street, from Bellfield avenue, in Germantown, was referred to the district sub-committee. William H. Doyle appeared before the Survey Committee and said that the sewer was necessary, in order to properly drain the establishment of the Little Sisters of the Poor, which is in the neighborhood.

Councils' Committee on Surveys on Tuesday considered favorably a report of the Chief Engineer and Surveyor in which he recommended that a light iron bridge with stone piers should be built over the Reading Railroad Company's tracks at Spencer street, Twenty-eighth Ward. The estimated cost will be less than $2,500. This sum will be taken from the unexpended balance of $2,-295.26 in the appropriation for repairs to South street bridge. The committee referred to the district surveyors a petition to change the name of Long lane, Twenty-sixth Ward, to Point Breeze avenue.

It is very evident from the statement recently made by Dr. Thomas K. Morton, resident physician of the Philadelphia Hospital, that the water of the Delaware river is even more dangerous for drinking purposes than that of the Schuylkill. The Board of Health has been informed by Dr. Morton that there have been a large number of cases of enteritis and gastro-enteritis, (inflammation of the stomach and intestines), caused by drinking Delaware river water.

"Many of these cases," Dr. Morton says, "have been sailors, whose supply has been pumped from the river wherein their ship may happen to lay. In many instances I have actually known the tanks of outward-bound vessels to be pumped full of this water, as I have been informed by them. The case of one sailor within a few weeks developed into typhoid fever, with a very clear history which pointed toward the above cause. The other cases come from factories which have used the Delaware water for drinking purposes. One of these latter cases, a workman in the rolling mill of Stephen Robins & Sons, informed me that no other water than the Delaware was available there, and that all the hands are constantly attacked with diarrhœa and vomiting. This goes to prove that the water is polluted, and I think that some measure had better be taken by the Board at once."

The matter was referred to the Sanitary Committee.

—It is said that shingles can be made fireproof by setting the butts into a trough of water in which half a bushel each of lime and salt and six pounds of potash has been dissolved.

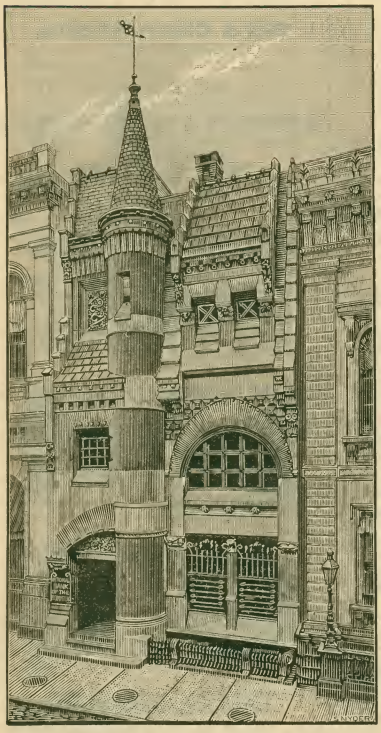
VOL. I.—NO. 22. PHILADELPHIA, MONDAY, JUNE 7, 1886. PRICE 15 CENTS

National Bank of the Republic,

OF PHILADELPHIA.



313 Chestnut Street.

AMONG the recent specimens of bank architecture is the new banking house of the National Bank of the Republic, of Philadelphia. An illustration of the front of this beautiful and unique building is shown on this page. It is of English red-stone and Philadelphia red pressed brick, surmounted by red tile and slate roof. The building covers a lot of thirty feet front and one hundred and eighty feet in depth. The main banking room is twenty-nine feet wide, one hundred and twenty feet long and thirty-four feet high, and is lighted from sky and ceiling lights throughout its length. The interior finish is of cherry; the counters and desks are of mahogany and beveled plate glass; the walls, where not of tile and richly carved Caen stone, are painted in warm colors, a rich dark red predominating, the effect of which is novel and pleasing; and the main floor throughout is covered with red and small black tiles laid upon brick arches. The main room is divided by the mahogany partitions into apartments for officers, tellers and clerks, back of which is the directors' room. The vaults are of massive granite work with steel lining, within which are steel safes. The bank occupies the entire building, giving ample room in all the apartments and abundant space outside of counters. The building is heated by steam and from open fire-places, and is admirably ventilated.

On December 5, 1885, the National Bank of the Republic completed the first twenty years of its existence, and was duly authorized to continue for another twenty years under a renewal of its charter until December 5, 1905.

The officers are William H. Rhawn, President and Joseph P. Mumford, Cashier, both of whom received their training in the old Philadelphia Bank, and have been together nearly twenty years in their respective positions.

During the year that the Bank has occupied its new banking house it has received a gratifying increase of business, as shown in the statement below, reported to the Comptroller of the Currency on March 1st, 1886.

RESOURCES.		LIABILITIES.	
Loans and Discounts	$2,215,336 01	Capital Stock	$500,000 00

Refers with permission to William M. Singerly, Proprietor of Phila. "Record."

PHILADELPHIA, MONDAY, JUNE 7, 1886.

GENERAL trade channels are still rather sluggish.

SCOTTDALE, Pa., suffered serious fire losses Saturday morning.

THE architects of Philadelphia have a good reputation in other cities.

IT is never lost time to tell the REAL ESTATE RECORD reporter all there is to be told.

REAL ESTATE is steadily improving in value in the northwestern section of the city.

THE saw and planing mill men are threatening serious harm to themselves and the trade.

WHO is it that is talking of putting up 500 small houses in the Twenty-fourth Ward this fall?

NEXT week, perhaps, we will furnish a real estate review of Norristown and its surroundings.

REAL ESTATE matters in Camden are picking up. Quite a number of transfers, of large dimensions, are under way.

THE opening of a large number of new streets this year will bring a great deal of building territory into market.

THE number of those in favor of an elevated road is quietly increasing. The necessity will in time become sufficiently urgent to lead to public expression.

NO CITY has more attractive suburban sites than Philadelphia. The attention of real estate agents is becoming more and more directed to desirable investments.

LABOR agitations hang on. Despite this fact there are encouraging symptoms of returning confidence. Still there is danger that the striking business may be overdone.

THE pretext for anarchic movements is the probability of the growth of an aristocracy of wealth and power such as exists in Europe, which will crush the masses into industrial serfdom. The history of America and the experience of American wage-workers belies this and proves that individual opportunities are as abundant as human energy and ambition, and as broad as human desires. American labor boldly denounces the schemes of the spawn of Europe and laughs at its silly fears, and relies with supreme self-confidence on its ability to hold its own against any possible oppression from wealth or power in this land of Franklin, Washington, Jackson, Lincoln, Grant and Cleveland.

THE incarceration of Herr Most presents a new phase in our Republican Government. Heretofore the rantings of the fanatics of the Most type have received very little attention, and were it not for the cowardly culmination of their teachings during the recent Chicago labor troubles, it is likely that their mouthings would have never received more than a passing notice from the press of the country. The interpretation placed upon our form of government, by these hot-headed anarchists, simply amounted to a freebooters license to destroy, murder and kill with an impunity that was startlingly refreshing to our modern ideas of civilization; that they were earnest in their belief that our well-established and world-recognized principles of an entire liberty of speech afforded them perfect immunity against police interference, there can be no doubt; their bravado and trumpetings were scarcely worth it, and yet it was high time for the strong arm of the law to step in in order that fellows of like ilk all over the world might understand that while American Republicanism afforded every possible license to speech, yet it would not tolerate the promulgation of doctrines which arouse the worst passions of men and which have no other merit than their supreme wickedness and consummate devilishness.

There were men at the north who, during the inception of the Rebellion argued that coercion was unconstitutional. There are, doubtless, hundreds of men who honestly believe that the arrest and sentence of Most is unjust and that it is an emphatic avowal that freedom of speech, as a fundamental principle of constitutional right is lost to us forever. The self same constitutional right of national self-protection which upheld the government during the rebellion, is by the very nature or our national organization delegated from Nation to State, and thence through the sub-division of our bodies corporate, consequently there can be no question as to the right of either nation, state, city or village through process of law, to shut the mouths of such devils as Most and his followers. Hence, it is only fair to recognize the sentence of Herr Most as a declaration of governmental authority to hold every man responsible for his utterances, if inimical to law and order.

IT has been truly said that "municipalities which argue and squabble over the cost of their water schemes should bear in mind that the cheaper water may prove the dearest commodity in the end, if its cost and not its quality and quantity be alone considered."

The deep interest shown in the important question of a new water supply under discussion by the general press of the city is likely to result in substantial progress towards a solution of this question, of such serious moment to the welfare of the citizens of Philadelphia.

Not only is the decided action of Councils demanded by consideration for the public health, but the manufacturing and insurance interests likewise demand recognition of their requirements.

The grievances of these interests have been so often stated in the discussion of this subject, that our municipal authorities may possibly think their apathy in the matter will be accepted and excused by a community whose patience is being sorely tested, but theirs is the responsibility, and a solution (with the complete information now before them) of the question of a future water supply is demanded, both in the interests of the public health and general business of this great manufacturing community.

The pollution of our principal source of supply, the Schuylkill river, has been exhaustively investigated and conclusively proved, and now the Board of Health have been notified by the resident physician of the Pennsylvania Hospital that "the increase at that hospital in the number of cases of enteritis (inflammation of the stomach) and typhoid fever, caused by drinking Delaware river water near the city, calls for prompt measures to be taken to prohibit, or warn of the use of this water for drinking purposes." The situation certainly calls for most serious and prompt consideration. It is a well-known fact that the so-called improvements now progressing will give but temporary relief.

A late inspection by members of the Water Committee of the pumping stations and the condition of the Schuylkill river undoubt-

edly gave those gentlemen a glimpse of the condition of the water that required no chemical test to determine. The water for long distances was covered with a surface of greasy shoddy waste from the Manayunk mills, and in places presented a black and most uninviting appearance, in all a most disgusting condition of affairs for a city water supply.

This is not an uncommon occurrence, and to exist at a season of the year when the river, increased by spring rains, should at least present a decent appearance, gives good reason for grave apprehension during the summer season, when the river becomes merely a pool, with no outlet except the canal locks, or the pumping stations from which it is served to the community, with no basins for proper subsidence.

It is by presenting the true existing condition of affairs to the public, whereby they are informed of the seriousness and urgency of this question of a future water supply, that the importance of prompt action is shown.

It is obvious that other supplies being better or worse than the one under consideration is quite immaterial. It does not in the least benefit Philadelphia that some other city is worse off, nor improve the Schuylkill to establish the greater pollution of another stream, any more than the river can be cured by protestations or sewerage, and mill waste got rid of by denying their existence.

In these matters, accurate ascertainment of the facts, and clear comprehension of the requirements of the situation, and candid acceptance of the duty imposed thereby, are worth all the tinsel patriotism and provincial declamation that can find utterance and auditors.

What it is evidently essential to each city to do is to set itself resolutely to the solution of its own individual problem, and, having accomplished this to the best of its ability, congratulations may ensue, and comparisons and complacency be in order.

SMALL houses are in good demand in all sections of the city. The larger class of houses are rather slow of sale and are not very good for prompt renting purposes. The depression in business has effected the real estate market, and fewer houses have been selling during the past few weeks than was expected. There is still an abundance of money awaiting opportunity for investment in land and houses, but the disposition is growing among many to go very cautiously lest we may find ourselves with an over supply of houses. This possibility is, of course, to be kept constantly in view. The testimony of real estate operators however, is at least up to this time, that we are on the safe side and that the demand for houses is likely to continue for some time to come. The lack of opportunities for the investment of capital in other directions no doubt accounts for much of the investment during this season. Comparing this year's building operations with last in the city of Philadelphia, we find an encouraging improvement and one which it is to be hoped will continue to the end of the year. The run is still on small houses and within a short time several blocks have been projected and will no doubt be undertaken by midsummer. Investors have confidence in small properties. While a temporary dullness may arrest enterprise, it is safe to say that it will be a difficult thing to build too many houses worth from $1,500 to $2,500. Philadelphia has been marching in this direction too many years to be injuriously effected by a little dullness. As a manufacturing centre it is destined to progress even more rapidly than it has. It is advancing in importance as a commercial centre. It needs, of course, more abundant railway facilities and ere long will have them. Its bigger brother, New York, will always retain the lead, but the distance between Philadelphia and New York from a manufacturing and industrial standpoint is gradually lessening. Our builders are encouraged and our capitalists have confidence, and we will most likely see a steady expansion of building enterprise throughout the season.

QUITE a number of fronts will be changed from dwellings into store rooms on Arch, Walnut and Spruce streets this year.

LUMBER holds up well in price and is abundant. Supplies of cement are large. Lath and shingle receipts continue heavy.

THERE are thousands of people who use sand daily in the making of mortar, but who cannot tell why it is used. There are many architects who know, but there are also many who do not. There are other substances that it would seem might take the place of sand, but there is in fact positively no suitable substitute for it.

THE street-car companies would do well to "clean house" like other people at this season of the year, and take up their carpets. The horrible mats, mud-dried, tobacco-stained, foul in every way, give proof of their unpleasant existence by that undeniable smell accompanying dirt. It always brings to clean people the thought of disease and worse than death. They will soon fear to ride. That loss will be a double one to the street cars, as the Board of Health will follow in condemnation of such an abuse of the public.

CHIEF COMMISSIONER MCDONALD, of the Highway Department has brought most of the passenger railway companies to terms, they having concluded that it is cheaper to do their own repairing of the streets. It is evident that McDonald not only intends to enforce a compliance with the law, but he will see that the work is promptly done. A little of McDonald's back bone imparted to the heads of the different City Departments would very materially improve the quality of our city government.

—The following are the charter members of the proposed Real Estate Exchange: Henry L. Thompson, Charles M. Lukens, James L. Stevenson, Frederick Sylvester and James R. Booth.

REAL ESTATE.

Pay Your Tax.

After June 30, the penalty on unpaid taxes will be one-half of one per cent.; after August 1, one per cent.; after September 1, one and a-half per cent.; after November 1, three per cent., and after December 1, four per cent.

Obituary.

Christian J. Hoffman, for many years prominently identified with the business interests of this city, died at St. Paul, Min., from pneumonia, on Sunday last. In 1852 Mr. Hoffman was elected a member of City Councils. In 1861 he was elected President of the Corn Exchange and took a deep interest in the organization of the gallant Corn Exchange Regiment. He was formerly a Director of the Girard College, Prison Inspector, President of the Commercial Exchange and of the Chamber of Commerce and also a member of the Board of Finance of the Centennial.

Charters Granted.

The Provident Home Purchasing Company, of Philadelphia, $35,000 capital stock; The Pennsylvania Granite Company, of Philadelphia, capital $50,000; The Irvona Coal Company, of Philadelphia, capital $50,000; The Eureka Building and Loan Association, of Butler, capital $250,000; Keystone Natural Gas Company, of Parker City, capital $10,000; Stoneham Tannery Company, of Warren county, capital $100,000; Hartley Carpet and Rug Company, of Philadelphia, capital $50,000. The incorporators are J. B. Shonell, Charles H. Flemming, Kida Hartly and J. T. McElroy. The Belleview Building and Construction Company, of Philadelphia, capital $20,000; North Philadelphia Building and Savings Association, capital $1,000,000. The Duquesne Steel Company of Pittsburg, with a capital of $325,000.

A Building Boom in Chester, Pa.

In Chester City there are some very considerable improvements being made; the hotel Cambridge, a very handsome first-class hotel, costing about $100,000 has just been completed. An opera house, with seating capacity for 1,000 persons, is about being erected. The Chester Land and Improvement Company have just completed two handsome marble front houses, and are about finishing two Queen Anne brick houses with 14 rooms each, all finished in the latest and best city style. Mr. B. Frank Beatty has purchased from the Company a large and handsome lot adjoining to erect a house for himself. The Baltimore and Ohio Railroad Company have commenced the erection of a commodious station, and quite a number of fine improvements are going up in the vicinity. In the centre of the city there is being built a number of the finest store properties ever before built in that place.

New Church and Seminary.

The congregation of Christ's Reformed Episcopal Church contemplate the erection of a church and theological seminary on the Northeast corner of Forty-third and Chestnut streets. A church, chapel and seminary building will compose the structure. The church will have a frontage of 75 feet on Chestnut street and a depth of 120 feet on Forty-third street. A tower surmounted by a spire, rising to the height of 195 feet will stand at the Southwest corner. The material employed will be Chester gray stone, and the architecture the gothic style. The trimmings will be of Trenton brown stone, including a frieze of artistic design and finyals

of the same stone will add to the general effect. The building will be well lighted and will have two stained glass memorial windows. The chapel will contain lecture, reading, Bible, Sunday-school and infant class rooms. It will adjoin the church on the East, having two entrances from Chestnut street. The theological seminary will extend behind the church and chapel East and West, 40 feet on the Forty-third street side and 120 feet in length. It is expected that the chapel will be finished by next Christmas. Pursell & Fry are the architects.

Building Operations for May.

The building operations for May show 391 permits, 773 operations, covering 376 two-story dwelling and 150 three-story dwellings. The April permits were 495, operations 1,223, two-story dwellings 540, three-story dwellings 393. The May building activity shows quite a falling off as compared to April. Taking the first four months of this year as compared to last, the improvement is quite marked. So far this year, the number of permits foot up 1,601, as against 1,466 last year to same date; number of operations 3,946, as against 3,353 last year; two-story dwellings 2,018, against 1,992 last year; 925 three-story dwellings, against 659 last year.

In addition to the dwellings above enumerated permits were taken out for the following: Additions and alterations, 70; kitchens and back buildings, 66; stables 20; new fronts, 17; walls, 10; stores, 9; baths, 6; offices and factories, each 5; ware and storehouses and roofs, each 4; removals and underpining, each 3; sheds, 2; boiler house, wood house, wash room, bake oven, city bath, slaughter house, foundry, church, stairway, brewery, hospital, re-build, girder, chimney stack, shop, Nurses' Home, concert hall, Catholic Home and club house, each 1.

Items of News.

—Permits were taken out on Friday for the erection of twenty-three dwellings in Camden.

—The Boston strikes for the month of May have delayed business investments in that city to the amount of $4,000,000.

—The Board of Health on Wednesday elected seven inspectors of plumbing. The plumbers registered now number 455.

—The increase of 10 per cent. in the wages of the railroad and coal and iron employés of the Reading Company added $180,000 to its expenditures last month.

—It seems to be a foregone conclusion that the Count de Paris and his family and the Princes Jerome and Victor Napoleon are to be expelled from France.

—Poor Buddensieck built his houses not wisely nor too well. The Supreme Court, N. Y., has decided that he must serve his ten years sentence in prison.

—Application has been made to the Council of Camden to appropriate $10,000 towards opening a canal from the river to Broadway, on the line ditch, about 60 feet wide.

—The American Surety Company of New York will not become surety for Contractor O'Rourke, but he will find no difficulty in obtaining sufficient security elsewhere.

—The Public Improvement Association of the Twenty-fifth Ward has decided to apply for a jury to assess damages for the opening of Venango street from Ninth to Twelfth.

—The agent of the Citizens' Municipal Association has reported that the sewer on Eighth street, west side, from Market to above Filbert, is choked up with dirt and filth.

—104 ballots were cast by the members of the Stock Exchange in favor of removal to Fifth and Library streets. There were 86 votes cast in favor of remaining at the present location.

—An advance of five per cent. in wages has been generally conceded by the brick manufacturers, consequently the general closing of the yards as contemplated on June 1st did not take place.

—Mrs. John M. Thomas has had placed in position in the Cathedral, on Eighteenth street, a fine white marble altar, erected to the memory of her son. It is 14 feet in length, 3 feet 6 inches in depth.

—A bill has been introduced into the Councils of Reading, and referred to a committee, asking an appropriation of $110,000 for purposes of constructing underground water courses, the loan to bear 4 per cent. interest.

—The Lombard and South Streets Passenger Railway Company is laying steel rails on a portion of the road without the continuous sleepers generally used. Cross-ties are placed every four feet, and to these the rails are bolted.

—The friends of the Morrison Tariff bill at Washington, as well as Mr. Morrison himself, are said to be deeply disappointed at the failure of the New York free trade brethren to get up a "grand rally" in favor of that measure.

—Charles Pennock, 45 years, of the firm of Weaver & Pennock, plumbers, and James F. Sommerfield, 25 years, 3270 Chancellor street, were injured last Wednesday by an explosion of gas in a well in the rear of 613 Commerce street.

—Articles of merger and consolidation between the Cornwall and Lebanon and Colebrook Valley Railroad Companies have been filed at the State Department at Harrisburg. The consolidated companies will be known as the Cornwall and Lebanon Railway Company.

—From statements made on Third street it seems that President Gowen's plans for the reorganization of the Reading Railroad, proposes to give in exchange for the general mortgage bonds of that company a new income 4 per cent. bond and 20 per cent. of a second income bond as a bonus.

—A new school-house is to be erected in the Thirtieth Section and one in the Thirty-fourth Section. These houses will be something new in the way of school buildings; the second one, which will be erected at Forty-third and Ogden streets, will be two stories high, and will have 18 divisions.

—A special meeting of the Burlington County Board of Freeholders was held at Mount Holly on Tuesday to take action in regard to the surrender of the Bordentown and Columbus Turnpike Company, and it was decided to accept the road, rebuild the bridges and put the thoroughfare in complete order.

—The three Anarchists, Herr Most, Adolph Schenck and Richard Braunschweig, were sentenced on Wednesday morning by the Recorder, the first to serve one year in the Penitentiary and to pay a fine of $500; the second, nine months in the Penitentiary; the last also to nine months and to pay a fine of $250.

—A crevasse twenty feet wide and eight feet deep occurred below New Orleans last week, in the levee in front of the Ducrosse plantation, situated on the east bank of the Mississippi. Though the break will probably be closed, it is likely that the extensive vegetable crop on the plantation will be destroyed.

—The monthly statement of State Treasurer Quay, issued on June 1st, shows that of the $1,570,611.58 in the general fund, exclusive of moneys appropriated to the Sinking Fund, there are in Philadelphia banks the following amounts: Farmers and Mechanics' National, $362,751.43; Girard National, $50,000; People's, $180,000.

—It is probable that Sieman's Regenerative Lights will be put up in some of the public squares. Councils' Committee will confer with the Gas Trust in relation to the matter. The May bills for public lighting by private companies were approved as follows: Pennsylvania Globe Gaslight Company, $11,518.04; Trustees of the Northern Liberties Gas Works, $944.79.

—The Third Avenue Railroad Company has just signed contracts for laying a cable on One-hundred-and-twenty-fifth street, which will be used hereafter on that line as the motive power instead of horses. The work is already begun. The route is from river to river. The cars are to be run at the rate of eight miles an hour. The company are considering the advisability of converting the Third avenue road into a cable line.

—The Directors of the company which will establish a large pig-iron plant near Birmingham, Ala., are as follows: Samuel, John and Edwin Thomas, of the Thomas Iron Company; Robert H. Sayre and George H. Myers, of Lebanon; E. W. Clark and Geo. D. McCreary, of Philadelphia; Frederick A. Potts, of New York, and E. B. Leisenring, of Mauch Chunk. Samuel Thomas, of the Thomas Iron Company, is to be President.

—The corner-stone of the new Jewish Synagogue to be erected on Seventh street above Columbia avenue was laid on Tuesday afternoon. The erection of the building was begun in April, and it is expected to be completed by September. The synagogue will be of brick, with a front and trimmings of brown stone. It will be in the Moorish style of architecture, with two towers. The estimated cost of the structure is about $50,000.

—An order of Court signed by Judges Arnold and Allison has been filed, confirming the reports of the Board of Revision of Taxes concerning the rearrangement of election divisions in the Fifteenth, Nineteenth, Twenty-fifth and Twenty-eighth Wards. These reports provide certain changes in the election divisions in the Fifteenth, Twenty-fifth and Twenty-eighth Wards, but allow the Nineteenth Ward divisions to remain unchanged.

—The line of the Baltimore and Philadelphia Railroad to this city has been turned over to the road department of the Baltimore and Ohio Railroad Company, and will hereafter be known as the Philadelphia division of that company. After June 1 the following offices will have control of the new division: P. H. Irwin, Resident Engineer; Charles Selden, General Superintendent of Telegraph, and W. H. Harrison, Superintendent of Motive Power.

—Chief Commissioner McDonald, of the Highway Department, not only means business but believes in pushing things; below we print his letter to the Railway Presidents:

"*Dear Sir:* As the season for repaving the streets is now very far advanced, and as there are many portions of those on the line of your road which are badly out of order, I hereby notify you to proceed within ten days from the date hereof to put the streets on the entire line of your road in thorough repair."

—An effort is to be made by the school teachers employed in this city to induce Councils to increase their salaries ten per cent. Professor F. C. Christine, President of the School Teachers' Institute, says that the average pay of Philadelphia school teachers is less than that of any of the large cities of the country. The average in San Francisco is $980; in Boston, $933; in New York, $707; in Chicago, $705, and so on down a list of twenty-three cities to Philadelphia, where the average salary is $517. The Board of Education is in favor of the payment of larger salaries, but does not get the appropriation from Councils to and do so.

Among the City Departments.

—The Board of Education's Committee on Schools last Tuesday confirmed the appointment of George L. Wolf and Charles Crawford as housekeepers at the Bringhurst and Columbia Schools, in the Twenty-second and Twenty-third Sections respectively.

—The employés of the Water Department desire to have one day off per week; they now work twelve hours a day every day in the year; during the summer they are allowed ten days vacation. The matter has been referred to a special committee. It will cost $3,600 per year to employ the additional labor. There is no question as to the advisability of allowing the employés the day off.

—The Board of Surveyors have approved of the plan allowing the laying of two tracks on Twenty-second street, between Norris street and Susquehanna avenue; the tracks will be 3½ feet apart, leaving 10 feet and 3 inches on each side between the tracks and the curb. Plans were also approved for the construction of the Mill Creek sewer at Forty-seventh and Brown streets, and for a number of branch sewers.

—The Special Committee of the Board of Education appointed to consider certain recommendations of President Steel in his last report, met last Monday to consider the subject. The following resolutions were adopted: "That in all preparatory schools to be established hereafter there may be eight grades or any number of grades less than eight, but that no division shall contain more than one grade, and that each such school be under the control of one principal."

—It would be scarcely fair to call the members of the Peace Association cranks for objecting to the erection of military statues around the Public Buildings. President Perkins has replied to their protest, and sensibly says: "After thoughtful consideration of the whole subject the committee are unanimously of opinion that the question of the allowance of statues of military men on the site of the City Hall must be determined upon grounds entirely irrespective of reasons based upon the views of those whose objection has given occasion for the present report.'

—Chief Engineer Ogden, of the Water Department, submitted specifications to the Water Committee, at its meeting on last Tuesday, which are to govern the erection of the pumping engines which are to be built. One specification covers a 20,000,000 gallon engine and another two 10,000,000 gallon engines and five tubular engines for the Spring Garden works and two tubular boilers at the Roxborough works. The Spring Garden engine will have capacity to pump 20,000,000 gallons of water daily into the Cambria basin. The requirements of the Northeastern section of the city are to be more carefully inquired into, and a committee has been appointed to make a thorough investigation. Messrs. Holman, Smith, Hart, Bardsley and Moran are the Committee.

—At the last Tuesday's meeting of the Public Building Commission, the statement was made by architect McArthur in the communication that the tower had now reached a height where it would be advisable to have built into the walls the anchorage for the metal superstructure, and recommended that the superintendent be authorized to arrange with the contractor for the iron floor beams to set the anchorages as the work progresses, which was agreed to. The architect also stated that the greater part of the marble stored around the North front of the building would be placed in position during the present year, and, in order to allow the public the use of the sidewalk on that side of the building, he would recommend that all the granite coping, sills and steps for the area and main entrance be set during the fall months, so as to allow all the paving to be done before the appearance of frost. The matter was referred to the President and architect.

The Labor World.

—Mr. Wm. M. Singerly has countermanded an order for $15,000 worth of lumber on account of the strike among the sash and door men.

—The strike of the stone cutters and stone masons of Allegheny county for eight hours has been settled on the nine-hour basis at the old wages. Work was resumed on Wednesday.

—The strike in the Allison Manufacturing Company's works still continues; one-half of the men have found work elsewhere, the other half are supported by contributions from their Association.

—The strike of the journeymen house carpenters of Baltimore was settled on Wednesday, the men "agreeing to nine instead of eight hours for a day's work, and not to interfere with the business of their employers in the employment of workmen."

—The sash and door workmen of Philadelphia are asking their employers to do a very difficult thing. The price of labor in the interior of the State, particularly about Williamsport, is less than it is here. The interior manufacturers have the advantage of lower freight rates and cheaper lumber; they are able to compete with Philadelphia manufacturers and to take business, which but for the high wages ruling here, would come to Philadelphia. The workmen have of course considered the question, but we are not familiar with the reasons they give for insisting upon a virtual increase in the cost of labor. The employers in refusing the nine-hour day have certainly well considered the matter, but they have not favored us with their reason for refusing, other than that the difference in the price of labor between here and Williamsport forbids any reduction in the hours of labor. Several branches of the building trade have secured a reduction to nine hours, and the workmen in the sash and door factories may perhaps argue that what can be done in other branches of the building trades can be done in theirs.

—The sash and door employés of Philadelphia are preparing to give their employers no small amount of trouble. Some time ago thirty-three firms and individuals signed an agreement that they would make no concessions to their workmen individually, and that they would resist to agitation for shorter hours. The workmen sometime ago made a demand for a nine-hour day to take effect May 1st, but not having succeeded in gaining this demand, they have organized for a strike which will likely involve some 1,500 to 2,000 persons. There is a possibility that the strike may extend to other branches of the building trade. The Building Trades' Council have taken action in reference to the matter and will support the sash and door workmen. Mr. Charles Gillingham, Secretary of the Saw and Planing Mill Association, says that of the 2,000 saw and planing mill employés in this city about 500 went out on strike. Several establishments are run with non-union hands at this writing. An attempt will be made to involve the members of the building trades in the strike. The cabinet makers are still out. A proposition is under construction looking to the establishment of an arbitration board but the employers have not yet been consulted. The paviors and rammers employed by Joseph Johnson went on a strike early in the week. Three additional assemblies of carters are to be organized. It is stated by the plasterers that several establishments employing non-union labor have conceded to the nine-hour day. Fortunately the labor troubles in this city are dying out one by one; the workmen while determined are conservative and are disposed to meet their employers half way. The nine-hour day is declared by a good many employers to be utterly inpracticable, that concessions on this point are out of the question.

BUILDERS' ITEMS.

Among the Builders and Real Estate Men.

MR. TOMLINSON is building four dwellings and a corner store on Tioga street below Sixteenth.

W. F. PADDOCK, real estate broker, 4312 Fairmount avenue, is building six two-story dwellings, at Forty-eighth and Brown streets.

W. RIGHTLY is building 26 houses on Aspen and Brown streets, and Geo. E. Goldbeck, of Lancaster avenue, is the sanitary engineer.

W. E. RIGHTLY, builder, West Philadelphia, is erecting five three-story dwellings on Belmont avenue, above Marion avenue, with porches and front yards.

JOHN M. ERICKSON, 3935 Lancaster avenue, real estate agent, has on his rent-roll some 400 or more houses, and has but 10 vacant. Inquiries for small houses continue.

J. H. VIRKLER, builder, of West Philadelphia, is erecting 21 houses on Forty-second street and Woodland avenue—18 dwellings of two stories and 3 three-story stores—with stone fronts. They are being built as an investment.

F. H. MCCANN, 3811 Lancaster avenue, real estate broker, made a sale this week of a dwelling-house, 3814 Spring Garden street, for $5,000. Collections with him are good, but sales are a little slow. He has several small properties east of Forty-fourth street, which are hardly ever at liberty.

J. RAYMOND CLAGHORN is building 37 houses on Sixteenth, Smedley and Ontario streets, Tioga. They will be suitable for small families—two stories, with six rooms—and will have all the modern conveniences. They will be of brick, with brown stone trimmings, and are a great addition to Tioga. They are either for rent or sale.

G. W. HANCOCK, real estate broker, Lancaster avenue, is making some additions to the Crescent Rink, on Lancaster avenue and Spring Garden street, putting small store and office. They have on their rent-roll from 1,100 to 1,200 houses, and have but 25 vacant. The demand in this section (Twenty-fourth Ward) is for six-room houses, from $14 to $16.

CHAS. F. EHRENPFORT, southwest corner of Fourth and Green streets, has just completed the sale of two houses, 515 and 517 Master street, to the present occupants, for $9,050, and has several large sales all but closed. He has on his sale list some very fine central properties, one amongst them being a fine dwelling on Fourth and Green streets, 27x182, and is very commodious.

SAMUEL MOULTON, real estate agent, 1103 Girard avenue, has a rent-roll of from 550 to 600 house, out of which only seven are untenanted.

Mr. Moulton complains that the real estate agents are greatly interfered with in consequence of builders themselves opening offices in the buildings, and selling them themselves. He also complains of the scarcity of small houses in his neighborhood.

WM. MATTICK, 3840 Lancaster avenue, real estate agent, made sale of the following properties within the last few days: a dwelling-house on Brooklyn street, north of Haverford avenue, for $3,000; one on Wallace street, west of Forty-fifth, for $1,450, and another on Locust street, between Twentieth and Twenty-first, for $7,000, and has many important negotiations on the way. He has the charge of over 200 houses, which are all rented but two.

J. C. MOLLER, real estate agent and conveyancer, 245 N. Fifth street, commenced business last November, since which time his business has been steadily growing. He is a thoroughly practical man. He has lately been doing a good business, conveyancing, and has added several good properties to his increasing rent-roll, and succeeded in making considerable sale of real estate within the last two months. His stand is very central and his prospects are good.

GEO. E. GOLDBECK, real estate broker, 4217 Lancaster avenue, has made an exchange of 12 houses on Market street, West Philadelphia, and five on Parrish street, for a lot at Sixty-third and Hamilton streets. Also made sales of a dwelling-house, 4137 Brown street, for $2,750, and another, 807 N. Forty-second street, for $2,800.

Mr. Goldbeck reports rents coming in good and all his houses let, and a continuous demand for houses from $12 to $18. He has large quantities of valuable properties on his books.

HAZLEHURST & HUCKEL, architects, 508 Walnut street, are building a M. E. church at Park avenue and Norris street, of stone, with corner tower; also country house on Warren street, Beverly, N. J., for Mrs. Phœbe Bishop (frame); also building a four-story city residence, of brick and stone, for Dr. Knarr, at Twelfth and Spruce streets; also country house at Gloucester, N. J., on Broadway, two stories and attics, for Mr. West; also office building on Frankford avenue, Frankford, for John Sidebotham, with ornamental stone front; also M. E. church, with corner spire, Sunday-school and lecture room attached (it is of Trenton stone, with red stone trimmings); also country house for D. W. Hunter, at Park Station, on the Schuylkill division of the Pennsylvania Railroad (it will be built of stone, in Colonial style, and finished in hard wood); also a stone building at Frankford, 20 feet by 65 feet, for Mr. Ireland; also Cumberland National Bank, corner of Commerce and Laurel streets, Bridgeton, N. J. (will be of stone, brick and terra cotta, and the interior of cherry); also a residence, 321 Cooper street, Camden, N. J., for C. F. Nevin (it will have a stone front); also a house for Samuel Gilbert (country house), at Benezet Station. It will be built of Trenton stone, with Carlisle stone trimmings, and will cost $25,000.

Among the Camden Real Estate Men.

R. D. COX is building two-story houses on Penn street.

THE estate of Moro Phillips, on Cooper street is for sale.

EX-SHERIFF MORGAN is building a row of six two-story brick houses on Royden street.

W. T. MEAD is building several two-story brick dwellings in the lower part of the city.

J. C. TOONE is building four two-story brick houses at Sixth and Mount Vernon streets.

MESSRS. ROBERTS & COHN, real estate brokers and builders, Market street, have lately made a sale of $40,000 cash.

DAVID B. KAIGHN & LEWIS HOLL have just commenced operations on nine six-room houses on Mt. Vernon, between Locust and Third streets.

ALBERT F. BROWN, real estate broker and insurance agent, 125 Market street, is doing a large business in mortgages, and is having several inquiries for more. Considering the short time this gentleman has been in business he has been meeting with great success.

THADDEUS P. VARNEY, 264 Kaighus avenue, sold six lots at Tenth and Chestnut streets, to Peter J. Murphy, for $1,100. He has several important negotiations pending. He confines his business to sales and insurance as much as possible.

WILLIAM A. TURNER, real estate broker and insurance agent, made a sale of four frame dwellings at Broadway and Spruce street for $4,500. He has an extensive business in the sales of stocks, fixtures and goodwills of stores, which, with his insurance business, keeps him very busy.

I. W. JACKSON, 33 Kaighns avenue, is comparatively new in the real estate business, having only had his office open the last eight months, and it is pleasing to note that he, in so short a time, has built himself up a good connection. He has several desirable properties for sale or rent, both medium and small, and his future seems to look bright.

GEORGE HOLL is building two semi-detached houses, of three stories, on the corner of Broadway and Benson street. Properties on this land are restricted by the Cooper Estate to $9,000 each. He is also erecting eight houses on Sixth, between Benson and Washington streets, three stories, of plain and ornamental brick; there will be a store at either end.

JOHN MITCHELL, real estate broker and insurance agent, 309 Kaighns avenue, made sale of a dwelling house on Broadway, in the Eighth Ward, for $2,500. He is putting up four two-story, six-room houses, with bathrooms. They will have six feet of white marble in front portion of the houses, and will be finished with fancy brick. They are being built as an investment.

MESSRS. MOFFAT & CAPEWELL have lately purchased a plot of land, 85x100 feet, on Broadway, between Walnut and Spruce streets, on which they propose erecting a fine hardware store shortly. They are also erecting ten two-story brick dwellings on Walnut, between Sixth and Seventh streets; they will be fitted up with all the modern conveniencies. They are built as an investment.

JEHU EVANS & CO., real estate and insurance agents, 311 Market street: This firm started out in business as late as last January, and since that time have been doing an increasing business. They complain of the want of small properties near to the ferries, for which, they say, they are daily being applied to for. There list of properties for sale — dwellings, farms and lots — are heavy.

D. SOMERS RISLEY, conveyancer and real estate broker, 111 Market street, made sale of a fine dwelling house, 413 North Second street, for $6,000; also 602 North Fourth street, for $3,000. He has several very desirable dwellings for sale in some of the best parts of the city which he would exchange for Philadelphia properties; also, some good farm properties which he would also exchange. They are situated between Camden and Haddonfield.

L. B. HUMPHREY, real estate agent, Third and Market streets, has made sale of the following properties: 630 North Sixth street, $1,850; 525 North Sixth street, for $2,500; 418 South Second street, for $1,200; 1134 Cooper street, for $1,350; and 211 Federal street, for $4,600. He is in negotiation with several large real estate properties, and has a large number on his books. His rent roll, which shows some 500 houses, is, with few exceptions, all rented. He has also some small farms and country seats for sale near by Camden.

JOSEPH F. P. READ, real estate broker and insurance agent, Market street, has within the last few days made sale of a two-story brick dwelling on Point street for $2,200; also one on South Third street for $4,000; and another on Fifth, above Linden street, for $7,500; also a dwelling house on Maryland avenue, Atlantic City, for $9,000. He is also negotiating for a fine property on Second street, below Bridge avenue, for $23,000. Mr. Read has a very handsome house, 517 Cooper street, for sale, $13,000, beautifully situated, with lawns and fine side yard. The demand in Camden for medium and small houses still increases, both for rent and purchase. Real estate for the last two years has been showing considerable activity and, says Mr. Read, real estate men are looking forward to a very lively fall. He has on his rent roll from 400 to 450 houses, averaging from $22 to $25, all of which with but one or two exceptions are rented.

—The building interests of this city have thus far escaped without serious injury the agitation for shorter hours and higher wages; there are evidences of returning confidence, but if the present strike of sash and door workers should be endorsed by the Building Trades' Council, to the extent of suspending work, it will give a blow to returning enterprise which will be widespread and serious.

Building Permits.

Eleven two-story houses, 16 ft. by 39 ft., Seventh st. and Snyder ave., to Robert Alexander, 22 N. Seventh st.

One three-story house, 34 ft. by 36 ft., Boyer st., above Gowan ave., to C. R. Robel & Bros., 45 West Johnson st.

One two-story back building, 12 ft. by 18 ft., 47 Harrison st., to Amos W. Linn, 4767 Garden st.

One two-story house, 24 ft. by 68 ft., Bridge and Tacony sts., to same party.

Four two-story houses, 14 ft. by 37 ft., Haverford Road, above Sixty-sixth st., to Lewis G. Leger, 328 North Sixty-third st.

One corner alteration, Tenth st. and Columbia ave., to W. H. Young, 1528 Parrish st.

Two two-story houses, Mountain st., above Nineteenth, to Bernard McNicholl, 1906 Manton st.

Front alterations, 1738 Columbia ave., to Charles M. Baker, 1724 North Eighteenth st.

One addition, 17 ft. by 10 ft., 908 Orchard st., to J. Sims Wilson, 1327 Buttonwood st.

One two-story house, 17 ft. by 63 ft., Fifteenth, above Dauphin st., to Lemuel A. White, 2318 Carlisle st.

Six two story houses, 14 ft. by 36 ft., Keith, st., above Columbia ave., to Thos. E. Thorn, 1615 North Nineteenth st.

Four two-story houses, 16 ft. by 45 ft., Twenty-first, above Manton st., to Henry R. Coulomb, 731 South Tenth st.

Three three-story houses, 36 ft. by 50 ft., Evergreen ave., above Twenty-ninth st., to Ashton S. Tomison, 5441 Germantown ave.

One three-story back building, 12 ft. by 27 ft., 1937 Cune st., to Charles H. Queen, 1602 Johnson st.

Alteration and addition, Forty-first st. and Chester ave., to Jacob Y. Tone, Forty-first and Chester ave.

Two three-story houses, 19 ft. by 30 ft., Mansion and Ripka aves., to F. Noska, 4528 Main st.

Repairs to building, 16 ft. by 26 ft., New Market and Margaretta sts., to Charles P. Hilliker, Camden, N. J.

Three two-story kitchens, 13 ft. by 8 ft., Peters alley, above Poplar st., to Christian Kurtz, 966 Lawrence st.

One two-story back building, 18 ft. by 24 ft., Levering and Ridge aves., to S. Rainbey, Roxborough.

Twelve two-story houses, 10 ft. by 52 ft., Marshall, above York st., to Hy. G. Schultz, 2633 Germantown ave.

One two-story back building, 12 ft. by 17 ft., 1318 Warnock st., to Michael Hausen, Canal and Girard aves.

One three-story factory, 32 ft. by 32 ft., 1320 North Fifth st., rear, to Michael Magee, 1516 North Eighth st.

One two-story back kitchen, 10 ft. by 18 ft., 926 Charlotta st., to E. Schmidt, 1713 Mascher st.

One three-story house, 20 ft. by 60 ft., 930 North Sixth st., to Wm. Steele & Son, 2141 Howard st.

Ten two-story houses, 15 ft. by 27 ft., Seventh and Jackson sts., to W. H. Merrick, 509 Snyder ave.

Eighteen two-story houses, 14 ft. by 36 ft., Bancroft, above Tasker st , to Robert Montgomery, 1836 Wharton st.

Alterations to house, 17 ft. by 15 ft., 126 Maplewood ave. to Wm. H. Brunner, Adams and Duval sts.

Two three-story houses, 15 ft. by 41 ft., Meehan and Musgrove sts., to same party.

One two-story back building, 12 ft. by 12 ft., 1215 Melon st., to M. Grau, 655 Preston st.

One three-story house, 20 ft. by 49 ft., Germantown ave., below Mehle st., to M. Dwartman, 116 Bringhurst st.

One one-story shop, 18 ft. by 36 ft., Uber, above Berks st., to L. B. MacDowell, 2147 Woodstock st.

Eleven two-story brick houses, 15 ft. by 40 ft.; Thirty-eighth, above Aspen st., to Jacob Rightley, 2519 Franklin st.

One two-story house, 32 ft. by 52 ft., Marriott, above Seventh st., to Edwd. Delaney, 913 S. Twentieth st.

One two-story shop, 12 ft. by 25 ft., Orkney, below York st., to Joseph Cooney, 2332 Lawrence st.

One three-story house, 18 ft. by 16 ft., Front st., above Montgomery ave., to James Potter, 1836 N. Front st.

One three-story house, 15 ft. by 58 ft., Second, above Tasker st., to Louis Brauer, 29 Tasker st.

One three-story addition, 14 ft. by 20 ft., 3635 Chestnut st., to A. H. Williams, 402 Tenor Place.

One four-story store, 21 ft. by 175 ft., Market, above Twelfth st., to Wendell & Smith, 1430 S. Penn Square.

One three-story house, 34 ft. by 55 ft., Wayne st., above Chelten ave., to J. E. Pennock, 1901 Wood st.

One one-story kitchen, 10 ft. by 9 ft., 181 West Dauphin st., to D. C. Schuyler, 2263 Fairhill st.

Four two-story houses, 15 ft. by 42 ft., Cambria, above Second st., to E. Hanson, 158 East Huntingdon st.

Five two-story houses, 15 ft. by 40 ft., Oregon and Fairmount aves., to Daniel Kraus, Thirty-fifth st. and Fairmount ave.

Two three-story houses, 16 ft. by 57 ft., Franklin st., below Norris, to same party.

One two-story store and dwelling, 20 ft. by 63 ft., Foulkrod, below Willow st., to Samuel R. Ecker, 4812 Cherry st.

One two-story house, 17 ft. by 40 ft., Filmore, above Cedar st., to same party.

Fourteen two-story houses, 15 ft. by 28 ft., William, above Coral st., to Dickson Bros., 2817 Frankford ave.

One two-story back building, 14 ft. by 25 ft., Wayne, above Chelten ave., to Thomas Wright & Son, 7 Harvey st.

Thirteen two-story houses, 15 ft. by 42 ft., Federal, above Nineteenth st., to John McConaghy, 1710 Christian st.

Two two-story houses, 24 ft. by 26 ft., St. Mark's Square, above Sixteenth st., to Jos. Williams, 1534 Cayuga st.

Two two-story houses, 15 ft. by 42 ft., James, above Orthodox st., to R. C. Wimals & Bro., 4654 Worth st.

One two-story house, 14 ft. by 25 ft., Leiper, above Unity st., to same party.

One one-story stable, 18 ft. by 20 ft., Diamond, above Twenty-ninth st., to George Kessler, 1332 Marshall st.

One two-story bay window, 8 ft. by 4 ft., Mill, above Chew st., to Howard Rue, Adams and Johnson sts.

One one-story shop, 26 ft. by 50 ft., Twenty-third st., above Washington ave., to John Gibson, 1323 Reed st.

Front alteration, Sixth and Race sts., to Thomas McCarty, 1935 N. Seventh st.

Two three-story houses, 16 ft. by 57 ft., Eighth st., below Norris, to Robt. Buchanan, 2025 N. Twenty-second st.

One two-story back building, 16 ft. by 10 ft., Twenty-first and Wood sts., to Marvin Wilson, Twentieth and Fitzwater sts.

Three two-story houses, 14 ft. by 28 ft., Alder, below Diamond st., to Michael Smith, 1015 Norris st.

One one-story back building, 15 ft. by 12 ft., Woodland ave., below Fifty-seventh st., to John Doak, Fifty-third and Woodland ave.

Two two-story houses, 16 ft. by 43 ft., Mather, above Tioga st., to John Duncan, 905 Chant st.

Fifty-six two-story houses, 14 ft. by 36 ft., 28 on each side of Chadwick, above Morris st., to Friel & Simpson, Nineteenth and Wharton sts.

Gossip of the Week.

A $1,000,000 Court House is to be erected at Kansas City.

The dwelling, 2001 Arch street, and lot, 22x97 feet, sold for $17,200.

A new M. E. Church is to be erected at Eighteenth ahd Wharton streets.

A lot of irregular shape, near Germantown avenue and Haines street, sold for $23,000.

Pine street dwellings bring good prices; No. 1829 and lot, 22x100 feet, sold for $18,000.

A dwelling on the South side of Green street, West of Twentieth, and lot, 24.10x117 feet, sold for $24,000.

Partridge & Richardson are going to erect a four-story addition, 60x75 feet, to their stores, Nos. 17, 19 and 21 Nth. Eighth street.

Henry Hazelhurst, Esq., at Marion Station, Pennsylvania Railroad, will erect a large, handsome stable of the Queen Anne style of architecture at once.

N. Snellenburg & Co. have commenced excavations for a four-story addition, 48x300 feet to their store, at Fifth and South streets. Elevator and granolithic pavement.

The Temple Theatre is to undergo extensive alterations and improvements, about $30,000 are to be expended. A new 30-feet entrance is to be made on Chestnut street, and the seating capacity is to be increased.

A benevolent citizen who avoids publicity has offered to build for the Presbyterian Hospital, on its grounds at Thirty-ninth street and Powelton avenue, a children's ward, to cost upward of $25,000, and to present it to the hospital free of cost.

There are nearly 150,000 owners of real estate in Philadelphia who pay taxes upon the 225,000 separate properties assessed in the city limits. These figures show a larger proportion of taxpayers than can be found in any other city in the United States.

The Everly estate in West Philadelphia, contemplates building several hundred new houses, provided the necessary streets are opened to render the property accessible. Upwards of $1,000,000 are to be invested. Councils' Committee on Highways will recommend the opening of the streets.

—It is stated that about $2,000,000 of Texas and Pacific bonds of all three divisions have been forwarded to the Farmers' Loan and Trust Company of New York under the reorganization scheme, and $2,500,000 New Orleans Division bonds owned in Baltimore have given assent to the plan and are about to be shipped to the agents of the committee.

Begin at the Primaries.

If the people of this city want to rid themselves of the oppressive tax of $5,000,000 a year upon their fuel, if they want to reclaim a business of nearly $16,000,000 annually in manufactured products that has gone to New York, if they want to build up the agricultural and other industries of Eastern Pennsylvania, which furnish the best and largest customers of Philadelphia's merchants, let them begin at the primary elections by defeating those candidates for renomination who at the last session of the Legislature delivered over to the tender mercies of six railroad companies the material interests of Philadelphia and Pennsylvania.

Business men and the consumers of everything grown or manufactured in this city and State should unite in an effort to prevent the railroad companies from making discriminations in freight rates, in violation of the provisions of the State Constitution, and their personal influences should be brought to bear upon the selection of delegates to the Legislative Conventions at the primaries to be held this fall. The contest to be waged is the people's fight, and the battle when won will be their victory, and if they should be successful in the initiatory movement the final struggle at the polls in November would be shorn of half of its difficulties.—*Philadelphia Record.*

—The argument of the injunction proceeding by property owners against the Union Passenger Railway Company, to restrain the laying of tracks on Twenty-second street, between Norris and Susquehanna was postponed until to-day.

ABBREVIATIONS.

Add.—Addition.
Alt.—Alteration.
Assn.—Association.
B. & L.—Building & Loan.
Bk.—Bank.
B.B—Back Building.
Dwg.—Dwelling.
Est.—Estate.
E.J.—Ejectment Suit.
E.S.—Equity Suit.
Exr.—Executor.
Exrx.—Executrix.
K. & B.—Kitchen & Bath.
M.L.D.—Mechanics' Lien Docket.
Nat. Bk.—National Bank.
Sav. Bk.—Savings Bank.
t. t.—Terre Tenant.
S.F.—Scire Facias to revive Judgment.

Sum C.—Summons in Case—A form of action invented to meet all civil cases, the form of which is not specially provided for.

Where there are no figures to indicate the amount of the judgment, the damages have not been assessed.

The first name in each line is that of the judgment debtor.

An asterisk (*) denotes judgment confessed or bond and warrant conditioned.

The figures 1 2 3 and 4 immediately after the name of the plaintiff indicates the number of the Court. The letters D. M. J. and S. after the number of the Court indicate the Term as D., December Term, M., March Term, as J., June Term and S., September Term.

An examination as to the nature of judgments and suits will be made for subscribers without extra charge on application.

Real Estate at Auction.

—At Jemseh, on the Red Sea, explorations for petroleum, made under the directions of the Egyptian Government, oil is said to have been found which possesses greater illuminating power than the American oil.

—A leading shoe manufacturer in Auburn, Me., in adopting the profit-sharing plan as a business experiment, has directed, in order that the workmen shall be fully satisfied that the accounts are truthfully kept, three of the employés to be taken into the confidence of the firm and made acquainted with all its doings. It is stipulated, however, that these representatives of the workmen shall be citizens of Auburn, and that at least two of them shall be owners of real estate there. The probable reason for this condition is that, as a rule, an owner of real estate is of conservative tendencies, and, if a working man, is more likely to remain in a town than is one who lives in a rented house. The management of the business will remain with the firm, and the employés are not asked to invest any of their savings in the enterprise, or take any risks, or make any guarantees. Should the scheme prove satisfactory on a year's trial the establishment may be made over to a corporation, shares in which may be bought by the workmen.

The Plumb Bill.

We give below the text of the Plumb Bill, as amended by the Senate Committee, which is intended to prevent the acquisition of public lands in the United States by aliens. The Senate has passed the bill.

Section 1. That it shall be unlawful for any person or persons not citizens of the United States, or who have not lawfully declared their intention to become such citizens, or for any corporation not created by or under the laws of the United States or of some State or Territory of the United States, to hereafter acquire, hold or own real estate so hereafter acquired, or interest therein in any of the Territories of the United States or in the District of Columbia, except such as may be acquired by devise or inheritance or in good faith in the ordinary course of justice in the collection of debts hereafter created; provided, that prohibition of this section shall not apply in such cases as the right to hold lands in the United States is secured by existing treaties to the citizens or subjects of foreign countries, which rights shall continue to exist so long as such treaties are in force.

Section 2. That no corporation or association more than 20 per centum of the stock of which is or may be owned by any person or persons, corporation or corporations, association or associations, not citizens of the United States, shall hereafter acquire or shall hold or own any real estate hereafter acquired in any of the Territories of the United States or of the District of Columbia.

Section 3 That no corporation other than those organized for the construction and operations of railways, canals or turnpikes shall acquire, hold or own over 5,000 acres of land so hereafter acquired in any of the Territories of the United States; and no railroad, canal or turnpike corporation shall hereafter acquire, hold or own lands so hereafter acquired in any Territory other than as may be necessary for the proper operation of its railroad, canal or turnpike, except such lands as may have been granted to it by act of Congress.

Section 4 declares forfeited all lands held in violation of this act.

The bill now goes to the House of Representatives for concurrence.

—No mishap has occurred to the one thousand feet section of the underground electrical railway constructed on Ridge ave. Mr. Schlessinger, the electrician, says it is now intended to extend the track a further distance of 2,000 feet to Laurel Hill Cemetery gates. He says it costs $20,000 per mile for construction, which includes the costs of motor and machinery, and the saving in expense of operating it compared with horse power is from $2 to $3 per day per car.

NOTICE is hereby given that an application will be made to the Governor of the State of Pennsylvania, on Monday, June 21, 1886, under the Act of Assembly of the Commonwealth of Pennsylvania, entitled "An Act to provide for the Incorporation and Regulation of certain Corporations," approved April 29, 1874, and the supplements thereto, for the charter of an intended corporation, to be called "The Philadelphia Real Estate Exchange," the character and object whereof is the purchasing, holding, leasing and selling of real estate at public or private sale, and the carrying on of the various branches of business incident thereto, and for these purposes to have, possess and enjoy all the rights, benefits and privileges of the said Act of Assembly and its suuplements.

JAS. H. STEVENSON,
Solicitor.

"GILBERTSON'S OLD METHOD."

Takes the Contract for the WHITE HOUSE roof at WASHINGTON,

at 70 cents per box over the so-called "Genuine 'Old Style'" for the IC 14x20 size (equal to $1 40 per box for the 20x28 size).

The award not made with reference to price alone, but also from tests made as to the BEST QUALITY.

The guaranteed weight of the "Gilbertson's Old Method" offered was 120 pounds net per box of 112 sheets; while the so-called "Genuine 'Old Style'" was offered at 112 pounds.

In order that consumers may more thoroughly understand WHY the "Gilbertson's Old Method" was accepted AT SUCH AN ADVANCED PRICE OVER THE SO-CALLED "GENUINE 'OLD STYLE,'" we quote the following from the specifications made by the Government for the Roofing Plates to cover the roof of the Executive Mansion:

"The Government desires to secure the BEST QUALITY OF DIPPED ROOFING PLATES, and samples showing surface imperfections or irregularities in size or weight will be rejected.

"Comparative tests will be made for weight, ductility, uniformity of plates and thickness and quality of coating, ALL of which, as well as the prices, will be considered in making the award.

"The United States desire ONLY THE BEST CLASS OF MATERIALS, and parties who imagine that any other class will be received are respectfully requested not to bid."

The Real Estate Record's Suggestions to the Coming Real Estate Exchange.

THE Real Estate Exchange could wisely address itself to subjects like these, through its various committees and sub-committees:

Care over State legislation, watching of bills presented affecting real estate interests, opposing unwise legislation and supporting and advancing desirable legislation.

Care over municipal legislation; the centering of its influence on necessary legislation, suggesting wise measures and opposing unwise measures in Councils in reference to real estate interests, sanitation, city improvements, and so on.

The making of rules and regulations for the better government of the membership.

Control over the membership to the end that the profession be elevated in its own as well as the public estimation.

The establishment of an arbitrating committee or Board, where trade differences between the members can be adjusted.

The protection of the public and the profession against the unfair dealings and practices which sometimes creep into real estate dealings.

The creation of a fund for the building requirements of the Exchange.

The establishment of a department of statistical information in reference to building operations.

The establishment of fixed charges, commission, etc., for services.

By far the greatest immediate advantage that will accrue to members from the formation of the proposed Exchange will be the facility with which business can be transacted. At present agents and dealers having business are obliged to run from office to office, often losing time waiting. A common meeting-place will bring all together at a given hour, and all the business to be transacted can be done in a comparatively short time.

Another matter that may assume shape is the sale of real estate securities of various kinds. While it is not intended to interfere with auction sales and transactions, it is quite probable that an exchange could and would develop a practically new field in this direction. Securities sold at the exchange would probably sell better; would attract more buyers and better prices under the spirit of competition which is always apt to arise. The probabilities are that securities could be more promptly disposed of, and to much better advantage than under the old method.

A valuable point to be kept in sight among the resultant advantages of such organizations, is the centralizing of all the little rivulets of information now scattered. Men brought face to face will do more buisiness and talk more than when met separately. Each one now holds his fort against all comers. Under the new system, information in regard to real estate and all that comes under it would become more or less common property, not to disadvantage, however, to the better informed, as might be at first supposed, but to their ultimate advantage as well as to the benefit of all, large and small.

There is a vast undeveloped interest in real estate. Under the management of the organization in New York the volume of business has increased, true values have been ascertained and unfair values detected. That Exchange has instituted and effected some valuable reform. Need of similar reform will be found to exist here, as soon as the brain and energy now scattered in hundreds of offices are centred in one.

Municipal improvements and local enterprise in many directions will be stimulated by the combination now about being consummated. Buyers and sellers are practically strangers. The volume of land or property offered for sale at any time is not known. This knowledge is necessary to a proper transaction of business.

Such an Exchange would tend to draw the widely scattered real estate interests together, as they ought to be. Multitudinous small offices may continue throughout the city for the accommodation of tenants and prospective tenants, but the existence of an Exchange will tend to centralize the great interests of property and its more ready sale, transfer and improvement.

Refers with permission to William M. Singerly, Proprietor of Phila. "Record."

PHILADELPHIA, MONDAY, JUNE 14, 1886.

IF a title insurance company passes a bad land title good and the purchaser builds a house or factory on the land, why should not the purchaser make damages for his structure as well as for the land?

ALONG the line of the P., W. and B., building operations are extending. During the past thirty days real estate operations beyond the limits of the city have been quite numerous. Shrewd operators have their eyes at work in that section.

A WALL fell in New York on Monday and killed three men, one of whom was responsible for the accident. If mud-and-mortar builders are to be punished in this way in future, Buddensiek may congratulate himself that he is in Sing-Sing.

SOME men display their independence and greatness by incivility and a bragadocio style to an inquiring news gatherer and then complain that they are neglected and preference shown to smaller brokers. Possibly, it is because the s. b.'s are polite and civil.

ABOUT one thousand houses are under erection in the southwestern section of the city, between Broad street and the river, south of Dickinson street. The feeling against that section as a desirable location is fast disappearing under the foresight and energy of the southwestern builders.

CITY Councilman Clay does not go a dollar beyond the figures when he says that it will take $3,000,000 to put the streets of Philadelphia in proper condition. When will this amount of money be so expended? Not until a special act is passed, allowing the negotiation of a loan, and when that is done the amount should be made $5,000,000, for there are other urgent requirements besides street repairing. This will ere long become a vital question in municipal matters.

THAT theory of municipal government which exacts departmental management to that radical extreme as to practically isolate any single department is wrong in theory and extremely expensive in practice. To be sure, there must be responsible heads, whether elective or appointive, but in the present complex system—and it will be neither more nor less complex under the Bullitt bill—there should be some practical method devised in order that the departments, while retaining their distinctive features of individuality, may yet act in perfect harmony, in the sense that waste might be avoided and great expense saved to the city where it could be done without conflict of authority.

A merchant who would annually go upon the market, and buy hundreds of tons of hay for his horses, while he had thousands of acres of it going to waste at his very doors, which could be had for the cutting, would be considered wildly extravagant, and yet this is practically the position of Philadelphia to-day, for Fairmount Park as it stands now would yield hay enough, with no other cost than that of gathering it, to not only supply every department in which horses are used, but the surplus would greatly help to defray the expenses of keeping it in order. This idea must present itself to every observing visitor to the Park, and it is not alone in the management of the Park that practical methods are needed, for it is even worse folly for any department to impose the cost of new material upon the city when what is needed might be obtained by transfer from some other department where it is not needed. A set of harness is wanted at the House of Correction, Almshouse, or elsewhere. New harness must be purchased, of course, while the Fire department might furnish a dozen sets, unfit for fire duty, perhaps, but good enough to meet the purposes for which they are needed at the above institutions. The Gas Trust needs a length or two of hose. Plenty of it under the control of the fire companies unfit for fire service, but just as good as new for the purposes it is needed at some gas house.

Then why are not practical methods adopted by which the Park can be made to pay its way, the other departments made to turn over things and material that are not needed to departments that need them, and the city saved thousands of dollars yearly?

THERE is talk of extending street-car railway facilities in the region between Broad street and Gray's Ferry.

AT last Wednesday's meeting of the real estate brokers of this city the question was asked, "What good will a Real Estate Exchange accomplish?" It was evident those present were in earnest and wanted to know. Frequent reference was made by the speakers to the New York Exchange, but nothing very clearly was stated as to what it had accomplished. The enthusiasm shown by its members, its $150,000 building, its twenty to thirty busy auctioneers, its twelve or thirteen busy standing committees, its harmonious workings and the great respect in which it is held by the general public—all show that it is a good thing for New York. But it was remarked, two or three times: New York is not Philadelphia. That is no reason why we do not need an Exchange, however.

Coming down to fine points, what good can we expect to get from an Exchange? Some of the good things to be derived are evident; some are under the surface, and won't show themselves until the Exchange gets into operation.

The first good accomplished will be to put the shystering element in the real estate business where it belongs. Every real estate broker knows what that is. Then, frequently a piece of real estate is put into a half dozen different agents' hands, each imagining he is the sole person entrusted with it. Under the rules that would be probably established, all would know who had a given property.

Then, if one had an inquiry for property, or had a property to sell, he could describe it on the bulletin board in a general way, as on —— street, between certain cross streets, and parties desiring to buy in that section would at once be directed to the seller. Besides, the operations of a Real Estate Exchange will help to establish real estate values, and stimulate activity in purchases and sales. Operations would be more frequent, and for larger sums, if buyers felt cerain that a $10,000 investment, for instance, to-day, would be worth $10,000 next month or next years, so far as legitimate values are concerned. At present there is too much of haphazard in our operations—too much of mere opinion as to values.

What is known about real estate ought to be centralized. False values and false notions of values should be and could be eliminated under the attrition of ideas and opinions and bids and transactions that would be brought out.

An Exchange would bring much more property into the open market. Properties would be offered there that would not be

offered privately. Holders have been holding property for years, uncertain whether to sell. If they knew its value as fixed in the open market, they would be more ready and anxious to sell when an offer came at or near the ascertained value. In this way the business of the real estate broker would improve. The uncertainty of the value of much property has retarded investments, has checked building, and has created doubt and uncertainty in the minds of investors and builders.

Besides all such considerations, the real estate brokers need to be brought together more. There are animosities that ought not to exist and under association in an Exchange will disappear, just as a similar state of feeling disappeared in New York. The public will have more confidence in brokers who are organized. The association can control its individual members, and put an end to unfair practices and dealings. The best men will naturally be brought to the front.

Legislation can be controlled by an organization. Numerous modifications in existing laws are needed. The New York Exchange has a committee at Albany when real estate interests are to be affected, and their advice is regarded always.

Investments will be duplicated when real estate values are ascertained. To-day, false estimates are frequent. Buyers are frequently paying too much, and sellers often get too little. Note how purchasers have frequently of late doubled their investment. Note the steady advance in real estate in some sections. Our interests demand that real values be ascertained, for our own benefit as well as for buyers and sellers.

Holders of capital keep it idle because, as they say, there is nothing definite known about values. They say there is too much guess work. Opinions of brokers vary too much sometimes.

More capital is wanted, more enterprise, and more confidence. Evils must be removed from real estate methods, values ascertained, the volume of offered property increased, and the influence of the craft united to oppose what is against its well-being, and to push what is likely to do it good. An Exchange will bring together the intelligence of the whole body, and will be the means of increasing the knowledge and the opportunities of every member of it.

SOME real estate agents and conveyancers pluckily assert they do not intend to be swamped entirely by the mammoth real estate, title and trust companies. Bravo! These huge corporations have been forced into existence by the rapidly growing demands not only for title examinations and real estate transferring purposes but for absolute safety, which the old system did not always give. Certainly, if there is any one body of men to blame, it is the brokers and conveyancers themselves, who have not risen up to the magnitude of the situation. Individual energy and enterprise is no longer sufficient. Combination is the watchword of the hour. We see it everywhere. Conveyancers and brokers must fall in line or fall to the rear. The new organization of conveyancers has a place as well as the mighty concerns, who took time by the forelock. Besides the formation of an association of thoroughly practical and drilled conveyancers, presents some advantages which are not always manifest in some of the older and rich concerns. The title insurance company of conveyancers recently organized, is wanted in this city. This association will create confidence where confidence is wanting.

Let it Go On.

It is rather to be regretted that the innate modesty of Mr. George W. Childs has led him so early in the agitation of his name in connection with the Presidency of the United States to forbid the mention of it in that connection.

The people of the United States would, we believe, like to engage in an old-fashioned campaign, such a one as elected George Washington to the Presidency by a voluntary acclaim.

The people are tired of mere party representatives in the Presidential chair. A national sentiment has grown during the past few years, which has carried us as a people out beyond the narrow confines of party. We have a country; we are a nation of people; we have grown out of the narrow ruts in which our political life has been held. We want national men; a national man as President, not a party spoilsman, who can carry his party or his section only.

The masses would enter with zeal on the work of electing a man of the people—a broad minded man, a man away above the narrow and belittling party affiliations and influences—a man whose heart beats with the people, who rose from among them to be head and shoulders above his associates by industry and tireless energy.

Such a man Philadelphia and Pennsylvania has in the person of George W. Childs. The manifestation of good will to Mr. Childs from so many quarters, without the customary "working up," is evidence that the people are hungry for a new style of man, that the country wants something more than a mere party representative, whose thoughts will be given to the American people and the American nation.

The time may possibly be not yet ripe for such a movement, but we regret that Mr. Childs has thought it necessary to check this patriotic expression. It should be encouraged, not simply because it is an expression of good will to the object of it, but because it is a development and expression of a feeling of patriotism and loyalty that ought to be encouraged. It is an evidence that the people are growing weary of party shackles, and that all they want is the right man to centre on.

Could not Mr. Childs reconsider and agree to quietly let the voluntary expression continue? What would be grander than to see a voluntary convention of the people meet in Philadelphia and centre on a "no party" candidate? Third party movements, perhaps, are offensive to the hidebound politician; but why should the people forever stand back for the politicians? Let them speak, if they will. Let the theories of our Republic manifest themselves, even to the breaking over and down of party cast iron rules and regulations.

—A twenty-five room brick house was moved last Saturday, from Forty-third and Chestnut streets, 135 feet distant, to make room for a church. The furniture was not removed.

—A $200,000 church will be erected at Forty-third and Chestnut streets, by the Christ's Reformed Episcopal Church Congregation.

REAL ESTATE.

Charters Granted.

During the week charters were issued at the State Department to the Rhein Building Association, of Philadelphia, with a capital of $1,000,000; Germania Building and Loan Association of South Scranton, capital $500,000; Mason Iron Company of Philadelphia, capital $75,000; the Pennsylvania Axle and Graphite Company of Philadelphia, capital $25,000; the Alta Oil Company of Philadelphia, capital $15,000; Globe Building and Loan Association of Pittsburg, capital $300,000; St. Anthony Real Estate Association of Philadelphia, capital $250,000; the McKeesport and Youghiogheny Ice Company of McKeesport, capital $15,000. Applications for charters were made by the Manufacturers' Water Company, of Pittsburg, with a capital of $50,000, and the Shamokin Central Coal Company, with a capital of $1,200,000. The Merchants' Warehouse Company of Philadelphia, with a capital of $125,000. The Beaver Falls Marginal Railroad Company, with a capital stock of $100,000.

Preliminary Meeting for Organizing a Real Estate Exchange.

The result of the preliminary meeting of the real estate brokers of Philadelphia last Wednesday, was the appointment of a committee of eleven to map out a scheme to be submitted at a future meeting to be called by the chairman. The committee, as named by chairman Hancock, who is ex-officio chairman, is as follows: D. J. Myers, chairman; H. C. Thompson, Charles M. Lukens, Frederick Sylvester, James R. Booth, James L. Stevenson, B. F. Teller, J. T. Jackson, Lewis T. Brooke, John H. Lofland, W. F. Deakyne and George W. Hancock. Application has been made for a charter and about $35,000 of the proposed capital stock of $50,000 has been subscribed.

The discussion participated in, showed a willingness to form an exchange at once. About a half-dozen gentlemen spoke—Messrs. Thompson, Sylvester, Myers, Teller, Stevenson and Hancock. The committee will push their work as rapidly as possible, and a subcommittee will probably visit the New York Exchange for the purpose of studying into the details of that organization.

Bailey, Banks & Biddle's New Building.

Messrs. Furness, Evans & Co., architects, and George McNichol & Son, contractors, have nearly completed the demolition of the building southwest corner Twelfth and Sansom streets (a house by the way rich in association with the home life of many prominent families who have occupied it), and are about to erect in its place an iron front structure, 40 ft. front, on Twelfth street, by 100 ft. deep, on Sansom street, for the present owners of the property, Bailey, Banks & Biddle, who purpose renting to other parties two large stores on the ground floor, and using the remainder for their large force of diamond setters, jewelers, watchmakers, clockmakers, silversmiths, engravers, illuminators, die-sinkers, medalists, artists, designers and others engaged in the preparation of their goods. The stores on the ground floor will be each 18 by 80 feet, with fine bulk windows. Between them is the main entrance by a spacious tiled vestibule. The main stairway is fireproof, and there is an improved hydraulic elevator to fifth floor.

The front will be of iron, relieved at the fourth floor with tiled bay and corner windows.

Each floor will be fitted with all possible conveniences for the purpose for which it is to be used, and the whole will constitute one of the most complete factories, if not the finest, owned by any retail jewelry and fancy goods house in the United States.

Gossip of the Week.

Captain Allen is building a three-story frame dwelling at Prospect Park, at the cost of $8,000.

Work has been begun on a large addition to the La Salle College building, at No. 1240 North Broad street.

The Protestant Episcopal Academy, at Locust and Juniper streets is to be altered and improved this summer.

Mr. Ward has made sale of the property Northwest corner Fifteenth and Master streets to Dr. Raub for $8,200.

The contract for the additional sick diet kitchen at the Philadelphia Hospital, has been awarded to Bramhall, Deane & Co., for $3,250.

Corner properties are in demand. The dwelling N. W. cor. Eighteenth street and Fairmount ave., 17 ft. by 90 ft. 6 in., sold for $9,500.

The widow of Bishop Simpson refused $75,000 for a property on Arch, below Broad street, on the South side, the original cost of which was $40,000.

Extensive improvements are to be made within and around the Protestant Episcopal Academy, Locust and Juniper streets, during the coming summer vacation.

A new church is to be erected for the congregation of the French Episcopal Church of St. Sauveur, on the lot of ground at Twenty-second and Pine streets, now occupied by the Church Home.

The P. W. & B. R. R. Co. are taking down the old freight house at Moore Station and replacing it by a more commodious one to accommodate the increased population of that growing neighborhood.

It is proposed to put up a new building, at a cost of $ 0,000, upon the southeast corner of Eighteenth and Wharton streets, to have a frontage of 65 feet on the latter street, and to extend along Eighteenth street a distance of 80 feet. The building will be used as a church for the Eighteenth Street Methodist Episcopal Congregation. This structure is to be of brick, and is to contain two floors, with galleries, and be capable of accommodating nearly 1,000 persons. It is also the intention to erect an additional building to the front on Eighteenth street, in the rear of the church. The dimensions of this building will be about 20 by 80 feet. The trustees now have upwards of $3,000 on hand towards the building fund.

Ground was broken last week for the cellars of twelve stores and dwellings on the north side of Berks street, between Third and Fourth streets, and five dwellings on the west side of Third street, and five dwellings on the east side of Orrianna street, above Berks. All the buildings are in one operation and are being erected by John S. Serrill. The Berks street houses will contain twelve rooms each, and those on Third and Orrianna streets, nine rooms. William G. Serrill has purchased the lot of ground from the Clymer estate, situated at the southwest corner of Fourth and Berks streets and a small tract between Leithgow street and Germantown avenue. Work will soon be commenced in erecting sixty dwellings. They will be three stories high, contain nine rooms and be of fancy brick exteriors.

—A jury of view filed a report last Tuesday, making an award of $1,400 against the Schuylkill River East Side Railroad Company, for taking thirty-seven one-thousandths of an acre of land fronting on Thirty-fourth street, south of Gray's Ferry road, belonging to Jas. G. Robinson, in the Twenty-sixth Ward.

—The Citizens' Municipal Association bestow the highest commendation upon Chief Commissioner McDonald for the prompt manner in which he investigates complaints laid before him.

—The City owes the State some $47,059.95 for taxes collected, and which the city failed to pay over to the State. The State has sued the city in the Dauphin County Court for the amount.

—During the month of May the admissions to the Park were 33,658 one-horse, 18,755 two-horse and 12 four-horse vehicles, 2,414 bicycles, 2,673 equestrians and 346,190 pedestrians.

—Judge Gordon imposed a sentence of two years' imprisonment on John Donaldson, the bookkeeper of the Queen Fire Insurance Company, who embezzled $3,000 from the corporation.

—All the rolling mills, nail works, furnaces and other manufactories of Pottstown are now in full operation. The large steel works of the Pottstown Iron Company are nearly ready to start.

—The bill to increase the cost of the Public Buildings at Williamsport, Pa., from $125,000 to $225,000 has been finally reported upon by the Congressional Committee on Public Buildings and Grounds.

—Dr. Joseph J. Cummings, who was fined by the Sanitary Committee of the Board of Health, and Mr. Dutton, a member of the Board, passed some very warm words at the Health Office on Thursday.

—About twenty firms representing the Metal and Slate Roofing and Cornice Workers' Association have organized a permanent association, and propose to dictate terms to the workmen they employ.

—Permission was granted by the Port Wardens to the Schuylkill River East Side Railroad to build bulkheads on the east side of the Schuylkill river in front of the Arsenal and Asylum and below Pine street.

—A movement for the establishment of a savings bank in South Camden is in progress. It will probably be located on Kaighn's avenue, in order to accommodate the large mill district and Gloucester City.

—An ordinance was passed appropriating $80,000 for improved pavements to Reed, Front, Christian, Appletree, Sansom, Noble, Brandywine, Buttonwood, Twenty-eighth, Plum, Thirtieth and Locust streets and Long lane.

—Pfeister & Co. have leased the skating rink at Sixth and Columbia ave., and intend fitting it up as a manufactory of book-printing perfecting presses, which print, fold, paste and bind almanacs and pamphlets with lightning rapidity.

—Wm. P. Gerhard read a paper recently before the Engineers' Club, at 1122 Girard street, on "The Disposition of Household Wastes." The question is one that will command and demand the close attention of sanitary authorities.

—Jos. Ferguson, assignee of the Shackamaxon Bank, issued execution against John K. Martin and Geo. Schollenberger, trading as Wm. Schollenberger's Sons & Co., upon a judgment note for $30,837.41, dated June 7, and payable in one day.

—The Philada. Steamship Dock Company adopted a resolution instructing the incoming Board of Directors to sell the company's wharf property, No. 19 South Delaware avenue. It was decided that the price set upon the property should not be less than $40,000.

—The Chief Commissioner of Highways said on Friday that the Traction Company had a comparatively small number of men at work repairing the streets occupied by it, but that all the other companies were acting very satisfactorily in the matter of repairs to streets.

—At the annual meeting of the Park Commissioners Gustavus Remak was elected President; Vice-President, George H. Boker; Treasurer, Frederick G. Wolbert, and Secretary, Francis M. Dougherty. Mr. Sellers advised that the contract for constructing the East Park drive be awarded to the best bidder.

—St. Thomas' Roman Catholic Church, at Villanova, is nearly finished, and arrangements have been made for its dedication on July 4. The building has been four years in course of erection. It is built of bluestone and is modeled after the Augustinian Church of St. Monica, at Rome. The building cost $60,000.

—The grand jury at Norristown approved the report of the viewers who recently recommended that Matson Ford Bridge, across the Schuylkill River at Conshohocken be made a free county bridge, and that the county pay the stockholders $75,000 for the franchise and property. The annual tolls amount to about $6,000.

—The Board of Health declared the open lots at Nos. 1159 and 1161 South Fifteenth street; Fifth and Sixth and Wilder streets; Nos 804 to 912 Dudley street; Eighth and Cross streets; the open territory bounded by Fifth and Sixth and Owen and Reed streets, and the private thoroughfare adjoining Musical Fund Hall nuisances prejudical to the public health.

—The Board of Judges could not have made a better selection than Mr. Edwin H. Fitler to fill the place in the Park Commission made vacant by the death of Mr. John Welsh. Mr. Fitler is a gentleman of wealth and refinement. He is a successful business man, and will infuse vigor into the administration of that important branch of the municipal machine.

—The Board of Managers of the House of Correction state that at the close of last month there were 819 males and 204 females, making a total of 1,023 in the institution; that 343 males and 105 females were admitted, 448 in all, and that 500 had been discharged, leaving 971 inmates at the close of May. They state that the cost of keeping these inmates was $4,527.87.

—The Newsboys' Home has accommodated 700 boys during the past year. Funds are being raised for an additional building at 261 South Sixth street, to be used as a manual training school. The buildings have so far cost about $17,000, and the association has no money to spend upon new buildings. The receipts during 1884 and 1885 were $7,698.94, and the expenses were $7,673.83, leaving a balance of $25.11 on hand.

—C. C. O'Connell, the owner of a stone quarry at Yardleyville, Pa., preferred a charge of embezzlement against J. Moore White, a well-known politician. He claims to have consigned to him building stone to the amount of $510, for which he has received no return. The accused waived a hearing and was held by Magistrate Cassady, of Camden, in $500 bail to answer.

—The Gentlemen's Driving Park was sold at auction, on Monday, by order of the executors of the estate of the late Mark Devine. It was purchased by Joseph M. Bennett, owner of the Chestnut Street Opera House. The price paid was $2,900 per acre. The property consists of 30½ acres, bordering the Chamounix drive about a square from Belmont avenue, and facing Fairmount Park.

—A group of buildings comprising the canning establishment of Charles C. Hilgard, at Shiloh, Cumberland county, was destroyed by fire on Sunday morning of last week. The fire was supposed to have been caused by an incendiary igniting a barrel of gasoline. There was $1,500 insurance in the Fire Association, of Philadelphia, on the building, and $2,000 on stock in the Farmers' Mutual, of Salem.

—The police lieutenants reported to the Mayor as follows on the condition of the streets: Chestnut street, Third, Fourth, Fifth, Ninth, Tenth, Fifteenth, Eighteenth, Nineteenth, Twentieth, Twenty-second and Twenty-third Districts fair; Second, Sixteenth, Seventeenth and Twenty-first dirty; First, medium; Sixth, Eighth, Eleventh, Twelfth, Thirteenth, Fourteenth and Twenty-fourth good.

—The Committee on Buildings and Grounds of the Guardians of the Poor, in presence of President Lawrence and the Prison Committee of Councils, on Thursday afternoon awarded the contract for rebuilding the burned portions of the Almshouse to Paul J. Essick [& Sons at $59,993 for the whole building, with $3,039 extra for plumbing, making $62,972 for the entire work, to be completed within four months. The award was approved by the Prison Committee.

—TheCommonwealth Title Insurance and Trust Company has taken shape. Henry W. Dechert, Esq., is President, and William Nelson West, Vice-President, two good men. The capital is $250,000, all paid in. Each member receives immediate returns proportionate to the amount of business he brings in. This Company has an advantage over other Title Insurance Companies, in that they divide among stockholders proportionate to stock, while this divides according to business each brings.

—Representative Ermentrout secured the passage in the House of the bill to build a public building at Reading, the expenses to be limited to $180,000. Individual motions to suspend the rules were in order, and Mr. Ermentrout was recognized. He made a short speech in favor of the bill, giving the reasons why it should pass. He appealed to the Democrats to vote for the bill, telling them that Berks was the banner Democratic county of Pennsylvania. His appeal was heeded and the bill was passed by a large majority.

—Since the tracks of the Pennsylvania Schuylkill Valley Railroad were cut through the grounds which the Trustees of the Lutheran Theological Seminary had purchased, near Fifty-second street and Lancaster avenue, it has been determined to abandon that site for the proposed new seminary buildings. The Trustees have since been looking for a desirable location, and have now decided upon the Gowen homestead, located on Main street, below Gowen avenue, Mount Airy. It is expected that a handsome building will soon be erected. In the meantime the old seminary on Franklin street is still in use.

—The will of A. D. Ditmars, a wealthy widower of Lancaster, who died in June, 1883, was set aside in the United States Circuit Court. By the provisions of the instrument a residue of about $80,000 was "to be used in means to ascertain what children were created to do; that the child may be directed to and instructed in what he or she is best adapted to do." After the will had been admitted to probate an appeal was taken by Harriet Rappelye, of New York, a sister of the decedent, and an issue was framed, with Dr. Wm. Compton, the executor, as the plaintiff, and Harriet Rappelye as defendant. Judge Butler held that the bequest was couched in terms that were in themselves evidence of an unsound mind, and under his instructions the jury rendered a verdict against the will.

—The new Municipal Association is taking its first lessons. City Controller Dechert heard the testimony of Joel J. Baily, Wm. Harkness, Jr., members, and T. B. M. Addis, the agent of the late Committee, of One Hundred, and of J. Hampton Moore, relative to the legality of Contractor James Magee's claim for work last year on repairs to country roads in the Twenty-seventh Ward. Col. Dechert declined to approve the bill last year on the ground that protests from sources entitled to credit had been received by him. During the spring of the present year Councils passed an ordinance appropriating over $1,100 to pay Magee, and the Controller again decided to let the matter go to a jury, whereupon counsel for the contractor obtained a writ of alternative mandamus from the courts to compel the Controller to countersign the warrant. The testimony was presented in court on Saturday.

—On Monday last, at Washington, D. C., there was placed on record a deed of A. M. Zane, of Philadelphia, to Franklin E. Gregory, of Massachusetts, of the property of the Southern Maryland Railroad Company, the consideration being $75,000; also, a deed from the last named to the Washington and Potomac Railroad Company, formerly the Southern Maryland Railroad Company, of the same, the consideration being stock in company and a mortgage of the Washington and PotomacRailroad Company to the Union Trust Company, of Philadelphia, to secure $1,500,000 of the bonds of the company, payable on April 1, 1916, with 6 per cent. interest. The new management continues running the trains from Mechanicsville, in St. Mary's county, to Brandywine, connecting with the Baltimore and Potomac Railroad, and is engaged in preparations to resume the work of building the road to its terminus, Esperanza, on the Patuxant River, and Point Lookout.

—The Twenty-second streeters do not propose to allow the Union Passenger Railway Company to lay its tracks on that street if they can help it. Their protests were heard on Tuesday before Judges Thayer, Arnold and Willson.

Counsel for the complainants claimed that the ordinance granting the permission was passed by Councils on the strength of a petition to which signatures were secured by misrepresentation. He therefore asked the Court to enjoin the company from acting until Councils pass upon the new ordinance submitted at their last meeting, requiring the Union Line to use the People's track for these two squares.

Counsel for the defendant company urged that the ordinance was full legislative authority; that the Board of Surveys had passed upon the points raised by the complainants, and that the decision of that body was not subject to review. He also urged that, as the street was sixty feet wide, it would be an advantage to the property owners to have two tracks with cars running in opposite directions.

City Councils.

TUESDAY'S SESSION.

The following improvements have been authorized:—To permit the Penn Electric Light Company to place electric light poles and wires on South street, from the Delaware to the Schuylkill, on Second from South street South, and on Passyunk avenue Southwest from South. By Mr. Meehan—To grade Medary street, from Stenton avenue to Weiss, and Weiss, from Medary to Chelten avenue; to grade Franks street, from Wissahickon avenue to Green; to pave Ashmead from Germantown avenue to Wakefield; to open Evergreen avenue from Prospect avenue to Germantown avenue; to build a bridge over the Germantown and Chestnut Hill Railroad at Evergreen avenue. By Mr. James—To grade Croskey street from Norris to Diamond. By Mr. Hall—To locate an electric light at Belmont and Elm avenues. By Mr. Jenks—To pave Thirty-second street, from Haverford to Mantua avenue; Wallace, from Thirty-second street to Thirty-third; Mount Vernon street, from Mantua avenue to Thirty-second; Mantua avenue, from Haverford 300 feet Westward from Thirty-second. By Mr. Taxis—To locate electric lights on Poplar street, from Ridge avenue to Twenty-fifth, and Girard avenue, from West College avenue to Thirty-second. By Mr. Clay—To notify property owners on Pennsylvania avenue, from Twenty-fifth street to Fairmount avenue, that their property will not now be required for public use. By Mr. Wyman—For a sewer in Wildey street, from Palmer to Eyre street. By U. C. Smith—For an electric light at Nineteenth and Poplar and Ginodo and Perkiomen streets. By Mr. Fow—To erect safety gates at the railroad crossing at American and Master streets. By Mr. Baldwin—To pave Twenty-sixth street, from Master to Jefferson. By Mr. Kinkaid—To grade and repave Factory street, from Twenty-fourth to Twenty-fifth; to change the voting place of the 9th division of the Seventh Ward from 1307 Lombard to 426 South Thirteenth street. By Mr. Kenton—For a sewer in Water street, from Vine to Dock; to erect the Siemens' regenerative gas lamp around the Dock street market. By Mr. Maloney—For water pipe in Fairmount avenue from Forty-seventh to Forty-eighth; to pave Twenty-eighth, from Federal to Passyunk avenue. By Mr. Heins—To authorize the Lehigh Passenger Railway Company to lay double tracks on Lehigh avenue from Second to Fairmount Park.

The sub-committee of the Electrical Committee of Councils are pushing their work along. Two sections in the ordinances regulating the laying of underground wires were amended Tuesday. The provision that all companies receiving the privileges of laying wires shall furnish the Elecrical Department with three wires and furnish space for nine additional wires was changed by striking the "nine wires" out. A new section will be created providing that all conduit, and not telephone and telegraph companies shall furnish space for nine city wires. It was also provided that upon the passage of any ordinance granting underground privileges the company shall give a $5,000 bond that it will relay and pave all openings made by it and keep in repair the paving over the openings for three years.

A number of representatives of the companies to be affected were present, including Superintendent Gill, of the Western Union Company; Henry M. Bentley, of the Philadelphia Local Telegraph and Bell Telephone Companies; David Brooks, of the Brooks Underground Company; W. D. Sergeant, of the American Telegraph and Telephone Company, and E. J. Hall, of the American Telephone Company. Messrs. Gill and Bentley objected to the condition that all companies receiving privileges should furnish space for nine wires in addition to the three wires to be given the city free of charge, holding that such a concession would be onerous. The objectionable clause was striken out.

Chief Cantlin proposes that action be taken looking to legislation by Councils compelling the electric companies to place switches at the corners of each street so as to avoid danger. A resolution was passed requesting the Chief of the Electrical Department to compel electrical companies to place proper switches on all the electrical wires in the city. The Board of Fire-escapes ordered the secretary to notify lessees and owners of all theatres to erect the proper fire-escapes as required by the Commission.

The Board of Health, in a communication presented by Mr. Vanderslice, asked for an appropriation of $6,158 for the pay of a chief inspector, six inspectors and a clerk to carry out the law relative to drainage inspection. After a long discussion and many amendments it was agreed to recommend the bill favorably, making an appropriation of $3,350 for the pay of inspectors and clerk, the chief inspector to be paid at the rate of $1,300 per annum and the assistants $1,000.

The Highway Committee of Councils inspected the plot of ground between Thirty-first and Thirty-fifth streets and Mantua avenue and a point three squares South, on which it is proposed to erect 200 houses. The committee will report as to the propriety of opening a number of streets and for their grading and paving.

At the meeting of the Highway Committee ordinances were approved for paving Thirty-second street from Haverford avenue to Mantua avenue with Belgian blocks or asphalt, as the committee may determine; Mantua avenue, from Thirty-second street, 300 feet Westward; Wallace street, from Thirty-second to Thirty-third, and Mt. Vernon, from Mantua avenue to Thirty-third. It was decided to ask a further appropriation of $40,000 for grading and paving, as they have expended the $40,000 previously appropriated. William Wilson, contractor for the grading of Ontario street, was notified to have his work finished in thirty days or his contract would be annulled and he would be placed on the "black list" of contractors.

THURSDAY'S SESSION.

An ordinance was passed opening Thompson, Almond, Edgemont and Salmon streets, in the Twenty-fifth Ward. The sum of $8,000 has been appropriated for consequent damages, which Mr. Clay thinks is very insufficient.

Common Council passed the following ordinances: Approving Mark Devlin and Jas. Corr as sureties of Michael O'Rourke for the construction of Section 9 of the intercepting sewer (concurred in by Select); appropriating $1,794,833.86 to pay the interest on the funded debt falling due on July 1 (concurred in by Select); providing that in cases where the Chief Commissioner of Highways is obliged to employ labor to do work under neglected or annulled contracts payment shall be made from the item against which such contracts are charged, and the amounts shall be charged against the contractors constructing sewers on these streets: Tenth, from Market to Chestnut; on Perkiomen, from W. ne to Vineyard; on Wood, from Marshall to Seventh; on Oxford, from Eighteenth to Twentieth; on Bolton, from Twenty-second to Ridge ave.; on De Kalb, from Aspen to Fairmount ave; on Filbert, from Sloan to State; on Aspen, from Thirty-seventh to Thirty-eighth; on Fortieth, from Girard ave. to Egglesfield; on Egglesfield, from Fortieth to Forty-first; on Barker, from Seventeenth to Eighteenth; on Broad, East side, from Lehigh avenue to Somerset; on Baker, from Green Lane to Centre; on Fifty-second, from Lancaster ave. to the South curb line of Columbia ave.; authorizing satisfaction to be entered in cases of those taxpayers who appear as delinquent, but who have paid their taxes; authorizing the grading of Queen Lane, from Scott's Lane to Thirty-fourth street; authorizing the grading of Tyson street, from Ninth to Huntingdon, and Hutchinson, from Huntingdon to Lehigh ave.; for a sewer in Wakefield street, from Wister to Wisteria ave., and on Wisteria ave. to the Philadelphia and Germantown Railroad.

Select Council passed ordinances granting permission to Harrison, Frazier & Co. to construct a siding on Penn and Almond streets; to lay water-pipe on Moore, Mintzer, Hermit, Cresson, James, Forty-ninth, Orianna, Keith, Bambrey, Stillman, Herman, Thirty-first, Carlton, Division, Mt. Vernon, Norris, Wallace, Hicks, Tasker, Mole, Rose, Diamond, Clarence, Thirty-second, Fifty-third, Fifty-fourth and Fifty-sixth streets, and Mercer, Mantua and Sedgely aves.

The Schuylkill East Side Railway wants permission to construct a temporary bridge across Pennsylvania ave. to the approach to the Park.

The City Solicitor has been directed to notify the Pennsylvania Railroad to cease obstructing Delaware avenue from Walnut to Washington avenue between the hours of 7 o'clock A. M. and 6 P. M.

The final session before the Summer recess will be held on Thursday next, at 10 A. M.

The Committee on Surveys had the following matters referred to it, viz.: the culverting of a creek between Sixty-first and Sixty-second streets, to abate a nuisance; the construction of a sewer on Third street, between Willow and Noble streets; authorizing the Survey Department to revise the lines and grades of streets in the Twenty-second and Twenty-eighth Wards, affected by the construction of the Philadelphia, Germantown and Chestnut Hill Railroad, the cost thereof to be defrayed by the railroad corporation. Petitions for water-pipe on Rittenhouse street, Twenty-second Ward, on Harmony street, between Fourth and Fifth streets, and on Green street, Twenty-third Ward, were sent to the Water Committee. The ordinance to open Church street, from Tacony street to Frankford avenue, on each side of the Pennsylvania Railroad Company's tracks in Frankford, was referred to the Committee on Highways.

The ordinance of Select Council was finally passed which authorizes water-pipe to be laid on Moore, Mintzer, Emery, Hermit, Cresson, James, Forty-ninth, Orrianna, Keith, Bambrey, Stillman, Harman and Thirty-first streets, and the ordinance to authorize the American Telegraph and Telephone Company to lay and maintain underground wires, cables and conduits was returned to the Electrical Committee.

—A bill to incorporate the Maratime Canal Company, of Nicaragua, has been introduced in the United States Senate by Mr. Edmunds. The bill is intended to grant to the company the right to construct and operate a ship canal via Lake Nicaragua and the River San Juan. The principal office of the company is to be in New York city, and its capital stock is to be not less than 500,000, nor more than 1,000,000 shares of $100 each.

—E. S. McClellan, Patterson, N. J., has invented a trap for baths, basins, etc. In this invention mercury is employed to seal the trap and exclude gases. The mercury-holding vessel is located below the basin and contains a displacer. A rod passing through the displacer extends upwardly and terminates in a handle by which the displacer can be raised to allow the mercury to run back out of the trap, and thus permit the contents of the basin to be discharged.

BUILDERS' ITEMS.

Building Permits.

Two bay windows, 11 ft. by 3 ft., 1821 Walnut st., to Stacy Reeves & Sons, 120 North Thirteenth st.

One four-story back building, 16 ft. by 34 ft., Delancy Place, above Twentieth st., to same party.

Three two-story houses, 14 ft. by 28 ft., Gerritt, above Eighteenth st., to Aquilla Nebeker, Twelfth and Ellsworth sts.

Remove walls and rebuild, 1827 Gerritt st., to same party.

One one-story kitchen, 10 ft. by 12 ft., 1028 Ogden st., to Watson Rose & Son, 1811 Marshall st.

One two-story house, 17 ft. by 42 ft., Norris, above Belgrade st., to John R. Davis, 828 Belgrade st.

One two-story house, 15 ft. by 30 ft., Spring Garden, above Wood st., to Harry Rowland, 463 Green Lane.

One two-story house, 17 ft. by 47 ft., Green Lane, above Wood st., to same party.

Two two-story houses, 16 ft. by 49 ft., Jannett, above Manayunk st., to Wm. Eddleman, 480 Green Lane.

One one-story kitchen, 12 ft. by 12 ft., 1808 Columbia ave., to Mary Shrig, same place.

Two two-story houses, 17 ft. by 32 ft., Fairview, below Thirty-third st., to Owen & Raney, Germantown.

Two three-story houses, 17 ft. by 45 ft., Evergreen ave., above Twenty-fourth st., to Charles W. McFarlane, Green and Coulter sts.

One three-story store and dwelling, 15 ft. by 46 ft., 4241 Main st., to Bridget Corcoran, Conshohocken.

One three-story building, 50 ft. by 35 ft., Race, above Fifteenth st., to George Watson & Son, 905 Marshall st.

One two-story store, 16 ft. by 15 ft., Fifteenth, above Race st., to same party.

Interior alteration, 10 ft. by 14 ft., 2100 Green st., to Jacob R. Garber, 52 N. Thirteenth st.

Two two-story houses, 14 ft. by 40 ft., Woodbine ave., above Boyer st., to Wm. Garber, 5008 Adams st.

Four three-story cottages, 22 ft. by 60 ft., Harvey, above Wayne st., to same party.

One two-story store and dwelling, 16 ft. by 50 ft., to N. W. Fox, 2131 Pine st.

Two two-story houses, 14 ft. by 30 ft., Ridge, above Penn st., to Amos H. Taylor 4708 Paul st.

One two-story addition, 12 ft. by 13 ft., Hanover st., opposite Prison to Geo. Sheppard, Shackamaxon st., above Richmond.

One two-story addition, 14 ft. by 15 ft., 1305 S. Eighth st., to J. W. Kuhn, 214 Godfrey st.

Front alteration, 346 N. Seventeenth st., to Wm. J. Doyle, 262 S. Fifteenth st.

One one-story stable, 34 ft. by 14 ft., 4111 Lancaster ave., to Benjamin Hoover, 4206 Lancaster ave.

One one-story factory, 32 ft. by 98 ft., Josephine, above Church st., to James Quigley, 1517 North Front st.

Five three-story houses, 14 ft. by 37 ft., South, above Eighteenth st., to B. Harvey & Son, 729 South Twenty-second st.

One three-story store and dwelling, 18 ft. by 58 ft., Columbia ave., above Twenty-second st., to P. H. Somerset, 1518 North Twelfth st.

One one-story boiler house, 30 ft. by 44 ft., 26 and 28 Hudson st., to Samuel Hart, 923 Noble st.

Eight three-story houses, 15 ft. by 50 ft., Huntingdon, above Ninth st., and thirteen three-story houses, 13 ft. by 28 ft., Hutchinson, below Huntingdon st., to John Loughran, 2544 North Eighth st.

New front, 1619 Bouvier st., to Hugh Clotwarthy, 705 North Forty-second st.

Seven three-story houses, 14 ft. by 50 ft., Twenty-ninth, above Poplar st., to J. L. Shoemaker, 310 Powelton ave.

One two-story back building, 12 ft. by 16 ft., 3604 Mt. Vernon st., to J. Stout, 2001 North Twenty-ninth st.

One two-story building, 188 ft. by 90 ft., Ludlow, above Thirty-third st., to T. H. Doan, 3827 Baring st.

One three-story store and dwelling, 18 ft., by 67 ft., Sixth and York sts., to John Duncan, 905 Chant st.

One two-story building, 32 ft. by 57 ft., Fourth and Norris sts., to F. Black, 849 Taylor st.

Four three-story and four two-story houses, 16 ft. by 42 ft. and 16 ft. by 28 ft., Snyder ave., above Seventh st., to Jas. J. Loughrey, 5124 Viola st.

Eight three-story houses, 16 ft. by 42 ft., Eleventh and Moore sts., to same party.

Two three-story houses, 18 ft. by 46 ft., Manayunk ave. and Shurs Lane, to Michael McMonegle, 171 East st.

Front alteration, 16 ft. by 30 ft., Seventeenth and Sanderson sts., to P. Martin, 1416 Chadwick st.

Four one-story kitchens, 8 ft. by 12 ft., Eyre st., above Girard ave., to Jas. Bennett, 1324 Otis st.

One two-story shop, 18 ft. by 56 ft., Germantown, above Erie ave., to Benjamin Walker, 3869 Germantown ave.

Second-story addition, 17 ft. by 12 ft., 4620 Richmond st., to D. K. Large, 4626 Richmond st.

Three two-story houses, 12 ft. by 38 ft., Fourth, above Somerset st., to T. F. Shuster, 908 Buttonwood st.

Three two-story houses, 12 ft. by 28 ft., Palethorp, above Somerset st., to same party.

One two-story back building, 12 ft. by 18 ft., 2833 Jackson st., to James Sharp, same place.

One two-story back building, 11 ft. by 15 ft., 420 Richmond st., to Wm. Cummings, 431 Allen st.

One two-story shop, 16 ft. by 42 ft., Tenth, above McKean st., to Samuel J. Glenn, 2039 Evergreen st.

Three-story warehouse, Lombard st., near Sixteenth, 20 ft. by 75 ft., Gray & Sheppard, 1604 Sansom st.

Four-story addition to No. 2107 Walnut st., 6 ft. by 14 ft., J. McClellan, 251 S. Twenty-first st.

Alterations and additions to church at Montgomery and Frankford aves., A. T. Richards, 1512 Otis st.

Alterations to 2212 Trinity Place, 4 ft. by 13 ft., W. Ferguson, 1926 South st.

Two two-story houses, Gray's Ferry Road and Forty-seventh st., M. C. McHaney, Forty-seventh st. and Paschall ave.

Two-story building on Ellsworth st , near Twenty-first, 12 ft. by 14 ft., W. J. Phillips, 252 N. Twenty-third st.

Two two-story houses, Wharton and Bancroft sts., 15 ft. by 45 ft., W. Shelly, 1530 Wharton st.

Three two-story houses, Main st., near Sumac st., 16 ft. by 32 ft., S. S. Kelly, 350 Green Lane, Roxborough.

Two three-story houses, 18 ft. by 58 ft., Germantown avenue, above Broad street, to Stewart Bros., 2154 North Fifth street.

One two-story house, 16 ft. by 24 ft., Aramingo and Tacony streets, to Julia Donovan, Cherry and Meadow streets.

Ten three-story houses, 14 ft. by 44 ft., Perot, above Twenty-fifth street, to W. L. Atkinson, 2214 Wallace street.

One two-story brick building, 12 ft. by 26 ft., 530 Morris street, to W. R. Green, 1520 South Fifth street.

A two-story fire engine house, 25 ft. by 86 ft., Richmond and Kirkbride streets, to A. W. Linn, 4767 Garden street,

One two-story stable, 27 ft. by 14 ft., Wilson and Haines streets, to John G. Schuyler, 205 Haines street.

Two three-story houses, 11 ft. by 22 ft., Rush, above Somerset street, to Benjamin Tindall, 2821 Frankford avenue.

One two-story kitchen, 11 ft. by 11 ft., 1521 Vine street, to Thomas Garber, 1519 Seybert street.

IN a recent editorial article, entitled "Architectural Conservatism Indoors," the *British Architect*, draws the following characteristics of English architecture:

"We are, as a profession, too conservative, and too apt to reject a useful suggestion because it happens to be new and contrary to our preconceived notions of what is right according to recognized rules and practice. We think some of the fault of this conservatism can be traced to a lack of thorough education, and the consequent inability to found a correct judgment upon things practical and theoretical, which may not have been included in past experience. Then, again, we need a more liberal spirit of inquiry amongst us, and instead of using a material or an article merely because it is made by a particular firm, there should be some certain knowledge on the part of the architect that no better is in the market. And when a new suggestion is made, or a new invention brought out, which has a reasonable likelihood of being turned to practical account, it is as well to try how best it can be utilized, rather than to see how effectually we can put stumbling blocks in the way of its adoption."

Much of which is, without doubt, equally true of our American architects.

Building and Real Estate Notes.

MR. MARTIN is reconstructing a house for Mr. Fulton, at Conshohocken, which will cost about $2,500. Mr. L. O. Howell is the sanitary engineer.

GEORGE GIBSON, builder, is putting up 3 houses on Berks street and seven on Seventeenth, above Berks street. M. L. O. Howell is doing the sanitary work.

MR. HEMERLE is making extensive alterations to the property 1907 North Twenty-seventh street, which will cost about $5,000. Mr. L. O. Howell, of Columbia avenue, is the sanitary engineer.

SIMPSON & MCVICKER, builders, are putting up 60 four and six room houses on Fernon, between Twentieth and Twenty-first streets, which are letting even before they are finished. They built them as an investment.

FRIEL & SIMPSON, Nineteenth and Wharton streets, are erecting 100 two-story dwellings of five and six rooms at Fifteenth and Dickinson streets. Also, 58 two-story houses, five and six rooms, on Chadwick street, which they are building as an investment.

L. P. SIMPSON, real estate broker and conveyancer, Nineteenth and Wharton streets, reports collections with him good and an increased demand for small properties both to rent and purchase. He has on his rent roll some 160 houses but has but three vacant. Real estate in his locality is good.

MR. ELKINS, builder, has just erected, and are nearly finished, 18 two-story houses and is adding 6 others to the block on Oakford, between Twenty-first and Twenty-second streets; they have six rooms and bathroom and well finished and, although not finished, the inquiries for them are great.

JAMES HAGAN, real estate agent, 912 Christian street, has considerable houses under his charge, only three of which are vacant. He is getting fair rents for his houses and collections are good, but says the demand for houses of four to six rooms are very scarce. Sales for the last two months have been a little slow.

THOMAS MARSHALL, builder, 2025 Oakford street, is erecting seven two-story, six-room houses on Monitor, between Twenty-first and Twenty-second streets. They are of brick with brown s one trimmings and all modern conveniences. Also, seven similar houses on Oakford street, both rows backing each other; they are an investment.

WILLIAM SHELLEY is erecting 36 houses on Latona, West of Twenty-second street, on both North and South sides of the street. They will be five-room houses with hot and cold water, front elevations are of brown, blue and white marble. Also, two dwellings and stores on Wharton, West of Sixteenth street, on the South side. These are all as an investment.

W. H. C. HARPER, real estate agent, 516 Christian street, reports that his collections are slow and, also, that out of 100 houses he has on his rent roll only two are vacant. He has a daily demand for properties ranging from $10 to $17. He thinks that it would be a good thing if every real estate man would keep a "black book" for the special protection of their business.

MORSE & KING, architects, 226 Walnut street, are erecting two houses on the corner Broadway and Benson street, Camden, N. J., for Mr. George Holl, to cost about $8,000. Also, four brick houses for Mr. Budd on Mt. Vernon, above Locust street, Camden, N. J., two stories, cost $5,000. Also, five houses and store at Sixth and Pearl streets Camden, N. J., for Roberts & Cohn builders.

DIXON & HALLOWELL, real estate brokers, Southwest corner of Ridge and Fairmount avenues, have just completed the sale of a lot on Broad, below Dauphin street, 17x177 feet, for $2,200, and are busy negotiating other new properties. Renting with them is good and collections satisfactory. The conveyancing branch of this firm is kept very busy and business generally is good.

JOHN BARR & SON, conveyancers, South Broad street, are being kept busy conveyancing and negotiating mortgages, and, in the latter case, more so than they can put out. Mr. Barr says that in the transfers that they have been making, the properties have in each case brought good prices. They have several valuable lots, also small properties for sale on their list in the neighborhood of the Twenty-sixth Ward.

J. T. JACKSON, real estate broker, 711 Walnut street, has lately made sale of over $33,000 worth of lots at Fairhill, formerly belonging to the Fairhill Land Association. Also, sold a lot at Ashborne for $1,500. Also, two lots at Lawnton for $1,200 and $2,800. Also, two dwelling houses, one 1541 Race street, the other at 1749 Francis street, for $8,800. He is negotiating for the sales of some very valuable properties.

GEORGE W. CARSON, real estate broker, 1916 Columbia avenue, has just completed the sale of a property on the corner of Carlisle and Diamond streets for $8,000. He says that with him collections are good but that the demand for houses to rent do not come up to the standard. He has several good properties for rent and sale North of Columbia avenue and West of Broad street. Mr. Carson is negotiating several properties.

W. H. HENDERSON has just taken up the business which was carried on by the late Morgan S. Ramsey at 722 North Fifteenth street for many years as real estate broker and conveyancer. Mr. Henderson is a thoroughly practical man and has had considerable experience in both buying and selling of properties. He anticipates doing considerable business. He has lately bought the property 1733 Oxford street for $4,800 and 1422 Master street for $7,200.

JOHN H. HUDSON, 1428 Columbia avenue, made sale of the following houses within the last few days: Dwelling N. W. cor. Sixteenth and Tasker streets for $3,500; also, Northwest corner Lambert street and Columbia avenue for $10,200. His conveyancing business is still keeping good. He contemplates erecting some properties in a short time.

A. P. CLULEY, 906 South Fourth street, reports that from the first of the year until May, rents with him of four and five room houses have been advancing from 50c. to $2 per month, and that out of 250 houses on his books only five are to let. The demand for houses at about $11 still continues. He has several profitable small houses on his list for sale. During the winter season every house was tenanted right along.

CHARLES MATHEWS, JR., real estate broker, Columbia ave., has just made sale of the following properties: 1722 North Fifteenth st. for $6,600; 1629 Columbia avenue for $7,000; 1832, 1834, 1836 and 1840 Ringgold street for $2,000 each; and 2124 Franklin street for $2,500. He has many inquiries for properties for investments of medium size houses from $1,800 to $2,000. Houses with him are selling better than they rent just now.

WILLIAM L. CRAVEN & SONS, real estate brokers and conveyancers, 1546 North Seventh street, have this week made sale of a dwelling, 287 Tuscular street, for $1,350. Also, a fine dwelling, 1703 Franklin st., for $10,000 Mr. Craven says that with them houses are not renting as briskly as they have been doing the last six weeks. They have several four-room houses in the Rosehill district both for rent and sale. Real estate with them is rather slow but are bringing good prices.

THOMAS J. CARROLL, real estate broker, Eighth street and Passyunk avenue, states that business in the lower part of the city is good and sales made freely with fair prices. His exchange and mortgage business keeps him very busy, and the demand with him for moderate size houses is much greater than the supply. Within the last few days he made sale of the following properties: 828 and 1508 Moore street, 730 Pluver street, 1121 Guirey street and 617 Pine street.

P. H. SCHAEFFER, real estate broker, 1309 Columbia avenue, has just completed the sale of a dwelling, 1711 Columbia avenue, which will be used as a store, and is also negotiating for the sale of others for the same purpose in the immediate neighborhood. Rents on Columbia avenue are bringing high figures and are readily taken up. He has quite a number of valuable properties on Columbia avenue, between Tenth and Broad streets, and many other dwellings in the vicinity.

J. P. MORNEN, real estate broker, 925 Walnut street, is being kept very busy in a general way and has within the last few days sold the following properties: Two dwellings on South, between Sixth and Seventh streets, for $12,000; five on Susquehanna avenue, for $15,000; one on Nineteenth street, for $2,800; one on Ellsworth street, for $3,000; two on Dean street, for $2,700; and, four on Bangor street, for $3,500. He has several very fine properties as well as many small houses for sale.

THOMAS J. COSTELLO, conveyancer and real estate broker, 1008 Passyunk avenue, reports business with him brisk, and has within the last month been doing a good business in mortgages, and within the last three months disposed of 15 dwelling houses. Last week sold a property on Reed street for $3,600 and another, 1137 Guirey street, for $1,500. He says that in the lower part of the city real estate is both renting and selling very freely, but complains of a want of small houses. Out of a large list of houses under his care only two are for rent. Sold property corner 18th and Tasker sts. for $3,500 clear.

ROBERT S. GALBRAITH, real estate broker, 1942 Reed street, has made sale of a property on Fernon, West of Twentieth street, for $1,350. Also, two on Lambert, South of Dickinson street, for $1,300 each, and is negotiating with several others. He says that as fast as four or five-room houses in his district are erected they are taken up, and the demand still grows. His collections are good and he has not a vacant house on his list which numbers about 160. He is negotiating for some lots in Southwestern portion of the city in behalf of a down town builder, who will erect small properties on it.

B. F. BILYEU, real estate broker and conveyancer, 809 Columbia avenue, has just completed the sale of 725 Montgomery avenue for $3,500. Also, one on North Seventh, above Montgomery avenue, for $7,000, which is one of a row of six. They are completely finished and are of brown stone and pressed brick fronts. He says that real estate is looking up and he is of the opinion that the labor troubles greatly increase the value of better properties by staying an over production. He also says that real estate on Columbia avenue is increasing in value, and that within five years it will be the acknowledged up town business street.

W. R. MATCHETT, builder, 1515 Sth. Broad street, is erecting 225 houses of two and three stories. The two-story houses are on Mole and Hick streets and the three-story ones are on Fifteenth, Sixteenth and Tasker streets, and have from 9 to 11 rooms with all modern conveniences. He is also building 15 houses on Diamond, above Nineteenth street, which will have 12 and 13 rooms and modern conveniences. Mr. Matchett is building them as an investment. He made sale within the last few days of the following properties: 1501 South Broad street, $8,500; 1443 South Broad street, $9,500; corner Broad and Reed streets $8.500; 1441 South Broad street, $8,000; 1439 South Broad street, $8,000 and 1403 South Broad street, $7,500. Sales for past few days foot up $50,000.

WILLIS GEORGE HALE, architect, Chestnut street, is erecting a fine store at 1708 and 1710 Chestnut street, 44x150 feet; it will be five stories and basement. The first story will be iron, the remaining will be of brick and rock-faced stone with terra-cotta set in. It is for the Grebble Estate. He will shortly commence extensive alterations at the Temple Theatre, extending hallway both in width and heighth, and making both the access to and the exit from the theatre much more ample and, at the same time, adding much beauty in mirrors, electric revolving lights, stained glass windows and, from the drawing, we should say that it will, for grandure of architecture, be one of the handsomest theatres in America. It will cost in the neighborhood of $30 000.

J. L. GALLOWAY, N. W. corner Eleventh street and Washington avenue, sold 153 lots to the Prospect Park Land Association, all of which lots have been resold for building purposes, on which frame cottage properties will be erected, each cottage to stand on a fifty feet frontage which is stipulated in the agreement. Also, sold a lot 50x200 feet at Prospect Park to Mr. Harris, who has commenced the erection of a two-story-and-a-half frame cottage. Also, a lot to Mr. Greer who will build a similar house. He is building three ten-roomed cottages at Ridley Park which he has already sold. Also, erecting two at Prospect Park for James Moore. Also, made sale of 270 foot lot on Swarthmore avenue, Ridley Park, to J. E. Allen, who will erect 8 ten-room brick dwellings on it with all the modern improvements. Also, disposed of two lots at Prospect Park to Charles R. Strode, who is erecting two frame cottages on them, to cost $3,600; they are as an investment.

—The land speculators finds tongues in trees, books in the running brooks, sermons in stones, and good in President Cleveland's recent purchase of a home in the suburbs of Washington. They have now formed a syndicate which has purchased 114 acres of land along the Woodley Park Lane, which is the drive the President must travel over in going to and from his home to the White House.

Abbreviations.

Add.—Addition.	Exrx.—Executrix.
Alt.—Alteration.	K. & B.—Kitchen & Bath.
Assn.—Association.	M.L.D.—Mechanics' Lien Docket.
B. & L.—Building & Loan.	Nat. Bk.—National Bank.
Bk.—Bank.	Sav. Bk.—Savings Bank.
B.B —Back Building.	t. t.—Terre Tenant.
Dwg.—Dwelling.	S.F.—Scire Facias to revive Judgment.
Est.—Estate.	
E.J.—Ejectment Suit.	
E.S.—Equity Suit.	
Exr.—Executor.	

Sum C.—Summons in Case—A form of action invented to meet all civil cases, the form of which is not specially provided for.

Where there are no figures to indicate the amount of the judgment, the damages have not been assessed.

The first name in each line is that of the judgment debtor.

An asterisk (*) denotes judgment confessed or bond and warrant conditioned.

The figures 1 2 3 and 4 immediately after the name of the plaintiff indicates the number of the Court. The letters D. M. J. and S. after the number of the Court indicate the Term as D., December Term, M., March Term, as J., June Term and S., September Term.

An examination as to the nature of judgments and suits will be made for subscribers without extra charge on application.

—$499,000 will be expended this year by the Board of Education, for the erection of new school houses.

—A large and commodious building is being erected for Indian girls, on a ten acre tract purchased from the heirs of Richard Martin, in Upper Marion Township, Montgomery county.

Strength of Brick Walls.

The question of strength of brick walls is often discussed, and differences of opinion expressed. The following is one of the rules given: For first-class buildings, with good workmanship, the general average should not exceed a greater number of feet in height than three times the thickness of wall in inches, and the length not to exceed double the height, without lateral supports of walls, buttresses, etc., as follows, for safety:

Thickness.	*Safe Height.*	*Length.*
8½-inch walls.	25 feet.	50 feet.
13 "	40 "	80 "
17 "	55 "	110 "
22 "	66 "	130 "
26 "	78 "	150 "

Where the lengths must exceed these proportions, as in depots, warehouses, etc., the thickness should be increased, or lateral braces instituted as frequently as practical.

New Way of Making Glass.

After many years of the use in glass works of crucibles in the preparing of glass for the pipes of the blower, a German named Ferrari has found a way of doing without them by the use of a new furnace, which now reaches its highest exposition in the Bushwick Glass Works of William Brookfield, situated on Grand Street, Brooklyn. There, every day, Sundays, of course, excepted, a lot of glass-blowers may be seen exemplifying the new system, which is, or may become, a revolutionizer in glass blowing. It is a simple method, and one which it would seem ought to have presented itself to glass blowers or glass bottlemakers years ago. Given a certain mixture of sand, soda ash and lime, and the glass blower is happy, but the glass-maker is not necessarily so. He wants to reduce the cost of production, as well as increase the normal value of the material. So in Mr. Brookfield's establishment, where have been made three-fourths of the telegraph insulators used in this country, they are now trying the new system. Under the old fashioned method a crucible of molder's clay capable of holding a ton of glass mixture was made. The crucible itself was heated for thirty-six or forty-eight hours, carried on an iron frame called a "goat" to a furnace, in which, heated to about 3,000° Fahrenheit, the glass material was dumped. There the crucible and its contents sizzled and boiled until the following morning, when the blowers stuck their long, polished blowing tubes into the white-hot mass, and from that drew the material from which they drew bottles. So soon as the mass in the glass blower's crucible was exhausted so soon he had finished his work.

Technical Schools.

The effect of the teaching of drawing in primary schools on German pottery is very marked. Many rough designs on cheap earthenware are drawn and painted by mere lads just from the schools and at small wages, and are being imported largely into England. These common goods can be made much more cheaply than in England, owing to the artistic skill of the young apprentices.

There are many trade and industrial schools on similar lines and for similar purposes in Cologne, the Black Forest, Bavaria, Thuringia, all of which are adding to the commerce and prosperity of Germany.

In Austria, the government is largely aiding apprenticeship schools. There are over ninety for teaching various industries now established—schools for textile manufactures, for wood and stone work, for pottery and glass work, for metal work, for toys, for carpenters, for mechanics.

In Vienna, the joiners' school for winter teaching is organized and controlled by the joiners' trade society, but receives a grant of $2,500 a year from the government. The teaching spreads over three and a half years, when the students are supposed to leave with a practical knowledge of the trade.

At Riva, in the Tyrol, is a wood working school, where a general education is combined with special theoretical and practical instruction in modeling and carving wood.

It is stated that new industries have been created by such schools as these. Arco, near the Lake of Garda, in the Tyrol, being an instance where olive wood was once only used for fuel, is now the center of a flourishing trade, started by a technical school.

These Fach-schulen have been established in Austria to remedy acknowledged defects in the apprenticeship system, and have served, it is stated, to develop industry to a great extent in Austria.

In Belgium the apprenticeship schools are designed to give the workman a knowledge of scientific principles, which he cannot attain in the workshop, to develop his intelligence, to lead him higher than mere routine, and to enable him to contribute something toward increased production for his own and his nation's advantage. The hours of school-work are from 7 to 9.30 every evening, and for three hours on Sunday morning. The schools are free, supported by government and municipal grants.

About forty of these schools are so supported. The instruction varies to suit requirements of each locality. General courses comprise drawing, arithmetic, geometry, technology, physics, chemistry, mechanics, hygiene. But there are special classes to enable workmen to obtain certificates of competency in various industries. About ten thousand pupils attend these schools. There are industrial schools at Brussels, Antwerp, Ghent, Liege, Louvain, and other towns.

The Strength of Portland Cement.

The Portland cement, as it comes from the factory, is composed of an almost impalpable powder, mixed with coarser grains, which have but little adhesive quality. Mann's experiment's have shown that in a trial of seven days the proportion which passes through a No. 176 sieve (31,000 meshes per square inch) exhibit five times the adhesive strength of those which pass through a No. 103 sieve (10,600 meshes per square inch). The necessity of fine grinding is therefore obvious. In ordinary cement 45.6 per cent. is stopped by the No. 176 sieve, which is the finest that is made. The force of cohesion is much greater than that of adhesion, varying from threefold to tenfold. The adhesive force upon different substances, such as stone, brick, slate, marble, glass, etc., varies greatly. The degree of surface polish has less effect than one would think. According to these experiments, the best test of Portland cement is its adhesive power. The No. 176 sieve ought not to stop more than 45 per cent. of the cement; the part which traverses the sieve should have an adhesive force of 95 pounds, and the unsifted cement of 75 pounds per square inch.

—It is announced that Messrs. Appert of Clichy, France, have discovered a process that will make glass-blowing by the mouth unnecessary. Many attempts have been made to get rid of this painful process in the operations of glass-making, but to this day in every bottle house may be seen pale-faced men with their cheeks hanging limp, in folds, the result of years of glass-blowing by the mouth. Cases have been known in which men's cheeks have been worn so thin that they have actually cracked, and it is a common sight in a bottle house to see blowers at work with their thin cheeks puffed out like the fingers of a glove.

GUARANTEE

Trust & Safe Deposit Co.

CAPITAL, - - $1,000,000.

316, 318 and 320 Chestnut Street,

Rents Safes in its Burglar Proof Vaults at $9 per year and upwards.

VOL. I.—NO. 24. PHILADELPHIA, MONDAY, JUNE 21, 1886. PRICE 15 CENTS

A WONDERFUL INVENTION.

An Entirely New Manner of Making Shoes and What is Claimed for It.

"In William Penn's time," said a well-known shoe dealer last week, "journeymen shoemakers were paid two shillings a pair for making both men's and women's shoes. They sewed the shoes and made them up by hand, pretty much as they are made to-day. Although the character of the work has improved since that time the manner of building the shoe—with the edges of its upper drawn over the last and tacked down, the welt then sewed on and the sole attached to the welt—is about the same. The small pieces of leather requisite to fill in the sole, to make a flat surface inside, were put in the shoe in the olden time, just the same as the bits of shoddy, pieces of wood, brown paper and other things are found in the average sewed shoe of to-day. Did you ever carefully inspect an old, half-worn-out sewed shoe?" he continued. "You can pull bits of shoddy stuff out of it as soon as the sole begins to wear. Then you can find tacks, a nail or two here and there and pieces of rough wax threads, all of which hurt the feet. Many of the shoes—those of high as well as low price—sold nowadays are nothing more or less than feet torturers. They tear the stockings, make walking uncomfortable, distort the feet and create corns and bunions. Even the handsome feet of the ladies are often pressed into a nice-looking pair of shoes which make them writhe in offensive contortions.

"The introduction of pegged work, probably more than any other improvement before the invention of the McKay sewing machine, gave an impulse to the shoe business, which is to-day the leading department of American industry. The McKay machine turned out sewed shoes faster than by hand—that was all. But the shoes thus made were stiffer and rougher, and hence cheaper. Burt, the well-known shoe manufacturer, was the first to grade the shoes. His A, B, C, D and E shoes represented the width, while the numbers, 1, 2, 3, 4, etc., told of the length.

"There have been scores of improvements made in shoemaking ever since 1764, when a correspondent of the London *Chronicle* in this city wrote that some of the shoes made for women in this country exceeded in strength and beauty any shoes that were usually imported from England, but the latest invention of the Day sewed shoe reaches the sole of the shoe—pure and simple. It not only revolutionizes the manner of making a shoe, but it gives solid and absolute comfort to the wearer. It fits like a glove. It is as flexible and easy in the sole as in the upper. There is no welt, no filling of pieces of shoddy. The feet rest upon solid pieces of leather, with no ridges or gulleys or bumps on the surface of the inside sole.

"'How is this done?' would naturally be asked.

"Simply by taking a solid piece of good sole leather and splitting it inversely around its edge for three-eighths of an inch, then sewing the upper of the shoe to the lower half of the split sole by the McKay machine. then the upper split of the sole is laid back in its place inside the shoe, and in the language of the play, 'There you are.' You have at once a solid, flexible sole upon which the feet rest. There is no welt, which always necessitates a double row of stitches all around between the upper and the sole. So flexible are these Day sewed shoes that you can turn and twist them in every conceivable manner. So easy are they to the feet that a purchaser will buy none other after wearing them. A number of ladies and gentlemen of this city who have been wearing them for some time past say that they surpass anything ever worn before.

"George W. Day, the inventor of the shoe, is a Haverhill man. He has been many years at work in perfecting his invention. Hereafter the Day sewed shoes as a specialty will be sold to the public of this city. Several factories, one of which is at 501 Market street, have been at work during the past few months, manufacturing these shoes for men and women, boys and girls. The stock of these wonderful shoes at the start will be a large one. Philadelphians were the first to see the superiority of the Day sewed shoe over all others. A company was organized, with W. W. Apsley, president, J. W. Woodside, treasurer and J. Newton Walker, secretary.

"The handsomest, roomiest and best-equipped shoe store in the city is now open at No. 23 North Eighth street for the sale of the Day sewed shoe exclusively. The prices are lower in comparison than for any other shoe ever manufactured. Some of the handsomest shoes ever made in the city will be displayed, not for mere show, but as a sample of goods to be kept constantly on hand by the Day Sewed Shoe Manufacturing Company.

"There has been no such revolution in any branch of industry as it is believed the Day process of manufacturing shoes will make in the shoe trade. Eighty per cent. of the people of this city buy machine made shoes, with all their wax ends, tacks and nails forcing their way up into the soles of the feet. The Day sewed shoe will undoubtedly become the shoe of the future. What has been customary will not be allowed to continue so when the people are made acquainted with the wonderful advantage gained in the new over the old system of making shoes.

"A writer has said: 'The shoemaker and the shoe he makes are still at the present period of the world just as the shoemaker and the shoe have been considered at all former periods, a very common calling and a very common article.' The writer evidently did not know that Lackington, the shrewd, eccentric and fortunate old bookseller of London; Hans Sachs and Savidge, the poets; Roger Sherman and the late Vice President Henry Wilson were shoemakers at one period of their lives. Perhaps he was thinking of the typical old cobbler, with a thread like a pipe-stem, hauling, twitching and hissing away as he labored in his rickety seat. The author, unfortunately, did not live long enough to see or hear of the Day Sewed Shoe and the Magnificent Store at No. 23 North Eighth street."—From *The Times*, June 16th.

JOHN N. GALLAGHER, Prop'r.
Refers with permission to William M. Singerly, Proprietor of Phila. "Record."

PHILADELPHIA, MONDAY, JUNE 21, 1886.

THE Board of Health has taken steps to secure a systematic improvement of the sewerage and drainage system of the city.

THE operations of our Philadelphia capitalists in New York are familiar to the public. They are teaching the people of Chicago how to build city railroads.

THE Highway Committee is discussing the best way of laying granite blocks, whether with pitch cemented joints or in sharp gravel. There seems to be some little difference of opinion in this matter. Chief McDonald has complained that where blocks were put back, without removing the pitch, a poor job of work was done. The use of pitch makes the pavement water tight and helps to preserve it.

PHILADELPHIA is blamed with being behind the times, as being extremely conservative and so on, but its capitalists are making quite a stir in New York, Pittsburg, Chicago, St. Louis and some other cities. Some of their schemes have a Jake Sharpiness about them, but no one will hereafter say that Philadelphia capitalists are not enterprising. Their enterprise is not of the Sing Sing variety. At the recent election of directors of the Broadway and Seventh Avenue Railway of New York, a few familar names of Philadelphians appeared, and have practically gained control of the roads of that company. They promise to pay $40,000 due the city for rent June 22, and will also probably pay bondholders of the first and second mortgage bonds $53,000 due on coupons June 1.

SOME real estate agents speak of the quiet outflow from the city proper to suburban homes. Last year some two hundred very fine and costly residences, or mansions, properly speaking, were erected within seven miles of Independence Hall. This year as many more will probably be erected. Germantown and Chestnut Hill are preferred. The villas on the Pennsylvania Railroad are not forgotten. Some extensive real estate operations have been recently consummated along the line of that road, which clearly indicates the march of enterprise. The same spirit of enterprise will no doubt be exhibited along the line of the new road. There are some very attractive building sites along that line, and shrewd investors are not waiting until they are all picked up. The railroad managers are contributing their full share to the rapid development of suburban real estate interests by increasing the number of trains.

THE Baltimore and Ohio Railroad might, and probably would under like conditions, be as great a monopoly as the Pennsylvania Railroad; but, under existing circumstances, it comes to us as a rescuer from exactions that have made growth a slow development.

Another railroad line will be a boon to Philadelphia. The whole question has been explored in every direction. One result that will flow from the construction of this new line will be the development of real estate interests, not only immediately along the line of the new road, but throughout the city. The new company is the most, and of necessity must continue to be the most extensive purchaser of real estate in the city—the greatest builder, and the best and largest customer for a long line of building material.

The great benefits to result will be in the stimulus given to real estate and real estate operations. Philadelphia is what it is, largely, because of the Pennsylvania Railroad, with all its narrow policy. A new road that will place us in communication with the steadily developing South will bring activities and development and requirements that will be felt in every muscle of our body politic, not suddenly but slowly. It will be the work of years. The mighty South is our future great market. We are cut off from much of the West by more western competitors. Philadelphia can be, and ought to be, to the South what New York is to the great West.

THE most disgraceful instance of log-rolling that has cropped out for many years in the proceedings of City Councils is found in the ordinance that appropriates $80,000 for improved pavements on insignificant streets, while the business centre of Philadelphia is almost entirely neglected. Following is the list of streets on which that money is to be squandered:

Reed street, from Front to Second; Front street, from Christian to Federal; Christian street, from Front to Third; Appletree street, from Fourth to Fifth; Sansom street, from Twentieth to Twenty-first; Noble street, from New Market to Third; Long lane, from Mifflin street southward as far as can be done for $15,000; Brandywine street, from Fifteenth to Sixteenth; Buttonwood street, from Broad to Ridge avenue; Twenty-eighth street, from Oxford to Columbia avenue; Plum street, from Reach to Richmond; Thirtieth street, from Ludlow to Chestnut; Locust street, from Fifteenth to Eighteenth.

It seems incredible that Councilmen who are intrusted with the disbursement of the city's revenues could so far forget themselves as to countenance this scheme. If all the streets in the built-up portions of the city were well paved there might be a pretext for putting down granite blocks upon the approaches to brick-yards and upon back alleys, But with our highways in such condition that they shock strangers and shame ourselves it is strange that the better elements in City Councils permit such an ordinance to pass unnoticed.—*Phila. Record.*

LANDLORDS frequently complain that notices of charges for cesspool excavation are served on them and that this charge is the first knowledge they have had of the work or of the necessity for it.

Inquiry at the Board of Health office develops the fact that when Inspectors, of whom there are eight, report nuisances, a printed notice is served on the landlord or his agent, and if not known, is served on the tenant. Practically these notices are seldom handed to the owners or agents, perhaps because the tenants do not wish to appear in the role of informers, or do not care to incur the disfavor of the owners in consequence of the attendant expense. Whatever the reason is, the notices are destroyed or lost and the owner knows nothing of the complaint made or notice served. After five days if the nuisance is not abated, the Health Officer abates it; after it is abated an examination is made by the Inspector who reports the fact and a bill for the work done is left on the premises. These unreported nuisances runs from 100 to 150 a week at this season of the year. In order to show the workings of this Department we append an abstract from the records for the last year:

Properties examined		70,838
Owners notified		23,245
Bills served		1,830
Nuisances dismissed upon first visit		3,177
Nuisances found detrimental to health		24,589
Whole number of visits		110,589
Privy wells cleaned by owners		9,300
Cause of nuisance,		
Full privy wells	10,478	
Leaky privy wells	657	
Foul privy wells	1,514	
Filthy cellars	4,167	
Filthy houses and rooms	565	
Leaky hydrants and drains	1,961	
Defective W. C.'s	851	
Defective water causes	629	
Defective surface drainage of alleys and yards	2,252	
Miscellaneous	4,092	
Whole number of nuisances examined		27,766

REAL ESTATE.

Charters Granted.

Charters were issued at the State Department as follows: Standard Gas-lamp Company, of Philadelphia, capital, $30,000; Eisner & Mendelsohn Company, Philadelphia, for the importation and manufacture of medical preparations, capital, $128,000.

The Tenth National Bank Secures a Bui'ding Site.

The Tenth National Bank has purchased the property at the southeast corner of Broad street and Columbia avenue. The price paid was $30,000. At the expiration of the lease of the present occupants, in the early spring of 1887, a handsome banking house, with a frontage of 100 feet on the avenue and 30 feet on Broad street, will be erected. John K. Cuming, Esq., is president of the bank, which is now located at 1227 Columbia avenue.

Obituary.

Henry D. Sherrerd, President of the Insurance Company of the State of Pennsylvania, died on Monday last, of pneumonia. For 50 years Mr. Sherrerd had been engaged in the insurance business in this city. For many years he held the position of Secretary and Treasurer of the Philadelphia Board of Underwriters. He was Manager of the Union Benevolent Association, Vice-President of the Magdalen Society, President of the Seamen's Friend Society of Pennsylvania, and Treasurer of the Howard Hospital.

The Exchange Committee Visits New York.

The Exchange Committee visited New York on Wednesday, the 16th inst. A New York Exchange noticing the arrival of our delegates, said:

"A committee of prominent real estate men from Philadelphia visited the Real Estate Exchange yesterday morning. The committee consisted of D. J. Myers, Jr., George W. Hancock, J. T. Jackson, D. S. Lindsay, J. L. Stevenson and Henry C. Thompson. They visited the exchange to examine the methods by which the New York institution is conducted. President Cammann showed the deputation around, explaining the registration of ownerships, assessments and the method in which the 'wants' and 'offers' are issued and circulated. The real estate men of Philadelphia are thinking of forming an exchange in their city. Part of the capital is already subscribed. They propose to erect a building in the neighborhood of Broad and Chestnut streets, near the City Hall."

A meeting will be held in the Orphans' Court, at 4 o'clock on Monday of this week.

The stock has all been taken up. The scheme that was outlined by Mr. Stevenson will at that time be presented by the committee.

The City Trust, Safe Deposit and Surety Company of Philadelphia.

The City Trust, Safe Deposit and Surety Company, of Philadelphia, are now located at 1321 Walnut street. The Company embraces among its officers and directors many of the strongest men in the city. Mr. Chas. M. Swain is President; Franklin Hall, Vice-President; James F. Lynd, Secretary and Treasurer; Joseph A. Sinn, Trust Officer; B. K. Jamison, Chairman of the Finance Committee, and Messrs. Hughes and Eyre, Solicitors. The company, although recently incorporated, has already gained many friends and customers. The surety element of their business will fill a field, the necessity for which has been long felt in this city. The company is a strong one, and in the hands of its present practical and capable men it must certainly command the business prestige it justly merits.

The following gentlemen compose the directory: Andrew C. Sinn, Chas. M. Swain, Isaac Schlichter, Stephen Farrelly, John Field, James M. Anders, Franklin Hall, Wm. P. Kildare, Stephen F. Whitman, B. K. Jamison, Wm. R. Warner, Thomas A. Edwards, John H. Wheeler.

Quo-Warranto asked for Against the Traction Company.

Jesse Gyger, owner of thirty-six shares of stock of the Chestnut & Walnut street Passenger Railway Company, through his attorneys, Henry M. Dechert and James W. M. Newlin, of this city, has petitioned for a writ of quo-warranto against the Philadelphia Traction Company. Mr. Gyger sets forth in his petition that the Chestnut & Walnut has been leased at an inadequate rental to the Market Street Company, both being parallel and competing lines at the time of the lease. The Market Street line as lessors, has entered into an illegal contract with Elkins, Kemble, Widener and others, under the name of the Philadelphia Traction Company, by which the latter leases and operates the Chestnut & Walnut Street line. It is further claimed that the Traction Company had no authority to accept them. By operating these roads the Traction Company infringes upon the Constitution and laws for various reasons, chief of which are that the railway companies and the Traction had no lawful authority to execute the contracts; that the leased lines are parallel and competing; that none of the companies now operate the lines formerly maintained by them; that the Traction Company has no right to operate a passenger railway company, but only to furnish the motor to propel the cars, and that the only line of cars operated by the Traction by means of the motor is on Market street, while the cars on the other streets are drawn by horses. Mr. Gyger avers finally that he is greatly damaged by these illegal leases, and asks that the writ of quo-warranto be issued against the Traction Company.

Deputy Attorney General Snodgrass, before whom argument was made on the 16th inst., at Harrisburg, took the papers and reserved his decision.

A Half Million for New School-houses.

The census taken under the direction of Superintendent McAllister clearly demonstrated the necessity for greater school facilities for the children of this city. Many of the schools were found to be so overcrowded that the excess would fill 157 divisions.

The Board of Education have now got control of $499,000 for the erection and repairing of school-houses. $449,000 of the above sum was appropriated by Councils out of the Gas Trust surplus; the balance, or $50,000, was appropriated out of the tax levy.

The buildings to be erected by the Gas Trust surplus will afford accommodations for 185 divisions, and will be thus expended:

$35,000 goes to the First Section. Two-story brick buildings, of sixteen divisions, are to be erected at Eleventh and Moore streets.

$10,000 have been awarded to the Fourth Section. Six frame houses, on the south side of the William Meredith School, Fifth street above German, will be purchased and torn down, in order that more light and better ventilation may be obtained.

$6,000, for the Fifteenth Section, will be used in purchasing a property adjoining the Thaddeus Stevens School, Seventeenth street above Fairmount avenue. More light and better ventilation and sanitation, together with a fire-escape, is wanted.

$30,000 has been allowed the Seventeenth Section for the purchase of ground and the erection of a new building. An additional appropriation is to be asked for, as the Harrison School will probably be abandoned on account of the Reading Railroad tracks being so close to the school.

The Eighteenth Section will erect a two-story eighteen-division school, for which $35,000 has been appropriated, after which the Bringhurst building will be abandoned, as it is so completely hedged in with other buildings that its light and ventilation are wretched.

$40,000 will be used to erect a three-story brick building in the Nineteenth Section, at Fourth and Dauphin streets.

$15,000 will admit of the erection of a two-story stone building at Ridge avenue and Woodvale street for the Twenty-first Section.

The Board of the Twenty-second Section, which gets $30,000, wants to add twelve divisions to the Germantown Grammar School, Adams and Lafayette streets, and erect a one-story four-division school at Coulter avenue and Morris street. This proposition is not definitely settled upon.

$40,000 is to be received by the Twenty-fourth Section. A new two-story brick school-house, to contain nine divisions on each floor, is to be erected.

$40,000 for a new building for the Twenty-fifth Section. Some of the Board of Directors of this section favor replacing the old Fairhill School, 528 Cambria street, while others insist upon a new location at Bridesburg.

$18,000 for the Twenty-sixth Section will probably be used for an addition of eight divisions to the Landreth School, at Federal street above Twenty-second.

$25,000 will build a two-story brick school-house for the Twenty-seventh Section in the rear of the Newton Secondary School, Thirty-eighth street below Chestnut, as in time the old building will be torn down.

$40,000 also goes to the Twenty-eighth Section. A two-story brick building will replace one of the Forrest School buildings at the Falls of Schuylkill. A lot is to be purchased for a new school site in this Section.

Unless Councils change the ordinance, the $35,000 appropriated for the Twenty-ninth Section will be used for a new school-house. An effort is to be made to get Councils to change the ordinance so that the Elisha Kent Kane School, Twenty-sixth and Jefferson streets, can be enlarged.

$35,000 for a three-story brick building in the Thirtieth Section, to be erected on the site of the Curtin School, at Twentieth and Catharine streets. Plans have been approved. There will not be money enough to complete building, the Directors think, so three divisions will be left unfinished until more money can be obtained.

Gossip of the Week.

A nail mill is to be built at Lock Haven, Pa.

Improvements are to be made in the Mint. The present engine and boiler rooms are to be converted into vaults for the storing of coin.

Hallahan, the shoeman, will commence operations towards the erection of his new building, at Eighth and Filbert streets, on or about July 7th next.

A large three-story brick building, formerly situated at the corner of Forty-third and Chestnut streets, has been recently removed to a new location 135 feet away. The Christ Reformed Episcopal Church is to erect an edifice on the site made vacant by the removal of the building.

The Prospect Brewing Company has in course of erection, on the West side of Mervine, between Eleventh and Twelfth streets, a three-story building, 120 feet front by 73 feet deep, one portion of which will be used as a boiler house and the rest for stabling purposes. The building will have a height of 38 feet with a centre gable and corner towers. The chimney stack will be 10 feet square at the base with 5 feet opening and 140 feet high. The material of the structure is brick with granite and terra cotta trimmings. The boiler house will contain four boilers of 100-horse power each. The stables will be in the second story and have stalls for 60 horses. The wagons, for which there is room for 37, will be packed on the first

floor. The third story will be used for feed and harness purposes. Pipes from the boilers will run under the street to the main brewery on the East side of Mervine street. The plans for this improvement were prepared by William Gette, architect, of this city. The cost will be $45,000.

The American Fire Insurance Company building, 308 and 310 Walnut street, is about being extended upwards of 196 feet to Willing's alley, making the entire depth of the building 266 feet with a width of 46 feet. The extension will be three stories high, and be divided into 39 capacious and conveniently arranged offices, which, with 19 now in the front building, will give 58 offices in the entire structure. The present Walnut street front will be modernized by putting in new terra cotta window heads, surmounting it by an attractive mansard roof, covered with red tile, and replacing the present windows with large single panes of plate glass. In the front basement a large fire-proof will be constructed for the use of the company. The partitions of the present office will be torn away and the space thrown into one room, and the offices for the directors and agents placed in the new extension immediately in the rear of the main office. The upper floor rooms will also be modernized and have lavatories and other conveniences introduced.

Henry W. Brown is building a handsome residence in the fashionable part of Germantown, on Wayne avenue, near School lane.

Mr. J. F. Betz, the brewer, is having erected, from plans prepared by William Gette, architect, a large building on the East side of Ninth, below Race street, which it is proposed to call "Victoria Hall." The new structure will have a front of 40 feet, a depth of 100 feet (the width 47 feet back widening to 57 feet), and a height of four stories. The first story will be of ornamental iron. The rest of the front will be of strong, heavy brick work, relieved with trimmings of granite and terra cotta and be surmounted, 61 feet high, with a cornice of ornamental galvanized iron, finished in open balustrade work. The style of architecture is the modern Renaissance type.

Another extensive improvement will be made in Camden at the Southwest corner of Third and Federal streets. The properties 234, 236 and 238 Federal street, belonging to the estate of the late Joshua Jefferis, have been sold to Thomas M. Seeds & Son, of Philadelphia, who will immediately demolish them and construct a handsome four-story building, with a store on the ground floor, an opera house on the second story, and the third and fourth floors will be used for lodge purposes.

A Vast Undertaking.

THE TOWN THAT MR. SINGERLY HAS BUILT.

THE ENTERPRISE THAT IS CONSUMMATED BY THE OPENING OF DIAMOND STREET.

The actual opening of Diamond street through Odd Fellows' Cemetery, and the removal of the fences that crossed its line, signalized the completion of the most extensive improvement ever projected in this city. Its success is due to the tireless energy and courage of William M. Singerly, who held sixty-eight acres of land in that vicinity. Fourteen years ago Mr. Singerly's father attempted to secure the opening of Diamond street for the purpose of developing property on the line of that street, but he failed to make much progress. In 1880 the son, William M. Singerly, revived the scheme and with better results. He was interested in the improvement of property that had no western outlet, the Odd Fellows' and Mechanics' Cemetery completely blocking about three hundred acres of land which lay between Montgomery avenue on the south and Venango street on the north. He undertook the difficult task of removing this obstruction and for five years labored with characteristic persistency. He determined to open Diamond, Norris, Dauphin and Twenty-second streets through the cemeteries. To accomplish his purpose, he sacrificed two of the thirteen blocks of ground which he held; he exchanged land with the cemetery companies, squared their holdings and built new entrances for them, expending one hundred thousand dollars, and removing five thousand dead bodies from these sections which were cut off, reinterring them within the cemetery lines as readjusted. By arranging for this work and by securing a western outlet for his property at every thousand feet, Mr. Singerly brought a large area of territory into market. The stimulus he gave to improvement was felt as far east as Broad street, and building operations were begun on an extensive scale.

But part of the tract owned by Mr. Singerly required numerous municipal improvements before it could be made available for building purposes. A sewer was needed on Dauphin street, on the line of the old Cohocksink creek, and streets were to be raised to the city grade. Then a new obstacle arose. Directly on the line of Dauphin street there was a house which the owner declined to remove. It seemed as if the sewer building must be postponed until a jury could assess damages for the opening of the street. Mr. Singerly was equal to the emergency. He bought the house and adjoining land for $85,000, and dedicated the street. He next proceeded to grade the property. It is related that when Chief Engineer Smedley and Commissioner of Highways Baldwin visited the place with Mr. Singerly in 1881, the officials were appalled at the magnitude of the work yet to be done; Humboldt Park and other low land north of Susquehanna avenue were nearly 24 feet below the established grade of the city. Chief Engineer Smedley turned to Mr. Singerly and asked if it was proposed to raise all of that land to grade; to which Mr. Singerly responded in the affirmative. "Why," exclaimed the city's engineer, "that work will cost you $100,000!" Undismayed by this statement, Mr. Singerly went to work. Thus far he has spent nearly thirteen thousand dollars for grading, having raised the grade of nearly two miles of streets. He has erected, or caused to be erected, 683 buildings, and 126 additional houses are going up this summer, making a total of 708 houses built on Mr. Singerly's ground since 1881. Other property owners in the vicinity also began to improve, and 450 houses have been built by them. In the district bounded by Broad and Twenty-fifth streets, Montgomery and Susquehanna avenues, 1,096 new voters have been put on the assessors' lists since 1880, representing an increased population of more than five thousand, and equalling a large town. One-fourth of all the growth of Philadelphia last year was credited to the Twenty-eighth Ward, and the greater part of that quota was due to Mr. Singerly's enterprise.

But the greatest beneficiary in this work of improvement has been the City of Philadelphia, which is receiving an income by taxation of about $70,000 per annum from the work that Mr. Singerly has done, the increase in valuations in that territory being six million dollars, or one-tenth of the total increase of property valuations in this city during the last five years.

Persons who are unfamiliar with the locality as it was prior to the completion of these improvements can have only a faint conception of the transformation that has occurred there. Very few men had the capital or the courage to enter upon such a vast undertaking. Fewer men had the ability to carry it to successful issue, staking millions of dollars, reclaiming a large area, establishing a brickyard and a planing mill, taking extraordinary risks and entering upon a building operation that has already provided for seven hundred houses, and which, in the course of a few years will increase that number to fifteen hundred.

In the face of these facts, it is no exaggeration to say that Mr. Singerly has managed the largest improvement ever attempted in this city; and when the future historian shall describe the growth of Philadelphia he will credit the projector of that undertaking with having done more for its development than any man who has yet figured in its affairs.—*Sunday Republic*, June 20.

Items of News.

—The tarred paper manufacturers have organized a pool to maintain prices.

—A Philadelphia firm has secured the contract for increasing the water supply at Cape May.

—The American railway system is being investigated by a party of French civil engineers.

—An adjudication of the estate of Elizabeth Mifflin was made by Judge Hanna on Monday.

—The Traction Company has filed its agreement to pay for the conduits over the new bridge.

—The strike at Jacob Dingee's brickyard, Twenty-seventh and Lehigh ave., ended on Wednesday.

—Rachel McBride in her will bequeathed $1,500 for repairs on the Reformed Presbyterian Church.

—The Sundry Civil Appropriation bill appropriates $21,053,822. The appropriation for the present year was $26,205,747.

—Two hundred hands were thrown out of work on Tuesday owing to a strike at the yards of the Excelsior Brick Company at Nicetown.

—The Schuylkill East Side Railroad Company have purchased a number of the wharves on the Delaware, with the view of erecting depots.

—President Gowen seems positive that the money necessary to pay off the general first mortgage bonds of the Reading Railroad will be forthcoming.

—Charles J. Harrah, Esq., has resigned from the position of Vice-President of the Children's Society. He was elected an honorary member.

—Chief McDonald, of the Highway Department, charges the Traction Company with slighting the work done in repairing Columbia avenue.

—Jehu Evans & Co., are the agents of the Harleigh Cemetery Association. Lots are 9 feet wide by 18 feet in length and sell at $60, payable in instalments of $1.00.

—A large freight depot for the Baltimore and Ohio Railroad Company is to be built on the site of the Old Pennsylvania Steel Works at the foot of Laurel street, Delaware River.

—A party of tourists, including Mr. Wm. H. Rhawn, President of the National Bank of the Republic, have started on a pleasure trip to Yellowstone Park, Wyoming Territory.

—The Lincoln Institution has bought a tract of ten acres of land in Upper Merion township, and will erect upon it commodious buildings for the summer home of the Indian girls.

—Mr. Gowen says the South Pennsylvania Railroad will be completed, and that work will be commenced as soon as the decision of the Court on the Reading Railroad foreclosure suit is made.

—The Metropolitan Life Insurance Company, of New York, has been mulcted to the tune of $60,000 in the United States Circuit Court by Franklin G. Justice, who sued for malicious prosecution.

—The net earnings of the Texas Pacific Railroad Company from December 17, 1885, to April 30, 1886, amount to $290,479.08. Notwithstanding these handsome figures, the total deficit amounted to $452,457.92.

—Hereafter the books and accounts of the company will be kept under the control of the Real Estate Title Insurance and Trust Company, Tenth and Chestnut streets, where all transfers of stock must be made.

—Polished granite skirtings are being set around the sand-stone piers in the southern entrance of City Hall. The piers will thus correspond in appearance to the adjacent walls, the bases of which are made of granite.

—The Board of Health have declared the school-house at Seventy-second street and Powelton avenue a nuisance on account of a dangerous well, and directed the Board of Education to abate the same within ten days.

—Because George Rowe, the contractor, refused to discharge the non-union men which he employed with their carts, at his work on Willing's Alley and Third street, the General Assembly ordered a strike on Wednesday morning.

—About twenty-five carters in the employ of Edward Keenan, contractor, at Fifth and South streets, struck on Wednesday for 50 cents per load, in pursuance of the order issued by the General Assembly, No. 1, of the Carters' Protective Union, on Tuesday night.

—The Chief of the Bureau of Statistics, Washington, D. C., reports that the total values of the exports of dairy products during May, 1886, as compared with similar exports during the corresponding period of last year, was as follows: May, 1886, $392,-833; May, 1885, $634,028.

—A verdict in favor of the defendant was rendered in the United States District Court at New York in the suit brought by the Government against General Thomas Jordan for the recovery of an alleged shortage of $17,000 in his accounts while acting as Quartermaster during the Mexican war.

—The Committee on Plans and Improvements of the Park Commission on Wednesday heard Messrs. John Price Wetherill, John Wanamaker and Joseph Patterson in behalf of the proposition to devote money contributed for a memorial to the late Hon. John Welsh to finishing the Concourse in the West Park.

At a meeting of the Board of Highway Supervisors, on Wednesday, permission was granted to the Union Passenger Railway Company to lay tracks on Twenty-second street, from Montgomery avenue to Susquehanna, it being provided that the centre lines of such tracks should be 23 feet 3 inches from the east side of the street.

—The franchises of the Pennsylvania, Poughkeepsie and New England Railroad, were sold at Harrisburg by the Sheriff to Luther L. Cheney for $50. This road has been surveyed from Harrisburg and through Northampton county to the Delaware River. It also has a twenty-mile branch extending from the main line to the city of Reading.

—In the United States Circuit Court on Monday Judge McKennan made an order that Beauveau Borie should answer questions concerning the purchase of Reading general mortgage scrip, which he had hitherto refused to do in an examination before the Master relative to the payment of interest upon the floating debt of the Reading Railroad Company.

—It is said that the Hon. John Welsh, deceased, held a controlling interest in the North Chicago Street Railway; his holdings were 2,499 shares. Charles T. Yerkes, the President, is said to hold only one share. Messrs. Wiedner, Elkins and J. C. Moore, an employé of the Traction Company, own one share each. Mr. Welsh had no connection with the present scandals of the road.

—Testimony is being taken in the matter of the contested will of the late Pat'k Kane, of Seventh and Fitzwater streets, who died in March last. The contestants are the disinherited children of the deceased. Letters testamentary were granted Mich'l Gibbons, 1927 South Eleventh street. The opposing attorneys are: George McGowan and A. A. Hirst. The estate is valued at about $7,000.

—There are five public bath-houses in this city, three of which are ready for use, being situated at the west end of South street bridge and the two floating baths moored in the Delaware river at Hanover and Almond streets. The house at Twelfth and Wharton streets is being repaired and the new one at Twenty-ninth and Master streets is not quite completed. Mr. Dixey thinks he will have these two ready for service by July 1st.

—Counsel for the Traction Company on Monday announced to City Solicitor Warwick that they would stand by the answers already filed in defense to the city's suit for the establishment of 5-cent fares on Market street, and did not care to avail themselves of the privilege of demurring to the city's bill. This action will send the case to an Examiner and a Master, who will be appointed by Common Pleas Court No. 4 this week.

—St. Augustine's R. C. Church has purchased the double mansion No. 427 Vine street from the estate of Wm. H. Smith, and the property is being fitted up for St. Augustine's Select Academy.

—On Monday the annual election of the Germantown Railroad Company was held at the main office of the People's Company, at Eighth and Dauphin streets. Craig D. Ritchie was chosen President; Lewis S. Renshaw, Treasurer, and Craig D. Ritchie, W. H. Shelmerdine, R. N. Carson, Meyer Seidenbach, Clarence B. Moore and William Dulles as Directors. An effort was made to elect a ticket which would absolutely exclude a representation of the lessee.

—Considerable progress has been made towards the establishment of a Sanitarium. Ground has been purchased at Red Bank, N. J., sixty-five acres in extent and with a river frontage of 2,400 feet. For the present only 10 acres will be used with a frontage of 800 feet. A steamer will be built to accommodate 1,000 persons. Some $50,000 or $60,000 will be required to pay for what is wanted to put the place in shape. So far $6,000 has been paid in and collections are solicited.

—The National Cremation and Cemetery Company will be incorporated for the "purpose of purchasing land in the county of Philadelphia and adjoining counties, the said land to be used for a public cemetery, and for the erection of a public crematory, and such buildings and appliances as may be needed from time to time for the incineration and burial of the bodies of the dead." The names of the members are Berthold Trautman, Morris M. Newman, Isaac Herzberg, George H. Becker and Alexander Sinzheimer.

—The accounting officers of the Treasury are settling the accounts of the late Disbursing Clerk of the Court of Commissioners of Alabama Claims, and also of the other persons named in the act of June 3 to provide for winding up the business and paying the expenses of the Court. When these accounts are settled payment of the judgments of the Court will commence. The drafts, which will be issued about July 1, will be made payable to the judgment creditors, but sent to the attorney or attorneys of record. If there be no attorney of record, then directly to the creditors. The pro rata to be paid will be about 36 cents to the dollar.

—The bill forfeiting the unearned lands of the Northern Pacific Railroad Company as passed by the Senate declares forfeited so much of the lands granted to the company as are co-terminous with that part of its main line which extends from Wallula Junction to Portland, and that part of the Cascade branch which shall not have been completed at the date of the passage of this bill; and makes the right of way in the Territories subject to taxation. Nothing in the act is to be construed to waive any right of the United States to forfeit any other lands granted to them for failure, past or future, to comply with the conditions of the grant.

—The Dudley Homestead and Building Association, of Camden, is offering very attractive inducements to workingmen of that city. The lots are located on high ground, two miles from the ferry, near the Pennsylvania Railroad, near Dudley Station. The officers and directors are well known citizens. Lots are furnished at $200, payable $1.00 per week, or for $175 if paid within a year. Jehu Evans is secretary, office, 311 Market street. This association has distributed circulars, showing the manner in which a home can be acquired, the payments per month and all details, so that he who runs may read. A purchaser can buy a lot in a year for $175, borrow $1,000 at six per cent. and build a home and own it in eight years.

BUILDERS' ITEMS.

Real Estate Notes.

CHAS. F. HALL, real estate broker, will shortly build seven two-story dwellings at Forty-sixth street and Marion avenue.

WM. ARROTT and R. PITCAIRN are both making extensive alterations to their residences on Spring Garden street above Twentieth, and are putting in fine brown stone fronts.

JACOB RIDGWAY AND MCGRATH are making extensive alterations to two dwelling-houses on Spring Garden street, above Eighteenth street, on the South side, and putting in very elegant stone fronts.

JOHN E. ERICKSON, 3949 Lancaster avenue, sold a property at the northeast corner of Thirty-eighth street and Fairmount avenue for $3,500. This is one of the block of eleven; they have six rooms, bath and all modern improvements.

KERSHAW & MCGOWEN, builders, are erecting seven two-story houses, with all modern improvements, four on Laycock and Seventy-ninth streets and three on Seventy-ninth and Brewster streets, which will cost about $1,700 each.

MR. WAGNER, builder, is erecting four six-roomed houses and corner store at Sixteenth and Tasker streets. They are all very highly finished and are built as a speculation. Mr. Wagner has purchased other lots in the immediate neighborhood and will shortly commence other operations.

ROBERT MONTGOMERY, builder, is erecting 25 houses of six rooms and all modern conveniences on Bancroft, below Tasker street, and 25 similar houses on Sixteenth, below Tasker street, which are as an investment and, although but partially up, inquiries are already being made for them.

ABRAHAM RITTER, real estate broker, Walnut street, gives us as his opinion that property in Philadelphia is to-day fetching all it is worth, and further is of the opinion that real estate in Philadelphia is in a better condition now than it has been for the last twenty years. Mr. Ritter has on his rent roll large numbers of houses of all grades, and has but a single house to rent. He has within the last ten days made several sales of lots which brought good prices.

JOHN MCCONAGHY, builder, is erecting 28 houses of six rooms and bathroom, with all modern conveniences, on Chadwick, below Tasker street, and has just commenced 28 others of the same stamp in the rear, which will front on Bancroft street, also below Tasker street. Each of these rows will have a store at either end, and applications are already being made to rent them. He is also building 26 houses of six rooms and bath on Nineteenth and Federal streets.

GEORGE LAYCOCK, 914 Walnut street, real estate broker, has within the last eight weeks made sale of upwards of 300 lots for building purposes on Suffolk avenue, formerly known as Jones' lane, in the Twenty-seventh Ward, which is situated one square from Suffolk Park, and eight minutes from Paschalville station and fourteen minutes from Broad street depot. The total number of lots for sale was, on the outset, some 700, and are selling at from $125 to $225 according to location. They are 25 feet front by 100 ft. deep. The property is situated at the junction of the Island Road and the old P. W. & B. R. R., upon which it has a frontage of one-third of a mile. He is having daily inquiries and sales and is disposing of them under the instalment plan of $10 monthly if required. These lots were originally held by him as a farm until within a recent date.

WENDELL & SMITH, builders and contractors, 143 South Penn Square, are erecting a four-story store at 1209 Market street. Also,

building five modern cottages of Queen Anne design with all city conveniences at Haverford, P. R. R., and purpose to sink an artesian well for water supply. They have this week made sale of one of the houses of a row on Summer street, above Race and West of Thirty-second, for $5,800. These houses which were built under their own direct supervision are built in the best possible manner and are on a rock foundation. They have spacious rooms, wide halls, handsome staircases, large porch and front yard, and have had every care taken in the sanitary arrangements, and have Spears' heating and cooking arrangements. They are three minutes' walk to Powelton avenue station or the Market street cars. They are also putting up five cottage houses in the same street.

Camden Real Estate Notes.

SCUDDER & SON, Camden, are erecting two two-story stores on Broadway below Spruce street. They are as an investment.

MRS. E. J. DOUGHERTY has just made a purchase of the store and dwelling, 453 Kaighn's avenue, Camden, at the cost of $3,350.

GEO. HOLL, builder, Camden, has in course of erection for Wm. Myers a fine three-story store and dwelling on the southeast corner of Second street and Taylor's avenue.

FRANK J. BURR, real estate agent, 430 Federal street, Camden, has been kept very busy for some time in his conveyancing. He says that property is renting well, and that his collections are good.

HOLLINSHEAD & NEWKIRK, 927 Broadway, Camden, real estate brokers and conveyancers, have just completed the sale of two five-roomed brick dwellings, on Line street above Sixth, for $2,000.

This firm reports business looking up, and, from the many inquiries, anticipate a good fall business.

THAD. P. VARNEY, Kaighn's avenue, Camden, real estate broker, has sold a property, 608 Cherry street, Camden, for $700; also 651 Roydon street, for $1,400, and a lot on Tenth and Chestnut streets, Camden, for $1,000.

Inquiries for both purchase and rent in the lower end of the town are still numerous.

GEO. W. LAIRD, 1620 Broadway, Camden, real estate broker, has just completed the sale of a lot on Sixth street south of Jackson, Camden, for $350; also a lot on the northeast corner of Fillmore and Van Hook streets, 20x77, for $150; also a lot on the northwest corner of Broadway and Van Hook street, running northward 96 feet, for $2,500 (for E. Church).

L. B. HUMPHREY, Third and Market streets, Camden, has made a sale of a property, 428 Linden street, for $4,900.

Mr. Humphrey says that real estate is looking up. Inquiries are numerous, and he is negotiating several large sales. He has on his books some very desirable country seats for sale, within three minutes of Westmount Station, N. J.

ROBERT FREEMAN, real estate agent, has just removed from his old stand, 25 Market street, Camden, to more commodious premises, at 37 Market street. His rent-roll within the last few months has greatly increased, and out of his large number he has but few houses to rent. He thinks that real estate in Camden within the last few years has exceeded the anticipations of any real estate broker.

C. LETHERBURY, 1123 Broadway, Camden, real estate broker and conveyancer, has been appointed Commissioner of Deeds, and is also Notary Public, and within the last few months has made some considerable sales of properties, and has several fine dwellings, farms and lots on his books, for sale. His rent-roll, which has been steadily growing, now numbers up a large list, of which but few are untenanted. He states that collections are good, and, as a whole, business is satisfactory.

Building Permits.

One three-story building, 20 ft. by 67 ft., C st., above Poplar st., to L. Schwab, 161 West Thompson st.

Alteration to factory and shop, 16 ft. by 29 ft., Clementine, above Emerald st., to George Luntenberger, 2009 East Clearfield st.

One one story building, 40 ft. by 73 ft., Springer, above Main st., to Martin Hetzel, 45 Church st.

One two-story store and dwelling, 20 ft. by 49 ft., Lancaster ave., above Forty-third st., to John G. Ruff, 825 Filbert st.

Mansard roof, 18 ft. by 23 ft., 235 N. Sixth st., to Stephen Morris & Son, 121 N. Sixth st

One one-story brick kitchen, 14 ft. by 14 ft., 611 Vine st.. to same party.

One two-story house, 16 ft. by 40 ft., Third ave., above Eighty-fifth st., to Harry Loan, 123 Monterey st.

Six two-story houses, 16 ft. by 44 ft., Twenty-second, above Latona st., to Wm. Elkins, 2044 Reed st.

Twenty two-story houses, 14 ft. by 39 ft., Paschall ave., above Forty-ninth st., to Isaac Wood, Sixty-seventh st. and Woodland ave.

Twenty two-story houses, 14 ft. by 26 ft., Woodland ave., above Forty-ninth st., to same party.

Five two-story houses, Paschall ave., above Forty-ninth st., 14 ft. by 39 ft., to same party.

One four-story house, 20 ft. by 81 ft., 1316 Locust st., to Thomas Dittle & Sons, 718 S. Eleventh st.

Two-story addition. 16 ft. by 12 ft., Nice ave. and Township Line, to Joseph Hutelmyer, same place.

One two-story stable, 15 ft. by 50 ft., 1233 West College ave., to William Peoples, 1246 West College ave.

One French roof, 18 ft. by 32 ft., 2039 Pine st., to T. McClellan & Son, 223 Vaughan st.

Four two-story houses, 12 ft. by 30 ft., Garnet, below Somerset st., to Andrew Stevenson, 2735 Kensington ave.

Front alteration, 2202 N. Sixth st., to H. G. Schultz, 2633 Germantown ave.

A one-story shop, 14 ft. by 14 ft. 13 Rittenhouse street, to John L. Thomas, 57 Church street.

One three-story store and dwelling, 12 ft. by 53 ft., 704 South Third st , to Dahl & Kidd, 132 Bainbridge st.

One two-story stable, 15 ft. by 60 ft., Germantown and Susquehanna aves., to Wm. Seklenburg, 1614 Cadwalader st.

One two-story stable, 20 ft. by 20 ft., James, above Bridge st., to Charles H. Comly, 4035 Tacony st.

Third-story addition, 13 ft. by 16 ft., 133 Carmon st., to Joseph Miller and Bro., 318 North Thirteenth st.

One four-story building and factory, 57 ft. by 56 ft., Roland's Court and Seventh st., to H. C. Nichols, 1509 Montrose st.

Front alteration, 20 ft. by 26 ft., Columbia ave., above Twenty-first st., to Hugh Hazlett, 1935 Columbia ave.

One two-story store and dwelling, 16 ft. by 50 ft., Twenty-fifth and Federal sts., to Mich'l F. Dunn, 1413 S. Eighteenth st.

One two-story house, 16 ft. by 39 ft., Sixty-three and one-half and Vine sts., to Rebecca A. Stovey, 6315 Hamilton st.

Nine two-story dwelling, South side of Thirty-ninth st., between Braden and Aspen, 16 ft. by 47 ft., to Sarah Rightly, Franklin st., above Cumberland.

Two three-story dwellings, South side of Westminster ave., between Forty-first and Palm sts., 18 ft. by 52 ft., to J. Howard Bromley, Preston and Ogden sts.

New front, 1836 Huntingdon st., to David Fraser, same place.

One two-story dwelling, South side of Evergreen ave., between Twenty-fourth and Twenty-fifth sts., Chestnut Hill, 18 ft. by 28 ft., to George S. Poth, East Union ave., Chestnut Hill.

One three-story brick building, 3216 Germantown ave, 18 ft. by 36 ft., to William Davison, 515 N. Tenth st.

To remove frame chapel of Presbyterian Chapel of the Evangelist from South side of Tasker st., between Eighteenth and Nineteenth sts., to G. S. Benson, Jr., 1515 Sprucest.

One three-story brick house, South side of Lefever st., between Orthodox and Buckhive sts., 18 ft. by 84 ft., to Herman Gensheimer, 133 Kirkbride st., Bridesburg.

One two-story dwelling, Edward st., between Hancock and Second sts., 15 ft. by 38 ft., to George W. S. Hubbert, 1141 Hancock st.

One-story house, 18 ft. by 47 ft., Twelfth and Reed streets, to Harris & Sherlock, 933 Federal st.

Additions to building, 12 ft. by 24 ft., Adams st. and Walnut lane, to H. H. Buzby, 5258 Main st.

Three two-story cottages, 24 ft. by 39 ft., Emlin st., and Mt. Pleasant ave., to A. Rankin, 2104 Fitzwater st.

Seven two-story houses, 16 ft. by 32 ft., Main and Dawson sts., to S. S. Keely, 350 Green lane.

Eight two-story houses, 13 ft. by 30 ft., Field above Francis st., to Gurantee Land and Improvement Company, 1407 Chestnut street.

Three three-story houses, 16 ft. by 55 ft., Francis st. above Ridge ave., to same Co.

Four two story houses, 13 ft. by 28 ft., Crease and Belgrade sts., to A. McClay, 1520 Salmon st.

One one-story kitchen, 14 ft. by 6 ft., 1429 Arch st., to Geo. A. Fry, 1205 Sansom st.

One two-story store and dwelling, 17 ft. by 47 ft., 3086 Frankford ave., to Wm. Schrader, 216 Quarry st.

One four-story house, 20 ft. by 88 ft., 1314 Locust st., Tout & McLaughlin, 317 Cook st.

One three-story building, 87 ft. by 50 ft., Thirty-fifth st. and Gray's Ferry road, to Harrison Bros. & Co., same place.

One-story addition, 30 ft. by 12 ft., Forty-second st. and Baltimore ave., to W. S. Kimball, Forty-first and Chestnut sts.

One two-story office, shop and shed, Front and York sts., to Wm. Steele & Son, 2141 Howard st. One three-story store and dwelling, 20 ft. by 62 ft., Frankford road and Wishart st., to same party. One two-story factory, 52 ft. by 124 ft., Culvert and Amber sts., to same party.

One three-story house, 18 ft. by 30 ft., Middle alley and Sixth st., to F. Conroy, 1348 Moore st.

One two-story house, 16 ft. by 40 ft., William st., above Arch st., to Amos R. Croster 4621 Salmon st.

A one-story engine-house, rear 142 Oxford st., to Bricklehurst & Ewing, 523 W. Norris st.

One two-story stable, 16 ft. by 16 ft., Twenty-seventh and South sts., to C. W. Savage, 2524 Huntingdon st.

Interior alterations, Market and Thirteenth sts , 123 ft. by 172 ft. to John Wanamaker, Thirteenth and Chestnut sts.

One two-story back building, 11 ft. by 14 ft., 2722 Master st., to Charles D. Hill, 2623 Poplar st.

One one-story stable, 35 ft. by 52 ft., Township line and Main st., to Wm. H. Brunner, Adams and Duval st.

One one-story chapel, 75 ft. by 63 ft., Main st., near Negley's Hill, to same party.

Three three-story houses, 36 ft. by 50 ft., Wayne ave. and Lafayette st., to Ashton S. Tourison, 5541 Germantown ave.

One bank building, 40 ft. by 50 ft., Girard and Ridge aves., to Northwestern National Bank, same place.

City Councils.

At a joint meeting of Councils' Committee on Schools and the Board of Education Committee on Property last Wednesday proposals were received for building a new school house, at Forty-third and Oregon streets, Twenty-fourth Section, and one at Twentieth and Catharine streets, Thirtieth Section. For the former, there were two bidders, John Maxwell, $59,000, and Thomas Gamon, $58,-592.

The committee of Councils refused to approve of the award, on the ground that it would take too much money out of the appropriation for one section.

For the school house in the Thirtieth Section there were four bidders: John Maxwell, $38,000; Charles O'Neill, $40,779; John O'Donnell, $46,773, and Thomas Gamon, $41,-500. The contract was awarded to Mr. Maxwell.

At a meeting of the Electrical Committee of Councils on Wednesday the general ordinance regulating the construction and laying of underground conduits and wires was reported from the sub-committee and directed to be returned to Councils with a favorable recommendation. Similar action was taken upon bills granting privileges to the Electric Pneumatic Transit, the Keystone Light and Power and the Philadelphia Time Telegraph Companies.

Before the Councils' Committee on Prisons, the Board of Health, last Tuesday, opened bids for building an extension to the brick fire-proof in the yard back of their office, and awarded the contract to James Turner, for $338.

The following work has been favorably reported to Councils: To grade and macadamize Stenton ave., Chestnut Hill, from Willow Grove ave. to the county line, without expense to the city; to pave Chester avenue with granite blocks from Forty-third to Forty-ninth streets; to grade Adams street from Walnut to Green, Twenty-third Ward; North street, from Seventy-second street to Island Road, Twenty-seventh Ward; and to the Finance Committee was referred the ordinance to re-surface and grade Island Road, Old Second street, Stone-house and Stamper's Lanes, First Ward.

Councils' Closing Work.

SELECT COUNCIL.

An ordinance to lay water-pipe on Moore, Mintzer, Emery, Hermit, Cresson, James, Forty-ninth, Orianna, Keith, Bambrey, Stillman, Herman and Thirty-first streets, was passed finally, with an amendment by Common Council striking out Emery street.

Common Council resolution of request to the Mayor to keep Delaware avenue, between Washington avenue and Walnut streets, from 7 A. M. to 6 P. M., clear of freight cars, was referred to the Committee on Railroads of Select Council.

Select Council resolution directing the City Solicitor to enter satisfaction upon the bond of the Electric Conduit Company, of New Jersey, which desires to relinquish its privileges, was passed finally.

Common Council ordinance to authorize the opening of Chestnut street and Lexington avenue, Twenty-first Ward, to which an indemnity provision was inserted by Common Council, was referred to a conference committee, Select Council insisting on its amendment, striking out the same.

Common Council ordinance to authorize the opening of Thompson, Almond, Edgemont and Salmon streets, was, on motion of Mr. Horn, referred to the Highway Committee of Select Council.

Select Council adjourned till September, though it was understood that a special meeting would be held next week to finish up business.

COMMON COUNCILS.

The following Common Council measures were taken up and passed finally:

To authorize the construction of sewers on Morris, Tasker, McKean, Moore, Dickinson, Hutchinson, Wilson, Morton, Leamy, Broad, Currant, Benton, Water, Locust, Second, Cypress, Joint, Berks, Fifth, Mulberry, South, Parrish, Thirteenth, Twenty-first, Sixteenth, Camac, Huntington, Fifteenth, Stillman, Kessler, Hancock, Palethorp, Darien, Mount Pleasant, Stiles, Bailey, Bambrey, Forty-fourth, Aspen, Fiftieth, Thirty-first, Brown, Hurley, Centre, Rubicam, Price, Pine and Eighth streets, and Kensington, Lehigh, Wayne, Allegheny and Lancaster avenues.

To revise the grade of Morrell street, in the Twenty-fourth Ward.

To permit Wm. Howell to pave Forty-fifth street, from Lancaster avenue to Merion avenue, and Forty-fifth street, from Merion avenue to Wyalusing avenue, with asphaltum blocks.

To authorize the construction of main sewers on Hieskill and Hancock streets, on Forty-seventh and Brown streets, and on Twenty-fourth and Ellsworth streets.

To authorize the Mayor to enter security for the payment of any damages arising from the opening of Forty-second street, from Market street to Powelton avenue, and to provide for the immediate opening of the same.

To authorize the construction of a sewer on Wakefield street, from Wister street to Wisteria avenue, and on Wisteria avenue to the Philadelphia and Germantown Railroad.

To revise the grades on the north side of Girard avenue, from Ninth to Hutchinson streets.

To authorize the macadamizing of Moyamensing avenue, from Eighth street to Penrose Ferry bridge.

To strike Boileau street, between Bustleton and Somerton turnpikes, and Starkey street, from the city plan, and to substitute a 50-foot wide street called Banes street.

To strike Thomas street, between Ruan and Church streets, from the city plan.

To authorize the paving of Diamond street, from Twenty-second to Thirty-third street.

To discharge the Committee on Fire Department from the consideration of the lease of premises on the east side of Twenty-eighth street, above Girard avenue, by the Fire Commissioners.

To authorize the repaving of the following streets, with improved pavement: Reed, Front, Christian, Appletree, Sansom and Noble streets, Long Lane, Brandywine, Buttonwood, Twenty-eighth, Plum, Thirtieth and Locust streets.

To authorize the grading of Queen lane, from Scotts lane to Thirty-fourth street; Diamond, between Twenty-second and Thirty-third streets, and Twelfth street, between Lehigh avenue and Somerset street.

To strike Wakefield street, from Coulter to Mill street, from the city plan.

To authorize the paving of Cotton, Grape and Mechanic street, Twenty-first Ward.

To authorize the construction of a bridge over the Norristown Railroad at Spencer street.

To authorize the grading of Musgrove street, from Sharpnack to Horter street, Twenty-second Ward.

To authorize satisfaction to be entered upon the official bond of Albert C. Roberts, late Receiver of Taxes.

To appropriate to the Park Commission $11,491.49 out of a sum of money in the City Treasury as a special fund for Park purposes.

To authorize the construction of sewers on Tenth, Perkiomen, Wood, Oxford, Bolton, De Kalb, Filbert, Aspen, Fortieth, Egglesfield, Barker, Broad, Baker and Fifty-second streets.

To authorize the opening of Mantua avenue and Thirty-fourth street.

To make an appropriation of $3,500 for a main sewer on Forty-sixth street, from Walnut to Samsom streets.

To authorize the revision of the grade of Forty-seventh street, from Woodland avenue to Gray's Ferry road.

To authorize the macadamizing of Seventeenth street, from Tioga to Venango street.

To authorize the paving of Melrose street, from Fifty-fourth to Fifty-fifth streets, and Springfield avenue, from Forty-fifth to Forty-sixth streets.

To appropriate $9,100 additional to the Law Department and County Commissioners for 1886.

Authorizing the Chief Engineer and Surveyor to appoint additions to the engineer corps on the Manayunk intercepting sewer.

To authorize the Centennial Baptist Church to continue its frame chapel at Twenty-third and Turner streets.

To authorize the grading of Monastery avenue, from Ridge avenue to the Wissahickon turnpike.

Ordinance authorizing the construction of two wooden box drains across the Almshouse meadow.

Granting permission to W. B. Wilson, agent, to erect a small frame office in the Kensington freight yard.

The following Common Council ordinances were passed: To authorize satisfaction to be entered on the official bond of Albert C. Roberts, late Receiver of Taxes; to authorize the grading of Diamond street, from Twenty-second to Thirty-third, and of Twelfth street, from Lehigh avenue to Somerset street; to authorize the grading of Musgrove street, from Sharpnack to Horter street, Twenty-second Ward; making an appropriation of $11,491, paid into the City Treasury by the Park Commissioners in 1885, to the Commission as a special fund for Park purposes; to authorize the construction of main sewers in Heiskell and Hancock streets, on Forty-seventh and Brown streets, on Twenty-fourth and Ellsworth streets; to appropriate $3,500 for a main sewer in Forty-sixth street, from Sansom to Walnut street; to authorize the paving of Diamond street, from Twenty-second to Thirty-third, at a cost of not more than $25,000; to authorize the macadamizing of Moyamensing avenue, between Eighth street and Penrose Ferry bridge, at a cost of not more than $35,000; to authorize the construction of branch sewers in Morris, Tasker, McKean, Moore, Dickinson, Hutchinson, Wilson, Morton, Leamy, Broad, Current, Benton, Water, Locust, Second, Cypress, Joint, Berks, Fifth, Mulberry, South, Parrish, Thirteenth, Twenty-first, Sixteenth, Camac, Huntingdon, Palethorp, Darien, Mount Pleasant, Stiles, Bailey, Bambrey, Forty-fourth, Aspen, Fiftieth, Thirty-first, Brown, Hurley, Centre, Rubicam, Price, Pine and Eighth streets, Kensington, Lehigh, Wayne, Allegheny and Lancaster avenues; to authorize the Chief Commissioner of Highways to employ a watchman at the city yard, Twenty-third street and Powelton avenue, at a salary of $600 a year; to set aside $1,500 in the Police Department appropriation for the salaries and fitting up of quarters for four matrons at police stations, the Mayor being requested in appointing matrons to comply with the recommendations of the chairmen of the committees from the New Century Club, Prison Society, Women's Christian Temperance Union, Peace Society, Society for Organizing Charity and Women's Christian Association; to authorize the grading of Monastery avenue, from Ridge avenue to Wissahickon turnpike; to authorize the paving of Rihl street, from Palmer to Hanover street; to place Freeland, lately Wetherill street, from Sumac street to the line of Fairmount Park, on the city plan; to authorize the revision of the grade of Forty-seventh street, from Woodland avenue to

Gray's Ferry road, so that the bridge crossing over the West Chester Railroad will have an elevation of 20 feet above the rail; to authorize the paving of Melrose street, from Fifty-fourth to Fifty-fifth, Twenty-fourth Ward; Springfield avenue, from Forty-fifth to Forty-sixth street, Twenty-seventh Ward; to revise the grade of Morrell street, between Warren and Fifty-second street, Twenty-fourth Ward; to strike Wakefield street, from Coulter to Mill street, Germantown, from the city plan; to authorize the paving of Cotton street, from Main street to the canal; Grape street, from Main to Cresson; Mechanic street, from Grape to Cresson; to authorize the Chief Engineer and Surveyor to appoint an additional leveler, rodman and chainman on the intercepting sewer at a cost of $180 per month; to strike from the city plan Boileau street, from Bustleton to Somerton turnpike and Starkey street, and substitute therefor Banes street; to authorize the paving of Gratz street, from Berks to Norris; to authorize the macadamizing of Seventeenth street, from Tioga to Venango; to strike from the city plan Thomas street, between Ruan and Church streets, Twenty-third Ward; to authorize the revision of the lines of Tower street, from Cotton to Mechanic, Manayunk; to authorize the opening of Glenwood avenue, from Fifth to Second street, Twenty-fifth Ward; to instruct the Chief Commissioner of Highways to permit William Howell to pave Forty-fifth street, from Lancaster avenue to Merton avenue, and from Merton avenue to Wyalusing avenue, without expense to the city; to authorize the Mayor to enter security for the payment of any damages arising from the opening of Forty-second street to Powelton avenue, and to provide for the immediate opening of the same.

Council Notes.

A resolution from the Board of Health urged Councils to take prompt action in regard to investigating the sewerage system of the city. It was referred to the Committee on Surveys.

Ordinances were introduced in Common Councils by Mr. Lloyd, authorizing the Commissioner of Markets and City Property to lease South street wharf; by Mr. Purnell, authorizing the construction of a sewer in Dugan street, from Spruce to Pine; by Mr. Mann, to pave Cherry street, from Nineteenth to Twenty-second streets; by Mr. Smith, to regulate the paving of sidewalks in front of unimproved property; by Mr. Fow, to repave Germantown avenue from Girard avenue to Second street; by Mr. Meehan, to authorize the grading of Chelten avenue, from Chew street to Stenton avenue; by U. C. Smith, to make a transfer of $25,000 to the item for paving intersections; to repave Commerce street, from Fourth to Fifth; by Mr. Hanifen, to lay water pipe and construct a sewer on Fifteenth street, Cumberland to York streets; by Mr. Baldwin, to build a sewer tn Keith street, from Columbia to Montgomery avenue; by Mr. Wisler, to grade Bodine street, from Cumberland to Huntingdon, all of which were referred to committees.

The ordinance to authorize the opening of Mantua avenue and Thirty-fourth street, in the Twenty-fourth Ward, which was defeated at the last meeting of Councils, was reconsidered, and amended so as to largely reduce the land damages which would have ensued, and then passed finally.

Common Council ordinances as follows were passed: To authorize the opening of Chestnut street and Leverington avenue, Twenty-first Ward; to revise the grade of the north side of Girard avenue, from Ninth to Hutchinson street; to place on the city plan Philip street, west of Second street, from Westmoreland street to Glenwood avenue; to appropriate $1,800 for stationery and blank books, $300 for janitor, etc., $1,200 for messenger, etc., $1,300 for advertising, $1,500 for experts and witness fees in the Law Department, and $3,000 to the County Commissioners for pay of road jurors; to authorize the opening and widening of Thirty-second street, from Spring Garden to Rockland; to authorize the paving of Marshall street, from Venango to Erie avenue; to authorize the paving of Mantua avenue, from Haverford avenue to a point 300 feet west of Thirty-second street; to authorize the paving of Thirty-second, Mount Vernon and Wallace streets, Twenty-fourth Ward.

Six inspectors of house drainage will be appointed at a salary of $333.33 each. Term of duty, July 1st to November 1st. The chief inspector will be paid $650 per year.

Abbreviations.

Add.—Addition.
Alt.—Alteration.
Assn.—Association.
B. & L.—Building & Loan.
Bk.—Bank.
B.B.—Back Building.
Dwg.—Dwelling.
Est.—Estate.
E.J.—Ejectment Suit.
E.S.—Equity Suit.
Exr.—Executor.
Exrx.—Executrix.
K. & B.—Kitchen & Bath.
M L.D.—Mechanics' Lien Docket.
Nat. Bk.—National Bank.
Sav. Bk.—Savings Bank.
t. t.—Terre Tenant.
S.F.—Scire Facias to revive Judgment.
Sum C.—Summons in Case—A form of action invented to meet all civil cases, the form of which is not specially provided for.

Where there are no figures to indicate the amount of the judgment, the damages have not been assessed.

The first name in each line is that of the judgment debtor.

An asterisk (*) denotes judgment confessed or bond and warrant conditioned.

The figures 1 2 3 and 4 immediately after the name of the plaintiff indicates the number of the Court. The letters D. M. J. and S. after the number of the Court indicate the Term as D., December Term, M., March Term, as J., June Term and S., September Term.

An examination as to the nature of judgments and suits will be made for subscribers without extra charge on application.

The New Railroad for Philadelphia.

Philadelphia will, in a few months, be supplied with an additional railroad to the South and West. The Baltimore and Ohio Company will, no doubt, introduce a spirit of competition, which has not been known in this city heretofore. That company has purchased extensive properties, and will at once begin the erection of depots in convenient localities. Ground has been secured within a few days, for two freight depots at Dickinson street wharf. They will be built of brick, and will be for inward and outward freight. Freight will be shipped from them to all parts of the country. The talked-of depot at Pine street wharf will not be built at present. The purchasing agent of that company has bought the property of the old Pennsylvania Steel Works, on Laurel street wharf, on the Delaware. It is 600 feet deep and will be the Baltimore and Ohio up-town freight depot. Work on this will be pushed forward as vigorously as possible. It is the intention of that company to establish terminal passenger facilities at several points in the city. The operations of that company are being pushed with the greatest speed. The Schuylkill East Side Railway Company intends to purchase a good deal of wharf property on the Delaware River, for the purpose of establishing a series of depots along the Delaware. No through freight lines will be established until the completion of the connection with the road by means of the tracks of the Schuylkill East Side Road. Until that road is completed, the Baltimore and Ohio will not send any through freight over its own line from the West and South to New York. In addition to the depots on the Delaware front there will be a number of freight depots on the Schuylkill River front, and an exchange of depot facilities probably between the new line and the Reading Road. No plans have as yet been made for the Pine and Lombard streets wharf depots, but work will be begun at that point in a short time.

—Chief Engineer Ogden has reported that it would cost $49,500 to give Bridesburg a proper water supply, and the matter was left with him for action.

—It took about one and a-half hours for the flames to destroy over $1,000,000 worth of property in the town of Vancouver, B. C., on Tuesday last. The whole town was destroyed and over 1,000 persons were made homeless. A number of persons perished in the flames.

—The Philadelphia and Reading Coal and Iron Company has erected a new breaker at Alaska, Northumberland County, which will have a shipping capacity of $40,000 tons per month. The company will also erect machinery for treating refuse coal and making it merchantable.

—Chief Engineer Smedley, of the Survey Department, opened the bids last Wednesday which had been submitted for the construction of the new Market Street Bridge. Councils appropriated $300,000 for the work. The bidders were the Edgemoor Iron Works of Delaware, William Sellers, President, at $294,449, the works to be completed within twelve months after notice by the department; the New Jersey Steel and Iron Works, of Trenton, at $277,638.50; the Jones & Benner Company, of Philadelphia, at $311,000; the Keystone Bridge Company, of Pittsburg, at $308,000; the Phœnix Bridge Company, of Pennsylvania, at $294,205, and R. A. Malone & Son, of Lancaster, at $271,000.

The contract was awarded to Malone & Son, of Lancaster, Pa., which award was subsequently approved by Councils' Finance Committee.

—Henry R. Worthington, the noted engine builder, came out first in the contest last week for the contract to furnish pumping engines and boilers at the Spring Garden and Roxborough pumping stations.

The specifications called for an engine capable of pumping 20,000,000 gallons, or two engines with a capacity of 10,000,000 gallons each per day, for which there is an appropriation of $100,000 by Councils. The lowest bid was that of Henry R. Worthington, of Brooklyn, $57,000 for the one engine and $71,500 for the two.

The specifications for the boiler called for five tubular boilers for the Spring Garden station and two steel ones for the Roxborough station. The bidders were Robert Wetherill & Co., $21,500 for the five and $9,550 for the two; Southwark Foundry and Machine Company, $34,140 and $11,555; William Cramp & Sons, $22,800 and $7,950; Henry Warden, $28,385 and $10,205; H. A. Ramsey & Son, Baltimore, $34,418 and $13,550; I. P. Morris Company, $19,990 and $5,975; Edgemoor Iron Company, of Wilmington, $23,545 and $8,458; John Best & Son, Lancaster, $36,380 and $14,000; Sidebotham & Powell, 9,150 for the two; Hilles & Jones, of Wilmington, $10,800 for the two. Babcock & Wilcox put in a bid of $5,503 for the two boilers for the Roxborough station, but objection was made to it as not being according to specifications. For ten stop valves the Southwark Foundry and Machine Company was the lowest bidder, at $6,160. The bids were referred to the Chief Engineer to report at the next meeting which are the lowest and the best for the city.

GUARANTEE

Trust & Safe Deposit Co.

CAPITAL, - - $1,000,000.

316, 318 and 320 Chestnut Street,

Rents Safes in its Burglar Proof Vaults at $9 per year and upwards.

BOOK, JOB AND POSTER PRINTING,
501 CHESTNUT STREET,
PHILADELPHIA.

"GILBERTSON'S OLD METHOD."

Takes the Contract for the WHITE HOUSE roof at WASHINGTON,

at 70 cents per box over the so-called "Genuine 'Old Style'" for the IC 14x20 size (equal to $1 40 per box for the 20x28 size).

The award not made with reference to price alone, but also from tests made as to the BEST QUALITY.

The guaranteed weight of the "Gilbertson's Old Method" offered was 120 pounds net per box of 112 sheets; while the so-called "Genuine 'Old Style'" was offered at 112 pounds.

In order that consumers may more thoroughly understand WHY the "Gilbertson's Old Method" was accepted AT SUCH AN ADVANCED PRICE OVER THE SO-CALLED "GENUINE 'OLD STYLE,'" we quote the following from the specifications made by the Government for the Roofing Plates to cover the roof of the Executive Mansion:

"The Government desires to secure the BEST QUALITY OF DIPPED ROOFING PLATES, and samples showing surface imperfections or irregularities in size or weight will be rejected.

"Comparative tests will be made for weight, ductility, uniformity of plates and thickness and quality of coating, ALL of which, as well as the prices, will be considered in making the award.

"The United States desire ONLY THE BEST CLASS OF MATERIALS, and parties who imagine that any other class will be received are respectfully requested not to bid."

MERCHANT & CO.,

PHILADELPHIA. NEW YORK. CHICAGO.

THE BLATCHLEY

Is carefully made by men who know how to construct a

PUMP

When desired they are lined with specially heavy Porcelain or Copper, or with Drive Well Cylinders, at small additional cost.

When ready to buy, *insist* on seeing and examining them. Use your own judgment, and don't be persuaded to act contrary to your own interests.

They are sold by some good house near you.

Special terms to builders buying in quantities.

DEVOTED TO REAL ESTATE, BUILDING, ARCHITECTURAL AND INSURANCE INTERESTS.

[ENTERED AT THE PHILADELPHIA POST OFFICE AS SECOND-CLASS MATTER.]

VOL. I.—NO. 25. PHILADELPHIA, MONDAY, JUNE 28, 1886. PRICE 15 CENTS

Items of News.

—Of the 23,000,000 outstanding bonds of the Buffalo, New York and Philadelphia Railroad Company, between $18,000,000 and $19,000,000 have accepted the reorganization plan. The scheme is bound to go through.

—The Merchants' Committee of the State Agricultural Society has issued an appeal for the aid of the public in the preparation for the coming State Fair, they being at present in debt to the amount of about $25,000.

—On Friday night the Clearing House Association decided against the Saturday half holiday plan. This action is final for this year at least, for the Clearing House Association has adjourned until October.

—An artesian well 104 feet deep was bored recently at Schuetzen Park, falls of Schuylkill, and now supplies pure cold water to all the buildings and stands on the ground. The well is flowing at the rate of 3000 gallons an hour.

—Senator Sewell on Monday submitted a proposed amendment to the Sundry Civil Appropriation bill, directing the Secretary of the Treasury to purchase a site and erect a public building at Camden, N. J., at a cost of $100,000.

—The annual appropriation bill for the conduct of the city government of Camden, N. J., for the ensuing year, appropriated a total of $192,550. This is an increase of $2,700 over last year, and insures a tax rate of $2.75 on the $100.

—Mayor Grace, of New York city, is gunning after Commissioner of Public Works Rollin M. Squire, for crookedness in the Fifth Avenue pavement job and other stealings in contracts that have been made by the Department.

—The new cemetery of the Most Holy Redeemer will soon have a beautiful entrance and gate lodge. All the designs, plans and specifications are proposed. John J. Deery, architect and engineer, has the work under his direction.

—The limit of time for the payment of State taxes by merchants, eating-house keepers, brokers, wholesale liquor dealers, billard-room keepers, bottlers and brewers expired on Friday last, a penalty of 10 per cent. is now assessed.

—The old cotton mill at Harrisburg, Pa., has been leased by two New York Frenchmen, who propose putting in the necessary machinery for the manufacture of silk. They will also erect a new factory if the necessary capital is forthcoming.

—The new Tenth National Bank, lately located at Camac and Columbia ave., has purchased a property on the Southeast corner, where they intend erecting a larger building to the one now occupied, their business having so much increased.

—The wood-working mill of George Smith, on Philadelphia street, below York, was totally destroyed by a fire of unknown origin on Monday night. The building was a two-story brick structure with frame back buildings. The loss is estimated at $8,000.

—The Executive Committee of St. Mark's Working Men's Club and Institute, at Seventeenth and Kater streets, has decided to add a gymnasium to the other attractions of the Club. This, it is expected, will be in working order on or before September 1st.

—Judge Hanna on Tuesday ordered the executrix of the estate of Mary Lane Davidson to hand over to Richard Arthur Carden the $5,000 legacy which the decedent had directed should be paid to him whenever he became capable of entering into business.

—The new scientific building, costing $30,000, presented to Smith College by Alfred Theodore Lilly, was dedicated at Northampton, Mass., on Tuesday. Professor J. P. Leslie, of Philadelphia, delivered an address on "The utility of physical science in education."

—The Board of Health has declared the slaughter-house, No. 928 Poplar street, a nuisance prejudicial to public health, and ordered the removal of all garbage and other refuse from the lot on the north side of Parrish street, between Twenty-seventh and Taney streets.

—The Street Committee of the Camden City Council on Monday night awarded the contract for clearing the streets and the collection of garbage and ashes in the First district to William H. Sherman for $4,040, and in the Second district to Benjamin F. Sweeten for $4,480.

—The stone masons are somewhat agitated over the report that the recently formed Stone Masters' Association will endeavor to increase the working day from nine to ten hours. The matter was brought up for consideration at the Building Trades' Council, Wednesday evening.

—In Vienna there were recently exhibited gas and water service pipes made of paper. The same kind of pipes will do for many factory purposes, and for laying electrical wires, etc., we should suppose it to be especially useful. The pipes, according to the *Paper World*, are made as follows: Strips of paper are taken, the width of which corresponds with the length of one pipe section. The paper is drawn through melted asphalt, and wound upon a mandrel which determines the inner diameter of the pipe. When the pipe thus made has cooled it is pulled off the mandrel and the inside is covered with a kind of enamel, whose nature is kept secret by the makers. The outside is painted with asphalt varnish and dusted with sand. It is stated that such a pipe will resist some 2,000 pounds internal pressure, though the thickness of the stuff is only about half an inch.

—Washington correspondence to *New York Herald* says, "I found one Congressman who has written 18,000 letters to his constituents since the inauguration of the new Administration. This is an average of 50 letters a day, or 1,500 per month. He is a menber of one of the important committees, and is flooded with inquiries on all sorts of subjects. When we recollect that there are 325 membersand eight delegates, it is not surprising to learn from the Congressional Postmaster that the mail for members has averaged as high as 16,000 letters per day for several months at a time. This does not include postal cards, circulars or newspapers. Of the latter some members get a basket-ful daily."

—Judges McKenna and Butler, in the United States Circuit Court, listened to the arguments of counsel, on Thursday, as to the application for a preliminary injunction, asked for by Fernando Del Valle, to restrain J. Lowber Welsh, as administrator of the estate of Donna Francesca Del Valle, from paying over to Antonio Modesto Del Valle and William W. Gibbs the sum of $262,000, they claiming the fund by virtue of assignments. The amount claimed represents the share of one of five daughters of the decedent, who was the widow of Don Roque De Lara, a wealthy Cuban. The latter died in 1884, leaving $1,374,000 invested in American securities, of which Samuel and the late John Welsh, of this city, were made the custodians.

—In disposing of a complaint of discrimination preferred by a firm of grain dealers of Hancock, N. Y., against the Ontario and Western Railroad Company, which charged more for a haul from Hancock to New York than for longer hauls which included the distance from Hancock to New York, the New York State Board of Railway Commissioners has ruled that a railway company in respect to its local traffic cannot lawfully charge a higher tariff of rates on a short haul than on a longer haul in the same direction.

This decision is an affirmation of the short-haul principle that is embodied in the Constitution of Pennsylvania and in the contract which the Pennsylvania Railroad Company made in 1861 with the Commonwealth of Pennsylvania. Why cannot Governor Pattison insist upon a fulfillment of the charter obligations of railroad companies? There is a riotus excess of evidence upon which he can proceed. The City Councils, the Commercial Exchange, the Maritime Exchange, the Produce Exchange, the Retail Coal Dealers' Association, and the Textile Association, all of Philadelphia; the Boards of Trade of Allentown, Wilkes-barre and Reading, and the Pittsburg Chamber of Commerce complained to the Legislature last year of the violations of law which marked the management of the railroads of Pennsylvania. The facts are within reach. Why, then, are these violations of law allowed to continue, to the loss of our people and to the injury of our trade?

(REAL ESTATE PUB. CO.)
JOHN N. GALLAGHER, Prop'r.
Refers with permission to William M. Singerly, Proprietor of Phila. "Record."

PHILADELPHIA, MONDAY, JUNE 28, 1886.

THE eight Inspectors appointed by the Board of Health are having a lively and HEALTHY time fulfilling their duties. Their inspection is thorough and very effective.

"AS SLOW and as conservative as a Philadelphian," say the New York go-ahead people. We are undoubtedly a little slow, but our conservatism is of the right type, for we always measure the distance between our conceptions and their realizations and practical ends. We look twice before leaping, and we make sure that the direction we take does not lead to Sing Sing, or land us in the wrong place. Yes; "Slow and sure," is our motto.

STRANGE things happen sometimes in real estate operations. Some months, ago owner A placed a house in conveyancer B's hands, and told him to take $4,000 for it. In due time C came along, and after the usual negotiating agreed to pay $4,000. In the investigation it happened there was a little trifle of $19 of unpaid taxes, which A refused to pay or make good, and the upshot was, C refused to take the property and went away. In the course of time D came along and offered $3,-200, and got it, as that was the best price that could be had.

Moral—Keep your property clear.

THE tower at City Hall has now attained an elevation of 280 feet above the level of the pavement. The workmen are setting the Doric cornice. The stone work is intended to reach a height of 337 feet. Then the clock dials will be erected, and the whole pile surmounted by a large cupola. The derrick has been raised within four days, and is now 68 feet above the base of the scaffolding. A heavy load can be hauled up from the courtyard to the present terminus of the tower in 35 minutes

There is spread along the north front of the buildings an aggregate weight of 300 tons of material, which will all be laid on the tower some time next summer. The work this year will progress until about December.

Workmen selected must not only have skill, but great experience in high building operations, for fear of accidents occasioned by a sudden vertigo.

Last Tuesday they resumed the hauling of marble to the top of the structure, operations which had been suspended for a short time.

The gigantic proportions of these buildings, and the height of this majestic tower, vie with our handsome and spacious Post-Office, the glory of Philadelphia and the pride of its citizens.

OUR list of permits and conveyances exhibit a very fair degree of activity in real estate and building operations. Every week developes some points of interest. Our inquiries among architects and builders show steady progress in work. Much of the frightened off enterprise is returning. Great activity prevails in the southwestern, northwestern, as well as northeastern sections of the city; in fact no section is neglected. Real estate transactions are mainly of moderate proportions. One or two large operations are under way in Camden. It has been stated by good real estate authority that offers have been made in several instances for extensive tracts or building sites. Holders may make the mistake of refusing the best offer they will receive for years. Eligible sites are abundant. The B. & O. road will develop a great deal of desirable and valuable real estate for building purposes. The spirit of enterprise is abroad in the northeast, along the line of the New York Division. At Frankford, Bridesburg, Tacony and farther north there are evidences of progress. A great deal of small property has recently changed hands, and extensive building operations will be shortly projected. The property holders there are not, as a rule, exacting the last dollar, but are welcoming capital and building enterprise. In the southwest a great deal of work is under way, and much more building (we speak advisedly) will be undertaken during the third quarter of the year.

Real estate in the more central portions of the city takes strange fluctuations. Certain properties near Twenty-second and Arch streets, Race and Pine streets, have actually depreciated in value of late years, while along Broad street, north and south, a steady appreciation is in progress. Property along Sansom and Filbert and Cherry streets is improving, especially between Eighth and Broad streets, while on Arch street below Twelfth the improvement is slower.

The people feel that Philadelphia is in a transition state, that influence may develop what will change the currents. An elevated railroad, for instance, which the public will never lose sight of, would exert a marked influence, and advance properties in certain localities out of proportion to the advance in other places.

IT is probable that during the next twelve months several large business structures will be erected. The example furnished by the Girard Estate will not be lost. Business men by the score are clinging onto and into their little old-time houses. Store owners are seeking their annual rental year after year out of their old-fashioned three-story bricks, satisfied with their $1,000 to $4,000 a year. Instead of this they should, and many of them soon will, tear down these old structures never intended for commercial uses, and erect in their stead and under modern notions, grand five, six and seven story iron and stone structures, furnishing three, four, five or even eight times as much floor space and capacity.

This spirit of improvement is soon to break out. How many times more floor space, well lighted and ventilated, will be afforded in the new Hood, Bonbright & Co.'s building at Eleventh and Market? How much more rent will the Girard Estate realize? How much greater capacity and qualities for doing business will Hood, Bonbright & Co. have? How much cheaper in reality will their rent come in this new building than were they to continue in the old houses torn down? supposing for the sake of argument that they could continue in them. The way for owners to make the most money is to tear down and build anew. The cheapest rent is in such enormous buildings.

There are blocks and blocks of these old-time houses that ought to disappear. How much longer will we wait? Until the old fogies owning them depart, perhaps. But it would be economy to multiply the business capacity and the rent producing capacity per foot front along our principal business thoroughfares by tearing down and building up. Elevators annihilate stairs, labor and time. Electric lighting simplifies many difficulties. Those who have made the change wonder how they could cling to their dingy old holes so long.

There is room here for some splendid operations by our home capitalists. Storekeepers cannot take the lead. It is their business to sell goods, not to build stores.

WHEN a contractor or builder discharges workmen because they go fishing and twenty of their fellow workmen strike in consequence as was the case in Reading quite recently, it is very evident that labor troubles are not yet properly adjusted.

THERE are many complaints made against the new railroad bridge over the Schuylkill River by captains engaged in towing canal boats. The bridge is built diagonally across the river, and the beams are at right angles to the bridge floor. The matter is now under consideration by the Port Wardens' Committee on Navigation and Pilots.

MORE old houses could be sold, but owners are asking too much for them. Recently several transactions have fallen through because of the stubborn refusal to take a little less when the opportunity came to sell. Old houses are proverbially slow of sale. They do not have all the "modern conveniences," are time-worn and tenant-worn, need a good deal to fix them up and make them attractive; hence buyers expect to be liberally allowed for these defects or drawbacks. If owners would meet buyers' views a good many more old houses would be sold. But they hold on, thinking that, like whiskey, they improve with age. In consequence, buyers flock after the newer houses, with all their "modern conveniences," including cut up and pent up little rooms and nine-inch walls. The old house owners might take a hint if they want to sell. The tide of tenantry and of ownership is towards new houses, and nothing but a considerate shading in price will arrest it, even to selling some of the many old properties that are half on and half off the market.

ARCHITECTURAL iron work is being more widely used every year. Its low cost, its durability, its beauty and architectural effect, all unite in popularizing it for general use. Cornice work is comparatively new. Twenty years ago it was largely on trial, but since then its merits have been recognized. Such buildings as the Lafayette Hotel and Green's Hotel have been greatly improved in appearance by it, and at much less cost than would be possible in any other heavier but not more durable material. It is less liable to take fire than wood work, is cheaper than brick or stone work, and can be made as artistic in effect as either, even more so. Architectural iron work admits of more originality in design. The requirements of any particular building can be better met than with other material. Those who have used it recommend it highly. The manufacturers of it have exhibited no small degree of enterprise all these years in introducing it, and have been rewarded, as they deserve to be, with a constantly expanding market for building purposes. Austin Obdyke & Co., of this city, are prominently identified with its manufacture and sale.

A CAREFUL observer of the labor agitation cannot fail to have observed how much like a fever the strike epidemic has been. It starts, reaches its culmination and subsides, and after all is over the strikers themselves wonder what it was all about. Three-fourths of the strikes are caused by the imperative necessity men feel under for rest. As men's intellect becomes strained by intellectual action, there is created in them desires for more and more leisure, and this is the secret of strikes for higher wages and shorter hours. An ignorant hind is content to work ten hours a day, but the intelligent and well read mechanic feels ten hours a day, 312 days in the year, is irksome. Neither legislation nor arbitration can settle the labor question. They will simply oil the bearings. The only settling factor or force in the whole question is that growing tendency to a more just and more equitable distribution of the products of labor. The enormous accumulations of wealth are no longer so easy. Investments are no longer realizing 10 and 20 per cent. Returns are declining and so is the rate of interest. The opportunities for speculation are diminishing. All these things point to the fact that labor of hand and head is getting nearer its just share, near to what it produces. No power can arrest this tendency because the whole people are interested in its progress. Labor combinations cannot destroy anything.

THE law, as recently laid down in one of our Courts, in the case of the building occupied by Albrecht & Co., on Arch street, to the effect that Albrecht & Co., as tenants, having obtained from the owner the right to place signs upon the front of the building, to the absolute exclusion of the rest of the tenants, may at first sight seem arbitrary and unjust.

The learned judge ruled that the tenants, by virtue of their respective leases, merely occupied and controlled the inside of the building, and that they had no rights whatever to the outside, and that the privilege of placing signs having been conceded by the owner to Albrecht & Co. gave that firm indisputable priority to all sign privileges, and that it could hold the same against all comers, whether tenants or otherwise.

The principles involved, and on which the decision is based, are sound, inasmuch as in the case presented to the court a full surrender of the premises had not been made by the owner, and is never made where there are, as in this case, more than one tenant.

This case of Albrecht & Co. is but a single member of that family of cases which involve the right of landlord and tenant.

If Albrecht & Co. had leased the whole building from the owner, the lease in itself would have carried with it a full surrender of the premises, and the owner could have no control during the pendency of the lease over the inside or outside of the building; presuming always, of course, that upon the expiration of the lease Albrecht & Co. should surrender the premises in the same condition and repair—less the ordinary wear and tear—as when they took possession.

The decision of the Court in this case is entirely consistent with decisions heretofore rendered in cases where accidents have occurred from falling bricks or signs, or similar causes.

These cases cannot and should not be controlled by equity, and so long as the law strictly defines that a full surrender of a property follows the lease in its entirety, and that the owner is thereby relieved of all responsibility, the same having been assumed by the tenant, it is pure and simple nonsense to demand rights and damages where none exist.

Had a brick fallen from Albrecht & Co.'s building, and seriously injured or killed a man, the owner would have been responsible, but had Albrecht & Co. been the sole lessors, then the owner would have been relieved of all reaponsibility, and a suit would hold against Albrecht & Co. only.

The Water Question.

THE importance of this subject should not be lost sight of during the recess of Councils. The many municipal needs of this growing city are apt to receive more or less attention according to the persistency with which they are pressed. The repaving of the city with the Belgian pavement, a resurvey of our sewers (we have nothing worthy the name of system connected therewith, though a Councils' Committee, in their wisdom, have but lately decided a systematic consideration of the subject is unnecessary), increased school accommodations, more bridges spanning the Schuylkill to meet the requirements of that rapidly growing section of the city, West Philadelphia, new prison, new almshouses, and millions yet to finish that colossal pile, the new City Hall. All improvements seriously needed here, but paramount, is the improved water supply of the city. Statistics fortunately show no increased death-rate, but we take it, it is not a question that the waters of a city's supply should become so polluted as to cause epidemic and increased death-rate before the remedy is applied and the sources changed. When the conditions, such as are threatening our present source, in the increase of population and growth of great industrial industries (with all incidents thereto), presents a phase such as now exists. It becomes unmistakable that the day for theorizing has passed, the move for practical results is in order. In presenting this subject, one, which we hope to be able to keep before our readers until the change, which is sure to come, is achieved, we have no desire for unnecessary agitation, but its importance is of the first moment, both in the interests of the public health and the great industries supporting this community. It is a serious commentary upon the present condition of affairs when an important and rapidly improving section of the Northeastern part of the city, Holmesburg, in the Twenty-third Ward, is compelled to find ways and means for a supply of water, and this from private sources, to meet the absolute requirements of the people. Nearly $200,000 of improvements within the year impresses them with the importance of an abundant and good water supply, both for their convenience and protection. The city has no facilities to supply this section, though fortunately they are in the direct line of the proposed new source of supply from the Upper Delaware.

In a city of a million of people such provincialism should not exist. The necessity of this change of source is conceded by all who have considered the subject, especially by the various eminent engineers called to the aid of the city in its consideration. Meanwhile the causes become more urgent for a change and the longer the delay the more imminent the peril. A case directly in point is the pumpage of the foul waters of the river from Otis street wharf, Kensington, that is now in progress; and the complaint of residents of that section of its bad smell, its unfitness for use is aggravated by its service direct from the pumps, with no basin for subsidence and may well be considered alarming. This water station has been most emphatically condemned by careful expert authority, and its continuance in use is a most serious wrong.

The Real Estate Exchange.

At the meeting on Monday of last week of those favorable to the organization of a Real Estate Exchange the following was submitted by the committee appointed to draft a scheme:

"To create in the city a centre for dealings in real estate, and to establish a room for selling real estate and securities at auction—and furnish a general meeting room for real estate dealers and brokers, to unite the various real estate and building interests in the city and adjacent counties, to adjust controversies between members and to furnish full information by collecting statistics in regard to real estate and building matters, and preparing and keeping files of maps and other records relating to real estate and subjects connected therewith. This will include information of all legislative acts of the city and State governments, reports of the various committees on taxation, street and other improvements, and of awards and assessments affecting the realty in the city and neighborhood.

"The objects and aims of this Exchange are to secure united and harmonious action on the part of all persons interested in any way in real estate; to inculcate just and equitable principles of business; to oppose objectionable legislation and to support or suggest that which is necessary or desirable; to gather valuable statistics and other information as to all matters affecting real estate interests; to make and strictly enforce just, equitable and uniform rules as to commissions and fees in real estate transactions; to simplify and improve the present inefficient method of obtaining the standards of value of real estate, and to provide for an inexpensive and speedy settlement of disputes and differences in such transactions by means of arbitration.

"The corporation to consist of all original subscribers to the capital stock and all persons to be hereafter elected members to whom ten shares of the capital shall have been transferred. Any respectable person may be elected to membership. Firms or corporations, as such, cannot be members.

"No person to whom stock may be transferred shall be entitled to any of the rights and privileges of the Exchange and auction rooms until he has been elected a member thereof by the board of directors, and no person shall hold at one time a greater or less number than ten shares of the capital stock.

"Annual members shall pay into the treasury a sum equal in amount to ten per cent. of the par value of a full membership certificate."

The stock—1,000 shares, of $50 each—has been subscribed, and ten per cent. called for has been largely paid in to Drexel & Co.

REAL ESTATE.

Charters Granted.

Charters were issued at the State Department as follows: Apollo Iron and Steel Company, of Armstrong county, capital $300,000; Trust, Safe Deposit and Title Insurance Company, of Reading, capital $250,000 (the new corporation purchases the business of Kendall Brothers, brokers. 675 shares of paid-up stock; Robert Coleman, of Lebanon, and George Brooks, of Birdsboro, noted iron men, are stockholders); South Chester Gas Company, capital $5,000; James Duross Building and Loan Association, of Philadelphia, capital $1,000,000; Excelsior Building and Loan Association, of Philadelphia, capital $1,000,000; Moosic Water Company, of Lackawanna county, capital $10,000; Lewisburg Furniture and Planing Company, of Union county, capital $10,000; Schiller Building and Loan Association, of Scranton, capital $5,000,000; Wilkesbarre and Western Railroad Company; the line of which will run from a point near Watsontown, Northumberland county, a distance of fifty miles; the capital is $1,000,000, and the incorporators are from Millville and Milton.

New Building for the Medical Chirurgical Hospital.

The sum of $47,500 is to be paid for a piece of property on Cherry street below Eighteenth for the Medical Chirurgical Charity Hospital.

The lot of ground of the new purchase is 134 feet square, part of which is covered by two large brick buildings, three stories high, open to the light and air on all sides. It is not contemplated at present to make any additions to the buildings, and the only improvement definitely decided upon is the following: Just back of the vestibule of the main building is a large rotunda extending from the ground floor three stories to the dome, which it is intended to utilize below as the museum, and above as the amphitheatre, capable of accommodating 800 people. In the back part of the building (the L), in the third story, and removed from the hospital, after proper alteration, there is abundant room for an anatomical laboratory, capable of accommodating 100 operations. Of course, the buildings will require extensive alterations and improvements, rendered necessary by the character of the operations of the new occupants, and architects are now engaged in preparing plans for the same.

Gossip of the Week.

A lot on South St., west of 25th, 158x271, sold for $17,000.

The dwelling 1629 Spruce Street, and lot, 22x119, sold for $26,000.

The dwelling 1718 N. Sixteenth street and ot, 18x103, sold for $11,000.

The three-story brick store and dwelling, No. 230 Vine street, brought $6,000.

The four-story brick store and dwelling, No. 54 N. Second street, sold for $6,525.

Well-secured, irredeemable ground rents command a premium of 15 to 20 per cent.

St. Michael's Church, Second and Jefferson streets, is to be remodeled and the tower extended.

Broad street property is in demand; a lot 182x150, at N. E. corner of Norris, sold for $132,000.

A new Amusement Hall is soon to be erected on the east side of Ninth street, below Race.

The Bergner & Engel Brewing Co. has purchased two lots, 100x380, on 31st Street, above Master, for $11,000.

Work will commence next week upon the new County Prison, which is to be located near the House of Correction.

Wm. V. Keating has purchased the property N. W. corner Forty-sixth street and Woodland avenue for $26,500.

The Building Committee of the Germantown Almshouse has selected Charles P. Collom, architect, to prepare plans for the new buildings to be erected on the Stenton avenue farm.

A large schoolhouse is to be erected at Forty-eighth street and Lancaster avenue, to be of brown stone, pressed brick, corrugated iron and slate roof. John J. Deery is the architect.

A new station has been completed at Holmesburg Junction, on the New York division of the Pennsylvania Railroad. It is two stories high, and modeled after the prevailing Queen Anne style.

A new Presbyterian Church is to be erected on the corner of Eighteenth and Tasker streets, to accommodate 600 persons: The structure will be completed by January 1st. Theophilus P. Chandler is the architect.

A lot will soon be secured within the territory bounded by Twenty-fourth, Twenty-eighth, Ellsworth and Wharton streets, to establish Gray's Ferry Mission, which will be under the care of the Church of the Holy Apostles.

The Philadelphia Bicycle Club have laid the corner stone for their new club house, corner Twenty-sixth and Perot streets. The building will have a frontage of 26 feet on Twenty-sixth street, and a depth of 80 feet on Perot street.

Last Wednesday, the corner stone was laid at Twenty-sixth and Perot Streets for the new building of the Philadelphia Bicycle Club, which will cost $18,000 and is under contract to be completed by September 15. The structure will be built of black mortar brick and will have a frontage of twenty-six feet facing the Park, and a depth of eighty feet. The building will contain a parlor, billard-room, dressing-rooms for ladies and gentlemen, and a gymnasium.

Messrs. Hazlehurst & Huckle, architects have completed their plans for the Park Avenue Methodist Episcopal Church, to be built on the South-west corner of Park Avenue and Norris Streets. It will be 80 feet on Park Avenue, and 90 on Norris Street; will be built of Trenton brown stone, with trimmings of Euclid stone in gothic style. The roof and the tower will be covered with terra cotta tiles. The interior of the church will be of open timber construction, the ceiling plastered and panelled. The roof will be carried on four clustered stone columns, carved. The main roof will be covered with slate. The church will be a very fine one and work will be rapidly pushed upon it.

The old American Fire Insurance building, on Walnut street, above Third, is being remodelled. An additional story will be put up on the Walnut street side, and will provide eight additional rooms. An additional three story in height and 200 feet long will be built through to Willings Alley, making the entire length of the building 260 feet. The first floor will be even with the street and have a ceiling 14 feet high. A corridor will run along the left side paved with new granolithic pavement. An elevator and an iron staircase will connect with the upper floors. Newark buff-colored brick will be used with white mortar and limestone trimmings. Frank Furness is the architect.

Items of News.

—The Western Board of Prison Inspectors are on a tour of inspection.

—The Dominion of Canada has a deficit of about $5,000,000 this year.

—The silk mill to be erected in Reading at an early day will cost $50,000.

—The Gas Trust fireman have asked for a ten per cent. advance in wages.

—The manager of the Walnut Street Theatre paid $500 for his license of 1886.

—J. Cassatt has purchased the farm of W. W. Davis, in the Chester Valley, consisting of 165 acres, for $40,000.

—During this session 12,000 bills have been introduced in Congress, three-fourths of them being House bills.

—Notes falling due on Sunday in New Jersey, must be paid on Monday instead of Saturday as heretofore.

—Mr. Benjamin Moran, ex-United States Minister to Portugal, who has just died, was a native of Lancaster, Pa.

—The Gas Trust will occupy its present property on Seventh street, above Chestnut, for another year, rent $5,400.

—Work on the linen thread factory to be started at Allentown by Paterson (N. J.) capitalists, will be commenced at once.

—The Pittsburg National Gas Company, are working hard to form a pool, in order that they may command better prices for gas.

—The Indian Rights Association has adopted a protest against the removal of Wm. H. Lyon from the Board of Indian Commissioners.

—All the window-glass factories in the country will shut down on the 30th instant for the usual summer vacations of two months.

—The stockholders of the Bethlehem Iron Company have authorized the placing of an additional mortgage upon that property for $1,500,000.

—The Western Board of Prison Inspectors, began their examination at Huntingdon last Thursday, and from there go to other prisons throughout the state.

—It will be a very wise move for the Gas Trustees to establish branch offices in the Northeastern, Southeastern and Southwestern sections of the city.

—The cabinetmakers and furniture workers' strike was formaly declared ended at a meeting of the United German Trades' Association on Friday evening.

—The revenue due the Commonwealth from hotels, brewers, brokers, billiards and general merchandise was collected on Tuesday. $14,000 was received.

—A decree has been issued by Judge Simonton dissolving the New Era Life Insurance Association, of Philadelphia, and appointing J. W. Wiestling, of Harrisburg, Receiver.

—The Edison machine shops are to be removed from New York and Brooklyn to Schenectady, where labor is cheaper, and where there will be lessened danger of strikes.

—The following-named post offices show gains in receipts during the year ending March 31, 1886, as follows: New York, $112,-803; Chicago, $124,915; Boston, $108,545; Philadelphia, $47,734.

—A contract was closed on Monday at Montgomery, Ala., for the completion of the Birmingham and Sheffield Railroad and the erection at Sheffield of a second iron furnace with 100 tons capacity.

—The Keystone Enamel Company is the name of a thrifty enterprise to be located in Luzerne borough, Luzerne county, having been removed thither from Newport, R. I.

—In an adjudication filed on Tuesday of the account of the executors of the estate of Andrew Brofly, who died in 1878, Judge Ashman rejected a claim of $1,255 presented by Joseph A. Geiss for settling the books of the decedent and preparing a statement for the use of the executors.

—Boycotters will no doubt take notice of the advice of Judge Barrett of New York, to labor organizations on the subject of boycotting. He advises labor organizations to appoint a committee on law, and consult the best lawyers. The labor organizations will not take the Judge's advice.

—Mary Ann Bumm, widow of the late William Bumm, on Monday issued execution against George W. and Wm. H. Bumm, individually and as composing the firm of Wm. Bumm & Sons. The execution was upon a judgment note for $26,000, dated Monday and payable on demand.

—The will of the late Henry Havemeyer has been filed for probate in the Surrogate's Office at New York. It is dated March 22, 1884. He bequeaths all his property to his wife, Mary J. Havemeyer, whom he appoints sole executrix, and leaves to his children whatever remains after her death.

—Officials of the Pennsylvania Railroad Company state that the tonnage loss of that company from the strike in the Clearfield coal region was 500,000 tons. This was, however, made up by the increased shipments of gas coal, coke and anthracite, which amounted to 950,000 tons more than usual.

—About 450 Gas Works employés have presented a petition to the Chief Engineer, asking for an increase of wages of 25 cents per day. The men now receive $2.75 and want $3. The petition will probably be referred to the Committee on Works of the Gas Trust at its meeting this afternoon.

—The Anglo-American Insurance Company, of Washington, D. C., has suspended. It was devoted to marine and fire insurance. $33,000 of its drafts to pay insured losses having gone to protest in London, the company failed. Its liabilities amount to about $60,000 on policies insured in this country.

—The Committee of the Board of Port Wardens granted a license for the construction of a ferry slip on the Schuylkill river at the western end of Schuylkill avenue; also a license for the filling of the dock and the building of a bulkhead at the western end of Kent street, which is above Pine street.

—The Philadelphia and Reading Railroad Company has not thus far placed the car-trust certificates authorized by Court. The new equipment for the company, however, is being built, and the Receivers are confident that they will be able to place the certificates by the time that the money is needed.

—The Sprague Electric Motor, which some French engineers have been examining, as it is applied on an elevated railroad in New York, seems to satisfy them as to its practical use. It is governed automatically, and can be better controlled than the average steam engine, subjected to similar variations in load.

—The recommendation of the Master that the Reading Railroad Company be allowed to give an indemnity bond of $20,000 to secure property-owners on Cedar and Commerce streets against possible losses in connecting with the River Front Railroad in the Thirty-first ward has been confirmed by the Court.

—The United States District Court at Cincinnati has given a decree on a judgment of the United States Supreme Court in the celebrated McArthur will case, which gives some 15 000 acres of land, valued at $2,000,000, to the grandchildren and heirs of General Duncan McArthur as against those who purchased from his immediate children.

—Representative King, of Louisiana, introduced in the House on Monday a bill appropriating $11,000,000 for the construction of coast defenses to consist of revolving steel-turreted forts at the entrance to important harbors. The first appropriation is to be followed by a yearly appropriation of $8,-000,000 until the system of defense is perfected.

—Sheriff Smith, of Camden, on Thursday arrested Cornelius O'Connell, a stone dealer of Yardleyville, Pa., on a capias at the instance of J. Moore White, who sues to recover damages of $5,000. O'Connell a few weeks ago caused the arrest of White for an alleged embezzlement, and then failed to appear to the trial. He has entered security in $10,000.

—The reorganization of the Central Railroad of New Jersey proposes the creation of a new 5 per cent. loan into which the present loans of the company will be funded. The first mortgage bondholders are not to be asked to scale their holdings. That mortgage is payable in a few years, and then it will either be extended at a low rate or funded with another loan.

—On Monday last Judge Penrose, of the Orphans' Court, filed an adjudication of the account of Joseph DeF. Junkin and others, executors of the estate of John A. Wallace, who died in August, 1884. The account showed a balance on hand for distribution amounting to over $14,000, which was directed to be disposed of in accordance with the terms of the decedent's will.

—The southwest corner of Girard and Ridge avenues is undergoing considerable change. The property belonged to the Weightman estate, and for many years had been occupied as a hardware store and weather-vane establishment and saloon. The recently incorporated Northwestern National Bank has purchased it and is now engaged in erecting thereon a large and substantial bank building.

—Camden will soon have a regularly organized Safe Deposit and Trust Company, similar to those doing business in this city. The company is founded upon a capital stock of $200,000, divided into 2,000 shares, of $100 each. These have all been subscribed. Ex-United States Senator A. G. Cattell, of Merchantville, will be the President, and Edwd. S. Hall, also of Merchantville, will be the Secretary and Treasurer.

—The Harleigh Cemetery Association of Camden, Jehu Evans, Secretary and Treasurer, has a fine cemetery property at City Line Station, on the Camden and Atlantic Railroad. The spot is a beautiful one. The plan has been adopted of laying the grounds off into lawns, each surrounded with a drive. The grounds are cared for without cost to lot holders. Opportunities are offered to purchase lots in an easy manner.

—The new Ninth National Bank building, located on the West side of Front street, below Norris, is being constructed by Messrs. Hazelhurst and Huckel, architects. It has a frontage of 36 feet and a depth of 90 feet. Limestone from Indiana is used; the front is ornamented with carved belt courses. The general style is Romanesque. Mr. John Dickey is president and Charles F. Giles cashier. On October 1st they expect to take possession.

—Judge Butler yesterday filed an opinion in the United States District Court in favor of the steamboat Mary Morgan in the suit brought by the Delaware River Iron and Ship-building Works, in which it was sought to hold the vessel liable under a lien for about $700 worth of supplies which had been furnished her. The Court decided that the boat was not subject to a lien, and that if it had been it was discharged by a subsequent sheriff's sale.

—The Executive Committee of the District Assembly of the Knights of Labor held a conference last Wednesday evening with representatives of the Master Bricklayers' Protective Association concerning the Nicetown strike on the question of wages. The matter will be settled in a few days. The same committee visited Bridesburg on Thursday, and investigated the trouble at McCay & Sons' yard, and advised terms of settlement, which perhaps by this time have been accepted.

—The Camden City Council on Thursday night confirmed the following nominations by Mayor Pratt for members of the new Board of Health: Dr. J. D. Leckner and Dr. W. M. B. Miller, each for one year; Dr. Donger, for two years; Herman W. Milller and George Hammond, each for three years, and Charles Watson for four years. The ordinance creating the position of Assistant Tax Receiver at a salary of $1,000 was passed. Frank S. Jones' nomination for that position was confirmed.

—The Acting Secretary of the Treasury, on Monday issued the 138th call for the redemption of $4,000,000 of the 3 per cent. loan of 1882 on August 1, 1886. Following is a description of the bonds, the numbers being original and inclusive in each case:

$50—No. 136 to 147.
$100—No. 1813 to 1883 and 9922 to 9926.
$500—No. 825 to 843 and 4226 to 4228.
$1,000—No. 5963 to 6194 and 23,730 to 23,737.
$10,000—No. 12,966 to 13,344 and 28,209.

—Henry R. Coleman the surviving trustee of the estate of Robert Earp, who died in Philadelphia in 1848, has been ordered to file an account inasmuch as the suits brought by Elizabeth and Mary Earp, of Baltimore, widow and daughter of George Earp, who died in 1875 and who was the son of Robert Earp, has been decided against him. A decree was made, as prayed for by the plaintiffs, directing that certain legacies bequeathed them under George Earp's will should be taken out of the trust estate created by his father.

—Christian Rudolph, the owner of the property at the southeast corner of Gay and Baker streets, Manayunk, seeks to enjoin the Highway Commissioner and his assistants, together with Michael O'Rourke, the contractor, from tearing down his house. He alleges that the highway authorities are about paving Gay street to the width of 30 feet, and so shift the street that the curb line will go through his house. Rudolph has been notified to set his curb on the new line. He claims that the street has never been properly opened.

—The Gas Works have been for some time the subject of some consideration, and on Saturday Mr. Maloney, with the Law Committee of Councils, listened to the opinion of the City Solicitor in Select Council Chamber. The ordinance offered by Mr. Maloney and referred to by the City Solicitor was read. Several motions were made, but the Law Committee and the members of the Sub-Committee of the First Ward were equally divided in their opinions, and the matter was left without any decision being taken.

—The Board of Surveyors on Monday approved the plans of an iron truss bridge over the Richmond branch of the Reading Railroad at Somerset street, for which an appropriation of $30,000 has been made by Councils. The bridge will be 58 feet wide, with a roadway of 36 feet and two footways. The span over the tracks of the railroad will be 100 feet, and the height of the bridge above them 18 feet.

—Work is being pushed forward along the line of the Baltimore and Ohio Railroad, and the arching of the tunnel that crosses the boundary of the Park at Fairmount has already been begun in the vicinity of Twenty-sixth street and Fairmount avenue. Iron girders have also been placed in position across the walls of the cut on Twenty-fifth street, between Callowhill and Hamilton streets. Workmen are now riveting on to these girders buckle plates, upon which will be laid the pavement that will cover the cut leading to the tunnel, and once more open this portion of Twenty-fifth street for traffic.

—The long-standing suit of Richard T. Tuttle and others, trading as G. B. Olin & Co., of Canandaigua, N. Y., to have Oliver M. Blair enjoined from making an infringement upon patented improvements in spring tooth harrows was before the United States Circuit Court upon exceptions to the Master's report. The Master awarded the plaintiffs $1.90 upon each harrow sold by Mr. Blair. After argument by council the report of the Master was set aside, and only nominal damage were awarded to the plaintiff. Respecting the validity of the patent counsel for the defendent took an appeal to the Supreme Court of the United States.

—$3,483,275 is the aggregate of the House Harbor and River Bill. Items have been increased, while others have been decreased. Some $615,000 making a net increase of $2,867,775. The Senate Bill appropriates a total of $18,049,975. The totals of the appropriations recommended by the Senate Committee are as follows: New Jersey—Atlantic City, $5,000; Raritan Bay, $50,000. Pennsylvania—Susquehanna River, between Salt Lick River and Buttermilk Falls, $10,000; Allegheny River, for Herr's Island Dam, $50,000; Delaware River, $280,000, of which $40,000 is to be expended between Camden, N. J., and Philadelphia. Delaware—Nanticoke River, $10,000; St. John's River, $10,000.

—The Board of Port Wardens has been considering the question of the Baltimore and Ohio's right of way through the city, with a view of making some minor changes. Col. Douglass said that to change the plan the company would be obliged to abandon rights of way already obtained for a distance of 3,800 feet; that the curve could not be changed without changing the line north and south, and that it would be impracticable to reduce the width of the roadway, because, on account of the company's depot at Chestnut street, it is necessary to have width enough for four tracks north of the depot, the company being confined to two tracks north of Chestnut street.

—The New Jersey Safe Deposit and Trust Company, of Camden, has purchased the property on the Northeast corner of Third and Market streets, with a front of 180 feet on Market street by 140 feet on Third street. The building will have a front of 40 feet by 71 feet in depth, will be of pressed brick with terra cotta and stone trimmings. The building will be artistic in design and a credit to Camden. The company will be organized under a recent act of the Legislature, which gives to them similar powers to those of the Philadelphia institutions. The company will have a capital stock of $200,000, divided into 2,000 shares of $100 each. The stock has all been subscribed, and an organization will be effected in the early part of July.

—Eastern Pennsylvania is becoming attractive as a manufacturing locality to more than silk manufacturers. Within a year or so past, quite a number of New Jersey silk manufacturers have located in Eastern Pennsylvania, and one firm is now about selecting a site at Harrisburg. Other manufacturers are looking in this direction, because of the cheap coal and cheap labor to be had.

—The several committees of the Guardians of the Poor met at the Almshouse on Friday afternoon. The contract and specifications for rebuilding the burned wing were approved by the committee and ordered to be sent to Paul J. Essick & Son, the contractors, for signatures. Messrs. McMurtrie, McAleer, Paxson and Chapman will have charge of the rebuilding. Dr. McLaughlin reported 871 patients in the hospital, an increase of 61 over the same period last year, and Dr. Leidy reported 271 patients in the insane department, an excess of 121 over the estimated capacity. The number of prescriptions compounded for the month was 7,952, of which 7,376 were for the hospital and 576 for the outwards. The expenditures of the drug department were $551.85 out of the monthly appropriation of $666.70. Bills amounting to $1,121.57 were approved.

City Councils.

The Philadelphia Time Telegraph Company will shortly be accorded permission to place an electric metallic current in the territory bounded by Delaware avenue, Fifth, Market and Walnut streets.

An ordinance was passed in Select Councils on Thursday granting permission to the Keystone Light and Power Company to lay underground cables on certain streets.

The Board of Highway Supervisors have been authorized to grant permission to the Postal Telegraph Company to lay underground conduits under certain streets for the purpose of making connections with the Bennet-Mackay cable.

Bills were passed in Select Councils last Thursday as follows:

To lay water pipe on Knox, Rittenhouse, Collom, Green and Meadow streets, Fairmount and Trenton avenues, and to relay water pipe on Adams and Johnson streets.

Regulating the laying and construction of underground wires, electrical conductors, conduits, cables and tubes in this city.

Granting the Electro-Pneumatic Transit Company the privilege of placing pneumatic tubes under certain streets.

The Select Council ordinance to grant an extension of time to the Cosmopolitan Underground Telegraph, Telephone and Electric Light Company to lay its patent conduits under certain streets, was postponed.

Common Council ordinances and resolutions were considered and concurred in as follows:

To authorize the paving of Mantua avenue, from Haverford avenue to a point 300 feet West of Thirty-second street; to authorize the Chief Commissioner of Highways to employ a watchman at the City Yard, Twenty-third and Powelton avenue, and to provide for the payment of the same; to authorize the paving of Rihl street, from Palmer to Hanover street; to set aside $1,500 from the appropriation to the Police Department to pay the salaries of, and fit up quarters for, four matrons at police stations for the remainder of the year; to authorize the grading of Tyson and Hutchinson streets, in the Nineteenth Ward; to place Freeland, lately called Wetherill, street, from Sumac street to the line of Fairmount Park, upon the city plan; to authorize the opening of Glenwood avenue, from Fifth to Second street, in the Twenty-fifth Ward; to authorize the paving of Gratz

street, from Berks to Norris street, and Harrison and Thompson streets, from Oak to Gay street; designating the Produce National Bank as a depository of the city's money; to authorize the opening and widening of Thirty-second street, from Spring Garden to Rockland street; to make an appropriation to the Board of Health to pay salaries of six inspectors of house drainage and cesspools and one clerk, from July 1 to November 1; to authorize the revision of the lines of Tower street, in Twenty-first Ward; discharging the Committee on Police from the further consideration of the ordinance providing for licensing newsboys and bootblacks, and to provide means for their education. Also, the ordinance prohibiting the mooring or discharging of vessels, barges or other boats laden with baled hay or straw at or in the vicinity of any wharf on the Delaware front within the city limits. Requesting the Schuylkill River East Side Railroad Company to erect suitable temporary bridges for the convenience of public travel to and from Fairmount Park at the Fairmount avenue and Green street entrances. To place Philip street on the city plan. To authorize the paving of Marshall street, from Venango street to Erie avenue. Requesting the Mayor to instruct the police to flush the gutters on their beats once a day during July, August and September. Instructing the Chief Commissioner of Highways to see that the various passenger railway companies put in crossing stones on the streets occupied by them at the distances required by ordinance of July 7, 1857. To authorize Peter Woll & Son to lay a pipe under and across Berks street, East of Hancock street. The ordinance regulating the duties of the Police and Fire Surgeon, and instructing him to make an inspection of the members of the Fire Department, was postponed till the next meeting, it being said that the subject had not been fully considered in committee.

Contracts for improvements and repairs and for improved sanitary arrangements in various schools, were awarded as follows, at a meeting held at 713 Filbert street: Fifth Section, placing new water closets in the Horace Binney School, D. & P. McNichol, $897; Sixth Section, placing new floors in the Northeast Grammar School, F. Thurwanger, $956; Fourteenth Section, new water closets in Vaux School, $1,295; Fifteenth Section, skylights in Stevens School, C. O'Neill, $639; Eighteenth Section, putting new floors in the Douglass School, F. Thurwanger, $581; Twenty-seventh Section, draining water closets in the Newton Primary School, D. & P. McNichol, $590; Twenty-ninth Section, new water closets in the Meade School, D. & P. McNichol, $1,350. Contracts were also awarded for small repairs to a large number of schoolhouses in all portions of the city.

The committee also received proposals from these persons for the sale of lots: Peter Lamb offered the lot at the corner of Mascher and Master streets, in the Seventeenth Section, for $21,500; John McCarthy the lot at Marshall and Cambria streets, in the Twenty-fifth Section, with a frontage of 200 feet on Marshall street, at $2.50 per foot; Thomas Corson the lot at Twelfth and Cambria streets, in the Twenty-eighth Section, for $11,200, and Hiram A. Miller the lot at Richfield and Fremont streets, in the same section, for $5,000. Action in the matter was postponed until a committee could visit the lots and inspect them. A proposition from the Dobson Brothers to sell to the city for $3,000 the lot at Crawford and Front streets and purchase the lot at Ridge avenue and Crawford streets from the city for $3,000 was accepted.

The Chief Engineer says that about 500 lengths of 4-inch cast iron pipe is needed for extensions to the street mains. The matter has been referred to the Gas Committee on Distribution with power to act.

BUILDERS' ITEMS.

Real Estate Notes.

J. R. CLAGHORN has nearly completed 37 six-roomed houses on Sixteenth, Smedley and Ontario streets.

J. R. WHITE is erecting a block of dwellings (12), which will face Clearfield, Clementine and Emerald streets, and are being put up as an investment.

GREY & SHEPPARD are erecting a large warehouse, 1620 Lombard street. Addison Hutton, 400 Chestnut street, & Kline & Bros. are the sanitary engineers.

HORACE FRITZ, 713 Walnut street, the well-known conveyancer, we regret to say, is confined to his house, suffering from an attack of nervous prostration.

DIXON & HALLOWELL, conveyancers and real estate brokers, report business in renting properties with them good, and have but two or three vacant, and business generally satisfactory.

THE dwelling-house, 217 S. Ninth street, is undergoing extensive alterations, and having fine store window put in, and when completed will be occupied by Mr. J. L. Boesch, optician.

THE JOSEPH BROWN ESTATE is taking down some old houses and replacing them by six handsome stores and dwelling, at Eighteenth and South streets. They will be three stories, back and front.

THOMAS J. COSTELLO, 1008 Passyunk ave., has disposed of the property 823 McClean street for $1,480, and is busy negotiating several other real estate sales. His business generally is very satisfactory.

J. H. HUDSON, Columbia avenue, has just made sale of a property 837 North Fifth street for $7,000; also, one on French street, No. 158, for $1,800. Mr. Hudson finds his time constantly employed conveyancing.

CHAS. S. HENDERSON of Columbia avenue has been killing two birds with one stone at Atlantic City, taking in the fresh air and looking after some valuable lots he has there, and from all we can learn it will be a long job.

DANIEL FITZPATRICK, 812 Passyunk ave., has made sale of the property 778 Evangelist street for $2,150; also, dwelling, 1106 South Eleventh street for $3,100. He has 400 houses on his rent roll, and has but two of them vacant.

B. F. BILYEU, 809 Columbia ave., has just completed the sale of property, 721 Berks street, for $4,150. Mr. Bilyeu reports that inquiries are increasing for properties to purchase in his vicinity of about four to six rooms.

W. S. RINGGOLD & Co., 629 Walnut street, real estate brokers, have just completed the sale of two houses, 2027 and 2029 Oxford street, for $3,500 each.

This firm do an extensive business in mortgages, and report business satisfactory.

HENRY R. SHOCH has been selling considerable property which he has lately completed; 26 on Twentieth street, sold for $3,200 each; 35 on Taylor and 15 on Ringgold streets sold for $2,000 each. Most of these properties were purchased for investment and are bringing $18 per month.

JAMES E. DINGEE & T. ENGEL are building a fine fancy stable and house for coachman at Greenhill and Seybert streets. Otto C. Wolf is the architect. It will be fitted up in the most improved manner, and have great attention paid to its sanitary arrangements, which will be done by Messrs. Kline Bros.

WM. L. CRAVEN, 1546 N. Seventh street, has just completed the sale of house 1855 N. Eighth street for $4,300, and ten on Kip street, north of Somerset street, for $1,250 each; also, one, 285 Tusculum street, for $1,300. Mr. Craven is also erecting twenty-two five-roomed houses in the immediate vicinity, which he will offer for sale as soon as ready.

SAMUEL T. FOX, real estate broker and conveyancer, Ninth and Callowhill streets, has commenced the erection of two semi-detached dwellings, which will be built in the Queen Anne style. They will contain eleven spacious rooms and have all the modern conveniences, and will stand on a lot 50 by 150 feet on the S. E. cor. of Eighteenth and Tioga streets.

ROBERTS & COHN, builders, Camden, are erecting fifty-four four-story dwellings, which will be fitted up with all the modern conveniences, hot and cold water and bath. Also, sold twenty-three six-roomed houses on Point street, above Penn, for $46,000, and are negotiating many other large sales. Mr. Cohn says that properties in Camden are fetching very good prices.

KLINE & KEYS, 1112 Ridge avenue, have within the last few days made sale of the following: four and half acres of land, at Roxborough, for $11,000; also a dwelling, on Twenty-fourth street below Wallace, for $2,400, and two, on Brandywine street below Broad, for $2,400 each.

Properties with them are letting well, and they report collections fair.

WEIDNER & ELKINS are erecting a row of three-story dwellings on Seventeenth street above Jefferson, on the West side. They will be very elegant, brown stone fronts with marble trimming and high steps and will be very commodious with all the latest sanitary improvements. Also, a block on a smaller scale on the North side of Jefferson, similar in construction, with brown stone fronts.

J. R. MASSEY, S. E. cor. of Thirteenth and Green streets, reports having sold a private residence, 532 N. Twelfth street, for $3,200, clear.

Mr. Massey says that real estate transactions are a little dull with him, but is in anticipation of a good fall business; and further says that owners of old properties are asking too much for their houses.

THEO. F. SCOTT & J. E. ROBERTS report having within the last 30 days sold four houses—1624, 1626, 1628 and 1630 Swayne street; 1629 and 1631 Olive street, and 701 Fowler street—for $18,600; also 1017 Lingo street for $1,500; also 535 Dillwyn street for $3,475 (three-story ten-roomed house), and a lot on the east side of Nineteenth street, 108 feet front by 177 deep, for $10,600.

Small houses with them are in great demand.

PAUL BRANDER, architect, has completed plans for the erection of a Parochial school building for the Roman Catholic Church of the Holy Trinity, to accomodate 250 pupils. The new building will have a front on Spruce street of 45½ feet and a depth of 47 feet, and be three stories high with a high basement. The material will be brick, with terra-cotta and brown stone trimmings, with ornamental galvanized iron work at necessary points. The style of architecture is of the Renaissance type. Surmounting the Southeast corner will be a tower finishing with a cross, rising 79 feet above the pavement. The entire cost of the building will be $18,000. Thomas McCary is contractor. The building will be finished by November. The basement story will be 8½ feet. The first floor will contain a music room, 18x 18 feet, reception room, 9x14 feet.

SALES by Coleman & Co., 703 Walnut St., Philadelphia, Pa., two furnished cottages at Cape May, N. J., to Laura H. Chandler of Wilmington, Del., and two large cottages there to Geo. W. Gilbert, of Camden, N. J. The "Berkeley" a 100 room hotel at Sea Side Park, to R. J. Dobbins. No. 3502 Spring Garden St., Philadelphia, to Janette Grier. An 82 acre farm at Freehold, N. J., to Sarah A. Cox, Camden. 14 brick dwellings in Camden, to S. H. Morison, Camden.

CHAS. H. SHARP, 256 Kaighn's avenue, Camden, real estate broker, has just completed the sale of three houses (two stories), for $3,000, on Sycamore street; also a dwelling at Centreville for $800.

Mr. Sharp succeeded Mr. Geo. G. Bundick last August, and since that time has been very successful, having more than doubled the business. He says that collections are good, and the demand for small properties, both for rent and sale, in his section of the town, is active, and properties are being sought after.

P. E. GARDENER, Seventh and Washington ave., has just completed the sale of three houses on McKean street, above Ninth, for $1,850 each, which are a portion of a row of nine, five of which are already sold. He is also negotiating the sale of some lots on the Southeast corner of McKean and Ninth streets. Also, four lots in the rear, which will be consummated in a few days and buildings erected on them. Within the last thirty days Mr. Gardener has sold several properties, most of which have been four and five roomed houses and located in the lower part of the city. He reports that the applicants for properties from Dickinson to Christian streets is in excess of the supply.

GEORGE LODGE, conveyancer, corner of Third and Federal streets, has just completed the sale of property 409 Lombard street, store and dwelling, for $2,000; also 56 ground rents within the last thirty days, for $800 each, at the corner of Sixteenth and Tasker. He has several new properties in his care which he has for sale in the neighborhood of Eighteenth and Tasker, all of which are tenanted. Mr. Lodge is kept very busy conveyancing and has had to have additional help. His office is fitted up with all the most modern office requirements, lighted with electricity, and has several fans constantly playing, and as a down-town office would be difficult to find its equal. Andrews & Lodge are erecting twenty-three well finished two-story dwellings on the east side of Seventeenth, Tasker and Norris streets, which will have all the modern conveniences. The lots are 16x70, with a four-foot alley to each.

THE WARREN EHRET ROOFING COMPANY are being kept very busy, especially with their Slag-Stone Composition, which is both fire- and water-proof, and is a decided improvement on any other composition used for roofing. It is well adapted to all flat or nearly flat surfaces., and is being largely used in all kinds of buildings.

Long experience has enabled them to overcome some few objections so frequently made to roofings of this character, and they now claim it to be perfect.

Much attention has been paid to the particular kind of felt used in the composition. Roofing which is made entirely of wool, when prepared by their new process of saturation, is entirely impervious to either water or gases.

They have styled this felt the "Acme," and it has become quite a favorite amongst the architects and builders.

The Slag-Stone Roofing will stand a fire test that no metal or slate roof will endure. The cement used is composed almost entirely of hydro-carbons. The felt saturated with a similar compound would require a very high degree of heat to liquefy them, and to have a practically fire-proof roof is certainly a great desideratum.

Building Permits.

One two story stable, 14 ft. by 36 ft., Seventy-third st. and Greenway ave., to Michael McCue, Church lane.

Two three-story houses, 18 ft. by 44 ft., Michlin st. and Germantown ave., to George R. Baxter, 121 Wister st.

Twenty two-story houses, 14 ft. by 28 ft., Wensley st. and Kensington ave., to Joseph Sheckey, 1832 Reed st.

Third-story addition, 14 ft. by 58 ft., Sixteenth and Pine sts., to Chas. R. Jarden, 415 Wetherall st.

One addition, 40 ft. by 40 ft., 1336 Spring Garden st., to Wm. R. Dougherty, 1419 Sansom st,

One two-story back building, 11 ft. by 16 ft., 707 South Fifteenth st., to Jas. Maxwell, 1308 South Thirteenth st.

One two-story back building, 18 ft. by 16 ft., Township line and Walnut lane, to H. C. Wright, same place.

One brick kitchen, 14 ft. by 10 ft., 620 North Sixteenth st., to D. W. Blyler, 1328 Olive st.

Alterations and additions, 44 ft. by 18 ft., Broad and Sansom sts., to Tout and McLaughlin, 317 Cook st.

One two-story brick building, 12 ft. by 16 ft., 2315 Jefferson st., to Isaac Scales, 2519 N. Twenty-third st.

Ten two-story houses, 16 ft. by 42 ft., Buist ave. and Sixty-second st., to Geo. Laycock, Sixty-second st. and Elmwood ave.

One three-story house, 16 ft. by 41 ft., Germantown Road and Fifteenth st., to C. Ellwanger, 2210 East Dauphin st.

A one-story stable, 18 ft. by 56 ft., 2218 Columbia ave., to John S. Cornell, 2104 N. Twentieth st.

Seven two-story houses, 16 ft. by 42 ft., Ashmead, above Mercer st., to Wm. Garvin, 5008 Adams st.

A two-story factory, 50 ft. by 75 ft., American and Cumberland sts., to John Dawson, 1855 Frankford ave.

Two one-story storage sheds, 60 ft. by 218 ft., Delaware ave., above Poplar st., to Joseph D. Ellis, 325 Walnut st.

One one-story storage shed, 143 ft. by 25 ft., St. David st., above Race st., to same party.

One one-story shed, 150 ft. by 25 ft., Dickinson st., above Swanson st., to same party.

One two-story store and dwelling, 20 ft. by 44 ft., Kensington ave. and Harrowgate Lane, to D. C. Schuyler, 2263 Fairhill st.

One two-story house, 16 ft. by 40 ft., Erie ave., above K st., to same party.

One two-story back building, 9 ft. by 10 ft., 252 S. Eleventh st., to Corson & Spore, 914 Walnut st.

Corner alterations, Eleventh and Thompson sts., to A. M. Strader, 802 Nectarine st.

One two-story house, 26 ft. by 43 ft., Fifty-eighth and Elmwood ave., to John A. Palmer, 223 S. Fortieth st.

Twelve three-story stores and dwellings, 16 ft. by 56 ft., Berks, above Third st., to John S. Sernee, 1413 N. Broad st.

Five three-story stores and dwellings, 14 ft. by 45 ft., Third st., above Berks, to same party.

Five three-story houses, 13 ft. by 30 ft., Oriana, above Berks st., to same party.

Twenty two-story houses, 14 ft. by 39 ft., Lawrence, above Cambria st., to Michael Melody, 2111 Uber st

One two-story house, 16 ft. by 44 ft., 3712 Silverton ave., to Matthew King, 3700 Fairmount ave.

One two story house, 16 ft. by 44 ft., 3714 Silverton ave., to Anthony Kiley, 704 N. Thirty-seventh st.

Front addition. 14 ft. by 8 ft., Cadwalader and Oxford sts., to Elias Gramlich, 514 Oxford st.

Two brick fronts, Federal, above Twelfth st., to Wm. Thompson, 1524 S. Eighteenth st.

One two-story house, 16 ft. by 40 ft., Sixteenth, above Dickinson st., to same party.

Nine two-story houses, 14 ft. by 28 ft., Cumberland, above Fifteenth st., to John M. Sharp, 1936 South College ave.

Eighteen two-story houses, 14 ft. by 28 ft., North and South side of Bertha, above Fifteenth st., to same party.

Eighteen two-story houses, 14 ft. by 28 ft., North and South side of Kay st., above Fifteenth, to same party.

Front and interior alterations, and Eighth Winter sts., to Michael Whelan, 1120 Mifflin st.

One two-story house, 18 ft. by 30 ft., Eighty-sixth st., to Jas. P. Erwin, 1937 Brandywine st.

Front alterations, 1129 Filbert st., to Jas. Beatty & Son, 2114 Green st.

One two story house, 20 ft. by 20 ft., Reas st. and Lehigh ave., to John Mitchell, 2141 Mascher st.

One three-story building, 39 ft. by 63 ft. Ninth st., above Susquehanna ave., to Geo. Woolford, 1640 Cayuga st.

Four two-story houses, 13 ft. by 36 ft., Fourth, above Somerset st., to H. E. Chambers, 1042 West Dauphin st.

One three story house, Thirty-fifth and Sunny-side sts., to Charles E. Bartle, Thirty-third st. and Lehigh ave.

Eleven two-story houses, 15 ft. by 42 ft., Venango and Smedley sts., to Mary McUlman, 1636 Venango st.

Two-story addition, 15 ft. by 22 ft., 2345 Ridge ave., to J. C. Hirst, 2328 Montgomery ave.

Ten three-story houses, 17 ft. by 60 ft., Forty-second st. and Chester ave., to Henry C. Altemus, 112 South Thirteenth st.

Twelve two-story houses, 14 ft. by 33 ft., Fraley and James sts., to John Cairns, 2739 Kensington ave.

One one-story 10 ft. by 16 ft., Juniper, above Walnut st., to L. Koder, 1520 Fairmount ave.

Rebuild stable, 70 ft. by 80 ft., Aspen, above Forty-second st., to James H. Garrett, 735 N. Forty-first st.

Third-story addition, 60 ft. by 70 ft., Broad, above Vine st., to R. J. Dobbins, 308 North Broad st.

Addition to store, 9 ft. by 11 ft., Twelfth and Vine sts., to P. H. Somerset, 1513 North Twelfth st.

One two-story house, 32 ft. by 30 ft., Seventy-eighth st. and Buist ave., to R. B. Clark, 781 Pennock st.

One three-story store and dwelling, 18 ft. by 57 ft., 2232 Frankford ave., to Robert Beatty, 2046 East York st.

One three-story house, 25 ft. by 73 ft., Frankford ave. and Arrott st., to Wm. Keas, Frankford.

Two three-story houses, 17 ft. by 50 ft., Paul and Meadow sts., to same party.

One two-story house, 16 ft. by 44 ft., Franklin, above Harrison st., to same party.

A two-story church, 33 ft by 45 ft., Greenway ave. and Seventy-second sts., to Geo. S. Pathel, Darby.

One three-story house, 10 ft. by 42 ft., Germantown ave. and Venango st., to Benjamin Walker, 3869 Germantown ave.; one two story house, 18 ft. by 50 ft., Sixteenth, above Venango st., to same party.

One two-story back building, 15 ft. by 16 ft., 2220 North Fifth st., to George Kessler, 1332 Marshall st.; one-story kitchen and alterations, 12 ft. by 16 ft., 2041 Germantown ave., to same party.

One two-story back building, 11 ft. by 20 ft., 926 Green st., to Henry Koch, 559 Chatham st.

Two one-story houses, 35 ft. by 29 ft., Richmond, above Bristol st., to Wm. R. Dougherty, 1419 Sansom st.

Twenty two-story houses, 14 ft. by 28 ft., Stillman st., above Columbia ave.

ABBREVIATIONS.

Add.—Addition.
Alt.—Alteration.
Assn.—Association.
B. & L.—Building & Loan.
Bk.—Bank.
B.B.—Back Building.
Dwg.—Dwelling.
Est.—Estate.
E.J.—Ejectment Suit.
E.S.—Equity Suit.
Exr.—Executor.
Exrx.—Executrix.
K. & B.—Kitchen & Bath.
M L.D.—Mechanics' Lien Docket.
Nat. Bk.— National Bank.
Sav. Bk. —Savings Bank.
t. t.—Terre Tenant.
S.F.—Scire Facias to revive Judgment.

Sum C.—Summons in Case—A form of action invented to meet all civil cases, the form of which is not specially provided for.

Where there are no figures to indicate the amount of the judgment, the damages have not been assessed.

The first name in each line is that of the judgment debtor.

An asterisk (*) denotes judgment confessed or bond and warrant conditioned.

The figures 1 2 3 and 4 immediately after the name of the plaintiff indicates the number of the Court. The letters D. M. J. and S. after the number of the Court indicate the Term as D., December Term, M., March Term, as J., June Term and S., September Term.

An examination as to the nature of judgments and suits will be made for subscribers without extra charge on application.

CONVEYANCES.

ABBREVIATIONS.

Add.—Addition.
Alt.—Alteration.
Assn.—Association.
B. & L.—Building & Loan.
Bk.—Bank.
B.B.—Back Building.
Dwg.—Dwelling.
Est.—Estate.
E.J.—Ejectment Suit.
E.S.—Equity Suit.
Exr.—Executor.
Exrx.—Executrix.
K. & B.—Kitchen & Bath.
M L.D.—Mechanics' Lien Docket.
Nat. Bk.— National Bank.
Sav. Bk. —Savings Bank.
t. t.—Terre Tenant.
S.F.—Scire Facias to revive Judgment.
Sum C.—Summons in Case—A form of action invented to meet all civil cases, the form of which is not specially provided for.

Where there are no figures to indicate the amount of the judgment, the damages have not been assessed.

The first name in each line is that of the judgment debtor.

An asterisk (*) denotes judgment confessed or bond and warrant conditioned.

The figures 1 2 3 and 4 immediately after the name of the plaintiff indicates the number of the Court. The letters D. M. J. and S. after the number of the Court indicate the Term as D., December Term, M., March Term, as J., June Term and S., September Term.

An examination as to the nature of judgments and suits will be made for subscribers without extra charge on application.

CONVEYANCES.

—2?0 employés of the three brickyards of Young & Milnamow struck last Thursday, because of the refusal of the firm to discharge a non-union moulder who had been employed to fill up the gang.

—An equity suit was brought against the Independent Telephone Company in Common Please No. 1 by Adolphus A. Knudson and T. Gardner Ellsworth. The latter are owners of patents for improvements in mechanical telephones, and they say that they sold the patents to the Company for $14,500 in cash and $125,000 in stock. They allege that the Company has failed to make the payments according to contract, and they ask the Court to restrain it from doing business in the sale of State rights until they account to the plaintiffs.

—The Survey Committee of Councils on Tuesday considered an ordinance authorizing the Mayor to appoint a committee of expert civil engineers to examine the sewage system of the city, after which two of the experts, in conjunction with the Chief Engineer and Surveyor, would be formed into a Board to correct the system. It was decided to return the ordinance to Councils without the approval of the committee. An ordinance changing the name of the thoroughfare known as Long lane, in the Twenty-sixth ward, to Point Breeze avenue was approved.

—Superintendent Walker, of the electrical department has completed the laying of an underground telegraphic and electric wire conduit on Broad Street, north from Columbia Avenue, to the Germantown and Norristown Railroad. The conduit is a wooden box, about 6 inches wide and 3 inches deep, and in it are laid the wires for telegraphic and lighting purposes, the wires being imbedded in pitch, so that any settling of the pavement under which they are stretched, if it should cause the conduit to break in any part would still leave them perfectly insulated.

—The Commissioners for the erection of the Public Buildings have directed the old contract for fitting up the Southern and Eastern entrances to the structure to be put into operation. A granolithic floor will be laid in the interior doorways, with tiles on the edges near the walls, and the iron work and bronze gates already on hand will be set. The proposals for fully finishing the corridors in the Eastern basement story will be considered by committees who have power to take final action. The Executive Committee yesterday approved pay-rolls to the amount of $3,610.69.

—The amount of coal shipped over the Philadelphia and Reading Railroad for the week ending Saturday, June 19, 1886, was 272,273.01 tons, against 271,313.16 tons for the corresponding period of last year, an increase of 959.05 tons; total to date, 6,519,033.19 tons, against 5,968,293.15 tons at the same time last year, an increase of 550,740.04 tons. The amount shipped over the Schuylkill Canal for the week was 16,173 tons, against 14,847 tons for the corresponding period of last year, a decrease of 1,674 tons; total to date, 151,169 tons, against 143,276.10 tons at the same time last year, an increase of 7,892.10 tons.

—St. Louis seems to be ahead of Philadelphia in its manual training school feats. Five pupils of that institution have just graduated. Manufacturers and business men in general are all in favor of such schools and seem anxious to have some of the graduates in their various establishments. Philadelphia is in need of such graduates.

—At the meeting of the Water Committee of Councils on Tuesday, Chief Engineer Ogden recommended that in awarding a contract for a pumping engine only bids for a 20,000,000-gallon pump be considered. The following are the bidders for the engines: Gordon, Maxwell & Co., $85,500; William Cramp & Sons, $72,330; Holly Manufacturing Company, $69,000; Robert Wetherill, $69,000, and Henry R. Worthington, $57,000. The committee will not award the contract until the workings of the different pumps are investigated. The Southwark Foundry and Machine Company received the contract for supplying the Works with 48-inch stop-valves, and J. P. Morris for five boilers at the Spring Garden Pumping Station and two boilers at the Roxborough Pumping Station for $26,965.

—The suburban town of Holmesburg is improving rapidly. It is estimated that $200,000 will be invested in buildings there this year, or more than double the amount invested last year. It was stated a week or two ago that a stock company had been formed to supply water. Two thirds of the $50,000 capital have been subscribed. There is a great deal of building enterprise aroused there, and building lots are being offered for sale by the hundred. The Holmesburg Junction Station, which has just been completed, is two stories high, modeled after the prevailing Queen Anne style. It is painted in reds, greens, modifications of ochre, etc., and furnished with chestnut wainscoting and other hard woods, polished, inside. The tracks of the Kensington and Bustleton Road will be moved over about fifteen feet towards the station, while a new platform will be built out to the New York tracks.

—J. W. Hallahan's new store at Eighth and Filbert will be a very fine structure. The new building will be 31 feet front, 72 feet deep and four stories high. The general design of the building will be a modern treatment of Italian Renaissance. The first story presents on Eighth street, with a return on Filbert street, large show windows. The pilasters forming the divisions and supports above will be of polished dark Quincy granite, with fluted shafts and moulded and carved caps and bases, surmounted by a heavy cast-iron cornice and wrought-iron grills, thus forming balconies over the show windows. Rea & Rilly, the general contractors for the work, will commence operations the first week in July. The total cost of the new building and fittings will be about $30,000. It is expected to occupy the new store about September 20th, and during the rebuilding the business will be continued at 27 North Eighth street, a few doors south of Filbert street.

—Wilson, Brother & Co., Civil Engineers and Architects are preparing plans and specifications for the new prison. The new building will contain 432 cells, and eventually it will be considerably enlarged. A wall will be built 907 feet long on Adelaide Street, with a depth of 850 feet. The prison itself will comprise a series of long one-story buildings, shooting out at different angles from one common centre or rotunda. Each of these structures will consist of a corridor extending the entire length, and flanked on either side by cells. The latter will be ventilated and lighted by means of skylights in the roof. Underneath the pavement will be ducts or passage-ways to be used for heating and ventilating purposes, while different plumbing pipes will be carried along them. The wall enclosing the prison will have a semi-circular indentation along its front on Adaline street, about midway between the two side walls. In the centre of the crescent thus formed will stand the lodge or main entrance, a structure called the "administration building" being erected in front of it, along the line of the street. It is intended in a short time to erect a capacious store house, in addition to the large supply building. The total cost of the projected improvements will run up nearly to $1,000,000, for which there is at present appropriated, only $150,000. The work will be vigorously prosecuted, and funds sufficient will be forthcoming for the purpose.

GUARANTEE

Trust & Safe Deposit Co.

CAPITAL, - - $1,000,000.

316, 318 and 320 Chestnut Street,

Rents Safes in its Burglar Proof Vaults at $9 per year and upwards.

Also receives for safe keeping valuables of every description, and Deed Boxes at $5 per year.

Executes trusts of every kind, allows interest on deposits of money. Also, acts as Registrar and Transfer Agent of Corporation Stocks.

You are invited to inspect the following buildings, on which the paint has been used for years:—Record Building, Ledger Building, Philadelphia Press Building, University of Pennsylvania, Evening Item Building, Academy of Music; also the Traymore House, Metropolitan House, United States Hotel, Atlantic City.—Send for Price List. Roofs repaired and painted at shortest notice and guaranteed for five years. Paints shipped to all parts
1903½ Oxford Street, Philadelphia.

A Story of a Philadelphian
IN A BOSTON PAPER.

There is a good story told at the expense of a Philadelphian. Two gentlemen—one from Boston and one from Philadelphia, and strangers to each other—were fishing off the same pier at a watering-place near Boston, when the Boston man fell overboard. "Help! Help!" he cried, as he rose for the first time. But the Philadelphian paid no attention and he sank and rose again, still begging for help. "Perhaps I can help you," suddenly exclaimed the Philadelphian. "Can you tell me who your great-grandmother was?" "What do I know of my great-grandmother?" cried the drowning Bostonian. "Won't you save my life?" "I am sorry, very sorry," said the Philadelphian, coolly, "but I really cannot do anything for a man who does not know who his great-grandmother was."

The Day Sewed Shoe Manufacturing Company opened its new store, 23 North Eighth Street, about one week ago. The phenominal success of the undertaking emphatically disproves the point of the above story for the new store has been daily crammed with Philadelphians, all of whom have expressed their admiration for the style, beauty, and workmanship of the Day Sewed Shoe.

Ladies' Finest and best French Kid Button Boots at $5,00 in every style. This same quality is usually sold at $7.00 to $9.00 and even higher.

Gentlemen's Calf Boots, Button, Lace and Congress, from $3.00 to $6.00.

Misses' Kid Button Boots, Spring Heels, at $2.75.

Boys' Calf Boots, Button and Lace, at $2.75.

Children's Kid and Goat Button Boots at $1.50.

The Day Sewed Shoe M'f'g Co.,
23 N. Eighth St.

ESTABLISHED 1852. ANNUAL PRODUCT 20,000 TONS.
PENCOYD IRON WORKS,

[ENTERED AT THE PHILADELPHIA POST OFFICE AS SECOND-CLASS MATTER.]

VOL. I.—NO. 26. PHILADELPHIA, MONDAY, JULY 5, 1886. PRICE 15 CENTS

Items of News.

—Asbury Park, N. J., has an assessed valution of $2,000,000.

—F. B. Gowen has been elected President of the Reading and Pottsville Telegraph Company.

—The $800,000 steamship subsidy clause has been stricken out of the Senate Post Office Appropriation bill.

—The Baltimore and Philadelphia Railroad officials state that the new line will certainly be in operation by the middle of August.

—Congress having failed to make the necessary appropriations for the different Navy yards, it is probable that all work will be suspended.

—Ogilby ex-cashier of the Dime Saving Bank of New Brunswick, New Jersey, was sentenced to hard labor in the States Prison at Trenton, for ten years and a fine of $500.

—A lawyer of Kingston, N. Y., has appeared before the local authorities with the request that an assessment for $1,000 be taken from the property of a neighbor and placed upon his own lot.

—City Solicitor Warwick has sent an opinion to the Board to the effect that the city cannot sell its interests in the docks and piers at the ends of the streets between Vine and Pine streets on the Delaware river.

—The Gas Trust on Wednesday paid into the City Treasury $145,250, of which $5,250 was for State taxes on loans $35,090 the semi-annual contribution to the Sinking Fund and $105,000 the semi-annual interest on outstanding loans.

—Controller Dechert, with the approval of a sub-committee of Councils' Finance Committee, awarded the contracts for supplying the city departments with warrants to Wm. F. Murphy's Sons, at $17.50 per 1,000, the same price as last year.

—A letter from the Secretary of the Navy has been sent to the Senate submitting a request for an appropriation of $186,993 to complete the three steel cruisers Chicago, Boston, and Atlanta, and to pay the amount due on the dispatch-boat Dolphin.

—In an opinion delivered by Judge Willson, Common Pleas Court, No. 4, on Monday entered judgment in favor of the Commonwealth for $5,095.08 in a suit brought to recover the collateral inheritance tax upon the estate of Sophia Kuhn, deceased.

—It has been decided that the New York Police Commissioners, will be compelled to give up the scheme for forming a police pension fund. The question involved the principle of the right of wage earners having their wages when due and doing as they pleased with it.

—The Attorney-General of the United States is severely censured, and the Pan Electric combination is denounced as a conspiracy, in the the report which has been prepared by the Republican members of the Pan Electric Telephone Committee.

—If I. W. Pearce, of Brooklyn, N. Y., can prove that his mother was a cousin of Sarah Savage, mother of T. H. Blythe, of California, he will become the heir to $8,000,000 left by Blythe. He goes to England for the purpose of getting the necessary evidence.

—The will of Elizabeth A. Kershaw bequeaths $500 to the Presbyterian Home for Widows and Single Women. After the death of a relative the residue goes to the American Bible Society, American Tract Society and the Home and Foreign Missionary Society.

—The new Board of Health of Camden was organized on Monday by the election of Dr. Leckner, President; D. Cooper Carman, Secretary; Mahlon H. Ivins, Treasurer; Williard Morgan, Solicitor, and Septimus Knight, Inspector. The salary of the latter was fixed at $600.

—Judge Butler last Tuesday denied the motion for a preliminary injunction to restrain J. Lowber Welsh from paying $260,000 as administrator of Dona Francesco Del Valle's estate to Don Antonio Modesto Del Valle and Wm. W. Gibbs, who claim the money under assignments.

—In order that he may accept the position of Solicitor for the St. Paul, Minneapolis and Manitoba Railroad Company, Wm. F. Smith, Assistant Secretary of the Treasury, has tendered his resignation to the President. Hon. Hugh L. Thompson, Governor of South Carolina, has been selected as his successor.

—The Building Association League at its quarterly meeting placed in nomination the following officers: President, Jos. H. Paist; Vice-Presidents, Addison Burk and George Hawkins; Treasurer. Jos. K. Gamble; Secretary, Michael J. Brown; Solicitors, John I. Rogers, J. Levering Jones and H. W. Gimber. The Treasurer reported a balance of $875.51.

—Vice Chancellor Bird has rendered a decision in the famous Ocean Beach case in favor of the complainant. This case has aroused great interest, and about 4,000 pages of testimony were taken. The bill was to quiet title to certain lands, and was brought by the Ocean Beach Association against Henry H. Yard. Incidentally the suit involved the whole shore front.

—At the monthly meeting of the Board of Gurdians of the Poor on Monday Dr. J. C. DaCosta was elected First Assistant Physician of the insane department, vice Dr. C. P. Henry, resigned; Robert H. Smith was elected bookkeeper, and Dr. W. J. Hawley outdoor Physician in the First district. The contract of Paul J. Essick & Son for rebuilding the burned wing was approved.

—The Long Branch Railroad, which extends from the Tuckerton Railroad at Manahawkin across Barnegat Bay to Barnegat City Junction, a distance of five miles, is opened. The road has two branches, one 13 and the other 14 miles long. The former runs up the beach through Harvey Cedars to Barnegat City, and the latter, which is nearly completed and will be opened in a week, extends down to Beach Haven.

—Dr. Willis Weaver has been granted a license by the Port Wardens to build a bulkhead in the Delaware river at Bristol. Licenses have also been given to the Baltimore and Philadelphia and the Schuylkill River East Side Railroad Company to build a ferry slip in the Delaware river below Dickinson street; to build several bulkheads on the line of its proposed improvements along the Schuylkill river, and to build a ferry slip in the Schuylkill river above Point Breeze.

—Senator Edmund's bill giving the President power to appoint Postmasters of all classes, Collectors of Internal Revenue, Collectors of Customs at ports in which the gross revenues do not exceed———dollars, and all other customs officers; all Territoral officers, except Judges of the Supreme Courts, all District Attorneys and United States Marshals, Indian Agents and District Land Officers, is the latest Washington, D. C. sensation. At present these officers are appointed by and with the advice and consent of the Senate.

—Hallgarten & Co. and Robert Garrett & Sons, of Baltimore, have taken jointly $2,200,000 of the Staten Island Rapid Transit Railroad Company's second mortgage 5 per cent. 40-year bonds, principal and interest unconditionally guaranteed by the Baltimore and Ohio Railroad Company. The entire issue is $2,500,000, but $300,000 was previously disposed of. The property securing this mortgage comprises the whole of the New York terminals of the Baltimore and Ohio Railroad Company, including warehouses, elevators, etc., to be built, as well as the bridge over the Arthur Kil, the erection of which was recently authorized by special act of Congress.

—The *Public Ledger* says: "It is a fact that the city was made to pay for the 250,000 tons of gas coal it used every year $1 a ton, at times, more than other, and some quite unimportant, customers were paying, thereby entailing a loss upon the City Gas Works at the rate of $250,000 a year for coal alone. It is very desirable to discover how that came about, whether it was an unfair charge upon the city's coal by the Pennsylvania Railroad Company or an overcharge by the coal company on its best customers, or whether it came about by negligence or collusion of the Gas Trustees. Anyway, it is a very important question, which it should be the earnest and honest endeavor of the City Solicitor and associate counsel to find out. Such scandalous overcharges do not happen by accident."

TERMS:

One Year, in advance, - - - - $5.00

(REAL ESTATE PUB. CO.)

JOHN N. GALLAGHER, Prop'r.

Refers with permission to William M. Singerly, Proprietor of Phila. "Record."

PHILADELPHIA, MONDAY, JULY 5, 1886.

ON account of the 5th of July being observed as a holiday, this week's issue of THE REAL ESTATE RECORD has been delayed a few hours.

THE Traction Company will fight long and hard for that "cent."

THE year 1886 is a bad one for Anarchists. Food was never so cheap and work so abundant and wages, considering cost of living, so high.

A GREAT many people have very little respect for our judicial machinery. Shackamaxon bank officers can dodge along from term to term. One time Smith is sick, another time Jones is unavoidably absent. The public think they understand it.

PROPERTY along the Schuylkill and Delaware Rivers is likely to appreciate in value under the incentive given it by the B. & O. operations. In several localities prices have been advanced already. Both the B. & O. and the P. R. R. are heavy buyers of real estate and sometimes in localities where it is not suspected they are buyers. They are looking far ahead.

DAVID W. SELLERS, counsel for the Traction Company, wants it understood that he does not concede that the Traction Company owns and operates its property "in the sense" that other roads are operated under their charters. This case has been put off until September 7th. The city should, as it could, operate its own cable road, and some day municipalities will reach that point. We got rid of pay schools by establishing public schools. We dismissed the old-time water cart and built water works. Some day we will dismiss Traction monopolists and hire and pay our own drivers and conductors and superintendents.

SAM RANDALL'S Tariff Bill is not even a Pennsylvania measure, and it is simply traducing the thousands of intelligent, skilled mechanics and workmen of this State to say that they endorse it. The average Pennsylvania mechanic is a sober, industrious individual who has no sympathy with cheap rum at the expense of his wife and children, and the Real Estate Record is not a free trade paper either.

IT may be doubted whether any country in the world can vie with our own in the beauty and variety of iron architectural work; for the adornment of vestibule entrances and gardens, vases of bronzed iron are supplied that represent in relief some of the finest conceptions of ancient artists. Church ornamentation claims a large share of iron work, as in altar railings, screens and lecterns, cast-iron statuary with bronze finish offers productions representing mythological, symbolical and historical forms.

PHILADELPHIA needs a landing place for large ships. All existing facilities are under control of three railroad companies and one or two lines of steamers. Shippers are shut out because we have not a single open wharf. The fault is, or one of them, that the drainage of the city is permitted to empty into the head of the dock. The city has unwisely permitted the whole Delaware water front to be monopolized to such an extent that a ship drawing twenty feet cannot find an available wharf. The Walnut Street and Race Street wharves are built up to such an extent as to make it dangerous for a loaded ship to go in them. It is to our interests that our water front be not only preserved for the accommodation of the shipping interests, but also that the filling up be arrested by all proper means.

IT is a principle of law and equity that an agent is not allowed to make any profit out of an agency without the knowledge and consent of his principal, beyond his proper remuneration; and any sums of money so obtained by the agent from any other source must be accounted for to the principal, who may claim it as money received to his use. Where, therefore, an engineer (and this case again refers equally to an architect) entered into a sub-contract with the contractor without the knowledge or consent of the employer, it was held that any surreptitious dealings between the contractor and the engineer was a fraud, and entitled the defrauded employer, if he came in time, to have the contract which was entered into without his knowledge or consent rescinded, and to refuse to proceed with it in any shape. So, on the other hand, the architect should not, without the knowledge of the builder, enter into a contract or engagement with the employer. If, besides the contract between the employer and the builder, there is a contract between the employer and the architect, not communicated to the builder, that the outlay shall not exceed a given sum, and the builder is, by the contract, subject to the orders of the architect as to what works he shall execute, this agreement is not binding on the builder, and such restriction of the architect's authority by contract, as agent for the employer, cannot in any respect prejudice the builder's rights.

"How long will investments in small houses in Philadelphia continue to pay?" has been asked. Just now there is no occasion for solicitude on this point. The enormous construction of the past two or three years does not seem to have made any impression whatever on the demand. Builders and real estate agents say that houses are wanted frequently before they are finished. There is certainly a near limit to the supply of ten or fourteen-roomed houses, renting from $30 to $50, but for small houses, renting from $14 to $25, we are not yet in sight of the danger line. The first alarm will be sounded, if sounded at all, by advancing cost of material or labor, or scarcity of money. A boom in railroad building, in mining enterprises, or in some direction where opportunities would be opened for large investments might affect and would injuriously affect building enterprises by restricting the volume of money seeking investment therein. But this would react in favor of higher rents eventually by decreasing the supply of houses. Philadelphia is growing more rapidly than any city in the State. It is making great headway as a manufacturing centre and as a commercial centre. An additional railroad will broaden our opportunities. Capital is centering itself here and it is becoming a centre for the pushing of great schemes of one kind or another. It is no longer a dependency of New York. It is standing on its own financial and railroad and manufacturing legs. Expansion is therefore natural and necessary. The necessities for additional house room have been growing for years. It is not probable that with all our rapid growth that the present rate of progress can continue indefinitely. The first symptons that we have met the demand will scare off enterprise and capital into other directions for a while, but it will return again, for the growth of our industries will be continuous and the expansion of our great city is a fact that cannot be doubted.

GLORIA DEI (old Swedes) CHURCH, at Christian and Swanson streets, celebrated its 186th anniversary on Sunday last. The old relic of early Philadelphia had been thoroughly renovated for the occasion.

THE Pensacolians are happy. The new water works have stood an official test, and are pronounced satisfactory in every particular. The city is now protected from fire, and the premium for insurance must certainly drop.

No better evidence showing that the suburban districts of this city require more and better transportation facilities is needed than the great development of the section of country through which the New Germantown and Chestnut Hill branches of the Pennsylvania Railroad passes. The parsimonious management of the passenger railroad companies, with their one horse ideas is driving our citizens to seek homes farther out, for a ride of twenty miles in a comfortable seat in infinitely preferable to a five mile ride in a crowded horse care. We need two or three elevated railroads and we must have them.

BUILDING and architectural literature is increasing in quantity and improving in quality. The learner cannot certainly find fault with the supply of literature thrown in their pathway. Books are appearing from the best of masters in every branch of these diversified interests. The riches of past ages are unearthed and presented in readable form for a small sum, progress of architecture in all ages and in all countries is followed up in a scholarly and practical way. Building interests, past and present are made the subject of careful investigation and calculation.

THE coming of the Baltimore and Ohio Railroad has certainly caused the expectations of the most sanguine to be fully realized. Hundreds of thousands of dollars have been already expended by the company for Philadelphia labor and material, and the recent applications made to the Port Wardens for permission to build bulkheads along the Schuylkill and Delaware river fronts is in itself sufficient evidence that trade will be stimulated and the city enriched by this long needed competition. Let the good work go on.

THE idea of establishing sub-stations, in order that the consumers of gas may be saved the trouble and expense of going to the Seventh street office to pay their gas bills, is a good one, and should be adopted at once. The new system might entail some few trifling expenses upon the department, but in the long run the extra cost would be justifiable because it would not only expedite business, but it would save annoyance and much waiting in line, which is both tiresome and vexatious to many weak persons, to whom it is absolute torture and suffering. Let the good work go on, and President Gardiner should be able to settle all factious opposition against it. The sooner old fogyism takes a back seat in departmental management the better.

THE adoption of a new constitution by the Philadelphia Fire Underwriters' Association prohibits a division of the 15 per cent. commission with the person assured, or with any person outside of the association. The members are also prohibited from placing business with any but the companies forming the association. There is already a great deal of opposition, as the new rule practically places an embargo upon a large number of insurance brokers and companies that do not belong to the association. The Jefferson Insurance Company refuses to become a member, and the Lumbermen's Insurance Company has withdrawn. There are about 350 insurance brokers in this city.

"It is my belief," wrote the Controller, "that the ordinance is a reappropriation, and the evidence shows that Magee did not substantially comply with the terms of his contract. The ordinance is not mandatory on me I do not think I should countersign a warrant for a sum I believe was not earned by the contractor."

COLONEL DECHERT evidently means to exact a full compliance with the letter of the contract before he will approve the warrants of contractors. The above pointed remarks were addressed to the Chief Commissioner of Highways, the Controller having returned the Magee warrant without his approval. On the 2d of June last Councils appropriated $1,049.61 to pay Magee. The Citizens Municipal Association having entered a protest, the Controller refuses to countersign the warrant.

Among the Architects.

Professional courtesy is strained sometimes by a few architects when asked for information. While the public has no absolute right to know what architects have in hand, they are interested in knowing, and a sort of common law right, or common courtesy right, has been established, though it is by no means universally recognized. The profession has been fairly employed during the past six months, even though the great bulk of the building done has been done without drawings and specifications. Cheap house building draws very little on the talent of architects. The class of work calling for their special services is however large and growing, and with improving confidence there is no reason for complaining over unfavorable prospects.

One Thing To Do.

Now that our Real Estate Exchange has taken root, it might be well for a committee to set itself to work to see what sort of legislation, if any, is needed at Harrisburg. Possibly more is needed, but if the Real Estate interests were consulted it would probably be found that there are several matters that call for some legislating. It is unnecessary just now to point out where attention could be advantageously bestowed. The Legislative Committee of the New York Real Estate Exchange is its busiest and most important committee. In four months that committee held seventeen meetings and examined twenty-five bills pending before the Legislature. The sub-committee on taxation and assessment passed on six bills, one of which had reference to the inequality in appraised valuations, another on "the method of assessing real estate." The committee on building laws considered four bills; another committee took up the consideration of the inequalities in the existing charges for Croton water; another formulated a bill for remedying the serious embarassments as to searches. The committee on "Pending Legislation" reported to the Exchange the salient features of seventy bills affecting real estate interests in one way or another. The facilities for securing reliable and early information as to the progress of every bill in the Legislature affecting New York city or general interests are far greater than those possessed by any other corporation or individual in the city—the newspapers not excepted.

No doubt abundant work can be found when a careful inquiry is made into the matter. The question is an important one and cannot too early receive patient consideration.

What Some Brokers Say.

Opinions and expressions of views are quite divergent this week among real estate dealers, conveyancers and agents. Some report plenty of business, others say there is nothing doing. Averaging up the entire case, it is safe to say the real estate interest of Philadelphia and vicinity are in a healthy condition. New work is being quietly entered upon. The effects of the strikes have nearly worn off. The outlook is promising. Real estate is not moving with that activity which characterizes a rising market, but there is a large volume of business done when the whole situation is taken in. Fluctuations are observed in values here and there as judged by asking prices. The labor disturbances to some extent arrested the upward tendency in real estate. Investors became less anxious and more uncertain and hence holders and agents were obliged to abate somewhat of their demands. The general current of opinion is, that building enterprise will be steadily prosecuted, that material will maintain steadiness in prices, that labor disturbances are practically over and that this prosperous condition will continue. Properties rent readily everywhere, especially new properties. Here and there older properties have been standing idle a few weeks or months. There is a quiet and steady movement from the more central portions of the city to the outlying sections.

Manufacturing sites are being picked up; some to be utilized at an early day, others to be held for emergencies. Vacant lots in the manufacturing sections are more easily sold at reasonable prices this year than last. The Northwestern and Southern sections of the city continue to be the favorite fields for large building enterprise. The new blocks on North Broad Street are being tenanted at good figures and the new blocks within a half to three-quarters of a mile westward are sought for.

REAL ESTATE.

Wm. Jenks Fell Wins His Case.

Ex-Senator Charles R. Buckalew, the referee in the great coal land case of William Jenks Fell, against George B. Markle, William Lilly, and the Highland Coal Company has decided in favor of the plaintiff, for thirteen and one-half acres.

Charters Granted.

The Montgomery Iron Company, of Port Kennedy, Montgomery county, with a capital stock of $150,000 has been chartered. Charles L. Bailey, of Harrisburg, is among the stockholders. The others are Abraham S. and Joseph Storm, Edward and Samuel Patterson, of Philadelphia, and John N. Eckman, of Port Kennedy.

M. Thomas & Sons Have Moved.

The old auction firm of M. Thomas & Sons, have left their old stand on South Fourth street, and have taken possession of their new premises, 1519 and 1521 Chestnut street. The new building is 44x168 feet, it is three stories high with a rear building two stories high. The new building and improvements cost $100,000.

The Produce National Bank.

On Thursday morning the new Produce National Bank opened its doors at 104 Chestnut street, for the commencement of business with a capital of $200,000. The officers and directors of the new bank include many of our best citizens. The bank was organized under the most favorable auspices and it must command an extensive patronage. The officers are: President, W. C. Houston, Jr.; Vice President, John J. MacDonald; Cashier, F. N. Yates; Directors, J. W. Supplee, W. E. Burk, H. L. Withers, Edward Roberts, J. W. Brown, T. J. Hellings, William J. Latta, P. J. Walsh, E. Coon, F. W. Zoller and C. W. Wilkinson.

"Stern Enforcement."

Let it come. Controller Dechert says, in regard to the enforcement of terms of contract with garbage collectors:

"I think the great importance of the subject requires the stern enforcement of all the provisions of these contracts."

Though the specifications called for collections four times a week and six times during July, August, September and October, "I doubt," says the Controller, "whether this requirement has been complied with during the present month by any one of the fourteen garbage contractors of the city."

He therefore recommends, if this noncompliance with the specifications continues, that the contract be annulled upon 48 hours' notice of the failure to perform the work; that the 10 per cent. deposited with the City Treasurer be expended upon the work; that the city make the collections until a contract can be made; that the penalty provided by the law be enforced, and that the city proceed against the bondsmen of the contractors to recover any pecuniary loss that may have been sustained.

Our Baltimore Neighbors.

The New Baltimore Exchange is addressing itself earnestly to the work it undertook when it assumed shape on March 21, last. Among other things they will do, they will keep a list of irresponsible or dishonest tenants, a very important thing in some places. Such a list may not be necessary in Philadelphia, but if real estate people told what they could tell there would be, perhaps, a very lengthy list. Non-paying tenants are able to ply their vocation without danger. Cases are known where beats have beaten landlords for years. The losses incurred through non-paying tenants would go a long way to making repairs often vainly called for by good paying tenants.

Real estate ought to be made more productive. Our Baltimore friends have addressed themselves to this matter. It is a big field, and there is a good deal of swampy ground in it, besides clumps of underbrush that cannot be readily brushed aside. But nevertheless they intend to devise, if possible, some plan by which the repair bills, taxes, insurance, water rent, and other current expenses of real estate may be lessened, so as to render it more productive as an investment to its owners and more attractive to buyers.

It would be a very wise thing for our Exchange, among other things, to keep an accurate record of all sales, public and private, that occur in this city, with date, price, names of seller and buyer, and description of property for the information of members from day to day.

Sanitary Furniture.

Sanitary furniture is something new. Dr. Jaeger a German writer says that dead wood, as well as cotton, linen, and other vegetable matter, retains its powers of absorbing noxious animal exhalations. These the living plant digests, but the dead fibre or wood only harbors such poisonous gases for a time, and then throws them off again when there is a change of temperature. For instance, if a room is closed for some days, an unpleasant odor will be noticed on re-entering. This is especially apparent in German government offices, were the innumerable shelves and pigeon-holes are made of plain unvarnished wood. Sanitary furniture must, therefore, be rendered non-absorbent by carefully polishing or painting all the woodwork, both inside and outside; and the same rule applies to the flooring, wainscoting, etc., of all habitations. A room may be cleaned and purified after infectious diseases; but very powerful fumes are required to reach the interior of a closed drawer. From a sanitary point of view, the inside, the unseen, the back parts of furniture equally require to be treated with varnish, paint, or other substance, to render the wood non-porous. In practical Germany, sanitary furniture has become an article of commerce, and in England, also, we have recently inspected some such furniture. To carry out the above principles, the wood employed was prepared beforehand and rendered non-porous. This process, when applied to furniture made exclusively of wood, such as wardrobes, chests of drawers, sideboards, etc., involves an extra cost of not more than five per cent. Old furniture may also be rendered sanitary for a small outlay by covering the interior and unseen parts with a substance that will close the pores Dr. Jaeger maintains that all woodwork should be rendered non porous, the walls should be painted or the paper varnished, and the upholstery, bedding, carpets, mats and curtains should consist of animal fibre sanitarily dyed.

Bids Submitted to the Fire Commissioners.

The Board of Fire Commissioners met in conjunction with Councils' Fire Committee, and opened bids for two new engines, and for feed and straw for the department during the ensuing half year. Contracts for feed and straw were awarded to the following, they being the lowest bidders: Wm. Scott & Bro., hay, 79 cents per 100 pounds; corn meal, 99 cents per 100 pounds; straw, 75 cents per 100 pounds, and cracked corn, 99 cents per 100 pounds. T. M. Lancaster, cob corn, 68 cents per bushel; bran, 79 cents per 100 pounds.

The bids for the two engines were as follows: The Clapp & Jones Manufacturing Company, of Hudson, N. Y., two 7,000-pound engines, $8,500.

The La France Fire Engine Company, Elmira, N. Y., two 7,000-pound engines, with the Prunty relief valves, $4,200 each; without the relief valves, $4,060 each.

The Button Fire Engine Company, Waterford, N. Y., one 7,000-pound engine, $4,200, less 15 per cent., or two for $7,000. The same company also offered to furnish one 8,000-pound double pump engine for $5,000, less 20 per cent., or one 7,000-pound and one 8,000 pound engine for $7,000.

The Silsby Manufacturing Company, one 7,000-pound engine, $3,300. The bids were referred to a committee, comprising Messrs. Houseman, Robinson and Gilpin, with instructions to report at the next meeting. It has not yet been decided as to where the new engines will be located.

D. E. Dallam offered to rent to the Fire Commissioners for $1,800 per annum a lot of ground, on the west side of Eighth street, 214 feet south of Girard avenue, as a site for a house for Truck G. The lot is 25 feet wide on Eighth street, running back 90 feet to Darien street. The bid was referred to the Committee on Real Estate.

A Novel Association.

A movement is contemplated by a few disgusted tenants and a couple of enterprising lawyers to form a Tenants' Protective Association, for the purpose of fighting landlords. There are no doubt a few curmudgeons among the latter who would grind a tenant —who would insist upon every right provided in a lease for himself and allow nothing to a tenant. But their number is naught when compared to the number of dead-beat tenants. There are thousands of lying, impecunious fellows in a great city like Chicago, who pretend to have a business, and make a "great blow" about their prospects in order to gain possession of "the premises." When it is too late the landlord finds that his tenant is chattel mortgaged, or that somebody else owns the furniture or property, and that his tenant is "bomb-proof," or, to say the least, worthless; not unlike hundreds of other idle and incompetent men who go about imposing upon people who give them employment, and borrowing money of their associates. Some tenants make a business of beating their landlords. Hence the necessity of using an iron-clad lease. It is impossible to always find out just what kind of a tenant you are getting. Now, just because some landlords are grinding and dishonest the tenants need an association to protect their rights! We fear that these few tenants and their lawyers are imbued with the "new idea"—"Private property is stolen wages." "Down with capital, down with property; and a crooked dollar is worth ten straight ones;" anything to beat the fellow who gives you shelter or employment. There is not a reputable tenant in Chicago who would not rather lose a few dollars by a miserly landlord than go to law, and, upon the other hand, there is not a half dozen intelligent landlords in this city who would not willingly lose a month's rent in order to get rid of a tenant who could not or would not pay the rent and take care of his property. Our advice to landlords is to use the same diligence in selecting tenants that all employers have been forced to do when hiring employés; ask them if they believe in the rights of property, and what organizations they belong to, and if they are members of the association in question. There is nothing sure in this world but death and taxes, unless it is that a business man must lose fifteen to twenty per cent. of his gross earnings by dead-beats.—*Chicago Real Estate Journal.*

Communication.

To the Editor of the Real Estate Record.

DEAR EDITOR:—On the 19th of March, of the present year, I handed to an insurance broker a policy of insurance for renewal, which was returned to me, the receipt of the company attached to the policy acknowledging payment of the same. I, of course, paid the agent the amount specified. Now, today, July 1st, more than three months after payment by me, I am called upon by an employé of the company and informed that my insurance has not been paid, and on my showing that I had paid the agent am informed that insurance brokers are not recognized as agents of the company, but as agents of the insured, and consequently are not liable for any misappropriation of funds. How does this strike you? Does it not seem that after issuing a receipt for money received the company is bound by the conditions of the policy? If not, what protection has the insured who intrusts his business to agents? We believe that insurance companies who give three and six months' credit to agents should, in the event of failure on the part of these agents, be made to take the responsibility on themselves. SANCHO.

[If any doubt exists as to the responsibility of the insurance company under the above circumstances the business community and policy holders do not know of it.—ED.]

Items of News.

—The personal estate of Joseph William Bates is appraised at $114,807.28.

—It is expected that the entire bonded debt of Tennessee will have been funded by the end of the year.

—One hundred $50 bonds of the Huntingdon Water Company, Limited, have been sold 3½ per cent. above par.

—Julius Wadsworth, of New York, has resigned the Vice-Presidency of the Chicago, Milwaukie and St. Paul Railroad Company.

—An effort is to be made to change the name of Merrick street to Broad. It is claimed that the name confounds strangers arriving at the Broad Street Station.

—It has been discovered that the National State Bank, of Camden, N. J., has paid no real estate tax on its building for years, although it is not exempted by law.

—The bill for the future maintenance of the National Board of Health having failed to pass the House of Representatives, the organization passed out of existence on June 30th last.

—About 9,000 new bills have been introduced in the House of Representatives this session, and 3,000 in the Senate. Senator Sawyer has introduced 448 bills and Senator Blair 447.

—A recent canvass of the city of Erie shows that it has 33,215 inhabitants—17,110 females and 16,105 males. The increase in population since the census year has been about 6,000.

—It is estimated that the Randall Tariff bill will make a reduction in the revenue of the Government of $34,977,695. In the item of internal revenue it will make a difference of $26,407,088.

—The Producers' Marble Company have removed to their new yard, 201 S. Thirtieth street. Their removal was occasioned by the Baltimore and Ohio Railroad Company's purchase of the old yard.

—All the stock of the Real Estate Exchange has been taken and the regular organization will be effected to-day (Tuesday). Some subscribers failed to pay up promptly and their subscriptions were taken up by others.

—D. F. Coffrode carried off the contract for building the large Flour and Grain warehouse at Eighteenth and Market streets. The Pennsylvania Railroad Company is interested. The building is to be completed by October 1st.

—Senator Mahone, from the Committee on Public Buildings and Grounds, has reported favorably Senator Sewell's amendment to the Sundry Civil Appropriation bill to appropriate $100,000 for the erection of a public building at Camden, N. J.

—The Managers of the Children's Society have adopted their amended charter by which the society is authorized to increase the membership of the Board, to amend and alter the by-laws and to hold real and personal estate to an amount not exceeding $20,000.

—According to the charter of the Philadelphia Traction Company the original subscribers of stock were William H. Kemble, 50,000 shares; Peter A. B. Widenner, 30,000 shares; William L. Elkins, 30,000 shares; George R. Garsen, 3,333 shares, and George D. Widener, 3,333 shares.

—Under a writ of error taken by the defendant the suit of the Central Transportation Company against the Pullman Palace Car Company, in which the former recently received a verdict for the recovery of rental under the terms of the original lease, is removed to the Supreme Court. The security to be entered was fixed in the sum of $250,000.

—A man named Waldon settled upon an unsurveyed section of land which was afterwards selected by the Northern Pacific Railroad Company as indemnity. Land Commissioner Sparks has given a decision against the company, holding that unsurveyed lands were not affected by the indemnity withdrawal.

—In the hearing in the Parsons' suit, to ascertain the amount of interest paid on the floating debt of the Reading Company, Comptroller Jones testified that a commission of ½ per cent. was paid C. & H. Borie for the purchase of certain general mortgage scrip for the Reading Company. He also testified that the firm received 6 per cent. for carrying the scrip.

—The nail feeders strike at Pittsburg lasted thirteen months. The Treasury of the Association was depleted to the amount of $28,000, $25,000 of which went to aid the feeders. There were about 1,200 nailers who earn about $1,500 per year who were affected by the strike, and about 4,800 feeders. It is estimated that fully $3,000,000 have been lost in wages since the strike commenced. The agreement made by the conference committee on the 17 cent scale does not meet with the approval of the strikers.

—The Commonwealth Title Insurance and Trust Company, composed of conveyancers, lawyers and real estate men, have applied to the State Department at Harrisburg for a charter. The capital of the company is $250,000. The following gentlemen have been elected Directors: James H. Stevenson, James R. Booth, Frederick Sylvester, John H. Sloan, Abraham R. Beitler, George W. Hancock, Fred. R. Vogel, Henry M. Dechert, John F. Lewis, William Gorman, Henry Clay, William Wilson, Joseph C. Ferguson, E. Cooper Shapley and Wm. T. Fox. John Douglass is the Treasurer.

—E. H. Godshalk who is the owner of the building known as the Carleton Mills, at Twenty-third and Hamilton streets, and who occupies the first and second floors having given Messrs. Powell & Bro. who are his tenants notice to vacate the fourth and fifth floors or he would turn off the power. The Powell Bros. on Wednesday filed a bill of equity claiming that their lease had not expired and that the threat was meant to coerce them into leaving before the expiration of their lease. They have a capital of $30,000 or $40,000 invested in the business and employ 160 hands. To prevent the stoppage of their work Judge Biddle granted a five-day injunction restraining any interference by the defendent.

—Four bills in equity have been filed by the Pennsylvania Company for Insurance on lives and granting annuities against the city, and several individual defendents for the protection of ground rents which it holds for the estate of Maria Nixon and John J. Ridgway, deceased. The Nixon estate has ground rents of $37.50 on a property at Twenty-fifth and Spring Garden, $40.50 on another at Twenty-fifth and Brandywine, and $360 on a third at the corner of Twenty-fifth and Callowhill, while the Ridgway estate includes a $1,974 rent secured on a part of the Gas Works property at Twenty-fifth and Callowhill streets. All of these properties are being taken for the widening of Twenty fifth street in connection with the entrance of the Baltimore and Ohio, and the trust company asks that a sufficient amount shall be reserved or impounded out of the damages payable to the owners to properly secure these rents.

BUILDERS' ITEMS.

Building and Real Estate Notes.

A MEETING of the Real Estate Exchange is called for Tuesday, July 6th, at the Orphans' Court.

A FEED STORE at Thirty-eighth street and Lancaster avenue was purchased for $3,500, and will be turned into a hotel.

A DWELLING-HOUSE on Spring Garden street below Thirty-fourth, one of twins, standing on an elevated lawn, was purchased for $8,000.

PRIESTLEY & Co. will commence at once to erect a mill on the corner of Jefferson and Fillmore streets, Camden, for the manufacture of cassimeres.

CHAS. H. SHARP, Kaighn's avenue, Camden, is having a right lively business with mortgages and conveyancing, and will shortly close several real estate sales.

WM. A. TURNER, real estate agent, Broadway, Camden, is making some important alterations in his office, his business having grown to call for the alterations. Business generally in real estate is good with him.

PAUL BRANDER, architect, Sixth and Walnut streets, is doing the interior work of the Exchange for Wm. Gerlach, 316 Callowhill street, which will all be in walnut and plate glass windows and transom, and when complete will be a fine specimen of artistic work.

A JURY decided to open up Clearfield street from Sixth street to Germantown avenue, and it is intended to culvert it and take in the stream known as Gunner's Run. A number of lots have already been purchased by Serrill & Shoemaker, between Sixth and Ninth streets.

GEO. E. GOLDBECK, 4217 Lancaster avenue, West Philadelphia, has just completed the sale of a property (store), 4221 Parrish street, for $2,400; also a property, 811 Forty-second street, for $2,800.

His regular business in real estate is very satisfactory, and the demand for small houses, both to rent and purchase, still continues.

THAD. P. VARNEY, Kaighn's avenue, Camden, has just made sale of 11 lots on the "Warnock Estate, for $2,500; also sold a property, 608 Cherry street, $700 (two-story frame).

Mr. Varney has an extensive insurance business, and speaks of real estate business

as being good, and prospects for the fall very satisfactory.

HANCOCK & LEVICK, Lancaster avenue, have just completed the sales of the following properties: one on Melon street, 3863, six rooms, $1,500; also one at 4059 Eaglesfred street, 6 rooms, for $1,500; also a tract on Marion avenue and Forty-ninth street, for $26,000, with railroad facilities.

The business generally of this firm is especially satisfactory.

L. B. HUMPHREY, Third and Market streets, Camden, conveyancer and real estate broker, has just closed the sale of 221 Friends avenue, $2,500; also 311 Stephens street, $2,700.

Mr. Humphrey's conveyancing business has through the last few weeks much increased, and he reports real estate business generally very satisfactory.

WILSON ERNST, builder, Camden, is erecting 10 two story houses on Second street, which we understand have already been sold. Also 40 two-story houses on Chestnut and Crescent streets above Second; they will have four rooms and summer kitchen, 20 of which are also sold. Also putting up four three-story nine-room dwellings; they will have brown stone fronts, high steps, and finished generally in the most improved style.

Mr. Ernst within the last 60 days has sold considerable properties. With him the demand for small properties still continues.

THOS P. LONSDALE, 429 Walnut street, architect, is erecting two-story stone dwelling for J. L. Vandever, at Balla Station, at the cost of $7,000. Also a six-story commercial building for J. D. Johnson, on Seventh street below Race; the first story will be of iron, and the remaining five of pressed bricks, with brown stone trimmings. Also erecting armory building for the 3d Regt. N. G., Pa., Col. S. Bonnaffon, which will stand on a lot 147 by 220 feet, and will be built of pressed brick, with brown stone trimmings, on S. Broad street above Wharton, at the cost of $50,000. The front building will be 50 by 147 feet, two and a half stories high, and the drill room will cover a space 170 by 147 feet.

MOSES & KING, architects, 226 Walnut street, are erecting eight dwellings for T. J. Jeffries on Twenty-first and Bellevieu streets, Tioga, opposite Westmoreland Station. They will be built of pressed brick, two stories, and contain six rooms, with modern conveniences, with a 20-foot lawn in front. Also building four houses for John Schans on Mt. Vernon street, South Camden; also a fine frame dwelling for James Cresson at Fox Chase, Pa., cost $35,000. They are also making extensive alterations at "The Manse," Chestnut Hill, Pa., for Lewis C. Gratz, adding much additional dwelling accommodation, stables, ice-house, hot-house, spring-house, and other modern improvements, at the cost of $75,000.

RANDAL E. MORGAN, builder, 207 Market street, Camden, has within the last 30 days completed the sale of two dwellings, 407 and 409 Beckett street, for $1,850 each; also a six-room house, 932 Newton avenue, for $1,350.

Mr. Morgan has just completed four five-room houses on Walnut street and four seven-room houses on Second street, and has on the way six five-room houses on Chestnut street between Second and Third; also six nine-room dwellings, of three stories, on the south side of Royden street between Fourth and West, and has just purchased 11 lots on the corner of Second and Mt. Vernon streets, at the cost of $3,000; also three lots on the west side of Second street below Mt. Vernon, cost $600, and will in due course build on them.

Mr. Morgan builds and sells exclusively for himself, and during the year handles large real estate transactions.

A stable, 16 ft. by 45 ft., Eldridge place, between Fifth and Sixth sts., to John C. Klunder, 1913 N. Sixth st.

An elevator and building at 227 S. Fourth st., to H. K. Nichols, chief engineer Philadelphia and Reading Railroad.

A brick building and third story to pastoral residence of St. Veronica's Church, 12 ft. by 16 ft., near Second and Butler streets, to Thos. T. Foulkrod, Frankford.

One two-story house, 16 ft. by 42 ft., Allen st., between Franklin and Penn, to Samuel R. Eckert, 4812 Cherry st., Frankford.

New front to building at 1918 Twentieth st., to Frank P. Tolbert, 2160 Lambert st.

Addition to boiler-house, 28 ft. by 30 ft., on Trenton ave., between Eva ave. and Venango st., to Samuel Baxter, Venango and Janney sts.

One one-story house, 14 ft. by 20 ft., Tulip st., between Venango and Tioga streets, to same.

A stable, 16 ft. by 40 ft., on Fifth st., between Callowhill and Wood sts., to Thos. W. Draper, 328 N. Fifth st.

A fourth story on building at 116 N. Front st., to Jas. N. Pattison, 2430 N. Broad st.

Alterations in store front at 4136 Market st., to R. B. Griffith, 3341 Market st.

Three two-story houses on Marvin st., 11 ft. by 30 ft., to Jacob Hillsinger & Son, 3837 Hamilton st.

One three-story dwelling, 18 ft. by 60 ft., Broad st., between Wharton and Federal, to Blaney Henry & Son, 729 S. Twenty-second street.

A laundry, 35 ft. by 64 ft., Fortieth st. and Wyalusing ave., to Michael McShain, 226 N. Fifteenth st.

An addition to warehouse, 19 ft. by 36 ft., Church and Sellers sts., Frankford, to Fred. H. Henry, 1713 Columbia ave.

One two-story brick house, 16 ft. by 42 ft., Clementine st., between Emerald and Jasper sts., to Robt. Greger, 2155 William st.

One-story kitchen, 8 ft. by 10 ft., 1541 Germantown ave., to Wm. H. Atkinson, 774 S. Fifth st.

Two six-roomed houses, 16 ft. by 54 ft., Fifteenth st., between Federal and Wharton sts., to Mowbray Bro., 1115 S. Twenty-eighth street.

A fourth story on brick building, 15 ft. by 46 ft., Vine st., between Second and Third sts., to Jas. Hood, 212 and 214 New st.

One-story kitchen, 12 ft. by 12 ft., 1031 Master st., to D. A. Hampton, 722 N. Twenty-second st.

One one-story shop, 18 ft. by 25 ft., Fourth st., N. of Lehigh ave., to Edward E. Kelley, 2530 Sepviva st.

One dwelling-house, 37 ft. by 15 ft., 5071 Main st., to Burd P. Evans, Knox st., below Manheim.

One five-story store and one-story office, 24 ft. by 28 ft. and 10 ft. by 25 ft., 1.7 Bread st., to C. B. Porter, 117 Bread st.

Bath-room in two-story building, 12 ft. by 8 ft., Wildey st., in Eighteenth Ward, to Chas. Frank, 1038 Marlborough st.

Addition to dwelling, 20 ft. by 78 ft., 1610 Master st., to Fritz P. Worthington, 1308 Wallace st.

One-story addition, 12 ft. high, to house Girard Avenue, between Ninth and Tenth streets, to Phillip H. Kertze, 930 North Ninth street.

One side addition to store Southeast corner Pechin street, Twenty-first Ward, to Howard R. Yocum, 410 Lyceum Avenue, Roxborough.

Front alteration and back building, with a 12 ft. by 13 ft. kitchen, No. 37 North Fifteenth street, between Filbert and Market, to C. Joos, 504 Vine.

Two-story back building, 10 ft. by 11 ft., 2020 Brandywine street, to Joseph Cooney, 2332 Lawrence street.

Eleven two story houses, 14 ft. by 35 ft., on West side Forty-second street, South of Woodland Avenue, to J. H. Virkler, 4221 Lancaster Avenue.

Seven two-story dwellings, 14 ft. by 30 ft., on South side of Mechlin, between Boynton Avenue and Wakefield, Twenty-second Ward, Charles H. Rufe, 56 Bringhurst street, Germantown.

To alter two houses on Southwest corner Ninth and Brown, Thirteenth Ward, into a store, to Patrick Smart, 264 South Twentieth st.

One bow-window, 8 ft. by 4 ft., on house 2214 Pine st., to John McLeister, 2218 Pine st.

One-story slaughter house on North side of Otis, between Amber and Coral sts, 12 ft. by 30 ft. by 12 ft., to Frank Streibig, 265 Diamond st.

One two-story and mansard roof dwelling, 20 ft. by 24 ft. by 27 ft., East side of Tenth, South of Westmoreland, to James Parker, 2639 Germantown ave.

Store front on house South side of Dickinson, between Long Lane and Twenty-first st., to A. B. Stackhouse, 1928 Garrett st

One three-story house, 17 ft. by 65 ft., on South side of Allegheny avenue, between Frankford ave. and Emerald, to Einwechter & Sons, 2147 East Cumberland st.

One-stor smithshop, 20 ft. by 61 ft. by 12 ft., on West side of Long Lane, 18 ft. South of Dickinson, to Henry Hayes, Twenty-third and Dickinson.

One one-story brick building, 25 ft. by 149 ft., on North side Gray's Ferry Road, between Thirty-fifth and Thirty-sixth sts., to Harrison Bros. & Co., Thirty-fifth and Gray's Ferry Road.

Six two-story dwellings, 12 ft. by 26 ft., on East side of Lambert st., between Berks and Norris, to Wm. F. B. Roberts, superintendent.

One one-story shed, 20 ft by 20 ft. by 12 ft., on West side of Thirty-fifth st., between Frankford Road and Mt. Vernon st., to I. E. Hurley, 3326 Wallace st.

Sixteen three-story dwellings, 16 ft. by 52 ft. by 27 ft., on North side of Morris st., between Fifteenth and Sixteenth sts., to Wm. R. Matchett, 1515 South Broad st.

Sixteen three-story dwelling, 16 ft. by 52 ft., by 27 ft., on South side of Tasker, between Fifteenth and Sixteenth sts., to William R. Matchett, 1515 South Broad st.

Sixteen three-story dwellings, 16 ft. by 27 ft., on West side of Fifteenth st., between Morris and Tasker, to Wm. R. Matchett, 1515 South Broad st.

Eighteen two-story houses, 16 ft. by 52 ft. by 19 ft., on each side of Sixteenth st, between Morris and Tasker, to same party.

Five two-story dwellings, 16 ft. by 42 ft. by 19 ft., on Southwest corner of Twentieth and Tasker, to David Marshall, 1945 Garrett st.

One storehouse, 16 ft. by 50 ft. by 16 ft., on West side of Conestoga, North of Media, to Thomas H. Burrows, 5127 Kershaw ave.

Addition to chapel, 51 ft. by 31 ft. by 14 ft., on Northeast side Washington, between Jefferson and Fountain sts., to Wm. Heath, Dupont st., Roxborough.

Eight two story houses, one with store, seven 13 ft. by 34 ft. by 19 ft., one 16 ft. by 38 ft. by 19 ft., on North side Fletcher st., East from Twenty-sixth, to Jas. W. Young, 1904 South College ave.

One three-story dwelling, 16 ft. by 14 ft. by 17 ft., 1306 Nott st., between Thirteenth and Broad and Carpenter and Washington, to James Bird, 1106 Hunter st.

One-story hammer-shop, 100 ft. by 46 ft. by 16 ft., on South side of Hamilton st., between Seventeenth and Eighteenth, to Jacob R. Garber, 52 North Thirteenth st.

Internal alterations to theatre, on East side of Eighth street, South of Vine, to Charles McCaul, 20 North Eleventh st.

Sixteen two story houses, 14½ ft. by 42 ft. by 19 ft., on East side of Hutchinson st., between Cumberland and Huntingdon, to John Loughran, 2542 North Eighth st.

One two-story church, 67 ft. by 100 ft. by 32 ft., on the Southeast corner of Eighteenth and Wharton, to John Shepperd, 1115 South Fifteenth st.

Three two-s ory stores, 20 ft. by 28 ft. by 21 ft., on South side of Callowhill, between Second and New Market sts., to Thos. McCarty, 1935 North Seventh st.

Front and interior alterations to building on North side of Callowhill, between Second and Third sts., to same party.

One three-story schoolhouse, 45 ft. by 47 ft. by 38½ ft., on North side of Spruce st., between Sixth and Seventh sts., to same party.

Four two-story brick dwellings, 12 ft. by 42 ft. by 17½ ft., on West side of Waterloo st., between Westmoreland and Cumberland sts., to Thomas H. Flood, 2747 Frankford ave.

A front alteration to 728 Buttonwood, to J. Sims Wilson, 1327 Buttonwood.

One two story brick addition to coachman house, 13 ft. by 14 ft. by 17½ ft., on the West side of East Walnut Lane, between Morton and Chew sts., to Henry Harrison, 29 Lafayette st., Germantown.

One-story brick shop, 20 ft. by 25 ft. by 12 ft., on West side of Frankford ave., between Allen and Arrot sts., to Joseph P. Yerkes, 4329 Frankford ave.

t. t.—Terre Tenant.
S.F.—Scire Facias to revive Judgment.

Sum C.—Summons in Case—A form of action invented to meet all civil cases, the form of which is not specially provided for.

Where there are no figures to indicate the amount of the judgment, the damages have not been assessed.

The first name in each line is that of the judgment debtor.

An asterisk (*) denotes judgment confessed or bond and warrant conditioned.

The figures 1 2 3 and 4 immediately after the name of the plaintiff indicates the number of the Court. The letters D. M. J. and S. after the number of the Court indicate the Term as D., December Term, M., March Term, as J., June Term and S., September Term.

An examination as to the nature of judgments and suits will be made for subscribers without extra charge on application.

POUND Box of **CANDY**
CROFT & ALLEN,
1226 Market Street.

"GILBERTSON'S OLD METHOD."

Takes the Contract for the WHITE HOUSE roof at WASHINGTON,

at 70 cents per box over the so-called "Genuine 'Old Style'" for the IC 14x20 size (equal to $1 40 per box for the 20x28 size).

The award not made with reference to price alone, but also from tests made as to the BEST QUALITY.

The guaranteed weight of the "Gilbertson's Old Method" offered was 120 pounds net per box of 112 sheets; while the so-called "Genuine 'Old Style'" was offered at 112 pounds.

In order that consumers may more thoroughly understand WHY the "Gilbertson's Old Method" was accepted AT SUCH AN ADVANCED PRICE OVER THE SO-CALLED "GENUINE 'OLD STYLE,'" we quote the following from the specifications made by the Government for the Roofing Plates to cover the roof of the Executive Mansion:

"The Government desires to secure the BEST QUALITY OF DIPPED ROOFING PLATES, and samples showing surface imperfections or irregularities in size or weight will be rejected.

"Comparative tests will be made for weight, ductility, uniformity of plates and thickness and quality of coating, ALL of which, as well as the prices, will be considered in making the award.

"The United States desire ONLY THE BEST CLASS OF MATERIALS, and parties who imagine that any other class will be received are respectfully requested not to bid."

MERCHANT & CO.,

PHILADELPHIA. NEW YORK. CHICAGO.

THE BLATCHLEY

Is carefully made by men who know how to construct a

PUMP

When desired they are lined with specially heavy Porcelain or Copper, or with Drive Well Cylinders, at small additional cost.

When ready to buy, *insist* on seeing and examining them. Use your own judgment, and don't be persuaded to act contrary to your own interests.

They are sold by some good house near you.

Special terms to builders buying in quantities.

CHARLES G. BLATCHLEY
MANUFACTURER,

[ENTERED AT THE PHILADELPHIA POST OFFICE AS SECOND-CLASS MATTER.]

VOL. I.—NO. 27. PHILADELPHIA, MONDAY, JULY 12, 1886. PRICE 15 CENTS

Items of News.

—The will of MacGregor J. Mitcheson, admitted to probate on Tuesday, contained no public bequest. The estate left by the decedent is valued at over $100,000.

—The *Buffalo Courier* claims that in the first full fiscal year of President Cleveland's Administration, $22,000,000 in the ordinary expenditures of the Government have been saved.

—The City Councils' Committee on Gas Works decided on Tuesday to report favorably an ordinance to locate eight improved gas-lamps in the vicinity of the Dock Street Market.

—At Newberry, Michigan, on Tuesday last, 30,000 cords of wood, belonging to the Vulcan Furnace Company, were burned, and the furnace will probably be shut down in consequence.

—Among the improvements which Andw. Carnegie will put upon the tract of land he has purchased on the Alleghany Mountains, opposite Cresson Springs, is a lake which will cover eighty acres.

—The Board of Education on Tuesday last assented to an increase of 25 per cent. on the present salaries of Public Schools Teachers who had petitioned for the same. The matter was referred to Councils with a favorable recommendation.

—A number of San Francisco capitalists, among them E. S. Kelly, Leland Stanford, C. P. Huntington and Hagin & Tevis, have formed a syndicate, and are buying all the promising big parcels of land in New York city that they can lay their hands on.—*Phila. Record.*

—The Statement of the Controller of New Jersey upon the railroads in that Commonwealth shows that the probable net loss of the Philadelphia and Atlantic City Railroad last year was $70,000. The company is paying 6 per cent. upon $500,000 which was borrowed to make a change in the gauge of the road.

—Many pieces of furniture are now invented for various miscellaneous purposes—such as a bookcase, cabinet and secretary combined. The shelves to hold books for reference, with proper places for account books, pigeon holes, drawers for manuscripts, prints, and for the hundred-and-one different purposes deemed necessary to suit each particular case.

—The 119 cars which were taken when the Pullman Palace Car Company assumed contract of the Central Transportation Company's lease, have been tendered to the Central Transportation Company as a basis of compromise. The representatives of the Central Company have positively declined the offer, unless the leases which were obtained when the Pullman leased the rolling stock of the Transportation Company are also returned. These leases include a lease with the Pennsylvania Railroad Company and are very valuable.

—In 1885 the imports of tin plates into the United States amounted to 505,559,076 pounds, valued at $16,610,104. The duties collected from these importations amounted to $5,055,591. Mr. Randall's bill proposes to increase the duty on tin plate from 1 cent to 2½ cents a pound, this will make the duty on each ton of 2,240 pounds imported, $50.40. Taking last years importation as a basis the revenue from tin plates alone under Mr. Randall's bill would amount to $11,375,079, this would be an aggregate increase of duty amounting to $6,319,488 on tin plate alone. This is a modification of the tariff with a vengence.

—The timber mostly used along the Atlantic seaboard for piling is spruce, varying in length from twenty-five to sixty-five feet. It grows straight and tapering from ten to fourteen inches diameter at the butt, and six to eight inches at the length of fifty to sixty feet. Their uniform size renders trimming unnecessary, beyond lopping off the branches close to the log. Hemlock is sometimes used, but not from choice. Spruce logs, or piles, are brought to this market in rafts, and are of promiscuous lengths. In the hands of the dealer they are often sorted; the long, straight sticks are put into rafts by themselves and command an advanced price, while the culls and shorter sticks under thirty feet are rafted and disposed of for work requiring shallow foundations. When unusual service is required of piles, oak, elm and the southern long-leaved and pitch pines are used. The oak and elm require considerable trimming to remove their rough uneven surfaces to drive properly. The yellow pine is usually very handsome timber, straight and uniformly tapering.

—*Building*, a New York monthly says that over $100,000 will be expended on the improvement of the new executive mansion at Albany, N. Y. The plans have been prepared by Mr. Perry, the Superintendent of the new Capitol, and they will effect a complete transformation in the building. It will be over 100 feet in length, of great height, with tall sloping roofs of black slate, with two towers, broad piazzas, and several sloping steps leading to as many entrances. There will be two entrances to the building on the east side. Only one of these will be used ordinarily, but when the Governor gives a reception to several hundred persons the second entrance will be opened. A reception room will be built, 25 feet by 42 feet. Opening out of it will be a hall 20 by 43 feet 8 inches. The hall leads to the reception room. The rooms together have an extreme length of 68 feet 8 inches. When an unusually large reception is held, the doors of the dining-room at the south of the hall can be thrown open, making a room 107 feet in length from north to south. The new dining-room will be 20 feet by 35 feet. West of the dining-room there will be a large kitchen, pantry, butler's pantry and breakfast room. The present small parlor of the mansion, 15 feet by 32 feet, will be used as a reception parlor. There will also be a sitting-room on this floor 16 feet by 27 feet. There will be wide piazzas on the east and north sides of the building. In the second story of the building there will be seven spacious bed-chambers, each having a bath-room and closets attached to it. A broad and easy stairway leads to these rooms. In the third story there will be six bed chambers and a billiard room. The Governor's room, on the second floor, will be highly ornamented. It will be of large dimensions, 20 feet by 28 feet, 6 inches; and there will also be an alcove in the tower at the corner of the building. Upon the completion of the building $15,000 will be expended upon furniture for it.

—Since the burning of the Bancroft publishing house in San Francisco, the question has arisen there as to "what material is best for building purposes—looking from a fire-proof point." Attention is also being directed to the relative danger which the different materials subject a fireman to while he is in the discharge of his duty. The *Alta* has given much space to both matters and published interviews had with architects, one of whom stated that "from the results of a large course of reading and study into the structure of buildings with the view of protection against fire and of the greatest conflagrations in this and other countries, cast and wrought iron as building materials compared to the best woods are failures, unless in buildings where uninflammable materials are to be stored, such as the National Capitol at Washington, custom houses, and other such public edifices. The most noted chief engineers of fire departments in the greater cities of Europe and this country state that buildings of properly constructed wooden beams and breast-summers are entered when burning with an assurance of greater safety to men and the property contained in them than is accorded to any iron-ribbed building. This construction lasts so much longer than the iron one, and particularly is this true in the case of columns supporting beams built of rolled iron. Fire authorities say that in such a wooden structure the flames may be much more promptly extinguished, and with a greatly diminished loss of the contents. When any metal used in building is overheated it becomes soft and tends to give away, while a heavy timber of wood will char under the flames, but retains its position till the last point of its strength is tested." Another architect spoken to on the subject gives it as his opinion that, "if there were no fires, iron would be superior to wood for constructing purposes. Granite is not to be considered at all in this matter, for it snaps and cracks under heat. Marble is the best fireproof material that I know. But we cannot all use it in this country."

PHILADELPHIA, MONDAY, JULY 12, 1886.

THERE is no good reason why gas consumers should be compelled to come such long distances as they are obliged to come to pay their bills.

THE *London Electrical Review* describes an invention by which fire damp can be detected in coal mines. Two incandescent lamps—one with white glass and one with red—are so constructed that in an ordinary atmosphere the white lamp shines white. If even five per cent. of fire damp be present the white light will go out and the red lamp will, by its rays, give a timely warning.

A WASHINGTON, D. C., Gas Inspector has testified before a Congressional Gas Investigating Committee that two-thirds of the meters he examined measured more gas than passed through them. Thus it seems that meters cannot be relied upon, and the question presents itself as to whether the mechanical arrangement is not purposely constructed to accomplish just such imposition and robbery.

THE Race street and Franklin street sides of the Franklin Square sidewalk have been undergoing a patching process again. The bricks have been worn out for many a year, and there is not an even foot in it. It should be replaced with a good artificial stone side walk as soon as possible. The property owners of the vicinity are in favor of it, and pedestrians who are compelled to use it in winter would rejoice to see it done.

WHILE the board of health is vigorously abating nuisances in private houses, vacant lots and factories, a little attention should be given to that open sewer nuisance known as the Philadelphia Traction Company's Cable Conduits. These conduits are about half full of reeking filth and decayed vegetable matter and in the last few hot days they have been emitting gases and odors that are neither pleasant to the smell nor health giving in their influences. If the city authorities deem it necessary to frequently clean and flush the culberts, why should the Traction Company be permitted to neglect their long drawn out and disgusting stink pots? The Board of Health is requested to answer.

THE citizens of the city of Reading are now agitating the question of establishing public bathing houses. No one will, of course, refuse to endorse any proposition that will enhance the comfort and health of the poor of large cities, but when it is borne in mind that these Reading bath-houses must, through necessity, be located on the Schuylkill River, it is certainly not a pleasant proposition for Philadelphians to contemplate. This is but another reason why our water supply should be obtained from some point far away from large cities. We are daily drinking the sewage from the towns and cities along the Schuylkill, and it is high time some definite plan for a proper water supply was decided on. An aqueduct must be built.

IF Contractor O'Rourke, notwithstanding his contract awarded to him in 1873 for paving Tioga street, in the Twenty-fifth Ward, with rubble pavement, in face of the ordinance of 1881 prohibiting the laying of rubble pavements and the ordinance of 1878 annulling all contracts for rubble paving in force at that time, attempts to begin work under that contract, it is the duty of Chief Commissioner McDonald, of the Highway Department, to enjoin him, and, failing in that, to arrest him for violation of a city ordinance and have him bound over to keep the peace. If Mr. O'Rourke has any greviance he has redress against the city through the courts. It is simply absurd for him to suppose that he can break the law with impunity, no matter how much the Highway Department endorses his proposed speculation.

NOT another dollar should be expended on the clock tower of the Public Buildings until a proper and competent water supply has been obtained. To say the best for the clock tower it is nothing but an ugly, cumbersome map of dressed stone; it is neither creditable to the architect nor an improvement to the Public Buildings; it is already cracked in many places, and notwithstanding the mathematical calculations of the very competent gentleman under whose directions it is growing towards the skies, it would be a very wise thing to stop now for several reasons, first, we need a better water supply and can do very well without a clock tower until we get it; second, for safety's sake it is better to stop now, or the whole map of foolishness may fall to the ground.

The time and money spent on that clock tower would have made a suitable aqueduct pointing towards Philadelphia by this time.

PROPERTIES in the Northwestern end of the city, says a live real estate man, are feeling a slight shock, and in some instances rents have fallen here and there, and that cases have been known of some of our uptown builders, through their agents, offering to rent new properties by a system of offering the first two weeks free, and in consequence of which, houses that have been tenanted for considerable time have been vacated. This is done for the reason that in cases of selling properties purchasers have been guaranteed tenants, consequently others have, in the immediate neighborhood, been vacated; and as in many instances these properties have only been purchased in small lots, by small speculators, they are unable to allow their houses to remain untenanted, hence they have to take smaller rents, being unable to stand the loss. If this is allowed to go on the facts are clear that rents all round must naturally come down, as in some instances they have already dropped.

A REAL ESTATE EXCHANGE will surely be established in this city, notwithstanding the assertions of a few croakers to the contrary. Subscriptions to the capital stock have not only been liberally made, but the most sanguine expectations of the committee having the matter in charge have been more than fully realized. Every day strong men, in both capital and energy, are expressing the warmest interest. Of course the organization of an institution involving so many different methods cannot be accomplished in a day; through necessity the committee must move slowly. Mistakes of a trifling nature may be made, but the committee are determined to exercise the greatest care in formulating the organization to avoid mistakes.

The subscription list is still open, at the office of J. L. Stevenson, Secretary *pro tem.*, Fifth and Library streets, and, inasmuch as the capital stock, which was at first placed at $50,000, was, to the surprise of the committee, subscribed for in a few weeks, and ideas of a more extended nature having been suggested, the committee determined to defer the naming of the capital stock until after the meeting for permanent organization and election of officers, which is to take place on the 13th inst.

In several instances subscribers have complained because the committee refused to ac-

cept subscriptions from any single person or firm for more than ten shares. As ten shares secures to a subscriber a seat in the Board, the necessity for this restriction is apparent to all.

The necessity for a Real Estate Exchange in this city is becoming more apparent, and those who at first either refused to endorse the organization of such an institution, or who qualified their endorsement to that extent that it was of no practical good, are now its most enthusiastic supporters.

The committee have already outlined the organization, and on Tuesday it will be submitted to the stockholders for adoption. The charter will be granted in a week or ten days, and a Real Estate Exchange will become a matter of fact in this City of Houses before the 1st day of August next.

Every reader of the REAL ESTATE RECORD AND BUILDERS' GUIDE who is in favor of a Real Estate Exchange should subscribe for the stock, for it will certainly prove a profitable investment.

SINCE the organization of the combination or "Pool" anongst the roofing cement manufacturers in the United State, great changes in prices have taken place, which greatly affect all consumers, which a few facts will at once make noticeable to the naked eye.

Up to last December roofing cement was to be bought for $1 per barrel, but in January of this year, which was the date this "pool" went into operation, the price went up to $1.75, and to-day is realizing, in barrels, $2.40.

The combination are taking forty-five fiftieths of all the dry roofing papers manufactured in the United States, and forty-nine fiftieths of all the coal tar also made in the country, and it is said by good authority that if they are unable to use it, it is destroyed, for the purpose of keeping it out of the market.

These facts will clearly show the strong co-operation, and, from the facts, that any dealer who in any way attempts to cut on their prices is debarred from having any dealings with them, let his standing be what it may. Orders are also issued to mills which manufacture roofing felts not to supply any manufacturers outside the pool.

This system of doing business is undoubtedly against the interests of the United States, and must without doubt bring much foreign enterprise into the market, and already we know of some who have had to resort abroad for their goods, and are still, in spite of this combination, enabled to compete with them, and in some cases at lower rates.

One of the stringent rules of this combination is that each city has its chalk line, and beyond that it is debarred from doing business, but has to forward their customers to their sister towns, so that each town is strictly confined to its own vicinity.

—The President on Tuesday transmitted to the House messages announcing his disapproval of twenty private pension bills and the bill providing for the erection of a public building at Duluth, Minn.

REAL ESTATE.

Obituary.

On Thursday evening, at his residence, 6 West Walnut Lane, Germantown, Mr. Horace Fritz, the well-known conveyancer, died from Bright's Disease of the kidneys. Mr. Fritz was 48 years of age. He had been suffering for several months with the disease, which terminated fatally.

A Heavy Mortgage.

The Philadelphia Traction Company has given a mortgage for $750,000 to the Pennsylvania Company for Insurance on Lives and Granting Annuities. The mortgage is to secure an issue of 5 per cent. bonds, on behalf of the West Philadelphia Passenger Railway Company, and was recorded on Wednesday last.

Financial Affairs of Two Cities.

The taxable real estate of New York is assessed at double that of Philadelphia, and New York absorbs about $35,000,000 annually in current and other expenses, while Philadelphia's expenditures average about $13,000,000. Philadelphia is lowering her debt at the rate of $3,000,000 a year; New York proposes to issue bonds for $2,500,000 to meet her running expenses. Philadelphia's tax rate is $1.85 on the $100; New York's rate will be $2 28.—*Philadelphia Record.*

Contracts Awarded.

John Maxwell's Sons obtained the contract for flagging the sidewalk in front of Independence Hall, price $4,475.45; also, for flagging the sidewalk on the South side of Washington square, for $2,825.90.

John M. Powell received the contract for repairing Christian street wharf, for $498.

Jacob Crouse & Sons for supplying new carpets for the Court rooms.

J. G. S. Beck got the music contract for the public squares at $47.50 per concert, McClurg being disqualified on account of his holding the position of city Hack Inspector.

Contracts Amended.

The contracts for laying asphalt pavements on Diamond street from Twenty-second to Thirty-third, and on Locust street from Fifteenth to Eighteenth, were awarded to the Vulcanite Paving Company at $2.25 and $2.50 per square yard respectively. M. C. Hong was the lowest bidder for macadamizing Moyamensing avenue from Eighth street to Penrose Ferry bridge, at 99 cents per square yard. Contracts for Belgian-block pavements on Front street, from Christian to Federal, and on Long Lane from Mifflin street northeast, were awarded to D. & P. McNichol and T. P. Smart at $2.10 and $2.08 per square yard respectively.

Charters Granted.

The Stuart Peterson Company, of Philadelphia, capital stock, $200,000; the Westmoreland Telephone Company, of Greensburg, capital stock, $10,000; the line will embrace the counties of Westmoreland, Fayette, Allegheny, Armstrong, Indiana and Cambria, and connect the principal cities in that district. The Conestoga Cigar Company, of Lancaster, capital stock, $10,000; Monongahela City Water Company, of Monongahela City, capital $15,000; the Loom Manufacturing Company, of Philadelphia, capital stock, $100,000; the Sharpsburg and Etna Building and Loan Association, of Sharpsburg, capital $250,000; the Greensburg Fuel Company, of Greensburg, capital stock, $40,000.

Lancaster County Ahead.

The man who plants should take courage. There are in the United States thirty-three counties whose agricultural products amount in value to over $4,000,000 each. Of the thirty-three the State of New York furnishes fourteen; Pennsylvania, seven; Illinois, six; California and Massachusetts, two each, and Michigan and Connecticut, one each. Of these rich counties, Lancaster, in the State of Pennsylvania, leads all the rest, her agricultural products, according to the census of 1880, amounting to $9,320,202. It is important to know what is raised in the rich counties. Lancaster raises vast amounts of tobacco—twice as much as any other county in the United States. The county also raises vast quantities of corn, oats, wheat, and about 40,000 cows make enormous quantities of milk, butter and cheese.—*Atlanta Constitution.*

The City Hall Tower.

From a statement recently made by architect McArthur, of the Public Buildings, the greatest weight of the tower upon a square foot is 17,362 tons. From tests of the material used, made at the United States Arsenal at Watertown, Mass., several years ago, the average strength of the brick work laid in the cement used on the tower before the first crack appeared, was found to be 112 864 tons to the square foot, and the ultimate strength, 15,418 tons. Mr. McArthur says that the settling has been much less than was expected, as the weight of the tower had been materially calculated before the work was commenced, and that great care has been exercised to keep far within the safety line. 20,000 tons of marble and bricks have been added to the tower since the last agitation without making a perceptible difference in the settling.

The Electro-Pneumatic Transit Company.

The Electro-Pneumatic Transit Company has been organized to establish a system of carrying goods by the pneumatic process. It is the invention of Henry Clay, of 422 Library street. By the invention of Mr. Clay but two tubes will be required to connect with any number of points, one of them being a pressure, the other a vacuum tube. These tubes can be tapped wherever desired in a manner similar to a gas or water main, and the carrier switched off into any office or private building by an electrical device under control of the operator at the central station. The carriers which it is proposed at first to put in operation will have an internal capacity of two inches diameter by seven in length, and will be propelled at a speed of two miles per minute.

From district offices tubes will be carried to offices and residences. If the lady of the house wishes a piece of silk or lace or ribbon she simply encloses her order with a sample in the carrier and turns the valve. In ten minutes the order will be filled and the goods shot back. Checks can be sent to a bank and the money returned, and no end of like things done.

One of its great advantages is its absolute inviolability, no transcriptions of messages being required. It is expected that it will be extended to the general carriage of mails between cities, and in that feature would be remarkably efficient. Attempts have been made to buy the rights to the invention in certain states, but so far without avail. The company is sanguine of success and determined to push matters rapidly. Its organization is not yet complete, though some of the most prominent business men of the city are interested in it and a capital of $1,000,000 is represented. The board of direcrors is to be announced on Tuesday next.

The Re-Building of the Insane Department of the Almshouse.

The rebuilding of the Insane department of the Almshouse has already been begun, the stone walls of the burned-out quarters being used in the construction of the new hospital. The main building, however, instead of having three stories as before, will have but two floors, excepting in the centre, where the amusement hall, a room about 52 by 74 feet in area, will form a third story. Another new feature will be the separating of the two wings from the large structure by means of passage-ways between which, from building to building, will run iron bridges. The latter will permit of the inmates of the department escaping to the ground in case of fire by means of permanent iron steps that will lead from them. Precautions will be taken to make the buildings as near fireproof as possible, and the floors will be laid "flat," without joists, while the plastering of the ceilings beneath them will be placed on a wire netting. The roof, which is to be covered with tin, will be constructed in much the same manner.

The main building will have a frontage on the northeast of 158 feet and a mean depth of 62 feet. There will be two front entrances opening into a corridor extending the entire length of the structure. In the vicinity of the entrances, on either side of the apartments for the physicians and the public rooms, will be built an iron staircase, separated from the rest of the institution by brick walls. The greater portion of the ground floor will be reserved for the dormitories and for two dining rooms adjacent to them. The second story is to be arranged according to the same plan.

The two wings will have on each floor sixteen single dormitories, besides "associated" dormitories, a room for the attendants, a day room, etc. Fireproof stairways will lead from one story to the other. Both the wings and the centre building will be liberally supplied with facilities for washing and bathing. The rooms will be heated with steam, and, as is stated by Wilson Brothers & Co., the architects, will be better lighted than before. All of the windows, excepting those on the main house, will be protected by iron bars.

New Parish Buildings.

A handsome new building to be used, among other things, as a parochial school, but which is really the forerunner of a cluster of permanent parish buildings of the Roman Catholic Church of Our Lady, Help of Christians (German), is now going up on the church property, on Allegheny avenue, between Gaul and Chatham streets. The lot extends 165 feet along the south side of Allegheny ave. from Gaul to Chatham street, and is 194 feet deep.

Work was begun among the Roman Catholic German population in this parish by the Pastor, Rev. George J. Wolf, last summer. Since then the work has rapidly progressed, and the frame building on the Gaul street corner of the lot, in which services were begun about a year ago, is now scarcely large enough to accommodate the parishioners. The frame school in the rear has also become inadequate, and it is to relieve this, and eventually to provide a residence for the Sisters of Christian Charity now co-operating in the parish work, that the new building is being constructed. The building stands in the rear portion of the lot, about midway between Chatham and Gaul streets, and it will be ready for occupancy, it is thought, in the course of two months. It is a two-story brick structure, on which there will be a mansard roof. The frontage is 37 feet and the depth 64 feet. It will contain all of the modern improvements.

Excavations have also been begun on the Chatham street and Allegheny avenue corner of the lot for another new building, larger than the one just described, which is to be completed in the Gothic style of architecture in the course of a year or thereabouts. This building will have a frontage of 56 feet on Allegheny avenue, and a depth of 85 feet along the line of Chatham street. It is to be a two-story structure, with slanting roof, tower and spire. The basement will be divided into four large parochial school-rooms, and the upper floor will be used temporarily, after the present frame building comes down, as a church. The basement will be 13 feet high, and the auditorium above will be 27 feet high, so that if at some future time the growth of the school demands it a third floor can be put in and additional accommodations acquired. The auditorium as now proposed, it is said, will seat 500 people.

The main permanent church building, for which the plans have not yet been definitely settled upon, is to be erected on the corner of Allegheny avenue and Gaul street, with the front on the former. This is the site now occupied by the frame church and the school building. Work will not be begun upon the main building, however, it is thought, until the latter part of next year. Another building, which is to be erected on the lot, is the parochial residence, which will be located in the rear of the permanent church building.

To Crowd Out Silver Coin.

When one sees the Senate missing its opportunity to curtail the large appropriation bills passed by the House the question naturally arises whether that body will have the sense to arrest the provision for small silver notes. Democratic members of the Senate do not differ much from their party associates in the House. In this matter, as in so many others, the country is obliged to rely upon Republicans of the Senate for substantial unanimity in resisting the schemes of paper inflationists.

For this is not a movement in the interest of silver. On the contrary, it is of all things the worst that could be done as respects the future value of that metal. It would substitute a cheap and virtually irredeemable paper for all silver coin now in circulation, for the small notes could be redeemed only in silver dollars, and the silver dollars are redeemable in nothing. A financial journal which usually sustains the policy of the Administration intelligently says that "the public knows the article" (silver certificate) "as thoroughly as it does wooden nutmegs," and "the notes would find their way back into the Treasury as fast as put out." But that is a melancholy mistake. The small notes would be generally preferred to the standard dollars, of which 52,000,000 are in actual circulation, and there is not a bit more of the wooden nutmeg about the paper promise to pay 75 cents than there is in stamping "In God We Trust" on 75 cents and making it a legal tender for a dollar. Judging from the conduct of Democratic Congressmen there must be a great many Democratic voters who know so little about the wooden nutmeg money that the want as much of it issued as possible, and, once issued, it would be tolerably sure to push the "buzzard dollars" out of the way. That sort of thing would not help the price of silver in the least, whatever else it might do.

Notes redeemable only in silver are in no practical aspect better for use than notes not redeemable at all. Eleven years ago the Republicans of the Senate earned for their party two more Presidential victories by resisting inflation of legal tenders, which were promises to pay gold, and insisting that the promise should be made good. The kind of paper now proposed, if thrust into circulation as the authors of the measure contemplate, would in effect take up a great many promises to pay gold by putting out instead as many promises to pay a standard silver dollar that is not wanted. The practical effect would be to cut off the gold receipts of the Treasury to a large extent, and so to deprive it of power to redeem the legal tenders according to the pledge given in the resumption act.

Gold is leaving the country very rapidly; $3,600,000 went last week, and ten times as much has gone since January 1. The tendency is to make American prices only silver prices at no distant day, and a very few operators in London can fix the price of silver bullion to suit themselves. A bill to push silver into larger actual circulation in this country would tend to check the power of Great Britain over the price of that metal for a time, but a bill to substitute paper for all silver that we now have in use has exactly the opposite tendency. It is a worse blow at the interests of silver producers than has ever yet been aimed by any hated "gold bug."—*N. Y. Tribune.*

Proposals for the New Armory of the Third Regiment.

Proposals for erecting the new armory of the Third Regiment, on the east side of Broad street, above Wharton, have been advertised for. The old armory, at Twelfth and Reed streets, the site of which was owned by the city from the time of the erection of the building, has been bought from the regiment by the city for the use of some of the municipal departments. About the whole of the price, $20,000, was paid for the lot on Broad street, the size of which is 147 feet front and 220 feet deep. The building will occupy the whole of the lot. The front part of the armory will be 147 by 50 feet in size and two-and-a-half stories high. In the rear of this will be the drill room, 147 by 170 feet in size.

The base of the front wall, from the sidewalk up to the first floor line, a height of about five feet, will be Hummelstown redstone rubble masonry, rock faced, with the stones laid promiscuously. Above this the wall will be of stretcher bricks with red mortar, the moulded string courses and window sills to be of Hummelstown red stone. The roof of the front building will be of American terra cotta tiles, and will have four pavilions covered with these tiles. All the windows and doorways of the front will be round-headed.

At the northern side there will be a direct entrance 14 feet wide from Broad street to the drill-room. Through this vehicles can pass. On the southern side there will be an entrance 8 feet wide from Broad street. There will also be a doorway communicating with the small street in the rear of the armory.

The walls of the drill-room will be of brick, and will be 23 feet high to the eaves, and 15 feet to the base of the trusses supporting the roof. Curved Howe truss rafters of white pine, with iron truss rods, will be used, and the roof is to be covered with tin. In the centre of the room the height from the floor to the actual roof line will be 42 feet, and to the base of the truss 35 feet. The room will be lighted and ventilated by lantern skylights.

The first floor of the front building will be divided into rooms for the officers, and the second floor into rooms for eight companies. On the third floor will be a library, gymnasium, dining-room, kitchen and a room for the storage of camp equipments.

In the basement will be rooms for closets for the uniforms, dressing and toilet and for the janitor, armorer and quartermaster; also, rooms for the heating apparatus.

The rooms in the first and second floors will be approached by a corridor, on each floor, fourteen feet wide, with stairways at each end. These corridors can be used by audiences or spectators on the occasion of exhibition drilling, receptions, etc. The lower corridor will be five feet above the

floor of the drill room, and the higher one can be entirely used as an auditorium gallery.

The interior of the buildings is to be finished with pine in its natural color. It is intended that the armory shall be ready for occupation by the regiment on January 1, 1887. The cost of the building, exclusive of ground, is estimated at $50,000. Thomas P. Lonsdale is the architect.

Variations of Bids.

It is not pleasant to have to conclude that there are many builders and other contractors who do not know how to make estimates, but how else is the great discrepancies in bids, especially on public works, to be accounted for? The *Building Trades' Journal* cites the following illustrations:

For stone work and setting for Louisville, Ky., court-house, under advertisement dated November 25, 1885: lowest bid, $86,521; highest, $291,745, or 233 per cent. higher.

For iron work for Erie, Pa., court-house, advertisement of February 24: lowest bid, $5,818; highest, $10,817, or 86 per cent. higher.

For plastering Pensacola, Fla., court-house, advertisement of April 1, 1886: lowest bid, $3,243; highest bid, $18,521, or 475 per cent. higher.

For approaches to Dubuque, Ia., court-house, advertisement of December 3: lowest bid, $549; highest, $1,119, or 106 per cent. higher.

For plastering Toledo, Ohio, court-house, advertisement dated November 21: lowest bid, $5,120; highest $10,000, or 96 per cent. higher.

For plaster models for court-house at Lynchburg, Va., advertisement of December 10: lowest bid, $78; highest, $1,059, or 1,260 per cent. higher.

For iron beams for Brooklyn post office, advertisement of December 5: lowest bid, $1,850; highest, $3,110, or 70 per cent. higher.

For lathing and plastering Oxford, Miss., court-house, advertisement dated January 7: lowest bid, $1,775; highest, $4,443, or 150 per cent. higher.

For iron beams for Pittsburg, Pa., court-house, advertisement of January 15: lowest bid, $2,360; highest, $4,617, or nearly 100 per cent. higher.

The Trade Outlook.

The demand for building material of all kinds is reported by the leading manufacturers of material as very active for this season of the year. The receipts of lumber for the past week have been unusually large, one day's receipt footings up 3,600,000 feet. The demand for all kinds of lumber is steady, and prices are firm for all good qualities and weak for inferior grades. Yellow pine is arriving in cargo lots, and stocks at yards, while large, are not heavy, because of the brisk demand maintained. Leading dealers report the fall prospects better than they have been for years, but complain, as do all dealers, that their margins of profit do not justify.

Nails are in active demand at from $1.90 to $2, although it is stated lower prices have been taken for large. The local and country demand is quite good. Manufacturers of builders' hardware report a steady movement in both local and outside markets, and factories here and elsewhere are busy with labor force.

The window glass factories have shut down for the season, but the supply of glass is sufficient, and prices are rather weak than strong. The plate glass works have succeeded very well in meeting demand as to quality and prices.

The arrivals of cement have been large and prices are weak. Lath and shingles are moving freely and stocks are not permitted to accumulate.

The iron trade is quiet, as is usual at this season, but there are indications that the fall trade will be heavy.

Railroad construction, which may be accepted as a favorable indication of general trade conditions, will be prosecuted with great vigor all through the West and South. Statements differ as to the probable extent of railroad construction, but it is safe to put it at 5,000 miles for the last six months of the year. This means a large and steady demand for all kinds of material. The rolling mills throughout Pennsylvania were idle last week, and partially idle this. Labor disputes have been settled in all but one or two points.

Local labor troubles are of but little consequence. Disputes will continue to arise, but employers and workmen generally understand this, and we may look for peace and harmony until another season opens. The general trade conditions are all that can be desired. Machinery is busily employed; our productive capacity is being increased; our cities and towns are growing. The commercial health of the entire country is better than it has ever been. Failures are declining in number and amount, and the future is brighter to manufacturers, architects, builders and workingmen.

—The experiment which some real estate owners make from time to time, of collecting their own rents, does not always turn out satisfactory. In the long run, it is best to leave such matters in the hands of real estate agents who know better, with whom they are dealing and how to deal with them. It is possible to save a little money at one time, but they are sure to loose it at another. It may seem like earning money very easily to collect rents at 5 per cent., but there are annoyances connected with it which make it worth all it cost.

—To-day's building prospects are certainly as bright as they have been at any time this year. We are now over the striking season and in full view of a lovely fall trade. Trades people and manufacturers of all kinds are full of expressions of confidence and satisfaction. The country is busy; the people are nearly all engaged at good wages and the underlying conditions all point to a strengthening of trade and industrial conditions in every part of the country. The managers of our large railroads are earning fair dividends; the Western markets are active. Anywhere and everywhere we look we see evidences of life and animation which ought to go very far in strengthening confidence.

Items of News.

—The estate of Selser & Bros., bankrupts, is appraised at $32,322.31.

—The President has vetoed the bill providing for a public building at Dayton, Ohio.

—The late Senator Joseph P. Kennedy left an estate valued at $10,000 to his relatives.

—5,000,000 feet of lumber was destroyed by fire at Romeo, Wis., on July 7 inst.

—Joseph Paxson on Tuesday was re-elected President of the Board of Guardians of the Poor.

—During this session of Congress 565 special pension acts have become laws and 90 have been vetoed.

—The Philadelphia and Reading Railroad Company commenced the payment of June wages on Saturday last.

—The Senate has confirmed the nomination of Hugh Thompson to be Assistant Secretary of the Treasury.

—The British Chambers of Commerce have agreed to favor the neutralization of all submarine telegraphic cables.

—The new Estell Glass Works, at Woodbury have been leased to Wyman Bros., of Philadelphia, for a term of three years.

—At a special meeting of Cape May Council on Tuesday evening the police force of the city was placed under the charge of the Mayor.

—The people of Merrick street want the name of their thoroughfare changed to Broad street. Dignified Broad street may object to such a kind.

—The total coinage of standard silver dollars during the fiscal year ending June 30 last was $29,838,905, or $1,301,452 more than during the preceding fiscal year.

—The First National Bank has declared a semi-annual dividend of 6 per cent—a rate it has maintained for twenty-two years by careful and conservative management.

—The Board of Highway Supervisors on Thursday granted a permit to Baily, Banks & Biddle to construct a vault under the South side of Sansom street, above Twelfth street.

—The contract for building the line bridge between Camden and Burlington counties, on the Haddonfield road, has been awarded to the Phœnix Iron Works, of Philadelphia, for $3,600.

—The City Controller has been requested by the Municipal Reform Association to suspend action in the matter of Thorp's Lane Bridge until the character of the work can be examined.

—The total number of persons who emigrated from Germany from January to May, both inclusive, is 33,977, a large decrease as compared with the figures for the corresponding period of 1885.

—Real estate dealers and agents say that for the past week or two, sales have largely fallen off. This is nothing surprising. People are now thinking more of rest and recreation than of house buying.

—The proposed bridge at Sixth street and the Connecting Railroad will not be built until next year, because Councils cannot provide the money to pay the city's share of the expense, which would be about $1,400.

—The Secretary of the Interior has issued an order requiring every officer and employé in the Department receiving and disbursing public moneys to make weekly cash reports showing all sources of receipts and expenditures.

—The Public Building Commissioners, in answer to a communication sent to them by the carpenters employed on the building, have authorized Superintendent McPherson to fix the rate of wages according to the merits of the men.

—The portion of the Gloucester and Salem turnpike lying between Sweedsboro and Woodstown is to be either sold or vacated to the Freeholders. The matter will be disposed of at a special meeting of the Directors to be held on the 31st instant.

—The Philadelphia and Newtown Railroad is reported to be considering a proposition to abandon Second street and occupy American street instead, so as to free the former of toll-gates and railroad tracks and open it for improvement.

—A story has been going the rounds that the Pennsylvania Railroad Company intends to build engines with compressors to hold large quantities of natural gas, which will be pumped into them at Pittsburg. The story was denied yesterday by Pennsylvania officials.

—The Bordentown City Council has decided not to erect a new Town Hall. At the meeting on Tuesday night the vote on the project resulted in a tie, which was subsequently broken by the President, Isaac Gable, casting a negative vote.

—The census returns for Paris has just been issued. The population numbers 2,254,306 souls, showing the small increase of 14,378 since the last census taken five years ago, in 1881. In ten out of the twenty arrondissements the population had diminished.

—The House Committee on Public Lands has made a favorable report on the bill which permits homesteaders who entered less than 160 acres of land to fill out their right to the full 160 by entering the deficiency at any place where the land is subject to entry.

—A special meeting of the Vessel-Owners and Captains' Association was held on Thursday, at No. 205½ Walnut street, to take action against the combined efforts of the Eastern coal receivers to reduce freights below the minimum rates established by the association.

—Reck Brothers, bakers, 525 Spruce street, have been awarded $200 by Referee F. A. Osbourn as damages for injury to one hundred barrels of flour caused by flooding of water in their cellar on February 25, 1885, when the water-pipe leading from the main pipe to a street plug burst.

—At a meeting of the Finance Committee of the Gas Trust it was reported that the board had $804,942.44 to its credit in the several banks of the city. The committee placed $245,764.79 at the disposal of the cashier, with which to pay wages and emergency bills during the Trust's summer vacation.

—All the companies and agents doing business in New York and Brooklyn have signed an agreement to establish ratings on all property in the metropolitan district, and to reduce brokers' commissions to 10 per cent. The last signature was obtained by the committee on Friday morning.

—Houses worth from $400 to $600 per year rent are more difficult to rent than houses running from $200 to $300. The latter are always in demand. Not a single builder has been met with who complains of difficulty in renting small properties of from five to eight rooms at from $12 to $25 per month.

—The Window-Glass Workers Union, of Pittsburg, are going to try a co-operative scheme. Shares of stock at $50 each are to be issued for the erection of a new plant. It is proposed to start with six factories at cost of about $180,000. It is the intention to include tableware and bottle glass also.

—Senator Mitchell (Ore.) has submitted a proposed amendment to the General Deficiency Appropriation bill to provide for the payment to John Roach & Son of $20,274 for wharfage and care of the monitor Roanoke from March 17, 1877, to the time of its sale in 1883, including towing and pilotage, and to pay them $38,340 in full for the cost of changing the iron frame of the Puritan.

—The Magistrates' returns for June show that the greatest amount, $361.55, was turned in by Magistrate Durham, and the smallest, $42 95, by Magistrate Riley. The Magistrates who earned their salaries were Lennon, $316.20; Durham and Smith, $296.30. Others who nearly did so were Eisenbrown, $225.30; O'Brien, $233.40, and Ladner, $207.75.

—In some of the older sections of the city, houses which have heretofore been crowded with three or four families, are being thinned out. The head of a family of three or four, who can secure a home of his own for $12.00 to $16.00 per month will not be slow to take advantage of the opportunity. The multiplication of small houses continue and we do not seem to be in sight of the danger mark.

—The Public Improvement Association of the Twenty-fifth Ward met on Wednesday evening, at Sixth and Venango streets, the President, W. W. Morgan, in the chair. It was reported that the Court had appointed juries to assess the damages which would result on the opening of Clearfield street from Sixth street to Germantown avenue, Venango street from Ninth to Twelfth and Sedgley avenue from Germantown avenue to Erie avenue.

—It is said that a charter recently acquired by the Thirteenth and Fifteenth Streets Passenger Railway Company gives that corporation facilities for reaching Fairmount and Third and Walnut streets. President Ackley said that his company has as yet no definite plans to be carried out under the new charter. "The Board of Directors can not meet until fall, and until then operations under the new charter will be held in abeyance."

—By a decision given by Judge Hawes in the Circuit Court of Chicago the application of the Illinois Central Railway Company to compel the Baltimore and Ohio Railroad Company to vacate its present freight depot and premises on the lake front in that city, owing to the alleged termination of a twelve years' lease given by the Illinois Central, is refused, the Court holding that the Baltimore and Ohio cannot be compelled to vacate its present location and privileges.

—Highway Commissioner McDonald is of the opinion that the contract made in 1873 with Contractor O'Rourke, for laying a rubble pavement on Tioga street, can not be broken, notwithstanding the ordinances of 1881 prohibiting rubble pavements. Mr. O'Rourke, who has been prevented by the city from performing the work, now proposes to go ahead, and the Highway Commissioner will not interfere. It is likely that the Municipal Reform Association will take action in the matter.

—The statement of the Treasurer shows gold, silver, United States notes and other funds in the United States Treasury as follows: Gold coin and bullion, $231,977,729; silver dollars and bullion, $184,142,556; fractional silver coin, $28,831,701; United States notes, $33,674,351; national bank-notes, $269,170; national bank-notes in process of redemption, $2,988,126; deposits with national bank depositories, $13,229,136; total, $495,112,769. Certificates outstanding—Gold, $75,215,147; silver, $88,258,192; currency, $17,285,000.

—It is stated that under the Tripartite traffic agreement the Baltimore and Ohio and the Reading will have full use of the terminals of the Jersey Central at Jersey City under terms which are very advantageous to the Baltimore and Ohio. The latter will be enabled to create a much larger through business to and from New York than it now does while operating over the tracks of the Pennsylvania Railroad Company. This will also greatly benefit the North Penn and Bound Brook divisions of the Reading Railroad Company.

—The new building of the Friends' Library, to be erected on Sixteenth street, between Race and Cherry, will be 40 feet front by 40 feet deep. The reading room will be 27 feet by 37 feet. The building has been so designed by the architect, Addison Hutton, that extensions can be made to it when necessary. It will hold some 15,000 volumes in addition to the records, and, it is expected, will be completed in a little less than four months, when the 8,600 books now kept at 304 Arch street, will be removed to the new quarters. The cost of the structure is estimated at over $12,000. Mr. John H. Dillingham, who has been chosen the Librarian, will have under his care a number of rare volumes, among which, it is said, is a Cranmer Bible.

—A Pittsburg paper says the use of natural gas in the manufactories of this city has done away with the consumption of 189,850 bushels of coal a day. In 250 working days, which is considered a year by manufacturers, the whole amount of coal displaced would run up to 47,450,000 bushels. Calculating 100 bushels to be an average day's output for a coal miner, it would take 1,600 coal miners to dig this coal, but altogether the use of natural gas has thrown about 5000 men out of work in this region. It required the use of 633 railroad cars to transport the black diamonds.

—At a meeting of the Public Building Commissioners, held on Tuesday last, a resolution was offered by Commissioner Gaskill providing for a general cleaning of the front of the big building by the marble contractor, it was referred to the Architect and Superintendent. Bills to the amount of about $15,000 were approved, including $2,370.78 for marble work by Struthers & Sons; $2,555.60 for bricks from A. Dotterer, and $1,861.68 for dressed stone from Douglass Bros. The committee on heating and ventilation instructed the Superintendent to finish that part of the work during the summer months.

—The jury of view appointed to assess damages for the widening of Twenty-fifth street from Spring Garden to Biddle filed its report in the office of the Quarter Sessions. The amount of damages awarded against the city is $41,502.77. Of this amount $39,175 is awarded to owners of property, $656.10 to tenants of those properties, and $1,621.67 to the trustees under the will of Christine Biddle, deceased. This last award was for consequential damages for the destruction of the estates upon which the trustees held irredeemable ground rents. The award allowed the trustee the premium which the ground rents would bring at a sale in the open market at the present time.

—The report of the jury appointed to assess damages for the taking of property in the widening of Twenty-fifth street, from Biddle to Spring Garden, filed their report. They made three classes of awards of damages against the city—namely, to property owners, to tenants and to holders of irredeemable ground rents. To property owners, $39,175 are awarded, to tenants, $656.10, and to the irredeemable ground rent holders, $1,671.67, making a total of $41,502.77. In making the award of the latter class of damages, the jury hold that the irredeemable ground rents are an estate in land, and the security out of which the estates issued being destroyed by the taking of the land, the city should pay consequential damages, and in the award allowed the premiums which these ground rents would bring at an open sale, the jury fixing them at from 20 to 38 per cent. The holders of these ground rents are the trustees of the estate of Christine Biddle, deceased.

—Work on the various freight and passenger depots of the Baltimore and Ohio's new line into this city will be in progress in a week or ten days. The contract for the freight depot at Dickinson and Meadow streets has been awarded to W. D. Sipple, who will start in at once, and contracts for the erection of the stations at the foot of Race street, on the Schuylkill, and at the foot of Laurel street, on the Delaware, will be placed in the hands of contractors this week. The Iron City Bridge Company has been contracted with to construct the iron shed of the passenger depot, which will be 360 feet long by 110 feet wide. The plans for this large passenger station, which will be erected at Twenty-fourth and Chestnut streets, will all be finished in about a week. The station will be three stories high, and the waiting-rooms and restaurants will be on a level with Chestnut street. The ticket and baggage-rooms will be on a line with the tracks.

—It seems that members of the Journeymen House Painters' Assembly, No. 1, of this city have been interfering with the workmen of Edward M. Burk, No. 1604 Sansom street. Mr. Burk now threatens to arrest the painters for conspiracy if any further interference occurs.

—R. A. Malone, of R. A. Malone & Sons, of Lancaster, the firm who have been given the contract to build an iron bridge over the Schuylkill river at Market street, for $271,000, was in this city Tuesday evening, and said that they proposed to begin the work of taking down the old bridge at once. All of those portions of the piers above the water are to be rebuilt, and there are to be two entirely new piers, one at each end. Mr. Malone said that from eight to ten days will be required to take down the old bridge, and, as soon as it is removed, the construction of the new bridge will begin. He expects that everything will be ready by the 1st of November for the superstructure, which will not be constructed until next spring, and which can be put on in less than two months. He said he is not obliged to have the bridge finished until July 1st of next year.

BUILDERS' ITEMS.

Removal.

The Producers' Marble Company, formerly located at the western end of the Chestnut street bridge, has removed to their new yard at 201 South Thirtieth street. The Producers' removal was necessitated by the Baltimore & Ohio Railroad Company having purchased the property where the old yard was situated. Rutland, Sutherland and East Dorset Marble are the great specialties of the Producers' Company. Builders are invited to inspect the new yard and its extended facilities for filling orders.

Gossip of the Week.

The two and one-half story brick tavern and stables, known as the Seven Presidents' Hotel, 2234 and 2236 Germantown road, brought $16,000.

A farm of 9 acres on State road, in Twenty-third Ward, was sold for $12,500.

A new drove yard is to be built west of Gray's Ferry.

Three tracts of land, about 86 acres, on Howell's lane, in the Twenty-second Ward, sold for $88,500.

A lot, 100x112½, on Master street, west of Eighth, sold for $30,000.

Building and Real Estate Notes.

WM. ELKINS, builder, is erecting six seven-room houses at Twenty-second street and Oakford.

MR. PAUL, builder, is putting up five seven-room houses on Twenty-third and Oakford streets.

EDWARD HURST BROWN, architect, 1430 South Penn square, is putting new chancel in Christ P. E. Church, Dover, Del.; also erecting two frame houses for H. D. Boyer, Smyrna, Del.

WM. HARPER, JR., 146 S. Fourth street, real estate broker, has just purchased a farm of about 100 acres, in Galloway township, Atlantic county, N. J., which he purposes to put out in building lots.

EDMUND A. W. HUNTER has lately purchased a country seat at Rosemont, Montgomery county, covering 5 acres, at the cost of $15,000; also the adjoining estate of 19 acres (or country seat), at Villanova, for $30,000.

WENDELL & SMITH, builders, South Penn square, have just completed the sale of two dwellings at Haverford, near the station, for $6,500.

This firm have several very desirable houses for sale in this locality.

F. G. KEMBLE is building eight ten-room houses, at Ridley Park, for G. W. Giles, and D. A. Hall & Co. are supplying the lumber. These houses when complete will be worth $4,000 each, clear. They are built in pairs, of brick, with mansard third stories, and stand on lots with 132 feet frontage by 150 feet deep.

ISRAEL HECHT, real estate conveyancer and notary public, formerly located at 212 S. Third street, has removed to 302 Chestnut street. Mr. Hecht has fitted up his new offices with creditable taste, and is now ready for business.

MR. FOX is erecting 75 dwelling-houses on Eleventh street above Diamond, and Warnock and Diamond streets, which will all be completed with the latest improvements. Bailey & Salter, Columbia avenue, will have charge of them.

F. C. VAN BLUNK, real estate agent, 1206 S. Fifth street, has an extensive down town business, in addition to his up town office, which is situated, 1800 Montgomery avenue. He has a very extensive business, and controls some large estates and properties, amongst which are the properties of Widener & Elkins.

CULVER & ROGERS, 901 Walnut street, is erecting a stock barn, for J. Betz & Son, at Betzwood, near Norristown. It will be built of stone, 180 feet long and 38 feet wide, costing about $10,000. It will have 48 box stalls and 24 single stalls, and be finished in South Carolina pine; asphalt blocks flooring, and finished with wrought iron fixtures.

J. L. GALLOWAY, real estate and insurance broker, N. W. cor. of Eleventh street and Washington avenue, talks of his business as keeping him fully occupied, and although sales of properties have not reached anything decisive, yet many are on the way and will within the next few days be completed. Everything with him appears very satisfactory.

ROBERT S. GALBRAITH, conveyancer, real estate broker and notary public, 1942 Reed street, has just purchased 26 lots on Hillary street for $13,000, on which J. P. Leonard will erect 26 two-story six-room houses, with bath and all modern conveniences, and when finished will be worth $2,000 each. Houses with him are renting freely, and collections are very good.

GEO. W. CARSON, 1916 Columbia avenue, has made sale of a property, 1718 N. Seventeenth street (three stories), for $5,600, and is daily having inquiries for small properties for purchase and rent. Business with him, generally, is slow, which is by no means unusual at this season of the year, but says that the prospects for a good fall season is showing well to the front.

PATRICK CONROY, builder, 1348 Moore street, has this year been very successful in selling properties in his section of the city, but says that within the two last weeks he has found business slacken down, but has good prospects for a big fall business. He has now for sale some very handsome seven-room houses, which are rented for $20 per month, and would be a good investment.

SNOWDEN & STOCKMAN, real estate brokers, Eighteenth street below Ridge avenue, are having a busy time in conveyancing, principally country properties, and renting with them has been keeping good, as also have collections.

Mr. Stockman is at present spending the greater portion of his time at Media, at which place he says real estate is very active.

THE old-established firm of D. A. Hall & Co., lumber merchants, Ninth street and Washington avenue, are doing a very heavy business, and, with their mill work, find themselves overrun with orders, which keep them fully occupied. This is only one instance of many.

GEO. LAYCOCK, real estate broker, 914 Walnut street, has, since our last report, of the "Suffolk Estate," which is directly under his directions, increased the sales of his lots on the same from 300 to 500, and each day finds many fresh purchasers, and already many buildings are on the way, while others are making active preparations. It would be well for architects and builders to look in that direction.

BAILEY & SALTER, conveyancers and insurance and real estate brokers, have within the last 30 days removed their offices from 2220 Oxford street to commodious offices, 2008 Columbia avenue, which they have had fitted up handsomely. This firm have an extensive rent-roll, and have but one vacant house at disposal. They say that with them collections are good, and are anticipating big business from their new quarters.

TWINING & SON, 2133 Columbia avenue, and 430 Walnut street, real estate brokers, have within the last few days made sale of a store and dwelling, 2029 Ridge avenue, for $8,000; also a dwelling, 1608 Baily street, for $2,000; also many sales of good wills, with stocks and fixtures, in the city.

Business with them, generally, is very satisfactory, more generally in first mortgages, which within the last few weeks has been heavy.

SCOTT & ROBERTS, 831 N Sixteenth street, real estate brokers, have just completed the sale of a plot on the east side of Nineteenth street above Montgomery avenue, running through to Gratz street, 108 ft. front and 177 ft. deep, to the R. H. Russell Real Estate Association, on which they purpose building 18 five-room houses, and 6 nine-room houses, all of which will be fitted up with the modern conveniences. The 18 small ones will rent at $16, and the larger ones at $28. They will commence operations at once.

WM. L. CRAVEN & SONS, real estate and insurance brokers, 1546 N. Seventh street, have just completed the sale of four seven-room houses, with all modern conveniences, on Bucknall street, for $2,000 each. They have many inquiries for other properties, amongst which are 22 two-story houses, which they have almost ready for use, on Lawrence street north of Cambria. Small houses with them are still in demand, while houses from $25 to $40 hang rather slow on their hands.

CLOSE & CLUBB, the well known real estate brokers and conveyancers, are being kept especially busy conveyancing, and report real estate business in the lower part of the city good; and further report that in the First Ward there is a growing demand for business lots, which is invited by the B. & O. R.R., which will greatly add to the value of properties in that section. Amongst many valuable properties he has for sale is the Union M. E. Church, or more generally known as the Old Academy, on N. Fourth street below Arch, which stands on a lot 47 feet wide by 200 feet deep.

GEORGE LODGE, real estate broker and conveyancer, has within the last few days completed the sale of a dwelling, 1210 South Third street, for $4,500; also one, 322 Reed street, for $6,000, and has within the last 30 days done a considerable business with first mortgages on new properties.

Mr. Lodge reports real estate business very brisk with him, and says that in the Twenty-sixth Ward particularly large numbers of properties are changing hands. His conveyancing business is keeping his able assist-

ant, Mr. H. Lumson, fully employed. This gentleman is considered by the profession to be one of the ablest in the business.

E. S. Bortel & Co., 2213 to 2217 Chestnut street, have been established since 1873 as tin, slate and gravel roofers, and in 1880 commenced the manufacturing of all kinds of roofing and sheathing materials, with which they have been very successful, their business having monthly increased, and they now find themselves very busy, employing upwards of thirty hands making, as one of their specialties, a waterproof sheathing, which is patented, and of which they have the exclusive sale in this section of the country. This house is the only house in Philadelphia that does all kinds of roofing, and have a reputation amongst our foremost architects and builders in the city.

Rice & Gilbert, 2150 Ridge avenue, real estate and insurance brokers, say that, although July and August are looked upon as being the dullest months of the year, they find themselves unexceptionably busy, and have been so since the spring, and are looking for a heavy business for the next three weeks. They are negotiating some large sales, which they anticipate putting through right away. Renting with them is holding its own, and collections are good. They remark that a noticeable fact with owners of old properties is that they ask too much for them, both for rental or sale, and at the same time forget the fact that they lack the modern improvements of new houses. If the owners would fix them up, making them more in accordance with the times, they feel sure they would not only rent better, but realize good prices.

Building Permits.

Two-story brick house, 18 ft. by 36 ft., East side of Tulip street, North of Venango, to John Joseph Cragin, Tulip street, above Venango.

Interior alterations, Consolidated National Bank, Third street, above Callowhill, to George Watson & Son, 905 Marshall street.

Two-story dwelling, 15 ft. by 36 ft. 4153 Orchard street, Frankford, to Joseph Bird, 1106 Hunter street.

Three-story dwelling, 15 ft. by 36 ft., 4155 Paul street, to Joseph Bird, 1106 Hunter street.

Third-story addition and one-story brick kitchen, former 14 ft. by 26 ft., latter 14 ft. by 16 ft., North side of Locust, between Thirty-ninth and Fortieth streets, to J. D. Huston, 2433 North Fifth street.

Seven two-story brick dwellings, each 15 ft. by 40 ft., North side Franklin, between Fifty-first and Fifty-second streets, to Wm. R Nicholson, 623 Walnut street.

Three-story stone dwelling, 39 ft. by 54 ft., Wayne avenue, between Harvey and Walnut Lane, to B. P. Evans, Knox street, below Manheim, Germantown.

Five two-story brick dwellings, each 15 ft. by 40 ft., West side of Fiftieth street, between Kershaw avenue and Paschal street, to Frederick L. Nicholson, 3825 Fairmount ave.

Three-story brick dwelling, 16 ft. by 50 ft., South side of Norris street, between Second street and Moyamensing avenue, to Weed & Smith, 1028 Cross street.

Two-story brick addition to 527 York street, between Fairhill and Reese streets, 13 ft. by 6 ft., to Patterson & Norton, 933 Dauphin street.

Fourth-story brick addition to building, 721 Walnut street, 20 ft. by 40 ft., to Robert H. Touh, 3230 Lancaster avenue.

Two-story back kitchen, 2614 Edgemont street, 14 ft. by 16 ft., to J. C. Stackhouse, 2926 Rohner street.

Nine feet high addition to building, Hewston street, between Gaul and Cedar, to Alexander T. Richards, 1512 Otis street.

Alteration to glass house on Salmon street, between Lehigh avenue and Huntingdon street, building 70 ft. by 100 ft., 19 ft., high, to Rohrbacker and Harmon, per A. T. Richards, Salmon street, below Lehigh avenue.

Three-story brick building, 1621 South street, 17 ft. by 80 ft., to Michael McNamara, 1619 South street.

One-story brick house, 17 ft. by 30 ft., East side of Twenty-third street, between Hare and Brown streets, to Union Passenger Railway Company, Twenty-third and Brown streets.

Two-story house, North side of Dudley street, between Ninth and Tenth streets, 14 ft. by 48 ft., to William J Cox, 1439 Carpenter street.

Two-story brick house, North side of Richfield street, between Twelfth and Thirteenth street, 14 feet by 38 feet, to Hiram A. Miller, 1210 Ridge avenue.

One store and brick dwelling, East side of Twentieth street, between Mountain and Morris, 18 ft. by 46 ft., to John Gibbon, 1323 Reed street.

A brick back building, West side Tenth, between Spruce and Pine streets, 14 ft. by 10 ft., to Gubbert & Keeper, 1308 Rodman street.

One side brick building, 5 ft. by 7 ft., in addition to kitchen, 4½ ft. by 12 ft., West side of Broad street; size of building, 54.6 ft. by 127 ft., to John T. Sanders, 2140 North Eleventh street.

Nineteen three-story dwelling houses, one with store, West side Taylor, between Brown and Parrish streets, 15 ft. by 35 ft., to James H. Lyons, 17 North Ninth street.

Front alterations South side Callowhill street, between Third and Fourth, to Haibach & Auchter, Twenty-sixth and Thompson streets.

Alterations to store front, brick, Northwest corner Thirteenth street and Girard Avenue, to Otto T. Wolf, architect, 419 Walnut street.

One two-story brick store, Loffly street, between Mechanic and Robinson, 15½ feet by 30 feet, to Charles Dougherty, corner Terrace and Mechanic streets.

Two three-story houses, 16 ft. by 42 ft., Ridge avenue and Balton streets, to Harry Rowland, 463 Green Lane.

One two-story store and dwelling, 17 ft. by 53 ft., Twenty-seventh street and Susquehanna avenue, to Samuel Stewart, 2110 Dauphin street.

One two-story house, 14 ft by 31 ft., Susquehanna avenue and Thirtieth street, to same party.

Eight two-story houses, 13 ft. by 28 ft., Taney street, above Girard avenue, to J. L. Reaves, 1609 Mt. Vernon street.

Eleven three-story houses and two stores, 16 ft. by 42 ft., Lawrence street, above Lehigh avenue, to F. Lambrecht, 2620 North Fifth street.

One three-story house, 38 ft. by 40 ft., Thirty-first and Springfield streets, to W. C. Mackee, Chestnut Hill.

One three-story house, 44 ft. by 65 ft., Wayne, below Tulpehocken street, to same party.

One alteration, 16 ft. by 30 ft., 1038 Charlotte street, to George Kessler, 1332 Marshall street.

One two-story building, 14 ft. by 16 ft., 1335 Catharine street, to Duross & Welsh, 758 South Broad street.

One four-story store, 31 ft. by 71 ft., Eighth and Filbert streets, to Rea and Riley, 627 Filbert street.

One-story building, 40 ft. by 40 ft. Sixteenth and Cherry streets, to Era & Pennroy, 1907 Wood street.

One three-story house, 18 ft. by 52 ft., 3306 North Twenty-first street, to H. G. Schultz, 2633 Germantown avenue.

Three-story addition, 47 ft. by 196 ft., 308 and 310 Walnut street, to Jacob L. Myers, 1315 Sansom street.

One two-story house, 26 ft. by 26 ft., 870 North Ninth street, to H. J. Lloyd, 710 Walnut street.

One three-story house, 16 ft. by 26 ft., Bowen, above Seventeenth street, to W. W. Rea & Sons, 1815 Frances street.

Two bathhouses, 8 ft. by 8 ft., 801 and 803 Barnett street, to W. W. Rea & Sons.

Seven two-story houses, 13 ft. by 41 ft., Merion avenue and Forty-sixth street, to Steinmetz & Thompson, 844 Union street.

One four-story store, 29 ft. by 70 ft. Seventh, above Cherry street, to Kister & Orem, 129 South Seventh street.

One four-story factory, with engine and boiler-house attached, 95 ft. by 41 ft., Thirty-second and Spring Garden Streets, to Kister & Orem.

City Councils.

At a special meeting of Common Council Wednesday, President Charles Lawrence in the chair, the following Common Council bills were passed finally:

Appropriating $40,779 to the Board of Education for the erection of a school house at the southwest corner of Twentieth and Catharine streets, and accepting M. C. Mullin as the surety of Charles O'Neill, contractor for the erection of the building.

To purchase, for school purposes, the lot of ground and the buildings thereon, on the east side of Fifth street, about 36 feet north from German, adjoining the Meredith school property. The size of the lot is 19 feet 6 inches by about 126 feet, and the price $10,000.

To purchase for school purposes the lot of ground at the southeast corner of Twenty-third and Federal streets, adjoining the Landreth school property. The price is $2,500 in cash, together with a lot owned by the city on the south side of Federal street, 150 feet east of Twenty-third.

To approve the contract and sureties of John S. Dutton, for the construction of a main sewer on Sixteenth street, from a point 188 feet north of Mifflin street, to Wharton. The sureties are Charles K. Merklee, Francis Martin and Thomas McCullough.

To authorize the purchase of a lot of ground on the east side of Thirteenth street, between Fremont and Richfield, Twenty-eighth Ward, for school purposes. The size is 120 feet by 154 feet 8 inches, and the price $10,000.

To authorize the purchase of a lot of ground, for school purposes, at the southwest corner of Crawford and Krail streets, Twenty-eighth Ward. The size is 133 feet 8⅜ inches by 128 feet 11⅛ inches, and the price $3,000.

To revise the lines of Philadelphia street, from Susquehanna to Dauphin.

To strike from the city plan Retta street, between Sumac and Jennette avenue, Twenty-first Ward.

Permitting property owners to grade and macadamize that portion of Stenton avenue, between Willow Grove avenue and Evergreen avenue, at their own expense.

Appropriating $2,608 to the Water Department for the year 1886, to pay certain twice-paid, over-paid and paid in error water rent and pipe-laying bills.

An ordinance to approve the surety of R. A. Malone & Son for the construction of an iron bridge over Market street at a cost of $271,000 was concurred in, and the City Solicitor was instructed to take the bond of the Philadelphia Trust and Safe Deposit Company for $30,000, provided the company using the cable road shall pay to the city the extra cost of constructing the slot for the cable, according to a correct valuation to be made by the Chief Engineer and Surveyor. An ordinance transferring $3,540.93 from the old expense item, to pay salaries and other incidentals of the new Twenty-fifth District Police Station, created March 23, 1886, was

approved. The sum of $2,608.39 was also voted to be deducted from the annual appropriation to the Water Department, to pay certain twice-paid, over-paid and paid in error water rent and pipe-laying bills. An ordinance was also approved appropriating $515 to the Department of County Commissioners for the Pennsylvania Society for the Prevention of Cruelty to Animals, the sum being a balance due the society in excess of the appropriation for 1885, the fines belonging to it and now in the city treasury having been paid therein by various magistrates.

The widening of Pennsylvania avenue was the subject of a good deal of discussion last week. The widening will cost $30,000. Eleven buildings in that locality will be demolished.

The Electrical Committee of Common Council on Tuesday decided in favor of extending the underground electric light wires on North Broad street from the Reading Railroad to Lehigh avenue, and thence to the Twenty-second District Police Station, at Lehigh and Park avenues; also in favor of locating an electric light at Broad street and Lehigh avenue. A negative report was made upon the resolution to permit the Postal Telegraph Cable Company to lay underground wires, as it was decided that an ordinance was necessary to grant the permission.

It is proposed to expend $15,000 for improvements on Passyunk Square, and to expend $9,375 for a lot for school purposes at the southwest corner of Sixteenth and Moore streets.

The Electrical Committee of Common Council met Wednesday afternoon and decided to report favorably the Select Council resolution to authorize the Chief of the Electrical Department to lay underground wires and fixtures on Broad street from the South side of the Reading Railroad to Lehigh avenue and East on Lehigh Avenue as far as the sum of $400 will pay for the same and place an electric light at Broad Street and Lehigh Avenue.

The Select Council resolution authorizing the Board of Highway Supervisors to issue a permit to the Postal Telegraph and Cable Company to lay underground wires and cables on Third street from Chestnut to Market, Market to Thirteenth, Thirteenth to Cuthbert to Fifteenth, Fifteenth to Market, Market to Lancaster Avenue, thence to Fifty-second, and on Fifty-second to the county line, as authorized by ordinance approved March 24, 1885, was ordered to be reported with a negative recommendation on the ground that this company has been authorized by ordinances to lay these wires provided the work was done within a certrin time. The time expired and the work was not done; therefore the committee held that the passage of a new ordinance would be necesarry.

Councils' Committee on Surveys met Wednesday afternoon and opened bids for the construction of a number of branch sewers. The proposals having been scheduled, Chief Engineer Smedley awarded contracts to John Noonan, J. M. Donnelly, M. C. Hong, Thomas McCann, Michael Sammon, John McParland, T. P Smart, James Kane, W. A. Hendel, W. H. Yost, W. B. M. Conklin. F. P. Murray, Jr., and P. C. & T. McEntree, who offered to do the necessary work at prices ranging from $1.75 to $2.90 per lineal foot. Several other contracts were not awarded, the Chief Engineer reserving his decision in the matter. The committee approved the appointment by the Chief Engineer of George M. Heller as a draughtsman to be employed in connection with the building of the Market street bridge, at a salary of $100 per month. On motion of Captain Thornton, the committee also approved the construction of a sewer across Twenty-second street, at Walnut street, at private expense. Bills amounting to $24,114,40 were ordered to be paid.

Councils' Committee on Highways met at the Highway Department to open bids. Previous to beginning the work for which the meeting was called, Councilman Monroe, of the Third Ward, said that, at a previous meeting of the committee, and in his absence, a member had stated that he had withdrawn his objections to the payment of Contractor Mack's bill for paving in the Third and Fourth Ward, which statement he wished to deny. The following contracts were awarded: Paving Diamond street from Twenty-third, and Locust from Fifteenth to Eighteenth, with asphaltum, to the Vulcanite Paving Co., at $2.50 per yard; Long lane from Mifflin street as far northeast as can be done for $15,000, with granite blocks, T. P. Smart, $2.08 per yard; macadamizing Moyamensing avenue from Eighth street to Penrose Ferry Bridge, M. C. Hong, 99 cents per yard.

t. t.—Terre Tenant.
S.F.—Scire Facias to revive Judgment.

Sum C.—Summons in Case—A form of action invented to meet all civil cases, the form of which is not specially provided for.

Where there are no figures to indicate the amount of the judgment, the damages have not been assessed.

The first name in each line is that of the judgment debtor.

An asterisk (*) denotes judgment confessed or bond and warrant conditioned.

The figures 1 2 3 and 4 immediately after the name of the plaintiff indicates the number of the Court. The letters D. M. J. and S. after the number of the Court indicate the Term as D., December Term, M., March Term, as J., June Term and S., September Term.

An examination as to the nature of judgments and suits will be made for subscribers without extra charge on application.

Real Estate at Auction.

—The strike on the Gould system cost the railroad company about $3,500,000. The loss in wages was $1,000,000. The General Board of the Knights of Labor expended $100,000.

—Investors have been satisfied with the returns from building enterprise. The rate is not 10 to 15 per cent., as formerly, but it is sufficient to encourage additional investments from men of means. The Drexels have done well in the southwest, and do not intend to stop. Building operations are to be pushed in the northwest by the old standbys, and, it is rumored, by two or three new men, who see in this channel of investment an excellent opportunity for permanent investment.

Board of Health Meeting.

At the Board of Health meeting on Monday, General Sickel occupied the chair. Major Veale, Health Officer, presented his report of receipts and expenditures for the month of June. The receipts were $5,236.67 and the balance $4,734.67. The Municipal Hospital report for the month showed that no deaths had occured in the institution and that two patients were remaining, one suffering from rubeola and the other from typhus fever. The monthly reports of the vessel inspectors were also presented and showed that twenty-one coasters had been examined and their cargoes found free from infection. The Lazaretto Physician reported that twelve vessels had been allowed to pass up the river during Sunday and Monday.

The Sanitary Committee, "to whom was referred the communication of Dr. Thomas S. K. Morton relative to the occurrence of intestinal disorders, supposed to have been caused by the use of impure water taken from the Delaware along the city front by vessels while in port," submitted the following report upon the subject, which was adopted:

"The water of the Delaware river along the city front is, without doubt, very impure, as numerous sewers discharge their contents into the docks, and, besides, various impurities from the wharves and vessels are constantly deposited in the water. Sewage and other foul matters escaping from the docks are washed up and down the line of the wharves, rendering the water more or less impure, and its use for drinking purposes detrimental to health.

"It is hardly to be presumed that any one of ordinary intelligence, knowing these facts, would secure a supply of water from this source, or knowingly use such water for drinking purposes. Your committee is not convinced that the practice is a common one. However, it may be of service to warn captains of vessels of the evil consequences of such a practice, and, accordingly, a circular has been prepared as a matter of caution.

"In regard to the allegation that the employés of Stephen Robins & Sons have no available supply of drinking water other than that procured directly from the Delaware river, your committee refers to the report of the Medical Inspector, made by their direction, which states that an artesian well, 500 feet deep, has been constructed on the premises, in order to get cool water for the workmen, and thereby avoid the use of iced water, which they had found to be unwholesome when copiously used by the men in their greatly heated condition.

"The employés used this water for awhile with benefit, but they again demanded iced water, which was furnished them. There is no necessity for any one drinking river water unless he should prefer so to do. Your committee offer the following resolution:

"Resolved, That the action of the Sanitary Committee in issuing a circular on the above subject be approved; and also, that the employés of Messrs. S. Robins & Sons be cautioned against the use of iced river water, which is a practice detrimental to their health.

"Resolved, That the committee be discharged from further consideration of the subject."

At a meeting of the Board of Health on Tuesday a petition was submitted by Lieutenant Blankley, of the Twenty-first Police District, on behalf of thirty-six citizens, complaining of an offensive odor at the Dental Department of the University of Pennsylvania, arising from the incineration of flesh in the basement of the building. The complaint was referred to the Medical Inspector.

A complaint concerning the non-removal of garbage was received and referred to the Highway Commissioner.

GUARANTEE

Trust & Safe Deposit Co.

CAPITAL, - - $1,000,000.

316, 318 and 320 Chestnut Street,

Rents Safes in its Burglar Proof Vaults at $9 per year and upwards.

BOOTS AND SHOES,
BUT NOT SLIPPERS.

We wish to call the attention of the public to the fact that the DAY SEWED SHOE does not mean any kind of slipper.

The process is not applied to any single sole foot-wear, but to the manufacture of all kinds of BOOTS, SHOES, GAITERS and LOW SHOES used for out-door or steady wear. The dainty luxury which many cannot, and many should not wear—the "pump-sole" or "turned-sole" slipper—is for sale at the Day Sewed Shoe Store, but it is not our make. This fact has been carefully impressed upon our sales-people, but they are not always reminded of it in making a sale. We therefore take this method of explaining and providing against any mistakes. WHEN YOU BUY A THIN-SOLED HOUSE-SLIPPER YOU DO NOT GET A DAY SEWED SHOE.

THE DAY SEWED SHOE
MFG. CO..

Trouble Brewing.

There is trouble brewing in the Real Estate Exchange. It was felt and seen at last Friday afternoon meeting, which was called to elect a board of directors and officers. No election of officers was reached, but only two committees were appointed, one to formulate a set of by-laws and another to apply for a charter. The meeting adjourned without further action until September.

The trouble brewing is a vital one and calls for a little consideration. It is alleged a clique has been secretly formed to control the Exchange which may divert it from its original purpose, in fact turn it into a grindstone to grind the axes of the certain few who constitute the clique.

Those composing it, it is alleged, propose to turn the Exchange into a corporation for profit, to do a sort of real estate title business, buy and sell real estate and insure against liens, etc., and in general run the Exchange for profit on business to be done under its control and charter.

This scheme is in direct antagonism to the original plan and purpose and it was made apparent when the time came to vote for directors and officers. A ticket of thirteen had been agreed upon which was to be supported and consisted of the following names: Elwood Becker, Frank Craven, W. F. Deakyne, Samuel T. Fox, Geo. W. Hancock, J. T. Jackson, T. M. Montgomery, W. F. Potter, John J. Ridgway, James H. Stevenson, Fred'k Sylvester, B. F. Teller, H. C. Thompson.

Meanwhile a vigorous canvassing for proxies had been started in the interest of certain men who were interested in diverting the Exchange from its original purpose, and an opposition ticket made its appearance, of which six were elected by the "gang" and seven by the friends of the original scheme.

Persons, it is stated, were prevailed upon to consent to be represented by proxy, under the impression, or assurance, that they were supporting the original scheme.

A hot debate arose last Friday when the real purpose of the would-be wreckers was uncovered, and resulted in the adjournment for the summer, after the election of the following ticket for Board of Directors. The votes cast for each are attached: D. J. Myers, Jr., 1,646; Ellwood Becker, 1,461; Jno. J. Ridgway, 1,386; Geo. W. Hancock, 1,386; Fred'k Sylvester, 1,368; Wm. F. Deakyne, 1,346; Henry K. Fox, 1,338; James H. Stevenson, 1,315; Joseph H. Chubb, 1,274; B. F. Teller, 756; D. S. Lindsay, 650; Jas. G. Francis, 600; John M. Erickson, 440.

The directors who secured proxies under the original plan feel that they have been put in a false position and protest against the proposed action. The original scheme submitted at the meeting held in the Orphans' Court, on June 21st, reads as follows:

"To create in the city a centre for dealings in real estate, and to establish a room for selling real estate and securities at auction—and furnish a general meeting room for real estate dealers and brokers, to unite the various real estate and building interests in the city and adjacent counties, to adjust controversies between members and to furnish full information by collecting statistics in regard to real estate and building matters, and preparing and keeping files of maps and other records relating to real estate and subjects connected therewith. This will include information of all legislative acts of the city and State governments, reports of the various committees on taxation, street and other improvements, and of awards and assessments affecting the realty in the city and neighborhood.

"The objects and aims of this Exchange are to secure united and harmonious action on the part of all persons interested in any way in real estate; to inculcate just and equitable principles of business; to oppose objectionable legislation and to support or suggest that which is necessary or desirable; to gather and supply valuable statistics and other information as to all matters affecting real estate interests; to make and strictly enforce just, equitable and uniform rules as to commissions and fees in real estate transactions; to simplify and improve the present inefficient method of obtaining the standards of value of real estate, and to provide for an inexpensive and speedy settlement of disputes and difference in such transactions by means of arbitration.

"The corporation to consist of all original subscribers to the capital stock and all persons to be hereafter elected members to whom ten shares of the capital shall have been transferred. Any respectable person may be elected to membership. Firms or corporations, as such, cannot be members.

"No person to whom stock may be transferred shall be entitled to any of the rights and privileges of the exchange and auction rooms, until he has been elected a member thereof by the Board of Directors, and no person shall hold at one time a greater or less number than ten shares of the capital stock.

"Annual members shall pay into the treasury a sum equal in amount to ten per cent. of the par value of a full membership certificate."

The clique propose to practically ignore this and to turn the Exchange into something else—a money-making scheme. In short, the clique proposes to invade, if they can, the business of the individual real estate dealer in the buying and selling of real estate. It is on this point that differences have arisen. The buying and selling of real estate may develop itself, and no doubt will, in time, as a feature of the Exchange, but the conservative element do not desire or propose to adopt this feature at this time, though intending to secure a charter which will allow it.

Now it is, or, it ought to be for the stockholders to say whether they will have their Exchange run by a clique, to do business for profit by seeking to invade the business of individuals, or whether the original, broad, liberal and simple scheme shall be carried out.

The question resolves itself into simply this are the real estate people of Philadelphia to be handled by a clique who have axes to grind and selfish purposes to accomplish. Are the real estate people to have a Real Estate Exchange of their own forming, or not? Are the real estate people to be asked to make a club to be hammered over their own heads, in the shape of an Exchange that prefers to go into the real estate business and corporate business, similar in character to some of our powerful trust concerns? Are they to help build up a powerful competition, to be hampered and oppressed by it? The conveyancers have gone through this; do the real estate people want to put themselves in such a hole?

In short, who is to rule the new Exchange, a clique or the stockholders? Real estate dealers have each, their, established businesses, making from $1,000 to $10,000 per annum and more. Are they to be expected to throw a part of their business into the hands of an Exchange and be satisfied with the profits that might accrue to them on ten shares of stock, costing $500? This is communism with a vengeance. This outmosts Herr Most himself. Is a dealer of ten, twenty or thirty years experience to surrender to a clique who have, perhaps, not been in business that many month, or, perhaps weeks? who have no genuine identity, perhaps, with the real estate interests, who have but a smattering of requirements for it?

The fact of the matter is, the stockholders, who have so promptly and sincerely come forward with their subscription and cash, need to at once look into this matter. THE REAL ESTATE RECORD has no axe to grind, no friends to reward, or enemies to punish, but has only the best interests of the coming Exchange at heart. But it now warns the stockholders to look into this scheme to divert the Exchange from its original purpose, set forth above. It urges that they at once recall their proxies, until they can get at the bottom of this unworthy scheme. Some of our very best real estate operators refuse and will continue to refuse to co-operate at present. Nine-tenths of those who have come in have come in honestly, and unless matters are openly and honestly conducted they pull out. Some of the clique last Friday expressed themselves in a very lofty manner, and declared that they were now practically independent of the stockholders, having secured their proxy.

Gentlemen stockholders, your interests as well as your rights are in danger. See to it at once that you are protected against betrayal. See to it that the Committee to Secure a Charter secures the proper kind, and with the proper limitations.

—The department of Agriculture at Washington estimates the present crop of wheat at 415,000,000 bushels. Anticipating the loss occasioned by the hot and dry weather of June and July in the Western States at 15,000,000 bushels, the yield would then exceed that of a year ago by about 43,000,000 bushels.

—The property on the Southeast corner of Fourth and Chestnut streets has been purchased by a syndicate of capitalists for $140,000, and a structure similar to the Wood building, on the Southwest corner, will be built on the site. The building will have a frontage of 54 feet on Chestnut street and 84 feet on Fourth street. All the present occupants have received notice to move, and the demolition of the present building will be begun as soon as possible.

JOHN N. GALLAGHER, Prop'r.

Refers with permission to William M. Singerly, Proprietor of Phila. "Record."

PHILADELPHIA, MONDAY, JULY 19, 1886.

THE Philadelphians didn't get away with the whole of Chicago, after all. Mayor Harrison practically vetoed the La Salle Street Tunnel steal, and the North Side Railroad Company will have to take what it can get.

QUITE a number of real estate operators and conveyancers are at present enjoying themselves at seaside and mountain resorts, forgetting all about contracts, rent, conveyances, plumbers' bills and empty houses, and all other annoyances which go to make up the life of the real estate men.

FOR the first six months of the year over 3,600 dwellings have been projected or completed, which looks as though we would build six or seven thousand houses during the year. For every two three-story houses we build, five two-story houses are built. The disproportion will increase.

CAMDEN real estate is looking up. Nearly all the agents over there report quite an improvement in inquiries for houses, particularly with reference to purchasing. The terms offered are very liberal, and inducements are being held out, which results in an increased number of sales, as compared to leases.

THE difference between Philadelphia and Brooklyn is that notwithstanding the limited area of Brooklyn's suburban district, she means to make the most of it, and is consequently granting cable and elevated railroad franchises with an unstinted hand. Brooklyn is doing this to furnish transportation facilities to her rapidly increasing population, whereas Philadelphia, with her magnificent suburban area (much of it surpassing in beauty that of any other city on this continent), and with capital begging for investment, refuses to grant a franchise for an elevated railroad, when even the school children realize its necessity.

MORE inquiries have been made in West Philadelphia real estate offices during the past week for properties than have been made during the past six weeks. Nearly all the agents and dealers report quite an improvement in inquiries during the past few days, and a larger number of sales are in negotiation now than for a good while past. There is no particular reason given for this rather unexpected but gratifying activity. As a consequence, real estate people are in good spirits and are looking for a ready disposal of all the new houses now nearing occupancy.

MODERN cottages are multiplying in number and in devices and appliances to secure comfort. The cottage of to-day is far, far in advance of the cottage of twenty-five years ago. In fact there is very little relationship between them; cost has been reduced and luxuries have been piled on conveniences. Architectual skill and decorative art have well nigh exhausted themselves in their combined effort to render cottage surroundings and life attractive and luxurious. The modern cottages, while cottages in name, are scarcely so in fact. They are pretty little palaces of comfort, and models of beauty. They afford great opportunity for the display of taste and talent and are destined to multiply in number, size and beauty.

SUBURBAN residents are entirely too neglectful of their garden and lawn paths, which are often so muddy that it is unpleasant to walk on them. A concrete walk, made of coal tar and sand, and gravel mixed, is not only inexpensive but remains dry and compact during the winter, besides which, it will keep the paths free of grass; add to the comfort of the family a hundred times its cost; does not get soft in the summer, nor slippery at any time.

A barrel of coal tar will make seventy yards of concrete, which should be laid three inches deep. The tar will take in a great deal of gravel and sand, which should be added as long as the tar will take it in. It is best to lay it in warm weather.

OWNERSHIP of property is not always as comforting a condition to be in as it appears. Philadelphians complain a great deal about their $1.85 rate and about high assessments, but New Yorkers seem to be in a much worse condition. The cry has been growing for years and at last has come to the point where an organized opposition is likely to be developed before the State Assessors. On last Thursday the State Assessors met the Board of Tax Commissioners to talk over the annual tax levy to be made in the city of New York. In hundreds of cases properties are assessed as high as 30 per cent. more than their actual valuation. The cause for the present movement is that the State Assessors have added over $112,000,000 of valuation on property in New York alone. Instances are cited by the the score where the owners realize nothing out of rents. Philadelphia has not yet reached that point. It would be well, however, for our Real Estate Exchange to take this subject of taxation into careful consideration.

THE ship Ferdinand, loaded with salt, consigned to George B. Kerfoot, was unable to find suitable wharfage with a sufficient depth of water between Race and Callowhill streets. She was finally docked in the slip at the lower side of Race Street wharf and when the tide fell she slipped off the mud and narrowly escaped crushing into the steamboat Republic. The above statement is certainly very discreditable to our city authorities. A city of the size and the commercial importance of Philadelphia should at least be able to afford the necessary facilities for loading and unloading vessels consigned to its merchants. Complaint after complaint has been made that our slips on the Delaware River front are rapidly filling up and yet nothing has been done. If the Board of Port Wardens is unable to obtain the necessary relief they should resign in a body to make room for more competent men.

PHILADELPHIA COUNCILS have certainly shaken whatever fogy notions they might have had, and are going into the work of improving the city with an enterprise which is deserving of credit. The only regret to be expressed is that we have so little money to expend in this direction. Our city certainly needs a great many more improvements than we can possibly afford, in the way of streets, sewers, water-pipes, electric lights, river front improvements, and in two or three other directions. All this will come in due time. The right spirit exists. Our Councilmen see that it is a penny wise and pound foolish to save money by parsimony. The public will endorse all the expenditures which have been made, but only will demand that the money appropriated be judiciously expended. We will have a new almshouse, new bridges, and a brand new railroad, which will not cost us a cent, and which will kill nobody. We will have newly paved streets, a new intercepting sewer some day, and we hope purer water, and let us hope cleaner streets.

FORTY-TWO AND THREE-FOURTHS miles of conduit laid in the city of Chicago in the last three years contain 1,900 miles of wire.

EVEN the granite blocks for city pavements are open to objection. There is room for a genius to invent a pavement which will answer all requirements. Cobblestones must go, and if granite blocks will not answer what can be used in the way of stone? Artificial pavements are opened to numerous objections, one being the high cost. There is need for a new kind of pavement in the larger cities, and especially in Philadelphia, which will stand the terrible hammering and ceaseless traffic to which it is necessarily subjected. No amount of hammering seems to be sufficient to overcome the subsequent hammering of heavy wagons. Then the frequent tearings up and careless replacings adds another element of weakness for which there seems no remedy. The crown of the street is a complete thing in itself and ought to be made a perfect job at the outset and ought not to be turned up afterwards, but the requirements of the hour forbid it. There is no telling what week or day the best pavement will be torn up for water, gas or electrical purposes. A new pavement is certainly needed. The demand for it comes from more cities than Philadelphia. Everyone remembers the old style wooden pavement of a few years ago, concerning which so much was promised, but they were soon transformed into mud puddles on wet days and dust holes on dry ones. When granite blocks were suggested, everyone thought the ideal pavement was reached, but here we are to-day finding fault, and good fault, with this system. Who will be the inventor of the new system.

THE daily newspapers contain frequent announcements of the movements of capitalists. A few days ago it was stated that a half-dozen English capitalists had arrived in Alabama, where they proposed to invest large sums of money in mining and iron making operations. A local paper a few days ago made mention of the fact that six Eastern capitalists arrived at Pittsburg, in a special car, for the purpose of investing some $6,000,000 in that city and locality. They have gone ostensibly to see natural gas and to learn more of it in detail. Frequent mention has been made recently of movements of Eastern capitalists to Western States for the purpose of investing idle money. Railroad operations do not afford as much opportunity to idle capital now as a few years ago. In consequence the possessors of money are seeking new channels and are singling out the most promising industries throughout the West and South. This decentralization of capital is not only necessary from a financial standpoint, but from an economic one as well. It is far better for Eastern money-lenders to invest money in reproductive channels throughout the West, than to send it there and loan it at a high rate of interest. This movement of capital and capitalists West will, of necessity, increase. There are ten opportunities in the newer sections of country for a large amount of capital to one in the East where competition has already pretty well filled the field. Natural gas in Pennsylvania and iron ore and coal in Alabama, and manufacturing enterprise throughout the Western States are attracting a great deal of money and the end will be the development and extension of new industries and the multiplication of opportunities for capital and labor.

THE advent of the Baltimore and Ohio Railroad Company into this city opens up new opportunities for dealers in suburban properties; the sharp fellows are already looking around for chances. We give a full list of stations on the new Baltimore and Philadelphia branch to Canton.

Work on the new station has not yet been commenced.

THERE never were so many cases of stomach trouble in this city as there have been during the past year. Inflammation of the stomach and intestines, and indigestion in its worst form, has not only been quite common, but in many instances the cases have baffled the skill of our best physicians. Dr. Morton quite recently called the attention of the Board of Health to the numerous cases of inflammation of the stomach and intestines on shipboard, which were caused by the use of water taken from the Delaware river, and upon investigation the Board of Health considered the point so well taken that it issued notices to captains of vessels, warning them against its use.

For every case of enteritis or gastro-enteritis caused by the drinking of Delaware river water there have been thousands of the most aggravated cases in this city caused by the filthy water of the Schuylkill, and not a word of protest or warning has been uttered, either by the medical fraternity of this city or the Board of Health. The self same pollution of the water of the Delaware, which has made it so dangerous to drink, is being daily carried on, *ad libitum*, as to the water of the Schuylkill. True, an effort has been made to restrain the mills, etc., lying within the jurisdiction of our Courts, but what influence can prevent its pollution before the water reaches us?

The Sanitary Convention held here during the month of May clearly demonstrated the evils produced by drinking the Schuylkill river water. Dr. Charles Smart, Major and Surgeon of the United States Army, in his very able paper, read before the convention, stated that Philadelphia's typhoid rate during the last ten years had been 66 in each hundred thousand of its population; or, in other words, 4,400 persons had died of typhoid fever in Philadelphia who would not have died had the Brooklyn rate of 15 to each 100,000 prevailed, and that over 50,000 people (and here is where the gastric trouble comes in) suffered from a dangerous and debilitating illness who would have escaped had Brooklyn's causes operated on them instead of those of Philadelphia.

The sewage of a population of 350,000 people living above the Fairmount dam is enough to render the waters of a river of five times the capacity of the Schuylkill extremely poisonous and unhealthy, and yet our people must drink this filth, and seem helpless against it. We respectfully submit this water question to the intelligent and energetic members of our new Real Estate Exchange, and we trust they will come to the rescue of the good people of this magnificent city.

OUR Board of Health deserves credit for its watchful care over the public health. No doubt much unnecessary complaints are made to it, but this is unavoidable. It has caused the removal of hundreds of nuisances directly and indirectly. The citizens, real estate owners and renters are creditably co-operating with the Board in its efforts to put the city in excellent condition.

THE effort to establish a Real Estate Exchange has already developed good results in stimulating a more fraternal spirit. There is but little, if any, occasion for asperities or antagonisms, and where they do arise they can be more quickly rubbed out under the congenial associations of an Exchange.

THE architects report fair activity in their profession.

BUILDERS are confident that the next five months will cap the climax.

A DOZEN good-sized real estate transactions were closed last week.

THE supplies of good building lumber, lath, shingles and cements are increasing, but no changes are noticeable in prices.

FIFTY THOUSAND students graduated from the business colleges in the United States during the last year—a greater number than from the theological, medical and law colleges combined. The boys are bound to have practical education, if they have to pay for it.

About 25,000 deaths from typhoid fever occur in this country annually, and this represents fully 150,000 cases of disease. The 125,000 persons who recover lose six weeks out of their lives, and carry, perhaps, some vestiges of the fever's influence for years.—*Medical News.*

AND Philadelphia's typhoid rate, according to Dr. Smart, Major and Surgeon of the United States Army, is owing to the very impure drinking water—66 in every 100,000 of the population.

THERE are ten or twelve thousand acres of land in farms and neglected fields around Philadelphia, which are being held for building purposes. As farms their cultivation does not pay. The land is not yet needed for building purposes, perhaps but a small portion of it will be wanted for years. But if it was thrown into the market, it would be better for it. It is held at all sorts of prices. An occasional inquiry from a real estate dealer serves to swell the heads of the owners for months. They imagine all Philadelphia is going wild after their particular acres. If the supply of real estate for building purposes could be ascertained, it would exert a marked effect.

To define and locate the supply is necessary. There may be a dozen sites that will suit a purchaser, but at present the purchaser has no easy way of ascertaining the amount of desirable property that might suit him. Philadelphia covers 129 square miles; two-thirds of this area is available for building, yet how much of this is known of in real estate circles? Real estate operations could be greatly multiplied in this city to the advantage of buyer, seller and agent, and the way to begin is to schedule the supply of real estate.

—Foreclosure proceedings on a mortgage covering more than 30,000 acres of land in the townships of Mullica, Hamilton and Galloway, in Atlantic county, N. J., on which 300 families are settled, have been commenced.

This tract is in the shape of a horseshoe, and surrounds Egg Harbor City on three sides. German settlers bought the land in parcels from township officials, not knowing that there was a mortgage of $40,000 against it. In some cases the townships gave warrantee deeds, and in these cases the settlers will have remedy against the townships; in other cases they will be compelled to make the best terms they can.

REAL ESTATE.

A Correction.

In quoting, last week, from that prosperous New York weekly, *The Builder*, we inadvertently referred to it as a monthly. *The Builder* has been a weekly paper since January last.

Charters Granted.

Ashland Building Association, of Philadelphia; capital, $1,000,000. Philler Building and Savings Association, of Reading; capital, $1,000,000. The Lehigh Valley Trust and Safe Deposit Company, of Allentown, with a capital of $250,000.

A Live Architect.

Among the live architects of this city who know a good thing when they see it, and are consequently able to exact full measure in the interests of their clients, Mr. Charles F. Collom, 909 Walnut street, stands preeminent.

Mr. Collom believes in live men and live newspapers, and is one of the few architects of this city who believe in advertising; consequently business was never better with him than at present.

He has under way now the Germantown Almshouse, to cost $85,000; Grand Army building, Post 14, to cost $20,000; extensive repairs to Mr. Barger's house, Cooper street, Camden, and several large houses in Oak lane.

New Church Building.

Ground has been broken at the Southwest corner of Park avenue and Norris street for a new Methodist Episcopal Church. The new edifice will be a very handsome one. It will be Gothic in its style and cross-shaped. The body will be of Trenton stone, with Euclid stone trimmings. It will have a frontage of eighty feet on Park avenue and ninety feet on Norris street. There will be two entrances on Norris street and one on Park avenue. The main entrance will be directly under the tower, which will surmount the structure. The interior will be handsomely finished, all the woodwork being of cherry. It will have a seating capacity of 800 people and the seats will be arranged like an amphitheatre. The organ will be placed behind the pulpit. In the rear and adjoining the main building will be the chapel and Sunday-school rooms. The plans were made by Hazlehurst & Huckel, 508 Walnut street.

The New Southwestern National Bank Opens for Business.

The new Southwestern National Bank which was organized for the accommodation of business men in the Southwestern part of the city opened its doors to-day for the first time for the transaction of business. The new Bank is located on Broad street above South. It has a capital of $200,000 and its officers are John Gardiner, President; John A. Stevenson, Vice President, and H. B Langworthy, Cashier. The Directors are: John Gardiner, President of the Continental Brewing Company; John A. Stevenson, lumber merchant; Henry Whiteley, Treasurer of the McDaniel & Harvey Company, sheet-iron manufacturers; W. B. Mendenhall, President of American Sewing Machine Company; John O'Donnell, builder; H. B. Rosengarten, of Rosengarten & Sons, manufacturing chemists; W. S. Fox, of H. C. Fox & Sons, glass manufacturers; W.W. Alcorn, of W. W. Alcorn & Co., flour; J. J. Hitschler, of J. J. Hitschler & Son, produce; John Hunter, harness manufacturer, and Christopher Gallagher, wholesale liquors.

Master House Painters' Convention.

On Tuesday, the 20th instant, the Master House Painters' Association of the United States and Canada begin their second annual convention, at St. George's Hall.

A large attendance of delegates is expected. The convention will last three days at least, and will discuss, among other questions: the necessity of local associations, the establishment of a national apprenticeship system, the introduction of "cards of proficiency" for journeymen, cleanliness and management of paint shops, reforms in competing for work, the advantages of State organizations, the establishment of trade schools, the "ready-mixed" paint question, the relation to our workmen, protection from the inflation of spurious materials, the necessity of an associate chemist, our relation to manufacturers and dealers, our relation to the architects, present condition of our trade.

Have Mercy on Them.

There is a class of people in this country who get up at 5 o'clock in the morning and who never get back to bed until 10 or 11 o'clock at night; who work without ceasing the whole of that time, and receive no other emolument than food and the plainest clothing; they understand something of every branch of economy and labor, from finance to cooking; though harassed by a hundred responsibilities, though driven and worried, though reproached and looked down upon, they never revolt, and they cannot organize for their own protection. Not even sickness releases them from their posts. No sacrifice is deemed to great for them to make, and no incompetency in any branch of their work is excused. No essays or books of poems are written in tribute to their steadfastness. They die in the harness and are supplanted as quickly as may be. These are the housekeeping wives of the laboring men.—*Chicago News.*

New Building for La Salle College.

Work has been begun for the new building for La Salle College, corner Broad and Stiles streets. Western oak will be used for the staircases and yellow pine for other parts. There will be twenty class rooms, and a museum 26x72 feet.

The present building has a frontage of 50 feet, and a depth of 56 feet on each side. The new extensions begin 34 feet from the front, and will be each 35 feet front and 75 feet deep, making a total frontage on Broad street of 126 and a depth on north and south sides of 108 feet. In the rear the buildings will enclose a quadrangle 60x48 feet, in the centre of which will be located a large marble fountain. From the rear of the building to Carlisle street ample room is provided for pupils' recreation grounds.

There will be two towers, 24 feet by 20 and 110 feet high. Connecticut brownstone will be used for the front of the building, and all the basement story above grade to the first floor level will be faced with Connecticut brownstone, the enclosing of windows being fine tool-dressed, and between them finished in rock-faced broken range work. The facing of walls above is in general in press-brick work, with a liberal employment of band and sill courses, arch stones, jamb facings, lintels, etc., of the same material, rubbed.

Board of City Trusts.

At a meeting of the Board of City Trusts on last Wednesday, it was shown that the receipts from city real estate during June were reported to be $8,015.39; payments, $7,938.60; expended on the erection of the buildings at Eleventh and Market streets, $38,300; excess of payments over receipts, $28,223.21; net income for the year, $78,779.34;

corresponding period last year, $61,513.18; increase this year to date, $17,266.16.

The receipts from real estate outside the city were given as $32,259.78; payments, $3,510.65; net receipts, $28,749.23; net income to date, $183,651.39; same period last year, $179,799.48; increase, $3,851.91. Bills amounting to $77,354.55 were ordered approved.

It was reported that 16 boys left Girard College last month and 16 were admitted, leaving upon the rolls 1,173.

The Superintendent of Minor Trusts was directed to invest in city mortgages $2,000 for the Mary Shields' Almshouse Trust; $3,500 for the Benjamin Franklin Trust; $1,000 for the John Scott Loan, and $1,000 for the John Scott medal.

The Committee on Mechanical Instruction reported that all the departments were in the most excellent condition and that the instruction given was satisfactory.

Camden's New Assessment.

The following are the new assessments made by the Board of Assessors for Camden city and the townships:

CAMDEN CITY.

	Real.	*Personal.*	*Total.*
1st. Ward.....	$3,319,175	$403,850	$3,723,023

The Board made a reduction of $100,000 in the assessment of Camden city.

Convalescence Retreat for Pennsylvania Hospital.

The Board of Managers of the Pennsylvania Hospital have finally purchased 500 acres of land at Newton Square, Delaware County, to be used as a convalesence retreat. It is intended to erect a hospital for the insane and use it in place of the Kirkbride Asylum in Philadelphia. The land cost from $200 to $300 per acre and comprises four farms. The tract lies along the line of the West Chester turnpike, twelve miles from Market street bridge. The present buildings have been too crowded for years, and the necessity for making a change of location has been long recognized. As every Philadelphian knows, they extend from Forty-second to Fifty-second streets, and from Market street to Haverford avenue. It is said that these grounds have been sold to a syndicate of capitalists at $2,000,000, but whether such a sale could be made at this time it could not be said. The tearing down of the hospital building in this tract and the opening up from Market street to Haverford avenue will open an era of improvement in that section of the city. The first building was opened in 1841, and the building for males in 1856, although it was not completed until 1859. The people of West Philadelphia will be glad to see this tract opened up, because it virtually blocks up a large section of the city between North and South Market street. The land is very desirable for building purposes, and will no doubt command good prices and will be used as soon as it can be had. Blocks of houses are building up on both sides of it, and land is very high in its immediate vicinity. Hospitals of this character should be beyond the city limits, where land is cheaper.

New Buildings for a Dental Factory.

H. B. Justi is beginning the erection of a factory, at Thirty-second and Spring Garden streets, to be used as a dental factory. Kister & Oren are the architects.

The structures will cover an area of 110 feet by 50 feet, standing on a lot 155 feet by 50 feet, and fronting on Thirty-second street. They will set back a distance of 45 feet from Spring Garden street. The establishment will consist of three buildings, namely, the main factory, which will have a frontage of 95 feet; a one-story boiler house at the corner of Thirty-second and Rockland streets, and a furnace room constructed at one end of the basement. The factory will be a three-story brick building, with a high stone basement, the materials used for the exterior being granite for the base, Fairmount stone for the exposed masonry, Hummelstown stone for the water table, arches, sills and heads, and stretchers in red joints for the brick work. The main front will be ornamented with pilasters, and an open tower will rise from the centre.

Five large fire-proofs will be placed inside of the building, on different floors. The basement will have, in addition to the engine room, a machinists' room and places for storing the coarser substances that will be required in the manufacturing business to be carried on in the establishment. The first floor front will be reserved for the office and the experimenting room, the rest of the building being principally taken up by workshops. Messrs. Collins & Autenrieth, the architects, in planning the furnace room, have provided for its separation from the other quarters of the basement, as an alleyway five feet wide will extend around its outer walls.

The Highway Department.

Nearly $600,000 are available for street improvements and repairs and every dollar of it can be wisely invested. Chief McDonald has a responsible piece of work to accomplish. Even with this large sum, he will not be able to meet all, or even half of the demands that will be made upon him. Councils originally appropriated $745,648 for the Highway Department for 1886. Ordinances increased this amount to $842,283.55 and $117,000 was added to it from the Gas Trust's surplus of loan number nine, making a grand total of $959,238.55. Out of this $207,893.98 had been expended of which $106,286.88 was paid to contractors for cleaning streets, etc. Besides the Gas Trust surplus Mr. McDonald has $466,635.55 for improvements. Of the $150,994.62, which Councils appropriated for the improvement of streets, so far $17,409.35 has been paid out.

Chief McDonald has the following items intact remaining to his credit on the City Controller's books: Bridge across Fifty-second street, near Wyalusing avenue, $4,000; covering Snyder avenue sewer, $5,000; opening of Fifteenth street, $4,821,11; one-half cost of new county bridges, $7,050; repairing Girard avenue bridge, $10,000; macadamizing Moyamensing avenue, $35,000; bridge over Cobb's creek, $3,000; improved pavement on streets not occupied by passenger railway companies, $80,000, and to pay for the intersections and the pavement in front of exempt property on Diamond street, $25,000.

Chief McDonald has about four months and a half in this year in which to expend the balance of the appropriation. Many Councilmen hold that he cannot do the enormous amount of work which is scattered among the numerous items in that time and give it the proper and necessary supervision it will require.

The Value of Real and Personal Estate in Philadelphia.

The Board of Revision of Taxes furnished some very interesting statistics concerning the real and personal estate of the city of Philadelphia. The figures are as follows:

Real estate, at city rate, $544,389,660; real estate, at suburban rate, $38,006,137; real estate, at farm rate, $18,706,174; making the total real estate subject to city tax $601,001,971; household furniture, $6,683,459; horses and cattle, $2,833,611; pleasure carriages, $790,574; total, $611,309,615; total real and personal property in 1885 subject to city tax, $597,785,428; making the increase this year, $13,524,187.

According to the returns made to the Secretary of Internal Affairs at Harrisburg on July 1st, other items of personal property in this city for 1886 are as follows: Aggregate amount of money at interest as assessed to individuals, and individuals and corporations as trustees, $128,234,169.81; aggregate amount as assessed to corporations on corporation assets, "claimed not to be subject to payment of State tax," on which suits are pending, $11,016,808.36; carriages "to hire," $146,635; gold watches, 19,677; silver watches, 541; others, 181.

The real estate at suburban rates, according to wards, is estimated as follows: First Ward, $912,390; Twenty-first Ward, $3,754,190; Twenty-second Ward, $9,578,380; Twenty-third Ward, $4,424,200; Twenty-fourth Ward, $8,244,100; Twenty-fifth Ward, $5,894,341; Twenty-sixth Ward, $1,525,915; Twenty-seventh Ward, $3,082,176; Twenty-eighth Ward, $5,165,295, and Twenty-ninth Ward, $265,150.

The real estate assessed at farm rate is as follows; First Ward, $731,775; Twenty-first Ward, $959,525; Twenty-second Ward, $3,056,200; Twenty-third Ward, $4,562,000; Twenty-fourth Ward, $1,697,050; Twenty-fifth Ward, $2,258,344; Twenty-sixth Ward, $1,896,955; Twenty-seventh Ward, $2,196,575; and Twenty-eighth Ward, $1,047,750.

The amount of money at interest, assessed to individual and individual corporations is for real estate, $601,001,971; household furniture, $6,683,459; money at interest $128,234,169.81.

Southern Industries.

The *Manufacturers' Record* of July 10th, in its semi-annual review of the industrial growth of the South, shows that during the first six months of 1886 there have been added to the number of manufacturing and mining enterprises in the South 30 new ice factories, 40 foundries and machine shops, 1 Bessemer steel rail mill, 8 miscellaneous iron works, 3 stove foundries, 15 gas works, 17 electric light companies, 7 agricultural implement factories, 70 mining and quarrying enterprises, 11 carriage and wagon factories, 8 cotton mills, 18 furniture factories, 15 water works, 29 tobacco factories, 48 flour mills, 248 lumber mills, including planing mills, sash and door factories, etc., in addition to which were a large number of miscellaneous enterprises.

Among the leading enterprises established during the last six months were the Alabama furnaces; the Thomas Company, with $1,000,000 capital, composed of leading Pennsylvania iron men; the $2,000,000 De Bardelben Coal and Iron Company, to build furnaces in Alabama; two 100-ton furnaces at Sheffield, Ala.; one at South Pittsburg,

THE architects report fair activity in their profession.

BUILDERS are confident that the next five months will cap the climax.

A DOZEN good-sized real estate transactions were closed last week.

THE supplies of good building lumber, lath, shingles and cements are increasing, but no changes are noticeable in prices.

FIFTY THOUSAND students graduated from the business colleges in the United States during the last year—a greater number than from the theological, medical and law colleges combined. The boys are bound to have practical education, if they have to pay for it.

About 25,000 deaths from typhoid fever occur in this country annually, and this represents fully 150,000 cases of disease. The 125,000 persons who recover lose six weeks out of their lives, and carry, perhaps, some vestiges of the fever's influence for years.—*Medical News.*

AND Philadelphia's typhoid rate, according to Dr. Smart, Major and Surgeon of the United States Army, is owing to the very impure drinking water—66 in every 100,000 of the population.

THERE are ten or twelve thousand acres of land in farms and neglected fields around Philadelphia, which are being held for building purposes. As farms their cultivation does not pay. The land is not yet needed for building purposes, perhaps but a small portion of it will be wanted for years. But if it was thrown into the market, it would be better for it. It is held at all sorts of prices. An occasional inquiry from a real estate dealer serves to swell the heads of the owners for months. They imagine all Philadelphia is going wild after their particular acres. If the supply of real estate for building purposes could be ascertained, it would exert a marked effect.

To define and locate the supply is necessary. There may be a dozen sites that will suit a purchaser, but at present the purchaser has no easy way of ascertaining the amount of desirable property that might suit him. Philadelphia covers 129 square miles; two-thirds of this area is available for building, yet how much of this is known of in real estate circles? Real estate operations could be greatly multiplied in this city to the advantage of buyer, seller and agent, and the way to begin is to schedule the supply of real estate.

—Foreclosure proceedings on a mortgage covering more than 30,000 acres of land in the townships of Mullica, Hamilton and Galloway, in Atlantic county, N. J., on which 300 families are settled, have been commenced.

This tract is in the shape of a horseshoe, and surrounds Egg Harbor City on three sides. German settlers bought the land in parcels from township officials, not knowing that there was a mortgage of $40,000 against it. In some cases the townships gave warrantee deeds, and in these cases the settlers will have remedy against the townships; in other cases they will be compelled to make the best terms they can.

REAL ESTATE.

A Correction.

In quoting, last week, from that prosperous New York weekly, *The Builder*, we inadvertently referred to it as a monthly. *The Builder* has been a weekly paper since January last.

Charters Granted.

Ashland Building Association, of Philadelphia; capital, $1,000,000. Philler Building and Savings Association, of Reading; capital, $1,000,000. The Lehigh Valley Trust and Safe Deposit Company, of Allentown, with a capital of $250,000.

A Live Architect.

Among the live architects of this city who know a good thing when they see it, and are consequently able to exact full measure in the interests of their clients, Mr. Charles F. Collom, 909 Walnut street, stands preeminent.

Mr. Collom believes in live men and live newspapers, and is one of the few architects of this city who believe in advertising; consequently business was never better with him than at present.

He has under way now the Germantown Almshouse, to cost $85,000; Grand Army building, Post 14, to cost $20,000; extensive repairs to Mr. Barger's house, Cooper street, Camden, and several large houses in Oak lane.

New Church Building.

Ground has been broken at the Southwest corner of Park avenue and Norris street for a new Methodist Episcopal Church. The new edifice will be a very handsome one. It will be Gothic in its style and cross-shaped. The body will be of Trenton stone, with Euclid stone trimmings. It will have a frontage of eighty feet on Park avenue and ninety feet on Norris street. There will be two entrances on Norris street and one on Park avenue. The main entrance will be directly under the tower, which will surmount the structure. The interior will be handsomely finished, all the woodwork being of cherry. It will have a seating capacity of 800 people and the seats will be arranged like an amphitheatre. The organ will be placed behind the pulpit. In the rear and adjoining the main building will be the chapel and Sunday-school rooms. The plans were made by Hazlehurst & Huckel, 508 Walnut street.

The New Southwestern National Bank Opens for Business.

The new Southwestern National Bank which was organized for the accommodation of business men in the Southwestern part of the city opened its doors to-day for the first time for the transaction of business. The new Bank is located on Broad street above South. It has a capital of $200,000 and its officers are John Gardiner, President; John A. Stevenson, Vice President, and H. B Langworthy, Cashier. The Directors are: John Gardiner, President of the Continental Brewing Company; John A. Stevenson, lumber merchant; Henry Whiteley, Treasurer of the McDaniel & Harvey Company, sheet-iron manufacturers; W. B. Mendenhall, President of American Sewing Machine Company; John O'Donnell, builder; H. B. Rosengarten, of Rosengarten & Sons, manufacturing chemists; W. S. Fox, of H. C. Fox & Sons, glass manufacturers; W.W. Alcorn, of W. W. Alcorn & Co., flour; J. J. Hitschler, of J. J. Hitschler & Son, produce; John Hunter, harness manufacturer, and Christopher Gallagher, wholesale liquors.

Master House Painters' Convention.

On Tuesday, the 20th instant, the Master House Painters' Association of the United States and Canada begin their second annual convention, at St. George's Hall.

A large attendance of delegates is expected. The convention will last three days at least, and will discuss, among other questions: the necessity of local associations, the establishment of a national apprenticeship system, the introduction of "cards of proficiency" for journeymen, cleanliness and management of paint shops, reforms in competing for work, the advantages of State organizations, the establishment of trade schools, the "ready-mixed" paint question, the relation to our workmen, protection from the inflation of spurious materials, the necessity of an associate chemist, our relation to manufacturers and dealers, our relation to the architects, present condition of our trade.

Have Mercy on Them.

There is a class of people in this country who get up at 5 o'clock in the morning and who never get back to bed until 10 or 11 o'clock at night; who work without ceasing the whole of that time, and receive no other emolument than food and the plainest clothing; they understand something of every branch of economy and labor, from finance to cooking; though harassed by a hundred responsibilities, though driven and worried, though reproached and looked down upon, they never revolt, and they cannot organize for their own protection. Not even sickness releases them from their posts. No sacrifice is deemed to great for them to make, and no incompetency in any branch of their work is excused. No essays or books of poems are written in tribute to their steadfastness. They die in the harness and are supplanted as quickly as may be. These are the housekeeping wives of the laboring men.—*Chicago News.*

New Building for La Salle College.

Work has been begun for the new building for La Salle College, corner Broad and Stiles streets. Western oak will be used for the staircases and yellow pine for other parts. There will be twenty class rooms, and a museum 26x72 feet.

The present building has a frontage of 50 feet, and a depth of 56 feet on each side. The new extensions begin 34 feet from the front, and will be each 35 feet front and 75 feet deep, making a total frontage on Broad street of 126 and a depth on north and south sides of 108 feet. In the rear the buildings will enclose a quadrangle 60x48 feet, in the centre of which will be located a large marble fountain. From the rear of the building to Carlisle street ample room is provided for pupils' recreation grounds.

There will be two towers, 24 feet by 20 and 110 feet high. Connecticut brownstone will be used for the front of the building, and all the basement story above grade to the first floor level will be faced with Connecticut brownstone, the enclosing of windows being fine tool-dressed, and between them finished in rock-faced broken range work. The facing of walls above is in general in press-brick work, with a liberal employment of band and sill courses, arch stones, jamb facings, lintels, etc., of the same material, rubbed.

Board of City Trusts.

At a meeting of the Board of City Trusts on last Wednesday, it was shown that the receipts from city real estate during June were reported to be $8,015.39; payments, $7,938.60; expended on the erection of the buildings at Eleventh and Market streets, $38,300; excess of payments over receipts, $28,223.21; net income for the year, $78,779.34;

corresponding period last year, $61,513.18; increase this year to date, $17,266.16.

The receipts from real estate outside the city were given as $32,259.78; payments, $3,510.65; net receipts, $28,749.23; net income to date, $183,651.39; same period last year, $179,799.48; increase, $3,851.91. Bills amounting to $77,354.55 were ordered approved.

It was reported that 16 boys left Girard College last month and 16 were admitted, leaving upon the rolls 1,173.

The Superintendent of Minor Trusts was directed to invest in city mortgages $2,000 for the Mary Shields' Almshouse Trust; $3,500 for the Benjamin Franklin Trust; $1,000 for the John Scott Loan, and $1,000 for the John Scott medal.

The Committee on Mechanical Instruction reported that all the departments were in the most excellent condition and that the instruction given was satisfactory.

Camden's New Assessment.

The Board made a reduction of $100,000 in the assessment of Camden city.

Convalescence Retreat for Pennsylvania Hospital.

The Board of Managers of the Pennsylvania Hospital have finally purchased 500 acres of land at Newton Square, Delaware County, to be used as a convalescence retreat. It is intended to erect a hospital for the insane and use it in place of the Kirkbride Asylum in Philadelphia. The land cost from $200 to $300 per acre and comprises four farms. The tract lies along the line of the West Chester turnpike, twelve miles from Market street bridge. The present buildings have been too crowded for years, and the necessity for making a change of location has been long recognized. As every Philadelphian knows, they extend from Forty-second to Fifty-second streets, and from Market street to Haverford avenue. It is said that these grounds have been sold to a syndicate of capitalists at $2,000,000, but whether such a sale could be made at this time it could not be said. The tearing down of the hospital building in this tract and the opening up from Market street to Haverford avenue will open an era of improvement in that section of the city. The first building was opened in 1841, and the building for males in 1856, although it was not completed until 1859. The people of West Philadelphia will be glad to see this tract opened up, because it virtually blocks up a large section of the city between North and South Market street. The land is very desirable for building purposes, and will no doubt command good prices and will be used as soon as it can be had. Blocks of houses are building up on both sides of it, and land is very high in its immediate vicinity. Hospitals of this character should be beyond the city limits, where land is cheaper.

New Buildings for a Dental Factory.

H. B. Justi is beginning the erection of a factory, at Thirty-second and Spring Garden streets, to be used as a dental factory. Kister & Oren are the architects.

The structures will cover an area of 110 feet by 50 feet, standing on a lot 155 feet by 50 feet, and fronting on Thirty-second street. They will set back a distance of 45 feet from Spring Garden street. The establishment will consist of three buildings, namely, the main factory, which will have a frontage of 95 feet; a one-story boiler house at the corner of Thirty-second and Rockland streets, and a furnace room constructed at one end of the basement. The factory will be a three-story brick building, with a high stone basement, the materials used for the exterior being granite for the base, Fairmount stone for the exposed masonry, Hummelstown stone for the water table, arches, sills and heads, and stretchers in red joints for the brick work. The main front will be ornamented with pilasters, and an open tower will rise from the centre.

Five large fire-proofs will be placed inside of the building, on different floors. The basement will have, in addition to the engine room, a machinists' room and places for storing the coarser substances that will be required in the manufacturing business to be carried on in the establishment. The first floor front will be reserved for the office and the experimenting room, the rest of the building being principally taken up by workshops. Messrs. Collins & Autenrieth, the architects, in planning the furnace room, have provided for its separation from the other quarters of the basement, as an alleyway five feet wide will extend around its outer walls.

The Highway Department.

Nearly $600,000 are available for street improvements and repairs and every dollar of it can be wisely invested. Chief McDonald has a responsible piece of work to accomplish. Even with this large sum, he will not be able to meet all, or even half of the demands that will be made upon him. Councils originally appropriated $745,648 for the Highway Department for 1886. Ordinances increased this amount to $842,283.55 and $117,000 was added to it from the Gas Trust's surplus of loan number nine, making a grand total of $959,238.55. Out of this $207,893.98 had been expended of which $106,286.88 was paid to contractors for cleaning streets, etc. Besides the Gas Trust surplus Mr. McDonald has $466,635.55 for improvements. Of the $150,994.62, which Councils appropriated for the improvement of streets, so far $17,409.35 has been paid out.

Chief McDonald has the following items intact remaining to his credit on the City Controller's books: Bridge across Fifty-second street, near Wyalusing avenue, $4,000; covering Snyder avenue sewer, $5,000; opening of Fifteenth street, $4,821,11; one-half cost of new county bridges, $7,050; repairing Girard avenue bridge, $10,000; macadamizing Moyamensing avenue, $35,000; bridge over Cobb's creek, $3,000; improved pavement on streets not occupied by passenger railway companies, $80,000, and to pay for the intersections and the pavement in front of exempt property on Diamond street, $25,000.

Chief McDonald has about four months and a half in this year in which to expend the balance of the appropriation. Many Councilmen hold that he cannot do the enormous amount of work which is scattered among the numerous items in that time and give it the proper and necessary supervision it will require.

The Value of Real and Personal Estate in Philadelphia.

The Board of Revision of Taxes furnished some very interesting statistics concerning the real and personal estate of the city of Philadelphia. The figures are as follows:

Real estate, at city rate, $544,389,660; real estate, at suburban rate, $38,006,137; real estate, at farm rate, $18,706,174; making the total real estate subject to city tax $601,001,971; houschold furniture, $6,683,459; horses and cattle, $2,833,611; pleasure carriages, $790,574; total, $611,309,615; total real and personal property in 1885 subject to city tax, $597,785,428; making the increase this year, $13,524,187.

According to the returns made to the Secretary of Internal Affairs at Harrisburg on July 1st, other items of personal property in this city for 1886 are as follows: Aggregate amount of money at interest as assessed to individuals, and individuals and corporations as trustees, $128,234,169.81; aggregate amount as assessed to corporations on corporation assets, "claimed not to be subject to payment of State tax," on which suits are pending, $11,016,808.36; carriages "to hire," $146,635; gold watches, 19,677; silver watches, 541; others, 181.

The real estate at suburban rates, according to wards, is estimated as follows: First Ward, $912,390: Twenty-first Ward, $3,754,190; Twenty-second Ward, $9,578,380; Twenty-third Ward, $4,424,200; Twenty-fourth Ward, $8,244,100; Twenty-fifth Ward, $5,894,341; Twenty-sixth Ward, $1,525,915; Twenty-seventh Ward, $3,082,176; Twenty-eighth Ward, $5,165,295, and Twenty-ninth Ward, $265,150.

The real estate assessed at farm rate is as follows; First Ward, $731,775; Twenty-first Ward, $959,525; Twenty-second Ward, $8,056,200; Twenty-third Ward, $4,562,000; Twenty-fourth Ward, $1,697,050; Twenty-fifth Ward, $2,258,344; Twenty-sixth Ward, $1,896,955; Twenty-seventh Ward, $2,196,575; and Twenty-eighth Ward, $1,047,750.

The amount of money at interest, assessed to individual and individual corporations is for real estate, $601,001,971; household furniture, $6,683,459; money at interest $128,234,169.81.

Southern Industries.

The *Manufacturers' Record* of July 10th, in its semi-annual review of the industrial growth of the South, shows that during the first six months of 1886 there have been added to the number of manufacturing and mining enterprises in the South 30 new ice factories, 40 foundries and machine shops, 1 Bessemer steel rail mill, 8 miscellaneous iron works, 3 stove foundries, 15 gas works, 17 electric light companies, 7 agricultural implement factories, 70 mining and quarrying enterprises, 11 carriage and wagon factories, 8 cotton mills, 18 furniture factories, 15 water works, 20 tobacco factories, 48 flour mills, 248 lumber mills, including planing mills, sash and door factories, etc., in addition to which were a large number of miscellaneous enterprises.

Among the leading enterprises established during the last six months were the Alabama furnaces; the Thomas Company, with $1,000,000 capital, composed of leading Pennsylvania iron men; the $2,000,000 De Bardelben Coal and Iron Company, to build furnaces in Alabama; two 100-ton furnaces at Sheffield, Ala.; one at South Pittsburg,

Tenn.; one at Calora, Ala., and two in Sequatchie Valley, Tenn.; a Bessemer steel rail mill at Chattanooga; cast iron pipe works, to cost $300,000, at the same place; a $600,000 dry-dock and shipyard at Newport News, Va., and a $2,500,000 English company, to mine coal in Kentucky. The amount of capital, including capital stock of incorporated companies, represented by the new manufacturing and mining enterpises organized or chartered at the South, and in the enlargement of old plants and rebuilding of mills that were destroyed by fire during the first six months of 1886, aggregates about $63,618,200. The amount to each State as compared with the same time last year was as follows:

	1886.	First six months, 1885.
Alabama	$4,805,500	$3,580,000
Arkansas	11,428,000	375,000
Florida	981,000	479,000
Georgia	1,399,000	1,580,000
Kentucky	17,220,700	10,621,000
Louisiana	1,202,000	1,407,000
Maryland	5,139,000	4,633,000
Mississippi	467,000	416,000
North Carolina	1,485,000	1,535,000
South Carolina	538,000	427,000
Tennessee	5,297,000	1,802,000
Texas	2,986,000	1,319,000
Virginia	5,553,000	2,008,000
West Virginia	5,123,800	6,352,000
Total	$63,618,200	$36,534,000

Benefits of the New Revenue Law.

According to the returns made by the Board of Revision of Taxes to the State Revenue Commission, the aggregate amount of money at interest, assessed to individuals and to individuals and corporations in their capacity as trustees in the City of Philadelphia, amounts to $128,234,169.81, given in wards as follows:

First	$555,005 00
Second	184,250 00
Third	109,912 00
Fourth	77,950 00
Fifth	4,331,913 57
Sixth	28,587,707 82
Seventh	11,537,578 96
Eighth	25,812,915 42
Ninth	1,633,457 30
Tenth	6,375,338 93
Eleventh	199,430 00
Twelfth	2,184,848 53
Thirteenth	2,276,983 00
Fourteenth	1,107,097 00
Fifteenth	6,626,013 34
Sixteenth	882,539 58
Seventeenth	317,588 42
Eighteenth	1,000,201 73
Nineteenth	406,790 00
Twentieth	2,820,450 97
Twenty-first	1,144,851 40
Twenty-second	8,352,027 00
Twenty-third	1,325,251 80
Twenty-fourth	2,849,617 00
Twenty-fifth	262,514 12
Twenty-sixth	234,193 50
Twenty-seventh	4,970,812 61
Twenty-eighth	2,321,356 91
Twenty-ninth	3,826,949 00
Thirtieth	99,852 50
Thirty-first	334,720 00

The aggregate amount of money at interest assessed to corporations, on corporation assets, claimed not to be subject to the payment of State tax is as follows: Fifth ward, $1,755,898.37; Sixth ward, $563 109.99; Eighth ward, $8,697,800.

A judicial decision of this question will be reached at an early day, as suits have already been brought for that purpose. In 1885 the Board of Revision of Taxes returned the money at interest assessed to individuals in the city of Philadelphia, at $86,602,899.33. This increase of $41,631,270.48 for 1886 is owing to the new revenue law of 1885, which requires the tax assessors to compare the returns as made by tax-payers with the records in the office of the Recorder of Deeds, where all mortgages are recorded; and also with the records in the office of the Prothonotary of the county courts, where all judgments and notes are placed on record.

If the ratio of increase in assessments of money at interest in the county of Philadelphia can be taken as a basis on which an estimate of the increase in the other counties of the State can be formed, it is very probable that more than $2,000,000 per annum will be added to the revenue of the State. Indexed copies are now being made for the records in the offices of the Recorder of Deeds and of the Prothonotary, with the view of finding out just what the amount of money is at interest in this city and which is taxable, as it is believed that the new assessment is at least 100,000,000 less than it should be.

Items of News.

—There are 1,175 boys in Girard College.

—All the fruit stands on Delaware avenue are to be removed.

—Work has been commenced on Old South Bethlehem's new silk mill.

—R. J. Dobbins, has purchased the Berkeley Hotel at Seaside Park.

—A vein of natural gas has been struck at Knowersville, in Albany county, N. Y.

—The office of the State Board of Health has been removed to 1532 Pine street, Philadelphia.

—Mr. Hugh S. Thompson, of South Carolina, has qualified as Assistant Secretary of the Treasury.

—Further proceedings in the contest of the will of Mary Ann Mills have been postponed until Sept. 22.

—The Colored Invincibles, of Germantown, are requesting a better school building from the Sectional School Board.

—A 30,000 acre tract of land is to be foreclosed in Atlantic County, New Jersey, on which 3?0 families are domiciled.

—Real estate assessor William S Lawson, of the 31st Ward, died at his home 1410 Hanover street on Tuesday the 13th instant.

—Mullin & Pennock are to be paid $400 by the City Trusts for a wooden building on the West side of Sixteenth street, near Barker.

—Two fire engines are to be purchased, No. 32 for $3,200 and No. 4 for $4,000. Thirty fires have been reported during July so far.

—The loss at the fire of the Tunis Company's works, at Otsego and Moore streets, on last Tuesday, was $45,000, insurance $25,000.

—The Atlantic Refining Company has been granted permission to build an open pile wharf in front of its property at Point Breeze.

—At the regular monthly meeting of the Western Nail Association, held at Pittsburg on the 14th inst., the card rate on nails was reaffirmed.

—Herr Krupp has contracted to supply China with 1,500 tons of rails at a price, including freight, 25 shillings below the lowest English offer.

—A new Baptist Church has been organized midway between the villages of Palmyra and Riverton. An edifice will be erected at a cost of $3,000.

—The London Bankruptcy Court has ordered the committal of Mr. James McHenry. The committal, however, will not be drawn up for some time.

—Work on the New York Arcade Railway will be begun within six months. The plans place the cost of the road at from $3,000,000 to $4,000,000 per mile.

—The Board of Health on Wednesday referred a complaint of stagnant water on Dauphin street, between Broad and Carlisle streets, to the Highway Department.

—The property of the Denver and Rio Grande Railroad has been sold at a nominal bid of $15,000,000 to a purchasing committee under the "Coppell reorganization."

—Geo. Harding, Esq., as Counsel for Henry Root, of San Francisco, has sued the Philadelphia Traction Company for infringement upon the plaintiff's patent grip.

—George G. Crowell has been elected President of the Insurance Company of the State of Pennsylvania for the unexpired term of the late President, Henry D. Sherrerd.

—Work on the new engine-house at the head of Mahanoy Plane is being rapidly pushed, and it is expected to have the plane once more ready for work by September 1.

—The Green Glass Blowers' League of the Eastern district, in session at Atlantic City, received a committee report favoring a suspension of the apprentice system for one year.

—Madagascar has granted an English company a charter to establish a Royal bank, with power to coin money and to issue bank notes. The bank will have a capital of £2,000,000.

—In the elections in Alsace-Lorraine for the ensuing year twelve Germans have been elected members of the Commercial Council. At the last election but four Germans were elected.

—The Gloucester City Council has passed on second reading an ordinance for the paving of William street from Hudson to Mercer street. This is an important public improvement.

—Ground has been broken at Elmer, N. J., for a new shoe factory, which is expected to be completed and in operation some time next month. About sixty hands will, it is said, be employed.

—It is now pretty definitely settled that the new Tacony Driving Park will be located on the Toy farm just south of the House of Correction, and extending from the State road to the Delaware river.

—The County Board of Assessors of Camden, have fixed the county tax at 72 cents per $100 and the State tax at 25 cents. The city tax for Camden remains yet to be determined by the Council.

—At a meeting of 300 carpenters in St. Louis on Sunday a resolution was adopted adhering to the eight-hour system. Another meeting will be held to get an expression from all the carpenters in the city.

—Payment for the awards made by the late Court of Commissioners of Alabama Claims will probably begin August 1. The amount of the judgments that will be paid in each case will be about 35½ per cent.

—A prize of $1,000 has been offered by the American Sunday School Union, in accordance with the terms of the John C. Green Fund, for the best book upon the subject of Christrian obligations of property and labor.

—Execution for $27,500 has been issued against the Pittsburg (Pa.) Tool Company, based upon a mortgage against the works, held by the Safe Deposit Company as trustee for the bondholders, who are also stockholders.

—At a meeting of the Committee on Distribution of the Gas Trust on Wednesday, a contract for 5,000 lengths of four-inch pipe was awarded to the McNeal Pipe and Foundry Company, of Burlington, N. J., at twenty-five cents per lineal foot.

—On last Tuesday the fires were lighted in the new mill of the Columbia Iron Company, at Columbia, and the manufacture of iron begun. The mill is owned by a stock company, Mr. H. H. Houston, of Philadelphia, being the heaviest stockholder.

—J. de Rivera & Co., of 117 Pearl St., N. Y., importer of sugar, have assigned without preferences. The liabilities are variously estimated at from $300,000 to $500,000. Mr. J. de Rivera, Jr., a member of the firm, has been missing since Thursday last.

—The Board of Health has declared the water wells in Monument Cemetery a nuisance, but the Board of Managers asked permission to retain them for garden uses, promising to take proper precaution to prevent the use of the water for drinking purposes.

—The new bath-house of the Bedford Street Mission, at No. 621 Alaska street, is being extensively used. Contributions in aid of the mission can be sent to Charles Spencer, President, No. 7 Bank street, or Rev. George W. Lybrand, Superintendent, No. 619 Alaska street.

—The Harlem Bridge Commissioners decided to award the contract for the construction of the proposed new bridge to the Passaic Rolling Mill Company and Myles Tierney under a joint contract for $2,055,000. The work will be proceeded with immediately.

—Contracts were awarded on Monday by the Councils' Committee on Printing and Supplies to Linton & Fowler for repainting and gilding Select Council chamber at $322.50, and to Jacob Crouse for relaying the chamber with 300 yards of Brussels carpet at $1.07 per yard.

—Colonel Watson, the reputed owner of the Gas Works at Vineland, had a hearing at Bridgeton on Monday, on the charge of grand larceny, and was held in $500 bail to answer. The charge is a technical one, and is part of a plan to dispossess Colonel Watson of the Gas Works.

—The old brick building at No. 1340 Chestnut street is being demolished, and upon the site is to be erected a banking house for the Real Estate Trust Company. The building and lot will cost about $150,000, and will have a front of 29 feet on Chestnut street and a depth of 154 feet.

—The rolling-mill of the Bethlehem Iron Company, owing to a pressure of orders, is to be run day and night from midnight on Sunday until midnight on the following Saturday—that is, the only time the mill will be idle will be during the twenty-four hours which constitute Sunday.

—It is stated that Marshall O. Roberts has agreed to the Wistar plan for the reorganization of the Texas and Pacific Railway, and has deposited $908,000 in bonds. Russell Sage has also signified his approval by depositing bonds to the value of $412,000 with the Farmers' Loan and Trust Company of New York.

—Under Special Master Dallas' report, filed in the United States Circuit Court, and confirmed by Judge McKenna, at Pittsburg, the Receivers of the Philadelphia and Reading Railroad have been given permission to replace the company's wooden Columbia bridge, near Belmont Station, with a new iron structure.

—The Board of Estimate and Apportionment, of New York, at their meeting revised the final estimates of the city budget for the ensuing year. Sundry important reductions were made, which will cut down the tax rate from about $2.40 to $2.25. $25,000 was also voted to pay the salaries of the additional policemen recently authorized.

—Wm. Dixey, Commissioner of Markets and City Property, reported that, during the week ending July 11th, the total number of persons using the bath houses at Almond street wharf, Twelfth and Wharton streets and Twenty-second and South streets, were as follows: Men, 9,658; women, 209; boys, 55,-196; girls, 654. Total, 65,717.

—The contest over the will of the late Francis W. Tracy, the millionaire husband of Agnes Ethel, the actress, has been formally opened in Buffalo on behalf of his daughter (Harriet) by a divorced wife. The grounds on which the will is sought to be broken rest chiefly on the mental incompetency of the testator.

—The suit recently brought by Archbishop Williams against the estate of the late Rev. Father Peter Crudden, formerly pastor of St. Peter's Church, Lowell, Mass., for the recovery of certain moneys alleged to have been diverted by the pastor from their proper destination, the treasury of the Archbishopric, has been amicably settled without a trial.

—Dr. Wm. R. Hoch, of Philadelphia, was appointed the special medical inspector for the Pennsylvania Railroad Company. This officer will have authority to condemn foul clothing and parcels frequently carried by immigrants and liable to spread disease. Sixty-three such parcels were recently destroyed at the Broad Street Station, in Philadelphia, at Dr. Hoch's direction.

—The jury of view appointed to assess damages against the Schuylkill River East Side Railroad Company for taking land belonging to Anthony E. Stocker and others, on Oregon avenue, in the Twenty-sixth Ward, yesterday filed its report in the Prothonotary's office. The jury valued the land actually taken, which was a little over an acre and a half, at $5,070, and estimated the entire damage at $7,098, for which sum it gave judgment.

—Bids for rebuilding the burnt portion of the State House were opened on Tuesday at Trenton, when the following were found to be the lowest: Stone and mason work, Robt S. Johnson, Trenton, $145,000; carpenter work, Titus & Conrad, Trenton, $33,900; iron work, Post & McCord, New York, $65,559; plumbing, Thomas Craig, Trenton, $6,716; total cost, $251,175. The balance of the appropriation on hand is about $260,000.

—Secretary Ourt, of the Committee on Lunacy of the State Board of Charities, states that another hospital for the insane is badly needed in the Southeastern District, and urges the importance of the next Legislature taking action. The Norristown Asylum is inadequate for the pressing demands and should either be enlarged or relieved by the erection of a new building in the same district. The new hospital should accommodate 2,000 patients.

—There seems to be a good deal of difference of opinion among those who ought to know as to the serviceability of certain kinds of stone used in this city. Some say that the Quincy granite is the best that can be had. Dr. Paxson, of this city, has just opened a valuable bed of granite and feldspar a few miles north of the city on the Schuylkill. The experts who have examined it say it is an excellent stone and are contemplating the formation of a company to utilize it on a large scale.

—The work of repairing the machinery of the Mint and painting and cleaning portions of the building is about completed. The adjusting room has been entirely renovated, while the halls, the medal room and other apartments have been similarly improved. The furnaces in the melting rooms have been provided with new bricks and cleaned, and the annealing furnaces, as well as those used in the generating of steam, have been re-lined with brick, etc. All the scales in the building have also been readjusted. The cellar, which has been whitewashed throughout, contains the main engine used for driving the "rolls." It was recently discovered that the soil pipes running beneath the floor had been broken for a long period, so that the drains from above flowed under the engine, thus undermining its foundations.

BUILDERS' ITEMS.

Building and Real Estate Notes.

WENDELL & SMITH, builders and contractors, South Penn Square, are building a brick house for Mr. McIlvain, on Orthodox street, Tackawna, to cost $3,000.

CHAS. M. BURNS, JR., 717 Walnut street, architect, is erecting a stone dwelling in colonial style for G. W. Frederick, Esq., at Mount Airy, to cost $9,000.

MR. EVANS, who is the Secretary of the Dudley Homestead Building Association, Camden, N. J., reports that the first building drawn for will be commenced in a few days.

J. M. PULLINGER, Lancaster avenue, real estate broker, has just completed the sale of a property (three story, brick) on the north side of Hamilton street, near Thirty-third street.

MAYBERY E. HARDEN, builder, Camden, is erecting four three-story brick dwellings on Broad street above Ferry; also building a fine stone Roman Catholic church between Broad street and Ferry road.

HANCOCK & LEVICK, Lancaster avenue, report sales a little slow, but inquiries for properties increasing. Within the last three or four days the inquiries have exceeded the last three weeks. This firm are erecting a store on Lancaster avenue, west of Spring Garden street.

C. LETHERBURY, 1123 Broadway, Camden, real estate broker, has made considerable alterations to his office. His business, which is a growing one, is keeping him very busy, while inquiries for properties to purchase are within the last few days increasing. His telephone number is 133.

HOLLINSHEAD & NEWKIRK, real estate agents, 927 Broadway, Camden, will within a few days close up some heavy sales, and inquiries for properties at about $2,000 are daily being made. Amongst the houses they have for sale, they have some fine bargains of four- and six-room houses, which are central and will pay good interest.

ROBERTS & COHN, builders and real estate brokers, Market street, Camden, N. J., are erecting Fifty-two small houses on Clinton, Seventh, Royden and Edmond streets. They will be four and six rooms, and all fitted with hot and cold water, and the six room ones will have bath room and will sell from $1,200 to $2,000 each.

THE Grace Baptist Church now on Berks street above Eleventh, which seats 800, has in consequence of their being unable to seat their increasing congregation, purchased a lot on the S. E. cor. of Broad and Berks of J. Baird. It has a frontage on Broad of 107 feet and 150 on Berks and cost $25,000, on which they purpose erecting a new church shortly to cost $100,000.

MESSRS. FROEHLICH BROTHERS dealers in plumbers' materials, are now having erected on the site of the old Truman mansion, 142 North Seventh street, a building which they intend to occupy for the purposes of their business. It will have a height of four stories, a width of 29 feet, and a depth of 74 feet. The material of the front will be brick, laid in red mortar, and embellished with red sandstone, ornamental brick and terra cotta trimmings. The building will be well lighted, and is to be strongly and substantially built. The plans for the structure were prepared by Charles Balderston, architect, and Kister and Orem have the contract for doing the work.

GEO. E. GOLDBECK, 421 Lancaster avenue, is erecting five six-room houses, with bath and all modern conveniences, on Parrish street, east from Lancaster avenue. They are being put up as an investment. Mr. Goldbeck reports business fair, with good

prospects for the fall. Inquiries are increasing and sales anticipated. Renting with him is a little slow, as are also collections.

THE B. & P. R.R. Co. will commence at once the erection of a station at Folsom, which is situated between Moore, on the P. W. & B., and Morton, on the P. & W. O., which adjoins Ridley Park, Prospect Park and Routledge. The station will stand on a lot 50 ft. by 150 feet, and will be of the most improved style, and no expense will be spared in its erection.

JOHN DOBBIN & Co., 35 Kaighn's avenue, Camden, real estate brokers, have just completed the sale of a property on Jackson street above Broad (two-story, brick) for $800; also one (three-story, brick) on Front street above Mechanic.

They report houses renting well, and the demand for small houses increasing on the south side.

REED & HULL, real estate and Insurance brokers, Market street, Camden, N. J., and 413 Walnut street, Philadelphia, are having a lively time in insurance business and report sales of properties somewhat slow. Houses for the season of the year are in fair demand with them and from a general idea of the real estate prospects are looking forward for a good fall business. The demand for single mortgages is very light.

CHARLES H. SHARPE, 256 Kaighn's avenue, Camden, has this week made the sale of a five-room, brick house, at Centreville, for $800; also two lots on Cherry street above Fifth, $750, on which five houses will be commenced at once; also just closed the sale of five lots on Spruce street above Ninth, for $225 each

There seems, says Mr. Sharpe, quite a lively outlook in Camden for real estate.

RANDEL E. MORGAN, builder, Market street, Camden, has within the last few days been making some considerable sales, and has prospects of considerable others ahead. He reports business generally picking up in real estate, and properties realizing good prices. The majority of sales made are for investments. Mr. Morgan sold two three-story nine-room brick houses, one on Rydon and one on Carman streets, for $5,000.

A. F. BROWN, real estate and insurance agent, has within the last few weeks had considerable properties on his rent-roll, and although he has only been in business some two months is daily gaining ground amongst the property owners of Camden, and has already some ninety houses under his charge. His list of houses for sale are various, and amongst them are a number that will realize 10 per cent. Mr. Brown will make a specialty of renting and selling.

J. P. MORNEN, real estate broker, 925 Walnut street, has just completed the sale of a store and dwelling on South street, East of Broad for $1,150; also a dwelling house Eleventh and Callowhill streets, West of Eleventh street for $6,000. He reports that inquiries for small properties still continue in demand. Mr. Mornen is keeping a sharp lookout for a property to purchase on Market street, West of Eleventh. He has an over abundance of capital which he is anxious to put out on big mortages.

L. B. HUMPHREYS, real estate broker, Third and Market streets, Camden, has just made sale of seven lots at First and Thompson streets, on the N. E. corner, Stockton township, 114 ft. by 95 ft., for $400, and is negotiating for the sale of many dwelling-houses. He reports business in real estate with him very satisfactory, and anticipates in the fall an increasing business. Mr. Humphreys' office is one of the most prominent in Camden, and is well suited to his business. He makes a big display of all the business at his disposal.

Building Permits.

One three-story building, 18 ft. by 20 ft., 1025 Clinton st., to Alexander Ewing, 1823 Lambert st.

One two-story building, 14 ft. by 22 ft., 1514 N. Second st., to J. J. Eickel, 1513 Hancock st.

—The Board of Port Wardens, have granted licenses to the Atlantic Refining Company to build an open pile wharf in the Schuylkill river at Point Breeze. To the Kensington and Tacony Railroad Company to build piers for a draw-bridge at the mouth of Frankford Creek ; and to the Schuylkill river East Side Railroad Company and A. Gordon Jones to close up a portion of the dock and to build a pier at Locust street wharf, Schuylkill River. An application was received from the Repauno Nitro-Glycerine and Dynamite Company, at Thompson's Point, nearly opposite to the Lazaretto Station, to build a pile pier 130 feet in length into the river.

—The Camden Freeholders on Wednesday adopted a resolution instructing the County Collector not to pay the salary of the County Clerk until he turns over to the treasury $613.78, which Solicitor Harris and Charles I. Wooster, special experts, found was due from licenses and fees. They declared the system of keeping the accounts so confused and impracticable that they could not ascertain how much was really due. The experts presented a bill of $200 for their services. A discussion arose over the awarding by the Almshouse Committee of a contract for 300 tons of coal to Isaiah Woolston at $4.50 for egg and $4.75 for stove white ash, there being four lower bidders than Woolston. The action of the committee was sustained, however.

GUARANTEE
Trust & Safe Deposit Co.

CAPITAL, - - $1,000,000.

316, 318 and 320 Chestnut Street,

Rents Safes in its Burglar Proof Vaults at $9 per year and upwards.

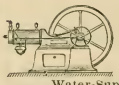
BOOTS AND SHOES,
BUT NOT SLIPPERS.

We wish to call the attention of the public to the fact that the DAY SEWED SHOE does not mean any kind of slipper.

The process is not applied to any single sole foot-wear, but to the manufacture of all kinds of BOOTS, SHOES, GAITERS and LOW SHOES used for out-door or steady wear. The dainty luxury which many cannot, and many should not wear—the "pump-sole" or "turned-sole" slipper—is for sale at the Day Sewed Shoe Store, but it is not our make. This fact has been carefully impressed upon our sales-people, but they are not always reminded of it in making a sale. We therefore take this method of explaining and providing against any mistakes. WHEN YOU BUY A THIN-SOLED HOUSE-SLIPPER YOU DO NOT GET A DAY SEWED SHOE.

THE DAY SEWED SHOE MFG. CO.,
No. 23 N. EIGHTH STREET.

"OTTO" GAS-ENGINE.



OVER 15,000 IN USE. Guaranteed to consume 25 to 75 per cent. less GAS than ANY other Gas-Engine per Brake Horse-power ENGINES AND PUMPS COMBINED. For Hydraulic Elevators, Town Water-Supply, or Railway Service.

1226 Market Street.

THE BLATCHLEY
Is carefully made by men who know how to construct a

PUMP

When desired they are lined with specially heavy Porcelain or Copper, or with Drive Well Cylinders, at small additional cost.

When ready to buy, *insist* on seeing and examining them. Use your own judgment, and don't be persuaded to act contrary to your own interests.

They are sold by some good house near you.

Special terms to builders buying in quantities.

CHARLES G. BLATCHLEY
MANUFACTURER,
308 MARKET ST., Philad'a.

MY extensive facilities and small expenses enable me to compete with any establishment in the United States.

Wood Turning in all its branches. House trimmings, new and original designs, a great specialty.

All orders delivered free on board at Jersey City.

Estimates for Philadelphia and vicinity cheerfully given.

Address,
JOHN NESBITT,
Yonkers, N. Y.

BILLMAN'S

Roofs repaired and painted at shortest notice and guaranteed for five years. Paints shipped to all parts.

1903½ Oxford Street, Philadelphia.

OUR
PIANOS AND ORGANS
Represent the
Best Makers in the World.
M. DE LONG & CO.,
1117 Chestnut Street.

"CAMARET"

GUARANTEED ROOFING PLATES.

A maker's brand, controlled by us to the extent that we represent the manufacturers in the United States. We are thus enabled to keep up the standard quality of this brand, the makers being under contract with us to do so.

We guarantee the material of the "CAMARET" to be the best Martin-Siemens Steel (exactly the same material as the "Gilbertson's Old Method,") while many of the cheaper plates offered in competition with the "CAMARET" are made of Bessemer Steel, which can be bought at a less price, hence is of inferior quality.

For the information of the trade we repeat the Guarantees which have made our "CAMARET" Brand so famous throughout the country.

The following is our specific guarantee of all the plates purchased from us under the brand "CAMARET."

1. That the coating, though not quite so heavy as on the "Gilbertson's Old Method," is of the same quality, is evenly distributed and heavy, perfectly coating and protecting the iron.
2. That they will stand any strain encountered in working a Roofing Plate.
3. That each sheet is cut perfectly square, has an even surface and is free from ragged or beaded edges.
4. That each box contains 112 sheets of uniform gauge, and that each sheet is stamped with brand and gauge.
5. That every box of "CAMARET" is securely bound with IRON STRAPS.

There is no other Roofing Plate that we know of to which the above Guarantees can be applied.

We take the entire product of the Mill in this Brand of Roofing Plate; and the ***Works are under contract with us*** to keep up the Quality of Goods as Guaranteed by us, and agree not to furnish the "CAMARET" Roofing Plate to anyone else, either under ***this Brand or a Private Brand.***

BUILDERS' GUIDE.

DEVOTED TO REAL ESTATE, BUILDING, ARCHITECTURAL AND INSURANCE INTERESTS.

[ENTERED AT THE PHILADELPHIA POST OFFICE AS SECOND-CLASS MATTER.]

VOL. I.—NO. 29. PHILADELPHIA, MONDAY, JULY 26, 1886. PRICE 15 CENTS

Items of News.

—W. T. Smith's Smyrna rug manufactory on Third street, above Lehigh avenue is nearly completed.

—The Gloucester Board of Education awarded a contract of $165 for the repairing of the Monmouth street school-house.

—The demands of the stonemasons of Germantown for ten hours' pay and nine hours work went into effect on Monday last.

—The Tax Receiver of Camden has been authorized to appoint two additional clerks for August and three for September, at a compensation of $50 per month.

—The contract for supplying the schools of Camden with coal for the ensuing year has been awarded to Charles A. Spooner at $4.35 per ton for stove, nut and broken sizes.

—The Citizens' Municipal Association have protested against the approval of the ordinance approving the sureities of R. A. Malon & Son, the contractors of the Market street bridge.

—The Camden Board of Assessors, which for the past week has been sitting as a Board of Appeal, on last Monday concluded its labors, having made a net reduction of $160,000 on the total assessment of $14,979,000.

—D. McMahon's bid of $1,500 was the lowest for repairing the bridge on Weiss street over Wingohocking creek. There were nine bids for paving with granite blocks, the prices ranging from $2.23 to $2.70 per square yard.

—Proposals for the erection of a new armory for the Third Regiment of the National Guard of Pennsylvania on the east side of Broad street, above Wharton, were opened last Monday evening at the regimental headquarters.

—The Trustees of the West Chester State Normal School have decided to erect a new chapel and dining-room annex to their already large structure, and the work will be commenced at once. It will be built of serpentine, with marble trimmings.

—Three hundred paviors and rammers received a charter on Monday night at Ninth and Spring Garden streets as a local Assembly of the Knights of Labor. James A. Wright, of the Executive Board, initiated twenty Knights during the evening and presented the charter.

—The city has been sued as a trustee under the will of Stephen Girard, by Messrs. Hecksher & Co., owners of a large tract of coal land, near West Shenandoah, in Schuylkill county. They allege that a dam was erected on the adjoining property of the Girard estate, which forced water into their mines, compelling them to suspend operations for six months, and thus subjecting them to enormous loss. They claim $100,000 damages.

—The regenerative system will be put into operation on the Ninth Ward gas works as soon as the middle of October. 150 men started yesterday to excavate for a trench in which to lay a gas main from Ninth street and Lehigh avenue to Germantown and Chestnut Hill.

—The House of Representatives provided for an appropriation of $6,000 to supply the Frankford Arsenal with two new steam boilers, and $3,500 for one 25-horse power expansion steam engine. The Senate Committee supplemented this with an appropriation of $5,000 for building a boiler house, dry house and coal shed.

—The Health Board on Monday adopted a resolution declaring the pump wells at No. 1335 Montgomery avenue, northwest corner of Girard avenue and Morton street, No. 1013 Otis street, No. 1338 Vienna street and No. 1501 Montgomery avenue, nuisances, and the owners or agents were directed to have the same abated within five days.

—A member of the Citizens' Municipal Association very properly characterized the Traction Company as a law defying company. It has imitators. Commissioner McDonald told a committee the other day that he had twice notified the Union Railway Company to do certain repairing on Spring Garden street, between Seventeenth and Nineteenth.

—Master Dallas' audit of the Receivers' account of the Reading Railroad for June shows total receipts, including a balance of $137,613.34 from May, amounting to $2,766,095.32; expenses, $2,649,431.72, leaving a balance of $116,663.60 on July 1. The receipts of the coal and iron company were $1,293,438.38, the outlay $1,291,511.25, and the balance on hand July 1, $1,927.13.

—The Finance Committee of the Camden City Council, in conjunction with the Board of Assessors, have fixed the city tax rate for the ensuing fiscal year at $1.13 on the $100. This, with the county, State and school rates, will require $328,638 to be raised by taxation. The total rate for the city of Camden will therefore be $2.65 on the $100, which is made up by 72 cents for county, 25 cents for State, 55 cents for school purposes and $1.13 for city government.

—The Highway Committee had under consideration last Tuesday the question of street pavements. The Committee questioned Chief Commissioner McDonald in relation to the resolution of Councils directing that the passenger railway companies repave with Belgin blocks those portions of streets paved with cobblestones and needing repaving from curb to curb, and instructing the Chief Commissioner, in case the companies failed or neglected to do this work, to select a portion of one or more streets, and, after having such work done as far as $2,500 would pay for it, proceed to collect the amount from the railway company and thereby make a test case.

—The Senate Committee struck out the paragraph making an appropriation of $114,639 for certain repairs and improvements to the U. S. Mint building, at Philadelphia. These consist in the removal of the steam power plant to the northwest corner of the property; locating the boiler room outside the walls of the main building; strengthening the walls; supplying a new engine, &c., and for the construction of a vault for the storage of silver.

—Workmen are now busily engaged strengthening the railroad bridges along the Pennsylvania Railroad. Work is now being pushed upon the bridges at Cove Forge, Port Royal and Mount Union. The cause for the strengthening of these bridges is the placing upon the road of heavier freight engines. At present the general freight engine is of the "I" grade, weighing 97,500 pounds. The new engine will be of the "R" grade, and will weigh 113,000 pounds, light weight.

—"$50—Nos. 133 to 135.
$100—Nos. 1,730 to 1,812.
$500—Nos. 787 to 824.
$1,000—Nos. 5,524 to 5,962.
$10,000—Nos. 12,612 to 12,965, and 23,738 to 23,747.
Total, $4,000,000."

The above is a description of the bonds called for redemption by the acting Secretary of the Treasury on the 19th inst. They are 3 per cents., of the issue of 1882. Interest is to cease on Sept. 1, 1886. The numbers are original and inclusive in each case.

—The Court of Errors and Appeals at Trenton has confirmed the constitutionality of the Police Tenure-of-office act passed in 1885. The question came up on an appeal by Chief of Police Fitzgerald, of New Brunswick, who was ousted from office by a Democratic Board of Aldermen after the passage of the act. He is now reinstated. This decision holds in office the Democratic police force of Camden. In the case of the Camden and Atlantic Railroad Company and the May's Landing and Egg Harbor Railway Company the decree of the Chancellor was affirmed.

—48,000 tons of coal were contracted for on the 19th inst. by the Navy Department, to be delivered at the various navy yards and stations as called for. The lowest bids were $3.65 per ton for anthracite lump coal for Navy Yard, Brooklyn, N. Y.; $3.28 per ton for anthracite broken for same yard; $3.64 per ton for anthracite egg for Naval Hospital, Brooklyn; $3.95 per ton for anthracite stove for Navy Yard, League Island; $4.25 per ton for anthracite chestnut for Navy Yard, Brooklyn; $2.60 per ton for bituminous for Navy Yards at Mare Island, Cal., and Portsmouth, Va. Anthracite lump coal for Mare Island Navy Yard costs $14 per ton, and anthracite broken for same yard, $12.20 per ton.

REAL ESTATE RECORD,

AND

BUILDERS' GUIDE,

PUBLISHED EVERY MONDAY, AT 727 WALNUT STREET.

TERMS:

One Year, in advance, - - - - $5.00

(REAL ESTATE PUB. CO.)

JOHN N. GALLAGHER, Prop'r.

Refers with permission to William M. Singerly, Proprietor of Phila. "Record."

PHILADELPHIA, MONDAY, JULY 26, 1886.

AS THE price of gas declines the bills increase.

SOMETIMES too little attention is paid to the acoustic properties of large halls.

THE Boston *Herald* says that nothng but an enlargement of our export trade will serve to revive our industries.

THE surprising number of permits issued from day to day indicates an improving activity in building trade circles.

PRESIDENT CLEVELAND will send the electric spark that will set the machinery of the American Exhibition in operation in London on May 2d.

WHEN the Real Estate Exchange gets under way the brokers who now try to steal business from neighboring brokers will find it risky business.

WE have entirely too much lawyer in Congress. Government, after all, is a matter of business, of dollars and cents, not of fine speech making or log-rolling.

PHILADELPHIA pays $13,000,000 per year for the cost of municipal existence, while New York pays $35,000,000, and still neither are happy. We run on a $1.85 base, and New York on a $2.28.

THERE seems to be a tendency to centralize the real estate and building interest. There is a magnificent opportunity just now for the organization of a Building Erection Company with sufficient capital to undertake the heaviest operations. It would be able to command the services of the best architects and the most experienced builders.

THE charter for the Real Estate Exchange must be broad and comprehensive enough to anticipate every possible contingency, besides which it must be so drawn that when granted its powers should embrace every business element involved in real estate transactions, in order that the Exchange may become, if necessity requires it, a formidable weapon in the interest of its members for both defense and offense against competition and absorption.

The organization must be made a strong one, and its management must be placed in the hands of strong men. It must command by virtue of its capital out, strength, and the personal and collective influence of the members, a place second to no corporate institution (railroads perhaps excepted) in this city.

It must have means for making the money not only necessary for its current expenses, but enough to enable the organization to make itself felt in opposition to State or municipal legislation inimical to the real estate interests. It need not enter into speculation, for there are hundreds of business transactions which legitimately belong to such an organization, and which would be in keeping with the purposes for which it was organized.

Its individuality must be maintained at any cost. To make it the tail to some foreign or domestic kite would render it of no practical good to the community it is expected to serve.

To create an organization that would simply afford its members a pleasant meeting place is not enough. It must be made a rallying place for every respectable real estate man in the community; its strong arm must be felt in the sense of redressing and correcting wrong and settling differences; it must be made the foster-mother of the whole real estate interest of this city, and cliques and gangs seeking to serve some ulterior purpose must be made to understand that the sentiment of the community is against them, and that neither they nor their motives will be tolerated.

The original idea of limiting the capital stock to $50,000 was a mistake, and it certainly indicates a want of appreciation of the importance and dignity of the organization to stop short of a quarter of a million at least. Men of small ideas who seek self-elevation and who would be satisfied with an organization of an ambiguous nature, handicapped with limitations in keeping with their brain area, so long as they obtained place and power, must step to the rear, for in this emergency, when practically the very success of the oragnization itself is seriously involved, there is only room at the front for men of brains who have no selfish purposes to serve, and who, without qualification of any kind, desire the success of the organization over and above every other consideration.

WE met a builder on the cars coming from Cape May, on Monday last, who had taken his first holiday in sixteen years. He said that he had concluded that the nose-to-the-grindstone-all-the-time way of doing things was neither profitable nor healthful.

A LEADING French writer ascribes the general depression throughout the world to two causes; first, to the great increase in production, and, second, to the contraction of the world's currency. The increase in production ought to be a sign of increasing plenty and comfort.

IT seems that apartment-house building has received a permanent check. Builders in New York and Brooklyn, who pushed ahead too rapidly are now in dire distress over the fact that their properties are not tenantable, and that the craze for apartment houses has subsided.

SUPPOSING the purchaser of a building lot which has cost, say $10,000, obtains an insurance upon the title, and that he afterwards erects a factory costing, say $75,000, who insures the title to the factory in case the title to the building lot proves defective and its owner is ejected? Next!

WE need more trees. Philadelphia, particularly in the older sections, has a large share compared with other cities, yet she has not enough. Trees are of great value; for, besides breaking the monotony of our almost endless rows of brick houses, they tone and soften the appearance of our streets, and impress the stranger and visitor with a sense of home life and domestic thrift and contentment. Trees enter largely into the sanitation of cities; they absorb moisture, and this in many cases makes innocuous, soil which would exhale fetid and unhealthy vapors. Trees practically inhale or absorb influences which in the heat of summer might become dangerous, while their exhalations are said to be extremely healthful.

Plant trees before your houses, and plant trees that will become not only a credit to our city, but which will make our miles of streets sheltering and inviting to the pedestrian during the warmest hours of the hottest days of summer.

FIFTY-EIGHT real estate men are included among the subscribers to the Real Estate Exchange.

IN California experiments with a double riveted pipe, made of a superior article of plate iron, showed that bent pipes could be with entire safety submitted to a constant maximum tensile strain of 16,000 pounds per square inch. Lap welded iron tubes of sizes up to 15 inches in diameter will safely stand a strain of 20,000 pounds per square inch.

IT is to the interest of financiers and money lenders to keep the supply of money at the lowest possible ebb, just as it is to the selfish interest of speculators to keep the supply of any commodity they want to corner at the lowest possible ebb. The great body of the people, who have no time to study theories, and who want to be on the safe side, should always lend their influence in favor of an abundance of circulating medium and plenty of silver.

SOME day when you have the time to spare, take a walk around town and make a note of the rickety, tumble-down buildings standing on desirable lots and which the Board of City Trusts, under Girard's will, would be only too glad to pay the owner to tear down. There's better chances for investment in hundreds of these old buildings than you can find in the new section of the city; the trouble is busy men must stumble on to these chances, they don't have the time to hunt them up.

THE REAL ESTATE RECORD AND BUILDERS' GUIDE has not subscribed for a dollars worth of the stock of the Real Estate Exchange and it consequently has no selfish interest to serve. It's article on the first page of last week's issue was prompted by a desire to see carried out the original purposes for which the Exchange was organized. The elevation of the real estate business of this city is of far more consequence than the few dollars which might be gained by speculation, at present anyhow.

OUR sewer-pipe manufacturers are endeavoring to form an association, the object of which will be to maintain prices and thereby avoid cut prices. They had at one time an organization, but dissensions arose which precipitated ruinous prices, leaving virtually little or no profit. A few days ago a meeting was held at Cleveland for the purpose of reorganizing the Western Sewer-pipe Association of Manufacturers which was represented by twenty of the leading manufacturers East of St. Louis and West of New York city and a board of trustees was elected.

THE fallacy of accepting bids for public work that are so ridiculously low as to bear the stamp of stupid ignorance on the part of the bidder or the worst elements of premeditated rascality is now again exemplified in the case of the four new buildings for the Norristown Hospital. Contractor Ginrich is no doubt an honest man and really believed that he could erect the four buildings for the amount of his bid, which was $81,150, and yet on the start he discovered that he had made an error of $10,000, and notwithstanding the leniency of the Trustees in giving him an additional $10,000, his work was so badly done that it received the condemnation of Architect Thorn and had to be torn down. This is but one of the many cases of mistaken economy that result from our competitive system. The principle is not a bad one if there was a way through which honest bids for honest work could receive just consideration, and the speculative contractor or bidder, who had everything to gain and nothing to lose, could be made to understand that "monkey" bids and "snide" work would not be considered at all. An approximate estimate should be made by competent architects as to what good work could be done for, and it would be a safe rule if those representing the city or State were permitted in making awards to be influenced by the judgment and experience of our best architects whose standing and representations are better guarantees than the sureties generally furnished by these ridiculously low bidders.

—A convention of operative potters is being held in Trenton, N. J.

—A communication was received by the Board of Health on Thursday from a number of property owners on Orchard street, north of George, in the Sixteenth Ward, protesting against paying for repairs to that street which has been declared a nuisance by the Board on account of it being defectively paved. The communication states that the street is used exclusively by Simon S. Myers, and that the residents use the cartway only for receiving coal, and, therefore, should not be made to bear the expeuse. The Second District Committee will inquire into the matter.

—A large number of complaints were forwarded on Friday to the Controller's office by the Citizens' Municipal Association. Most of them referred to the non-collection of garbage, but there were also charges of bad paving on Seventeenth street, below Reed, and on Bread and Quarry streets, and of poor material used in laying down a Belgian block pavement on Duval street, Germantown. Mr. Francis B. Reeves called attention to the dangerous condition of the inlet at the corner of Exchange place and Carter street, and also complained that several of the country roads of Germantown were badly in need of repairs.

—The Home for Destitute Catholic Orphan Children is being enlarged. The building is located on the South side of Race street East of Eighteenth, and is the property of the parish of St. Peter and St. Paul. The new building has a front of 80 ft. and a depth of 42 ft. There are two wings, one 20 ft. by 96 ft. and the other 20 ft. by 46 ft. It is three stories, with high basement, brick with rustic granite base and granite and ficestone trimmings. The front entrance is a wide arched doorway, the centre being 63 ft. from pavement, with gabled pediment surmounted by a cross. A chapel, 20 ft. high, will be located on the third floor; it will accommodate between 300 and 400 people. Cost of improvement $35,000. Architect, Edwin F. Durang. It will be ready for use by Christmas.

REAL ESTATE.

Charters Granted.

The Illuminating Company of Philadelphia, for producing and supplying electric light to public and private consumers; capital, $5,000. The incorporators are Joseph B. Altemus, Thomas Dolan, Henry Lewis, John Lowber Welsh and R. H. Chill. The Union Light and Heat Company, of Toxburg, Clarion county; capital, $15,000. Franklin Building and Loan Association, of Chambersburg, with a capital of $500,000. W. O. Hickok Manufacturing Company, of Harrisburg, with a capital of $250,000. Bellefonte Iron Company, with a capital of $100,000. Latimere Creamery Company, with a capital of $5,000.

New Building for a Trust Company.

The Girard Life Insurance and Annuity and Trust Company has purchased three properties at the northeast corner of Broad and Chestnut streets. The lot includes, besides the extreme corner, the properties adjoining on each street, and costs the Trust Company $200,000. A handsome building, 34 feet 8 inches on Chestnut street and 77 feet on Broad street, will be erected, providing the owners of the adjoining Broad street property will allow the company to close a three-foot alley which divides the corner property from Finelli's Broad street restaurant. North of Finelli's is a building occupied by the Liberal Club and belonging to the estate of Eli K. Price, the owners of which are unwilling to close the alley unless the property be sold. It is held at such an extravagant price that the Trust Company refuses to purchase. Unless the lot can be bought at a reasonable figure the company will probably sell its new acquisition as it stands and erect a building elsewhere.

Sub-Postoffice Asked For.

A petition containing the signatures of the presidents, secretaries or treasurers of the various banks, trust corporations, insurance companies, bankers and brokers doing business in the Eastern section of the city proper, was presented to Postmaster Harrity on Wednesday asking for the establishment of a sub-office near Fifth and Chestnut streets. This was backed by another petition from a large number of business men and citizens. It was claimed that the petitioners were very much annoyed and retarded in their business by the distance of their offices from the main office at Ninth and Chestnut streets.

The citizens of Pascalville, Twenty-seventh Ward, ask for a station at that point, which is four and three-quarters miles from substation B, Thirty-seventh and Market streets.

The residents of Holmesburg, Twenty-third Ward, ask for the extension of the free delivery service to that place. Several petitions to the same effect have been considered by the Postal Inspector, whose report was made direct to Washington. Mr. Harrity is of the opinion that these changes will add greatly to the facilities of the transmission of mails and benefit the business men and the residents in each locality.

Sea Isle City to be Sold by the Sheriff.

At the time Mr. Charles K. Landis purchased Sea Isle City, Mr. John L. Burk, for certain lot considerations, entered into a contract with Mr. Landis under which Burk was to secure titles from the many owners whose interests represented, besides an ownership in the land rights of a varied nature, such as grazing rights, fishing rights, wood rights, etc. After title had been secured, Mr. Landis and Mr. Burk quarrelled, in consequence of which Mr. Burke was ejected and all further business between these gentlemen ended

there. Mr. Burk subsequently brought suit against Mr. Landis and obtained a judgment for $58,000; Mr. Landis carried the case to the Court of Errors and Appeals, at Trenton, and on Monday last an opinion was read affirming the judgment of the lower court with interest and costs, the whole now amounting to over $80,000.

The judgment now constitutes a lien on a portion of Sea Isle City which will now be sold by the Sheriff unless Mr. Landis pays the amount of the lien.

Mr. Landis explains that the decision of the Court of Errors and Appeals in the Sea Isle City suit of John L. Burk against C. K. Landis only confirms the decision of the Chancellor granting to Burk forty town lots which had previously been set aside for him and $40,000 worth of stock in the improvement company. The decision does not affect any other property at Sea Isle City.

Railways' Duty to Repair Streets.

City Solicitor Warwick gives the following opinion covering the question of street paving where the street is occupied by a street railroad company:

"In a communication sent to this office some time ago you state that you have received a bill from the Highway Department for repairs to the asphalt pavement on the east side of Sixth street, between Walnut and Chestnut streets, amounting to $493.14, which it is proposed shall be paid out of item 13 of the appropriation approved December 13, 1884. This work was done without previous advertisement and award to the lowest bidder, and the bill states that the work was done at the expense of the Passenger Railway Company, and will be sent to the City Solicitor for collection.

"You desire my opinion first, whether upon the city paying this bill (on the refusal of the railway company to do so) the amount can be recovered from the railway company by suit. I advise you that it was the legal duty of the railway company to repair this portion of the street, and if the company refused to do so the amount expended by the city in putting it in repair can be recovered from the company by suit. Second, whether the amount can or cannot be recovered from the railway company should the city under the circumstances pay the bill, I answer in the affirmative."

State Committee of Lunacy.

The State Board of charities has a committee on Lunacy whose duty it is to suggest measures for the amelioration of the condition of the insane in the public and private asylums of Pennsylvania. At Williamsport in June last the medical society passed the following resolution:

"That this society recommends the county societies in affiliation with it to appoint a Committee on Insanity, whose duty it shall be to visit, at least annually, the insane asylums, county poorhouses and other institutions or places in which insane persons are treated, and observe whether the hygienic conditions and methods of treatment therein existing and pursued are in accord with the requirements of modern medical science."

After carefully considering this action the Lunacy Committee, of which Dr. Thomas G. Morton is Chairman and Dr. Andrew J. Ourt, Secretary, unanimously passed the following series of resolutions:

"That the State Committee on Lunacy desires to secure every advantage which may be derived from intelligent visitations of the insane, whether in State hospitals, almshouses, private institutions, or elsewhere, in order that this afflicted class shall have not only the best care and attention but every improvement in treatment which can be suggested.

"That the efficiency of the visitations of the proposed County Committees on Insanity will be greatly increased by the appointment, under the Lunacy law of May, 1883, of each member as an official visitor to all places where the insane are detained for care or treatment.

"That the Boards of County Visitors now acting for this committee be increased by the addition of those members of the County Medical Societies who shall be respectively appointed in accordance with the above resolutions of the State Medical Society.

"That the Secretaries of the County Medical Societies of Pennsylvania be requested to notify their respective societies of the action of this committee, and to send to the Secretary of the State Committee on Lunacy, at their earliest convenience, the full names and Post Office addresses of those so appointed, that they may promptly receive official notification."

It will seem that intelligent and effective supervision of the hospitals for the insane will be obtained as all county visiting committees will act under authority of commissions granted by the Lunacy Committee of the State Board of Charities.

The Citizens' Municipal Association.

The Citizens' Municipal Association will make itself a terror to evil contractors if its recent steps indicate its future course. Even in the trifling matter of a $2,800 bridge at Thorp's Lane, Germantown, earnest investigations have been made and followed by protests and affidavits before Controller Dechert. Mr. Joshua L. Bailey, in a letter to the contractor, goes into details as follows, which would seem to show that Mr. Bailey knows something about engineering work. The matter is as important as though the contract was for $280,000. S. M. Button, a stone mason, declared he would do the work for $800, if given permission, or for $1,200 according to specifications. If there is this difference between the value of all our contract work and the price the city pays for it it is high time the citizens were represented by other than their sworn servants. Here is the letter:

"The undersigned, with two other members of the committee (Messrs. Perot and Burnham), accompanied our agent, Mr. Addis, yesterday afternoon, and made a personal inspection of the bridge on Thorp's lane (Twenty-second ward), and fully verifie the statements already made to you by our agent.

"On a few points we desire to be more explicit. The specifications require that 'the foundation pits' of the abutment walls shall be excavated to a foundation satisfactory to the Chief Commissioner of Highways; also, that cement below water line shall be English Portland cement mortar, mixed half and half with sand. The committee caused four openings to be made, two under each abutment, and found not only that there were no foundation walls laid in cement, but ascertained, by actual measurement, that there were absolutely no foundation walls whatever below the water line. The abutments being built are resting only upon the loose, micacious surface soil. That there might be no mistake in the matter, a member of the committee thrust his arm in each of the openings under the walls 12 to 15 inches.

"It is the judgment of the committee that these abutment walls are very insecure in case of any ordinary flood, and would not like to believe that they were found 'satisfactory by the Chief Commissioner of Highways,' as required by the specifications. The committee cannot withhold expressing their belief that there has been culpable negligence upon the part of the Highway Department in awarding this contract when there was but one bidder, obliging the city to pay $2,800 for work which, in the judgment of competent persons, could have been well done for less than one-third that sum.

"We believe, therefore, that there is every reason for compelling the contractor to fulfil his contract with the city according to the specifications, and until that is done we hope you will find it to be your duty to withhold payment."

The letter of Mr. Addis which is addressed to the Committee on Abuses and Complaints, gives a detailed description of the material found in the walls of the bridge. The foundation, he said, was built with "rotten rock sand." None of the stones used were of the size specified in the contract and the mortar had been made with a small portion of cement and a great deal of loam.

The affidavits of Nicholas Miller and S. M. Button, the former a stone mason and the latter an architect and builder, stated that they had inspected the bridge and found that it had not been rebuilt according to the specifications; that the stones were not of the specified size, and that two-thirds of them were not of good quality; that no cement had been used in laying the stones below the water line, and that the "cement" above the water-line was not more than one-eighth cement, the remainder being rotten rock; that the foundation walls are not of the depth they should be and the walls are liable to wash away in case of a heavy freshet; that the planking was not of first quality, and the guard rails were spliced contrary to specifications.

Mr. Button swore that he would be willing to build the bridge as it is now for $800, or strictly according to the specifications for $1,200.

The Master House Painters' Association.

The Master House Painters' Association, in session last week in this city, was organized in New York on January 15, 1885, and has now a membership of 500. 119 members were present at the first day's session. The association has branches in Cleveland, Detroit, St. Paul, Milwaukie, Dubuque, St. Joseph, Atcheson, Sioux City, Louisville, Evansville, Bridgeport and Boston.

One of the painter delegates said, last week, before the Painters' Convention, that the paper manufacturers in New York and the East are stealing the trade from the legitimate painter. The paper hanging trade belongs legitimately to the painter. The painter hung paper before the paper hanger was born or ever thought of. The latter trade is comparatively of recent origin. The two trades ought never to have been separated as they now are. It is an every day occurrence in New York for the paper manufacturer to do the tinting, as an accessory to the paper hanging, and they are going a step further by doing all the painting themselves, and leave to the painter only the rough, common and dangerous work. "The paper manufacturers have not only stolen our trade, but have stolen our men," said the speaker. Even furniture dealers are doing decorating in New York, using the same argument as the paper men, that they can blend and harmonize colors better than the painter. The remedy for these evils was, he said, in their own hands, and that was to refuse to buy one dollar's worth of paper from manufacturers who seek to do business in the way mentioned.

On the interesting subject of trade schools A. Scheidler, of New York, read a paper. He said that Europe is no longer sending her best sons to America, but men of an inferior order of ability. The great question of the day is how to promote the training and the making of skilled mechanics, and he fully concurred with Mr. McCarthy in

asking the State to establish trade schools. He thought that a committee ought to be appointed to confer with committees of other trades to see if something cannot be done for the establishment of an apprenticeship system and of technical schools. It is the duty of every member to work for the establishment of industrial instruction in connection with the public schools. Technical schools are necessarily connected with the apprenticeship system.

John Patterson, of Philadelphia, before the Painters' Convention, spoke on the apprenticeship question. He strongly favored the system and predicted good results from it if the master will be careful in the selection of his apprentice as he had always been. He spoke in most favorable terms of Girard College, saying that its system of education furnishes excellent preliminary training for apprentices, and that some of his most successful apprentices had come from that institution. But to produce first-class mechanics the master must be watchful of his apprentice, must train him up carefully and exercise a paternal guardianship over him.

Extracts from address of J. G. McCarthy before the Master House Painter' Convention:

"On leaving this branch of our subject let us glance for a moment at the position of trades unions in the matter of apprenticeships. Their policy in all ages has been favorable; their loudest cry in our own times is for some system that will weed out incompetent workmen and prevent handy men from taking the place of regular mechanics. But you say they attempt to limit the number of apprentices in their respective trades. They do; and justly so, for while the plan prevails of leaving a knowledge of a trade an incident or accident of employment and substituting apt boys for regular mechanics we cannot have tradesmen in the true sense of the word. Let employers feel that when they hire a youth it is for the purpose of teaching him a trade in the general acceptance of that term, and not that he may take the place of a mechanic and man of family; in one small branch of the trade, at one-third the tradesman's wages thus working incalculable injury to himself, the tradesman and his employer, and an opposition on the part of trades unions will cease to exist. The best argument that can be produced on this matter is the fact that, before trades unions were thoroughly organized in England, there was but one apprentice to seventeen tradesmen, and now, both there and in this country, on a trades union basis, the average is three to seven, thus proving that employers and apprentices themselves are the most active enemies of the system.

The speaker assuming that the apprenticeship system is for the best interests of all concerned, and that Government aid seems to be necessary, and looking at the matter from an educational point of view, rather than one of labor, will we not be justified in suggesting that the State establish a mechanical department as a substitute for our present high school system, giving the children of the laboring classes, as well as all who may desire to take advantage of it, a technical knowledge of the lesser arts and mechanics, and leaving the pursuit of higher education to our colleges and universities? Benjamin Franklin says, "good apprentices make good citizens," and that being the aim of the State, the plan we have suggested is feasible and desirable.

"If our lawmakers can evolve from their gigantic intellects some plan that will impress on the youth of the land the dignity and necessity of labor, future generations will rise up and call them blessed, and, instead of depending on emigration to supply us with skilled artisans, good though they may be, we can reasonably expect to see in the immediate future a large class of intelligent American mechanics, born and nurtured under the most liberal Government on the face of the earth, whose aim and aspirations will be co-existent with that of those around them, and who will have nothing in common with the communistic braggarts of foreign despotism, that are a constant menace to the welfare of our country.

"The end is worth striving for: let us pray unceasingly for a Moses to lead us to the land of promise. Here, enter the life, liberty, and pursuit of happiness, disciples proclaiming aloud; we have already more government than we need and are fast drifting towards paternalism. We are not asking the State to provide work or regulate wages, but simply to so educate the youth of our land that they may become good, intelligent, self-sustaining citizens. * * * That this class of schools under Government supervision would be successful is best attested by the fact that in Switzerland, France and Germany, where they are in existence, they have realized the best hopes of their most ardent advocates, and are to-day working wonders in these several countries."

In conclusion, the speaker thought that the apprenticeship problem can best be solved by the local organizations, but that every member ought to resolve to weed out incompetent men and get apprentices, so as to have good workmen in the future.

Lumber.

Cedar posts are receiving great attention just now, large orders coming in; but the great trouble is that manufacturers are asking as much for them at their mills as prices are quoted at this point, but an upward tendency is marked. Chestnut posts are also in demand, but manufacturers are holding for higher prices. Sap pine is somewhat scarce, and prices remain firm. Walnut is in good demand, but better qualities remain scarce. Cherry is having but a slow sale, and is scarce. Poplar is in good demand, and prices run a little low. White oak posts are in fair demand in limited lots Yellow pine still continues to have a ready sale, and in most cases is bought up as it arrives. This may be accounted for from the fact that in the early spring but small quantities arrived, in consequence of a scarcity of vessels; hence the yards got drained of stocks. Spruce is now being largely introduced into the market for inside work, and is being very favorably received.

The lumber trade generally can hardly be said to be dull, but the anticipations are that a good fall trade is in prospective. White pine is to have a fair amount of attention paid it as is also hemlock, which both retain their last week's prices. The saw mills are all active and are ahead with their orders.

Cool Cellars.

Mistakes are often made in attempting to cool cellars. The object of ventilation is to keep the cellar cool and dry, but this object often fails to be accomplished by a common mistake, and instead the cellar is made warm and damp.

A cool place should never be ventilated unless the air admitted is cooler than the air within, or at least as cool. The warmer the air the more moisture it holds in suspension. Necessarily the cooler the air the more this moisture is condensed and precipitated. When a cool cellar is aired on a warm day, the entire air being in motion appears cool, but as it fills the cellar the cooler, with which it becomes mixed, chills it, the moisture is condensed, and dew is deposited on the cold walls, and may often be seen running down them in streams.

Then the cellar is damp, and soon becomes mouldy. To avoid this, the window should only be opened at night, the last thing before retiring. There is no need to fear that the night air is unhealthful; it is as pure as the air in mid-day, and is really drier.

The cool air enters the apartment during the night, and circulates through it. The window should be closed before sunrise in the morning, and kept closed and shaded during the day. If the air in the cellar is damp, it may be thoroughly dried by placing in it a peck of fresh lime, in an open box. A peck of lime will absorb about seven pounds, or more than three quarts of water, and in this way a cellar or milk room can be kept dry.

"Folsom."

A NEW TOWN ON THE BALTIMORE AND PHILADELPHIA RAILROAD.

This estate was originally farms, and owned by T. T. Tasker of the firm of Morris, Tasker & Co.; the full extent of the area is 300 acres, which has been purchased by a company for the purpose of putting it out into lots for building purposes of which there will be 3,600 lots, each lot being 25 feet by 100 feet. So far nothing has been done to place them on the market, but, suffice to say, the location is within easy access of the city and is situated between Ridley and Prospect Park, and Moore on the P. W. & B., and Morton, Rou ledge and Swarthmore on the P. W. & C. R. R., with the B. & O. R. R. taking a straight cut through the centre, and further, that within a radius of four miles it has easy access to no less than seven stations, and from this point trains may be found to Philadelphia every twenty minutes. This neighborhood has grown so rapidly that it has even deceived real estate speculators. A great, and very important feature of the new line which travels through the centre of "Folsom," (B. & P. R. R.) is that it is run through a cut, and at the road crossings will have handsome bridges spanning it; this of course will be a great advantage to families and travelers, as great annoyance will be prevented and safety of life will be insured.

The title of the estate is taken from a happy idea of one of Philadelphia's prominent brokers in real estate, who well knowing that this particular spot was young in the minds of the populace, and beautiful to the eye, it well deserved the name of "Folsom," which will we think require no explanation. Already arrangements have been made, by the B. & P. R. R., to erect a fine station and when completed they will offer to purchasers of lots in that vicinity inducements to enjoy country air in preference to town life. The land company will as soon as practical erect suitable dwellings for middle class people, which they propose to sell on cash payment of 10 per cent. with the balance in easy monthly payments. The present rate of fare to Broad Street Depot is seven cents, but the B. & P. make statement that their intention is only to charge five cents for single fare.

Recent Decisions in Relation to Matters Concerning Real Estate.

ADVERSE POSSESSION.

To defeat a title claimed by adverse possession, on the ground that the possession has not been continuous, the break must be not merely an accidental one, nor a temporary want of a tenant.; it is where there is an abandonment or a want of continuity of title between successive holders that adverse possession is broken.

BUILDER'S CONTRACT.

The architect of a building may be named by the owner as arbitrator on the owner's part, to value work done by a contractor,

even where the architect has been employed to superintend the work.

The agreement in this case provided for a valuation of the work by "competent" persons, each party to select an arbitrator.

DAMAGES.

The measure of damages for the breach of a covenant against incumbrances, is the sum actually paid by the covenanter to remove the incumbrance; so long as he has paid nothing, he can recover only nominal damages.

DEED.

The doctrine that courses and distances in deeds give way to actual monuments and boundaries, applies where there is a discrepancy between them as described in a single deed. When the controversy was between claimants under two deeds from the same grantor, and the description given in the earlier was consistent with itself and was supported by all the testimony, held that the rule was inapplicable, and that the Court was right in instructing the jury to find for the title claimed under the earlier deed.

EXECUTION.

Where a sheriff who had made money on an execution was notified of a landlord's claim, but disregarded it, and paid the money to the execution plaintiff, held that, whether he acted from ignorance or design, he was liable to the landlord.

LANDLORD AND TENANT.

Where the landlord lets the tenant into possession, and the tenant afterwards surrenders the property to a stranger, the latter on ejectment brought by the landlord can only defend by showing title in himself.

MECHANICS' LIEN.

A notice to create a labor lien must show, in some form, that the labor was performed within the time limited by the Act, in a business defined therein, the sum due, and that the property subject to the preferred lien is embraced in the levy.

MORTGAGE.

A mortgage duly recorded is not discharged by a sale of the premises under foreclosure of mechanics' liens subsequently entered; it constitutes a charge prior to such liens.

SALE.

A contract for the sale of a building covered by a policy of insurance does not in general render the policy void, but brings the vendor under obligation in case of injury by fire before conveyance, to serve notice and proofs of loss, and collect the insurance money in trust for the purchaser, to the extent of his equitable interest.

VENDOR AND PURCHASER.

The fact that a parol contract for sale of land may not be enforced against the vendor does not entitle the purchaser to declare it rescinded and recover back his voluntary payment of purchase money, if the vendor is ready and willing to perform his part of the contract. F. R. SHATTUCK.

—The funeral of Samuel Barton, the senior member of the firm of Samuel Barton & Sons, who died of heart failure on Saturday night, aged 79 years, took place on Wednesday afternoon from his home, 707 Vine street. Among the members of the grocery trade present were James Melsop, S. L. Kirke and Henry Rorer. The pall-bearers were Messrs. Wm. King, John S. Bispham, Nathan Young, John L. Hough, also of the trade. The religious services were conducted by the Rev. J. L. Sibole, Pastor of St. Luke's Lutheran Church, and the interment took place at North Laurel Hill.

Items of News.

—The Volunteer Firemen's Association has 1187 members.

—A new rectory is to be built for the Episcopal Church at West Chester.

—An apparently inexhaustible vein of mica has been discovered on the farm of Samuel G. Moore, of East Marlborough, Chester county.

—On Thursday, the first locomotive and a number of freight cars were taken across Gray's Ferry bridge on the new Baltimore & Ohio Railroad.

—A new building is about being erected by the 1001 Club, Sixteenth street, above Chestnut, which will be ready for occupancy by the 1st of next January.

—Mr. Chas. F. Kolb, of building and loan association fame, says the tendency of capital these days is in the direction of enterprises that will benefit persons of small means.

—The final sessions of the Master House Painters' Association were held Thursday in St. George's Hall. In the afternoon the delegates visited the Gray's Ferry White Lead, Color and Chemical Works.

—At the meeting of the Committee on Control of Gloucester, N. J., Water Works, the contract of laying water-pipe on Somerset and Hunter streets was awarded to Jas. E. Smith, the lowest bidder.

—The French Government has ordered 60,000 repeating rifles to be distributed among the troops before August. This action is attributed to the conduct of Germany in recently arming her battalions in Alsace-Lorraine with similar weapons.

—The Board of Health elected Augustus Brown an inspector of house-drainage and plumbing, vice Wm. W. Weilde, who declined. It was decided to dismiss the appeal of the Managers of Monument Cemetery and to remove the pumps in the inclosure.

—A resolution was passed on Thursday, at a meeting of the Board of Health, making the chairmen of the standing committees a special committee to prepare an estimate of the probable expenses of the Board for next year, in accordance with the request of Controller Dechert.

—By the adjudication of the second and final account of William B. Hackenburg and Mayer Sulzburger, executors of the estate of Benjamin Lavine, it appears that the entire property, amounting to $15,000, has been turned over to the Jewish Hospital, to which the decedent left it.

—A bill is equity was filled in the United States Circuit Court on behalf of Albert H. Spencer, of Boston, asking to have the Pennsylvania Railroad Company enjoined from the making of an alleged infringement upon the complainant's patented improved locomotive-tender loader.

—There is a talk of turning the grounds, on which the Pennsylvania Hospital for the Insane is located in West Philadelphia, into a new park. The movement is favored. The tract of land has great natural beauties and could at very little expense be made a handsome and attractive place.

—The following statement was Thursday afternoon submitted by the cashier to the Finance Committe of the Gas Trust. Cash in banks, $664,799.89; sinking fund account, $2,632.94; redemption account, 1,836.96; cashier's account, $12,241.31; total, $683,511.10 The committee appropriated $65,758.69 for the payment of wages due August 1, the balance necessary, $14,241.31. for this purpose and for the payment of emergency bills being in the cashier's account.

—By invitation of Henry R. Worthington, engine builder, the Water Committee of Councils propose to visit New Bedford, Mass., to inspect a pumping engine erected there. The committee will start from the Broad and Filbert Streets Station on Wednesday, August 4 at 1.14 o'clock P. M., and will return on the following Friday.

—A tract of land on Master street between Twenty-eighth and Twenty-ninth streets, 400x455 feet, and another tract on Master North of Twenty-ninth street, have been purchased by William L. Elkins and P. A. B. Widener at a cost of $63,000. On account of the recent strikes, the building of the houses will be postponed for an indefinite time.

—The question of widening Arch street is now before the Board of District Surveyors. An ordinance has been prepared, fixing the uniform widths between the house lines from Eighth street to the Schuylkill river. This will set back a number of houses from a foot and half to three feet. Mr. Dallam protested against any alterations below Tenth street.

—The Union Electric Railway Company made a successful test on Thursday evening on the Ridge avenue line at Dauphin street. There were a large number of scientists and distinguished gentlemen present. The car was loaded with passengers and worked perfectly. It ran at the rate of about eight miles per hour. It can bo stopped or reversed at the will of the engineer.

"—Indications are that the managers of the Pennsylvania Asylum for the Insane will not dispose of the property at the figure offered by a syndicate, $1,000,000, as they value the ground at double that amount. There is some talk of the managers cutting streets through the western end of the grounds and dividing it into building lots, which will increase the value to over $3,000,000.

—Jas. B. White & Co., of Pittsburg, have puchased 5,000 acres of manganese ore land twenty miles from Waynesburg, Va., and within three miles of the Shenandoah Valley Railroad. The product from this land will supply the home market with sufficient ore to shut out the greater part of the spiegel and fine manganese ore imported from England. In a few months there will be a new town built and about 1,000 men at work, when there will be an output of 500 to 800 tons of ore per day.

—The weekly statement of the City Treasurer shows that on July 15th the balance was $1,806,226.36, with cash receipts to July 21st of $124,147.22 and payments to the amount of $98,240, leaving cash balance on Wednesday of $1,832,173.31. The various departments returned to the city treasury these sums: $13,658.59, taxes for 1886, from Receiver Hunter; $2,962.08 from city property, $1,500 from county prison, $213.32 from surveys, $195.38 from the City Solicitor and $89.20 from boiler inspections.

—A communication was received on Thursday stating that Philadelphia is to have a school ship. The appropriation of $3,000 will be made for the fitting up of the ship. President Lawrence of Common Councils' Friday sent the following letter to Washington:

CITY OF PHILADELPHIA, COMMON COUNCIL, Philadelphia, July 22, 1886.—Hon. A. C. Harmer, M. C., Washington, D. C.—My Dear Sir: Your kind letter of yesterday has been received and contents read with much satisfaction. Permit me to tender to you, not for myself alone, sincere thanks for your valuable labors in connection with this school ship, and I feel assured that after it had been established you will feel proud in knowing that it was mainly through your exertions that it became possible. Future generations may be grateful enough to bless the men who had foresight enough to conceive a measure that saved many boys, and made worthy and useful men of them, and at the same time provided a supply of men to man out vessels of war in case their services were needed. Again thanking you, I am, sir, yours very truly,

CHARLES LAWRENCE.

—The new parochial building of the Church of St. Vincent de Paul, at Germantown, will be finished about the 1st of September. It adjoins the church and has a frontage of 65 ft. by 147 ft. deep, two stories high, slanting slate roof. The walls are of stone, plastered and cemented inside, so pointed that at a short distance it resembles granite. The trimmings are of gray stone with terra cotta tiling. The basement will contain a gymnasium, and the ground floor will be used for the different parish organizations. There are two wide stairways, and in rear of hall a gallery. The cost of the building will be $50,000.

—According to the New York *Commercial Bulletin* the loss by fire in the United States and Canada, between January 1 and June 30, is $53,900,000, or $3,000,000 in excess of the loss during the same period last year. There were 999 fires whose reported losses were between $10,000 and $1,000,000 respectively; and there were 82 fires whose aggregate destructiveness exceed $21,500,000, or 40 per cent. of the entire waste of the half year. The *Bulletin* thinks that a Coroner's inquest into the origin of all fires throughout the country would have a good effect in checking incendiarism and carelessness, which cause at least two-thirds of all the fires.

—Judge Acheson, of the United States Court, has ordered the sale of the Shenago and Allegheny Railroad on first and second mortgages. The road is 68 miles long, and the liabilities are $2,250,000. The date and place of sale will be fixed by the Court later. A deed of sale was also made in the case of the New Castle Northern road, in the same Court, on account of the general indebtedness of the road, which is represented by the Receiver to be insolvent. The liabilities are $175,000. The road will be sold at New Castle, Pa, on Sept. 2. In the case of the Buffalo, New York and Philadelphia Railroad Company, a petition was filed, praying for the appointment of a Trustee in place of J. Edgar Thomson, deceased.

—Among the items in the inventory at the time of the filing of the account under the will of Asa Packer were 105,685 shares Lehigh Valley Railroad Company, appraised at $6,213,187.56; 31,000 shares Pennsylvania Middle C. F. C. and Railway Company at $31,000; $132,680 bonds of the Lehigh Valley Railroad Company; Lehigh University Library Building, $110,213.58, a total of $6,567,-796.13. The executors have also on hand securities valued at $286,280 purchased during the period covered by the account, which include 1,489 shares Bethlehem Iron Company, valued at $157,789.23, and 1,102 shares Franklin Coal Company, valued at $55,100. The income from the estate during the same period amounted to $2,153,005.27, derived principally from Lehigh Valley Railroad dividends, other securities and coal lands.

—The defence in the Heckscher suit against the Girard Trusts for $100,000 damages for the flooding of the plaintiffs' colliery will be that the defendants took every possible precaution to prevent the doing of damage, and that therefore they are not responsible for the loss.

"We suffered a very heavy loss, direct and indirect, from the flooding of the mines," said Mr. A. Heckscher. "All our skilled mechanics were kept on salary, our profits ceased, and loss of business prestige was considerable. We not only had to stop working entirely, but we had to pump out the water they forced into our mines. Every day we kept begging the inspector to allow us to resume operations, but he refused. Of course, he did right, and the fact that it was afterward found that we might safely have gone to work is of no importance when we consider the risk to the lives of the miners."

BUILDERS' ITEMS.

Among the Norristown Real Estate Men.

JOHN D. HART has just completed a handsome stone dwelling, at the cost of $25,000, at Norristown.

THE Norristown *Times* is erecting itself a handsome structure on the corner of Swede and Main streets.

MORGAN WRIGHT, builder, De Kalb street, Norristown, has this year largely added to the number of dwellings in that town and its vicinity.

THOS. R. DAVIS has recently purchased a country dwelling, built of stone, on the main pike at Norristown, above Eagleville, at the cost of $9,100, and has commenced some very extensive alterations on it.

J. M. COWDEN, conveyancer, corner Green and Egypt streets, Norristown, has been established upwards of 30 years, and for some considerable time has confined himself particularly to his own private business. He says that prices are being sustained, and the want of proper securities are preventing buyers.

E. D. ROSE, real estate broker, Main and Green streets, Norristown, makes as his specialty, transactions in farm properties, and within the past few months has transacted considerable business. He further reports the real estate business as being fairly active, and inquiries for small properties active for the season of the year. Mr. Rose has been established upwards of seven years, and is popular in his profession.

LARZELERE & GIBSON, attorneys-at-law, 320 De Kalb street, Norristown, find their conveyancing business in excess of other years, as is also that of single and large mortgages, and further report that that the private enterprise of the electric light, which is fast gaining ground throughout the town, is meeting with great success, and the anticipations are that before long the corporation will use it in common for lighting the streets. This firm speak of real estate business generally as being moderately fair, and sales realizing good prices.

S. M. MOORE is erecting a fine store at the corner of Mill and Main streets, which he anticipates to be ready for use early in August. It is three stories, elevator, and is heated with steam. He will use the ground floor as a feed and produce store, the second story as a carriage emporium; the whole building is suitably arranged for both businesses.

Mr. Overhultzer, Norristown, is the architect. The same architect has just built for Mr. Moore a fine three-story residence, of brick, with brown stone trimming, on Green street below Marshall, at the cost of $12,000.

Mr. Moore lately purchased a mill and workmen's dwellings at the Trappe, which he will shortly commence to make considerable alterations to. The mill, which is a shoddy mill, has been standing idle some considerable time.

DETTRE & PARKE, real estate and insurance agents, 55 E. Main street, Norristown, have been established three months, and have opened up with fine spacious offices, and report their business, considering the short time they have been established, very satisfactory. From the many inquiries for houses from $8 to $14 per month, they consider that there is a heavy demand for them, and a great want to the town; also a scarcity of houses from $20 to $25.

This firm have on their books some very valuable properties for sale, both business and private, most of which are central. Both gentlemen are well known amongst real estate men, and are thoroughly practical.

Within the last few days they have made sales of the following properties: a dwelling house on Chain street, $4,500; also 22 lots on Marshall street, for $3,000, which will be built upon almost immediately; also a dwelling house on Chestnut street, for $2,000.

FROM the authority of an old real estate man of Norristown we glean the following: That real estate for some considerable time has been renting very low, and selling, also, equally so; and, as a comparison, he says that property is 50 per cent. lower than that at Conshohocken; and, further, that in the lower or eastern part of the city lots are very plentiful, and may be purchased very cheap. The reason given for this is that some 35 years ago Mr. Isaac Roberts made large purchases of farm properties in that district, and turned them all into building lots, thinking that the town would extend in that direction. But, as may be seen, the growth of the town went westward and nortwestward, and to-day these vacant lots can be purchased for one-fourth their actual cost. He also reports that a better class of properties are being erected, most of which are built for sale and private individuals.

Large numbers of retired farmers are making Norristown their home, each purchasing or building his own dwelling. Great change have within the last few years been made in the business portion of the town, many fine buildings having been turned into stores, while the old stores have been undergoing modern improvements, adding fine plate-glass fronts and other improvements.

The average number of houses built each year is estimated at 200, and in nine-tenths of the cases properties are owned by their occupants, hence real estate agents have little or no rent collecting to take charge of. The town has two natural sewers—the Stoney Creek and Saw Mill, which empty themselves into the Schuylkill.

Some four years ago a movement was on foot to get a city charter, but was defeated, but is again being agitated, and the general idea is that it will now be carried. The electric light, which is being largely introduced into the town, is fast gaining popularity, and in Main street, where it is principally used, is very effective.

—About sixteen miles from Broad Street Station on the Pennsylvania Railroad, at Eddington, the Eddington Presbyterian Church is in course of erection. The exterior is built of a creamy white stone from quarries near Reading, and the trimmings are of light Trenton brownstone. The edifice is to be pure decorative Gothic in style. A spire about sixty-nine feet high will be built on the Southwest corner of the church. On its exterior stone steps will give access to the belfry. The chapel and Sunday school rooms will be in the rear. The whole building will be 104 feet long by thirty-four feet wide. Theophilus P. Chandler, Jr., is the architect.

Building Permits.

A three story brick dwelling, 18 ft. by 64 ft., Northwest corner of Germantown avenue and Brunner street, to William D. Daunton, 1803 Girard avenue.

A two-story store, 25 ft. by 35 ft., West side of Fortieth street, between Locust and Spruce, to John O. Kelly, 1218 Brown street.

Interior alterations West side of Fourth street, between Locust and Spruce, St. Mary's Church, to E. F. Durang, architect, 1200 Chestnut street.

One alteration at 218 North Front street, to James McCoy, 128 Vine street.

Addition to back building, 18 ft. by 14 ft., 346 South Fifteenth street, to James W. Howard & Son, 1336 Pine street.

Two bulk windows, Northwest corner of Fifth and Market streets, to Thomas Garber, 1519 Seybert street.

A one-story house, 34 ft. by 34 ft. and one two-story stable, 10 ft. by 22 ft.; Eastward of Frankford avenue, South of Tioga, to Colonel William Frishmuth, Amber and Auburn streets.

A one-story kitchen, 8 ft. by 9 ft., 922 Nectarine street, to T. Frank Shuster, 908 Buttonwood street.

A one three-story dwelling, 14 ft. by 30 ft., 522 South Twenty-sixth street, to George F. Payne & Co., 1211 Sansom street.

A two-story brick building, 15 ft. by 10 ft., 208 North Thirty-sixth street, to George F. Payne & Co., 1211 Sansom street.

Four stores and dwellings, 15 ft. by 56 ft., Southwest corner of St. John and Poplar streets, to Robert W. Strode, 2131 Vine street.

One two-story brick building, 16 ft. by 33 ft., Nice ave., between township line and Spring st., to J. Rhodes, Rittenhouse st. and township line, Germantown.

One two-story brick building, 17 ft. by 25 ft., on south side of Federal st., west of Long lane, to Thos. Marshall, 1336 Hillany st.

A two-story brick store, 20 ft by 60 ft., at 2233 Germantown ave., to Stephen Humphreys, 2531 N. Eleventh st.

One three-story store and dwelling, 16 ft. by 54 ft., on west side of Front st., between York and Dauphin sts., to Jos. Parker, contractor, 2639 Germantown ave.

An addition to Peabody Hotel, 10 ft. by 34 ft., west side of Ninth st., between Locust and Spruce sts., to Wm. Paine, 250 S. Ninth street.

Front alteration, 16 ft., southwest corner of Warnock and Diamond sts , to Wm. C. Merritt, 1021 Nevada st.

A two-story back building, 6 ft. by 9 ft., North side of Arch, between Twenty-first and Twenty-second sts., to Thomas C. Nesbitte & Son, 425 Locust st.

A three-story main building, 16 ft. by 24 ft.. on South side of Wharton, between Sixth and Seventh sts., to Thomas C. Nesbitte & Son, 425 Locust st.

A three-story back building, 14 ft. by 13 ft., on North side of Mt. Vernon, between Twentieth and Twenty-first st., to J. England & Bro., 2217 Wallace st.

One bay window, 4 ft. by 8 ft., 2039 Mt. Vernon st., to J. England & Bro., 2217 Wallace st.

A one-story blacksmith shop, 17 ft. by 30 ft., East side of Carlisle, between Dauphin and York sts., to Lemuel A. White, 2318 Carlisle st.

A three-story brick building, 18 ft. by 48 ft., on West side of Thirty-ninth st., between Powelton ave. and Baring st., to John A. Palmer, 233 South Fortieth st.

A two-story dwelling, 16 ft. by 46 ft., on West side of Thompson st., between Ash and Wires sts., to Herman Gemheimer, Kirkbride st., Bridesburg.

A two-story stone stable, 60 ft by 32 ft., East side of Main st., between Walnut lane and High st., to McManus Bros., 4 Evans Place, Germantown.

One-story back building, 14 ft. by 40 ft., Southwest corner of Tackawanna ave. and Linden st., to Herman Gemheimer, Kirkbride st., Bridesburg.

Alteration to store, front 15 ft., Northeast corner of Twenty-fourth and Berks sts., to James C. Moore, 605 Walnut st.

Third-story addition to dry house, 30 ft. by 32 ft., East side of Germantown ave., between Lehigh ave and Somerset st., to John Kramer, 1314 North Front street.

One three-story store and dwelling, 16 ft. by 45 ft., Northeast corner of Seventeenth and Morris sts., to DuRoss & Welsh, 758 S. Broad st.

Interior alteration, South side of Lancaster ave., between Forty second and Forty-third sts., to George S. Rowbotham, 4214 Lancaster ave.

A one-story building, 10 ft. by 25 ft., back of 188 Berks st., to Solomon Krudler, 2213 N. Second st.

Seven two-story dwellings, 14 ft. by 35 ft., East side of Woodward, South of Woodland ave., to J. Vinklen, 2221 Lancaster ave.

A store and dwelling, 16 ft. by 56 ft., Southwest corner of Tasker and Dean sts., to Du Ross & Welsh, 758 South Broad st.

A two-story brick building, 15 ft. by 36 ft., 1343 Germantown ave., to Mrs. A. Dougherty, owner, 1343 Germantown ave.

One three-story house, 16 ft. by 32 ft., North side of Wood, between Twentieth and Twenty-first sts., to William Marshall, 1226 Market st.

A two-story back kitchen, 17 ft. by 14 ft., East side of Wakefield st., between Jefferson and Ashmead sts., to Howard A. Buzby, 455 Wakefield st.

Five two-story dwelling houses, 13½ ft. by 39 ft , rear of 1514 Palmer st., to Wm. Keifer, 1514 Palmer st.

A two-story brick building, 16 ft. by 30 ft., West side of Lawrence st., between Venango and Erie ave., to Zachais Deboies Lawrence, North of Venango st.

A two-story frame building, 9 ft. by 12 ft., 4516 Penn st., to Atkinson & Pinker, Franklin and Unit sts., Frankford.

Two stone cottages, 24 ft. by 36 ft., North side of Lehman st., between Township Line and Morris st.,to C. F. Wells & Son, 5424 Vine st.

Two two-story houses, 15 ft. by 36 ft., Southwest corner of Lancaster ave. and Olivia st., to C. F. Wells & Son, 5424 Vine st.

One-story office, 4 ft. by 8 ft., South side of Poplar st., between Twelfth and Thirteenth sts , to W. R. Dougherty, 1419 Sansom st.

A one-story boiler house, 23 ft. by 30 ft., North side of Walnut st. between Ninth and Tenth sts., to John Duncan, 905 Chant st.

A carriage-house and stable, 23 ft. by 43 ft., at Northwest side of Cresson, between Gay and Levering sts , to James H. Boone, Cedar st., Manayunk.

One-story brick building, 18 ft. by 30 ft., West side of Third st., between Cumberland and Huntingdon sts., to H. M. Martin, 521 Diamond st.

A carriage-house and stable, 38 ft. by 23 ft., East side of Fern st., below Clapier st., to Hinchcliffe & Priestley, 2933 North Nineteenth st.

Two two-story houses, 13 ft. by 28 ft., North side of Melrose, between Fifty-seventh and Fifty-eighth sts., to F. E. Bassett, 325 North Fifty-sixth st.

A two story brick building, 16 ft. by 42 ft., W. side of Fairhill st., between Indiana and Cambria sts., to William Bartholomew, 143 West Morris st.

Three two story houses, 14 ft. by 28 ft., West side of Merion st., above Girard ave., to William Shelley, 1530 Wharton st.

An addition to dwelling, 14 ft. by 78 ft.. on East side of Thirty-fifth st., between Lancaster ave. and Race st., to Lewis M. Houpet, 107 North Thirty-fifth st.

A two-story back building, 16 ft. by 10 ft., on west side of Florida st., between Fitzwater and Catharine sts., to John Fitzpatrick 501 Pine st.

Third-story addition to back building, 13 ft. by 29 ft., 111 Friedlander st., to J. Sims Wilson, 1327 Buttonwood st.

Two three-story dwellings, 18 ft. by 44 ft., 189 to 191 Haines st., Germantown, to Rob't Christy, Mt. Pleasant.

A two-story brick house, 18 ft. by 45 ft., on North side of Queen st., between Morris and Laurens sts., to Geo. Wood, 4722 Germantown ave.

Four two-story dwellings, 15 ft. by 42 ft., on North side of Indiana, between Marshall and Seventh sts., to Lorenzo Amhern, 3036 N. Sixth st.

Rebuilding a building, 40 ft. by 111 ft., 3045 Chestnut st., to Geo. Van Dyke, 1223 Warnock st.

One shed and brick building, 16 ft. by 32 ft , Southwest corner of Broad and Columbia ave., to A. Wilt & Sons, 721 North Front st.

A two-story back building, 15 ft. by 18 ft., 1629 South st., to Mrs. G. McElwee, 1629 South st.

Interior alterations and second story addition and kitchen, and two-story brick stable, 15 ft. by 16 ft., East side of Germantown ave., above Evergreen st., to John Hallenstein, Rex ave., Chestnut Hill.

A five-foot addition and an additional story to a second-story back building, 12 ft. by 26 ft., South side of Locust st., between Twentieth and Twenty-first sts., to Joseph Price, 2136 Master st.

A two-story store, 43 ft. by 29 ft., West side of Frankford ave., below Unity st., to Wm. Keas, 4849 Penn st., Frankford.

A two-story frame house, with mansard roof, 18 ft. by 50 ft., on East side of Seventy-second st., between Elmwood st. and Gray's ave., to A. Watson, 2316 Oxford st.

Three-story addition to mill, 20 ft. by 22 ft., on North side of Filbert st., between Thirty-seventh and Thirty-eighth sts., Wm. Bunch, Jr., 408 N. Forty-first st.

A store front alteration, 16 ft., 614 Pine st., to Bryan Woodward, 432 N. Thirty-second st.

Four dwellings, 13½ ft. by 48 ft., East side of Franklin st., South of Arrot st., Frankford, to Myers Livezey, owner, Fox Chase.

One-story addition to store, 12 ft., 929 Market st., to J. R. Pyle, 1741 N. Twentieth st.

A brick church, 34 ft. by 120 ft., on West side of Sixteenth st., between Cayuga and Bristoe sts., to Joseph F. Williams, 1634 Cayuga st.

A two-story brick house, 19 ft. by 41 ft., North side of Berks st., between Front and Howard s s., to John Cairns, 2739 Kensington ave.

A three-story store, 18 ft. by 57 ft., East side of Fifth st., between Locust and Spruce sts., to Andrew White, 321 Gusceon st.

A three-story back building and alteration, 16 ft. by 16 ft , 1330 South Broad st., to John Gibson, 1332 South Juniper st.

A two-story store and dwelling, 16 ft. by 40 ft., Northwest corner of Oregon and Mifflin sts., to Dunbar and Meyers, 1517 North Second st.

A three-story brick house, 18 ft. by 10 ft., East side of Twenty-second st., North of Spruce st., to B. Hetcham & Son, 1029 Brown st.

Two three-story stores and dwellings, 18 ft. by 65 ft., West side of Ridge ave., South of Girard ave., to B. Hetcham & Son, 1029 Brown st.

A two-story brick kitchen and frame bathroom, 12 ft. by 12 ft., North side of Irvine, between Fortieth and Forty-first sts., to Newlin Dalby, 3943 Ludlow st.

A two-story back building and alteration, 12 ft. by 20 ft., 1711 Columbia ave., to Wm. Kutz, 1637 North Eleventh st.

Two two-story dwellings, 17 ft. by 41 ft., West side of Thirty-fifth st., between Fairview and New Queen sts., to Charles E. Bartie, Thirty-third and Lehigh ave.

A brick and frame building, 10 ft. by 36 ft., South side of Funch st., at Wyoming Station, to Mrs. Susanna B. Howell, 2205 North Seventh st.

Bulk window and alteration to house North side of Oxford st., between Fifth and Lawrence sts., to Joseph McPeak, 1540 Lawrence st.

A two-story back building, 12 ft. by 30 ft., 2011 Germantown ave., to D. C. Schuler, 2264 Fairhill st.

New front, 18 ft., 1444 Howard st., to Andrew Hetzell and Son, 205 Richmond st.

A two-story dwelling, 17 ft. by 44 ft., West side of Carlisle st., between Dauphin and Susquehanna ave., to L. H. Slifer, Tenth and York sts.

ABBREVIATIONS.

Add.—Addition.
Alt.—Alteration.
Assn.—Association.
B. & L.—Building & Loan.
Bk.—Bank.
B.B.—Back Building.
Dwg.—Dwelling.
Est.—Estate.
E.J.—Ejectment Suit.
E.S.—Equity Suit.
Exr.—Executor.
Exrx.—Executrix.
K. & B.—Kitchen & Bath.
M.L.D.—Mechanics' Lien Docket.
Nat. Bk.—National Bank.
Sav. Bk.—Savings Bank.
t. t.—Terre Tenant.
S.F.—Scire Facias to revive Judgment.

Sum C.—Summons in Case—A form of action invented to meet all civil cases, the form of which is not specially provided for.

Where there are no figures to indicate the amount of the judgment, the damages have not been assessed.

The first name in each line is that of the judgment debtor.

An asterisk (*) denotes judgment confessed or bond and warrant conditioned.

The figures 1 2 3 and 4 immediately after the name of the plaintiff indicates the number of the Court. The letters D. M. J. and S. after the number of the Court indicate the Term as D., December Term, M., March Term, as J., June term and S., September Term.

An examination as to the nature of judgments and suits will be made for subscribers without extra charge on application.

CONVEYANCES.

Gumming Saws.

Emerson Smith says that many persons who are not fully acquainted with the principle upon which circular saws are made, entertain the erroneous opinion that a saw should work the same until worn out, if it is not accidentally sprung in use or strained in gumming. So far as any damage to the saw is concerned, there is no difference between the use of a burr gummer or a file; but if proper care is not exercised in the use of the emery wheel, there is more danger from its use than from either the file or burr. If the condition of the saw is such that a considerable depth is required to be cut into the plate, the operation should be performed by going over the saw several times, only allowing the wheel to grind away so much as can be done without heating the saw to a blue. There is no excuse whatever for crowding the emery-wheel so as to heat the saw red hot, as this is sure to injure the saw, often glazing it where the wheel comes in contact so hard that a file will make no impression whatever. From these hard spots on the outer surface small cracks commence, invisible at first to the eye, but gradually enlarging until they become dangerous fractures. Hacking the face of the wheel with a cold chisel or the corners of an old file will often prevent its glazing, so that it is not as liable to heat the saw. After a few times gumming, however, the saw will enlarge on the rim, so that the slightest warmth will cause it to buckle, and there is no remedy left but to send it to a saw maker and have it rehammered. Some, however, entertain the erroneous impression that a saw rehammered will never run as well as when new. On the contrary, a saw rehammered will generally run better than when new, because all the elasticity, or nearly all, is worked out of the saw by using, and it generally works stiffer than when new.

—Some time ago Councils' Committees on Finance and Law asked the City Solicitor whether commissions paid by the State for the collection and accounting of State moneys should have been turned into the City Treasury or retained by Wm. B. Irvine and his predecessors as City Treasurers. The City Solicitor has decided that in view of the importance of the questions involved, the interests of the city will best be served by a presentation of the facts to the court, or, in other words, that suit be instituted to determine the question.

—At the meeting of the Board of Health on Friday, the complaint of a nuisance at the University of Pennsylvania, arising from the burning of flesh, was dismissed, assurance having been given that the nuisance would be abated.

G. P. McDONALD, of England, a very high authority in economic and industrial matters, writes a sensible and conservative article in the *British Quarterly Review*, which is worthy of reproduction. He writes:

"There are other elevating forces in the hands of the people themselves, which they have already used to their lasting benefit, and which are not yet exhausted. It has been said that there is an iron law pressing wages down to the limit of starvation. If this were true, we might well despair. But it is not true. Wages have risen; they are earned with less effort; they command more of the comforts of life, and the workman has greater leisure. Yet, in a mere physical sense, he is as capable now as he was at the beginning of the century of spending his working hours in ill-paid and hopeless toil. If he has risen, the conclusion is clear that there is no economic law by which wages are pressed down to the limit of starvation. Not starvation, but rather the standard of comfort which the people have set up for themselves, is the true limit—a standard which is not fixed, but varies among different people and among the same people at different times, which in England has risen in the past, and which can rise in the future. A point there certainly is beyond which wages will not advance. So long as different nations have different standards, a rise of wages in one of them may be checked by the competition of the rest; as labor becomes more mobile, the international check will operate more readily, and even now in many trades there are signs of its retarding influence. But our immediate progress is not wholly a matter of wages. In other directions the people have the making of their own fortune, provided always that their numbers are not recklessly increased. If they seek for education, and in all seriousness come to regard it as a necessary of life, they will secure it. If they persuade themselves that the overcrowding, which is the shame of our cities, is a thing intolerable, overcrowding will cease. If they are inspired with an earnest desire to convert into homes houses which are now in the haunts of disease and crime, they can themselves effect the change * * * * They need not fight the battle alone. Employers of labor have duties, too seldom recognized, towards such as toil and spin in their service. The State can give powerful aid when the strength of public opinion supports its action. From whomsoever it comes, the test of all efficient help is whether it tends to raise the character of the people, to excite in their minds better hope, and to give them higher ideas of a worthy life."

—The work of constructing the new East Park river drive from the arched bridge at Fountain Green to near Strawberry Landing is progressing rapidly under the direction of the Vulcanite Paving Company, to which the contract was awarded, and 300 men are kept busy along the route. There has been some heavy blasting at Rockland, and there is considerable filling in to be done. The new drive will be ready for use this fall if the contractor who is grading the drive from near the tunnel to Fountain Green completes his work in season. When these two new drives are finished there will be an unbroken stretch of fine road along the river bank from the boat-houses at Fairmount to the Wissahickon.

TO ADVERTISERS

A list of 1000 newspapers divided into STATES AND SECTIONS will be sent on application FREE.

To those who want their advertising to pay, we can offer no better medium for thorough and effective work than the various sections of our Select Local List. GEO. P. ROWELL & CO., Newspaper Advertising Bureau, 10 Spruce street, New York.

Wood Turning in all its branches. House trimmings, new and original designs, a great specialty.

All orders delivered free on board at Jersey City.

Estimates for Philadelphia and vicinity cheerfully given.

Address,

JOHN NESBITT,
Yonkers, N. Y.

BOOTS and SHOES,

BUT NOT SLIPPERS.

We wish to call the attention of the public to the fact that the DAY SEWED SHOE does not mean any kind of slipper.

The process is not applied to any single sole foot-wear, but to the manufacture of all kinds of BOOTS, SHOES, GAITERS and LOW SHOES used for out-door or steady wear. The dainty luxury which many cannot, and many should not wear—the "pump-sole" or "turned-sole" slipper—is for sale at the Day Sewed Shoe Store, but it is not our make. This fact has been carefully impressed upon our sales-people, but they are not always reminded of it in making a sale. We therefore take this method of explaining and providing against any mistakes. WHEN YOU BUY A THIN-SOLED HOUSE-SLIPPER YOU DO NOT GET A DAY SEWED SHOE.

THE DAY SEWED SHOE MFG. CO..

No. 23 N. EIGHTH STREET.

Summer Clothing.

We have a large stock of these goods new and fresh this season. Beautiful patterns in SEERSUCKERS, ALPACAS and SILKS. Foreign and Domestic manufacture. But our large stock of

[ENTERED AT THE PHILADELPHIA POST OFFICE AS SECOND-CLASS MATTER.]

VOL. I.—NO. 30. PHILADELPHIA, MONDAY, AUGUST 2, 1886. PRICE 15 CENTS

Items of News.

—The Black Mill property in Swedesboro has been sold to Benjamin Black for $7,000.

—26,000 slaves in the island of Cuba have been made free by a unanimous vote in the Spanish Chamber of Deputies.

—The Board of Health on Wednesday fined Drs. N. J. Dundore and C. B. Wurtz $10 each for neglecting to report contagious diseases.

—A movement to unite all of the street railway companies of St. Louis into one to be under one management, with a Trust Board at the head of affairs, is on foot.

—A company of capitalists have made large purchases of land around Magnolia Station, N. J., on the Philadelphia and Atlantic City Railroad and intend starting a town there.

—2,000,000 acres of land, situated between the Missouri and the St. James rivers, have been sold by the Northern Pacific Railroad Company and will be paid for in preferred stock before December 1st next.

—A mortgage for $1,000,000, executed by the Wilkesbarre and Western Railroad Company in favor of the Central Trust Company of New York, was filed in the Recorder's office at Wilkesbarre on Wednesday last.

—The long-discussed project of starting a glass factory at Pennsgrove has at last taken shape. The ground has already been secured, and steps have been advanced toward raising the capital to $3,000. The factory will be for hollow ware.

—Colonel John D. Watson, who was convicted by a Bridgeton jury on Tuesday of forcible entry and detainer upon the complaint of John R. Farnum, the reputed owner of the Vineland Gas Works, declares that he will carry the case to the Supreme Court.

—The turnpike war at Reading developed on Wednesday last in the arrest of Superintendent Samuel Manmiller and a force of laborers who were engaged in tearing out a drainage pipe at the junction of the new public turnpike, two miles east of Reading. They were subsequently discharged.

—Chief Walker, of the City Electrical Department, has completed the police patrol telegraph service, which includes all the territory south of South street and extends to Point Breeze. There are thirty-two patrol-boxes in position in that section, all of which will be placed in operation by the Mayor early this week.

—A jury of view on Tuesday filed a report making an award of $4,791 against the Baltimore and Philadelphia Railroad Company for taking 3 roods and 18 perches of land in the Twenty-seventh Ward belonging to the estate of Thomas S. Ellis, deceased. The land is situated on Greenway avenue, above Mount Moriah lane.

—The 1,500 feet of electric cable presented to the city by Fatham Brothers will be used by Chief Walker, of the Electrical Department, in the extension of the underground cables on North Broad street. It is the intention to extend the service from the Reading Railroad crossing along Broad street to Lehigh avenue, and thence to the Twenty-second police district station-house, located just east of Broad street.

—The Board of Highway Supervisors authorized Chief Highway Commissioner McDonald, the President of the body, to issue in future permits for the construction of vaults under sidewalks where they are kept back three feet from the curb line and granted a permit for an extension of the Reading Railroad Company's track on Thompson street near Thirtieth, to enter the J. & P. Baltz Company's brewery.

—The city's twenty-four magistrates turned over to the City Treasurer, as returns from their offices for the first six months of the present year $33,442.25, divided as follows: Magistrate Pole, $563.90; Collins, $828.25; Eisenbrown, $1,008.85; Lelar, $1,145.30; Lennon, $1,531.50; Durham, $2,294.35; List, $4,731.15; Smith, $1,949.85; Clement, $684.65; Cobb, $914.70; Ladner, $1,685.25; Thompson, $4,8.0.15; Baird, $4,313.50; Ahern, $474.55; Lloyd, $723.25; Gillespie, $695.85; O'Brien, $1,179.10; Severn, $4,438.55; Riley, $354.95; Neall, $670.75; South, $344.80; Brown, $347.05; Clarke, $376.20; Randall, $375.80.

—Three handsome houses are being erected on Baring street, near Thirty-ninth. They will be three stories in height, with brown stone, terra cotta and red brick fronts. The insides will be finished in walnut and cherry, and the windows will be of colored glass. Bay windows, front and side, and front porches will add to their appearance. They will stand back from the street, and two of them will have a frontage of eighteen feet and a depth of sixty-four feet, and the other fifty-five feet front by forty feet. They are being built for Wm. Howell, the paper manufacturer, upon plans furnished by P. A. Welsh.

—The officials of the Electrical Department on Wednesday began to place the masonry, mechanical and scientific appliances in the new quarters in the City Hall. Two "repeaters" which transmit all the alarms were placed in position, and the work on the telephone switch board was completed, and it is now ready to receive the wires from the street. The "commutator," a huge piece of wood and metal workmanship which splits the main current, has been waiting for some time to perform its duties and will wait until the end of the year, when the department will be fully equipped with everything new and spick-and-span for fire and police telegraph purposes. The old material now in use at Fifth and Chestnut streets will be sold in 1887 to the highest bidder.

—In the Jesse W. Starr will contest before Judge Miller in Camden, on Thursday, B. B. Clark, of New York, Vice-President of the Thomas Iron Company, testified that he was well acquainted with decedent's affairs, and claimed that his bankruptcy was due to the extravagance and mismanagement of his sons, the contestants. He believed Mr. Starr was mentally unqualified just previous to his death to engage in business or to make a will.

—President Titus Berger, of the Master Painters' Association, is responsible for the following words of wisdom, they are just as applicable to all mechanical trades as to the one he is identified with—"We realize that we must establish some mode of educating apprentices to the present high state of perfection in the business. The only thorough manner in which to accomplish this end is to maintain schools in which apprentices may receive thorough instruction in every branch of the trade Such a system is calculated to weed out all bad mechanics and elevate the craft. The good men receive cards of proficiency. To perfect this reform will require years of work, but we mean to accomplish it."

—The following is the small silver certificate clause in the Sundry Civil Bill which will soon become a law: "And the Secretary of the Treasury is hereby authorized and required to issue silver certificates in denominations of $1, $2 and $5, and the silver certificates herein authorized shall be receivable, redeemable and payable in like manner and for like purposes as provided for silver certificates by the act of February 28, 1878, entitled 'An act to authorize the coinage of the standard silver dollar and to restore its legal-tender character," and denomination of $1, $2 and $5 may be issued in lieu of silver certificates of larger denominations in the Treasury, or in exchange thereof, upon presentation by the holders, and to that extent said certificates of larger denomination shall be canceled and destroyed."

—The proposed action of the Window Glass Makers' Union, if carried out, will have a very important bearing on the glass industry of the United States. And besides this, it will demonstrate whether there is any real benefit in co-operation when conducted on a large scale. The scheme under consideration is for the establishment of a number of glass-making plants in favorable sections of the country, all of them to be owned and operated on the co-operative plan. The product will not be confined to window glass alone, however, but will include all the various makes of glass. In all there will be six factories, each of which it is estimated will cost $30,000. Stock will be issued in $50 shares, and it is claimed $200,000 will be subscribed the first day the books are opened. Upon the action of the American Flint and Green Bottle Leagues depends the carrying out of the scheme proposed by the window glass makers.

PHILADELPHIA, MONDAY, AUGUST 2, 1886.

SEVERAL of our leading builders have disappeared within a few days for a week or two's jaunt on the mountain and by the sea. They have earned their right to a long vacation.

MANY of our architects are absent from the city, and during August the offices will be depleted of their usual force. At some few offices the pen and pencil are plied with unusual vigor.

REAL ESTATE operations are not extensive. A few inquiries are in hand. Agents are in a hopeful frame of mind, and are satisfied that the fall transfers will swell to large proportions.

CONTRACTOR MALONE'S attorney it is said has advised him to ignore Mayor Smith's veto and to go on with the work on the new Market street bridge. There will be music in the air if the contractor should be so foolish as to take the advice.

OUR iron and steel makers say there is no excuse for or need of importing material for armor plates—that we have all the necessary facilities to manufacture the largest possible armor plates. This is true, and Congress ought to resolve to buy at home rather than abroad when the time comes.

SHOULD the cases now being tested before the courts as to the liability of corporations for the payment of the State tax upon money at interest go against them, an effort will no doubt be made to have the law repealed, as it stands now the borrower is generally compelled to pay the tax, in cases where he does not do so the individual lender is seriously oppressed and practically denied competition with corporations who have thus far been exempt from the tax.

DURING the six months ending June 30, 1886, the total production of Pig Iron amounted to the enormous quantity of 2,954,209 net tons, this is an increase of nearly 800,000 tons over that of the same period of last year. There has never been so much Pig Iron purchased in this country in six months before.

EXTENSIVE purchases of land, it is rumored, are to be made along the B. & O. R.R., presumably in the interests of that corporation, or perhaps some other. No details are available just yet, nor are the objects stated. A good deal of property is being offered, but the prices are just a little too high for the ordinary real estate speculator.

OUR health authorities have exercised great care this season in preventing contagion spreading. Midsummer finds our city healthful, and the mortuary list light for the season. A typhoid epidemic has broken out at one or two points in the State, due to accidental causes The people are commendably co operating with the authorities everywhere to barricade pestilence from our shores.

THE authorities of Atlantic City should be held just as responsible for the shooting of O'Donohue's child as the miserable, ignorant negro dog-catcher who fired the shot. The idea of employing a brutal negro to shoot dogs (and many of them would bring more money if sold at public auction than he would have brought during the palmy days of slavery,) upon the public streets, is not only brutalizing, but indicates a want of judgment and refinement that the community have a right to expect even in a Jersey Mayor and Board of Councilmen.

SOME one has made this objection to our Real Estate Exchange, viz., that under the cataloguing of the properties for sale a speculative demand would be developed, which would put up prices. Not at all. If ten properties are brought out, the effect would rather be to depress prices.

The strong point of the plan is that a competition would be developed among sellers or holders of real estate. Of course the more desirable properties would be more likely to bring top prices. The New York and Baltimore Exchanges have not complained on this score. Artificial prices cannot be established in any event.

THE law taxing household furniture is a humbug; it never has been, neither will it ever be enforced and the *Philadelphia Record* is right in calling for its repeal. In the first place what rule could be made to govern the appraisement of furniture, a tax levied upon first cost would be pure and simple extortion. Fashion rules in furniture as in everything else, neither would a tax levied upon an appraised value be just, for it would rarely bring the tenth of it if thrown into an auction room. The law is simply an embargo upon house comforts, it strikes at the very root of well organized societies; it is home life that makes Philadelphia the best city in the world to live in. The tax should be abolished.

NOW that capital is so plenty, and paying investments are so scarce, it would be a good time to organize a company for the purpose of irrigating and reclaiming a large part of Southern New Jersey. The peculiarly non-retentive properties of the soil renders a very large part of this immense area of very little, if any, value for agricultural purposes at present, but which with the proper irrigating facilities could be made extremely fertile.

There are thousands of acres which could be made to yield large crops of cereals with no great expense, through irrigation; and with an abundance of water, both in the Delaware and in the streams coursing through this section of country, it is a wonder that the scheme has not been suggested before.

A series of pumping stations, with stand-pipes erected along the Delaware river as far as fresh water continues, with the proper system of main and distributing pipes, could be made to afford the entire section sufficient water to turn the thousands of barren acres into beautiful fields and pasture lands.

It is well known that water is the secret of the growth of vegetation; it is a wonderful fertilizer, and through its influence land which is now worth but a few cents per acre could soon be made to be worth many dollars.

There is no point south of Camden where the elevation is so great that it could not be reached with water from a stand-pipe. The area covered by these suggestions is so great, and the opportunities for an enterprise which would yield a steady and increasing income to the investors in the way of water rents and privileges so magnificent, that were such a company formed there would be no trouble in disposing of the stock and obtaining from the State an appropriation commensurate with the great and lasting benefits it would derive from the enterprise. This is no utopian scheme, for it is not only possible but extremely practical,

It is said that all the street railway companies of St. Louis are to be put under one management. No doubt this will be done in several cities eventually.

The Society of Arts is considering the advisability of offering prizes for the best engines designed to fill the especial purposes of providing power for electric lighting. So far the gas engines seem to be the best adapted for this purpose.

It looks as though we were gradually drifting back to the apprenticeship system. The house painters have already practically re-established it. The Journeymen House Painters' Protective Beneficial Association of this city have adopted resolutions approving the action of the Master Painters' Association in establishing the apprenticeship system of five years for learners.

The representative of the Real Estate Record has visited several near-by towns, and finds a fair degree of activity in real estate matters. Prices for city lots have not advanced, as a rule, notwithstanding considerable building has been done within a year, and a great deal is contemplated. Builders are under contract for a fair amount of store, shop and house building.

A great deal of the architectural iron work now in use is protected by what is called the "Rustless" process. There are four furnaces in this country where iron is made rustless: two in Brooklyn; one at Little Ferry, N. J., and one in Philadelphia.

The Bower process is used particularly for cast iron, oxidation being produced by carbonic acid and air. Cast iron must first be pickled to remove sand, but wrought iron and steel do not require to be pickled.

During the past two or three weeks the real estate market has not been disturbed by any important transactions. Those best posted have very little to say, and incline to the belief that nothing of importance will be done until after September 1st. Purchases for this year's building operations have been all made; whatever land will be bought this fall will be for next year's operations, excepting in a few isolated cases. A good deal of land is being offered, but in a quiet way.

Receipts of lumber continue to be very heavy. Frequently from one to two million feet per day arrive. The prospects are that lumber will hold its present strong prices. The statements of lumber journals in the Northwest and Southeast all seem to point in that direction. The stock of lumber, while enormous, is not likely to be in excess of the market requirements, a fact which is proven by the willingness of a good many small and wholesale dealers to stock up at this time. There is no boom in the lumber trade, but everything points to an increasing consumption, not only in the city, but in the surrounding towns which obtain their supplies from here.

The building and loan associations are thriving, according to reports, all over the United States. What has been done in Philadelphia is being done in several Western cities and towns. A recently returned Western traveler states that it is quite surprising to find the number of small houses being built on this plan in the West and the amount of money going into this channel. The management is excellent, and the results most gratifying. One effect, he states, has been to help to bring down rents. Individual capital is competing with association capital, and new associations are everywhere springing up. Here at home the system is extending. Nowhere are there any complaints made of bad management Former mistakes are avoided. Experience is making the system profitable.

The appeal of the New Yorkers against the increased assessment on real estate has been dismissed and the property holders have nothing to do but to submit. Taxes have been reduced in Philadelphia 37 per cent. in nine years. Properties worth $10,000 nine years ago are now assessed at $8,000 in some portions of the city. The tax rate has been reduced from $2.25 to $1.85. There is no uniformity in assessments in the city and it is difficult to expect it, but at the same time there is too much elasticity in the system. There are forty-two assessors, each of whom is practically independent. The whole system is rather clumsy, and a great deal of trouble arises from the slip-shod way assessments are made. There seems to be no rule to govern the matter. If any rule at all could be established, it would be one which would recognize actual values as the basis. There are legislative enactments on this subject, but even they are disregarded. What we want is sound legislative and business principles. This is a subject which our Real Estate Exhange ought to take in hand. It opens a wide field for reforms that mean something.

Our so-called scientists do not know what to make of the Keely motor, for it *does mote*! The *Ledger*, before endorsing it, desired that some shafting and machinery should be moved with it, thus demonstrating beyond the possibility of a doubt, that there is some real working power in it. The public have looked upon the concern with a good deal of suspicion. It is confined to the inventor's shop, and shown to only a very few.

A great many inventors have been endeavoring to find some new latent force in nature, since Keely first announced his project, but even Edison has been knocking at the door, in vain.

That Mr. Keely has something that the world at large knows nothing about, can not be denied; but what it really is, can only be guessed at by the uninitiated. Whether it can be utilized or not, is another question. It has required a great many years' work to make the machine, which demonstrates the force generated, but when it is once perfected, it is not likely that it will be as difficult to produce other machines of like nature. The first steam engine was the work of years. The first locomotive was the result of long continued effort and experiment, and it is not to be expected that the first engine for utilizing this new force, should be brought forth in a day.

The Real Estate Owners and Builders' Association of New York is doing good service, and greatly assisting in the improvement and prosperity of that city.

It is stated that a large amount of money will shortly be invested in building operations in New York City.

During the past twelve months over $75,000,000 have been invested in building loans in that city alone, apart from the cost of lots. It is stated on good authority, that there is now a large volume of money in the market, to be loaned at 4 and 5 per cent. Good applications, however, are exceedingly hard to obtain; which explains the large amount of idle capital.

It is not likely that very much will be done in the way of investment during August. The possessors of capital are not idle, but are looking around very carefully, and studying the drift of things. A good many have actually made up their minds that real estate is the best direction for investment. The Real Estate Exchange was not established one day too soon.

Taking Philadelphia as a whole, real estate is steadily advancing in value. In certain sections of the city values have been stationary for years. Localities could be pointed out where property has depreciated. Above all things, there is very little speculative business. The large withdrawals of capital from speculative channels have found profitable employment in numerous other legitimate channels, but have not yet unfavorably affected the values of real estate. Very little real estate is bought but for actual use. There is a disposition shown now and then to buy large tracts for speculative purposes, but this tendency is put under a healthy check by the unwillingness of real estate holders to let their properties go at anything but good prices. Influences are at work which are likely to give real estate a little boost. The rates realized on investments in industrial channels are not inviting quite as much capital as three or four years ago. At the same time there is an over supply of capital, even at low returns. There is no doubt but that during the coming twelve months a large amount of money will find employment in real estate. People are getting out of debt instead of getting in. This is shown by the records in the office of the Recorder of Deeds. During the first half of last year 3,803 mortgages were satisfied, amounting to eleven and a quarter million dollars. During the last half 3,824 mortgages were satisfied, aggregating nearly fifteen million dollars. For the first half of this year 4,504 mortgages were satisfied, representing a little over twenty million dollars. During all this time there was an increase in the number of new mortgages, but this is partly due to the fact that there is an increasing demand for money, growing out of increased building activity,

REAL ESTATE.

$4,000,000 Increase in Internal Revenue Receipts Over Last Year.

According to the preliminary report of Internal Revenue Commissioner Miller, which he submitted to the Secretary of the Treasury on the 25th inst., and which covered the operations of the Bureau up to the end of the fiscal year, June 30, 1886, the total collections for the year were $116,902,845, or $4,481,724 more than for the preceding fiscal year. The cost of collection for the fiscal year was about $4,300,000, being 3 67-100 per cent. of the amount collected; $155,000 less than the cost of collection for the year ended June 30, 1885. The receipts from taxation on spirits, fermented liquors and tobacco during the past two fiscal years were as follows:

	1885.	1886.
Spirits	$67,511,208	$69,092,363
Fermented liquors	18,239,782	19,675,731
Tobacco and fermented liquors	26,407,088	27,907,382

During the year 1886 tax was paid on 67,689,250 gallons of spirits distilled from grain and other materials, and in 1886 on 69,295,358 gallons.

Tax was paid on 3,510,898,488 cigars during the fiscal year, against 3,358,972,633 during the fiscal year ended June 30, 1885; and on 1,309,613,500 cigarettes, against 1,058,749,238 during the preceding fiscal year. By States Illinois stands first in the amount of internal revenue collections—$23,852,252; Kentucky second, with $15,746,940; New York third, with $14,365,208, and Ohio fourth, with $12,921,349. Pennsylvania furnished about $8,000,000, Missouri $7,000,000, Indiana nearly $5,000,000; New Jersey about $4,000,000 and Wisconsin $3,000,000.

The County Wins.

On Tuesday, the 27th ult., at Harrisburg, Pa., Judge McPherson gave his decision in the tax case suit brought by the Commonwealth against the county of Philadelphia, in which the State sought to recover $47,059.95 which was collected by the County of Philadelphia over and above the valuation made by the Board of Revenue Commissioners in the years 1877, 1878, 1879 and 1880.

Judge McPherson dissents from the opinion held by the Commonwealth that the County is the mere agent for collections. "In our opinion," he says, "the State has no valid claim to the money in suit, and we believe a short examination of the statues will show this view to be sound." After quoting many authorities to sustain his opinion that the county is not liable, he remarks:

"It is reasonably certain that this tangle, like several others which have been a source of trouble, is to be traced to the notorious fact that during many years only a small part of the taxable personal property in the State was assessed, and to the efforts by the Revenue Commissioners to adjust a system framed to reach and act upon all such property so as to roughly meet the actual and well-known trouble. Such an effort could hardly fail to cause perplexities, and its most prominent result has been to furnish occasion of much vexing litigation and dispute." In conclusion, Judge McPherson quotes the acts bearing on the case, and says: "Either in letter or in spirit, therefore, the legislation referred to forbids a recovery in this case by the Commonwealth," and accordingly a judgment is directed to be entered for the defendant.

The Boys to Have a Chance.

On Wednesday last the Eastern Glass Manufacturers Association held a meeting at Long Branch and the following resolutions were passed:

"Whereas, The Glass Manufacturers' Association learns from the public press and from other sources that the Glass Blowers' League has determined that no apprentices shall be taken for the coming blast, and, beliving that such action is opposed to all fair dealing with the tending boys; that it tends to destroy all proper ambition on their part and works a great wrong to them; that it is an arbitrary and unwarranted invasion of the rights of manufacturers and opposed to the best interests of both employer and employed, and believing that no association should dictate who shall or who shall not be permitted to learn any trade; therefore,

"Resolved, That a committee shall be appointed to properly represent the matter to the workmen, and secure the cancelling of all regulations as to apprentices, and also to arrange a proper scale of wages for the ensuing blast.

"Resolved, That with a view of securing an equitable and stable basis of business, which the present unjust and arbitrary attitude of the green glass blowers prevents, the Labor Committee is hereby instructed to inquire and report, as early as may be convenient, as to the expediency of establishing one or more experimental factories, properly equipped and superintended, to be used as a training-school for boys to learn glass-blowing."

Estimating the Cost of a Building.

The first idea that naturally suggests itself, after the general plan of arrangement of a house has been perfected, is what material shall mainly enter into the construction of the building—brick, stone or wood. In nearly every portion of the Eastern, Middle and Western States these three building materials can readily be had, and the cost of production does not vary much in any locality. Assuming, therefore, that the first cost is the same in the above localities we may easily arrive at the ultimate cost of construction.

For the purposes of this article, we may assume the cost of good common brick, during the summer, to be $8 per thousand; cost of labor and mortar to lay the same in the wall, $4 per thousand, wall measure. The cost of good quarry stone, assumed at $10 per cord; the cost of labor and mortar to lay the same in the wall, $8 per cord of 100 feet. The cost of framing lumber, $12 per thousand feet; labor and nails to put the same up, $6 per thousand. With these prices as basis, it is a matter of computation only to arrive at the proportionate cost of each material after it has been worked into the walls. As an example, suppose we have 10 feet square of plain wall to build, what will be the comparative cost? Ten feet square equals 100 superficial feet. If to be built of brick 12 inches thick, estimating 22½ brick to the superficial foot, would take 2,250 bricks; cost in wall per thousand, $12, equals $27.

To lay a good rubble stone wall, it should be 18 inches thick; therefore, 10 feet square, or 100 superficial feet, of stone wall 18 inches thick, at $18 per cord of 100 feet, would cost $27. In estimating a frame or studded wall, there should be included, first, the studding, say, 2x8, 12-inch centres; second, the outside sheeting of 1-inch surfaced boards; third, the siding of clear pine. For this example we have placed the cost of rough lumber at $18 per thousand, put up. We will assume the cost of the inch surfaced boards for sheathing to be $25 per thousand, including labor, nails and materials. Siding at $40 per thousand, including lumber, labor, nails and waste. Ten feet square, or 100 superficial feet, of 2x8 studding, at $18 per thousand, equals $2.43. The same surface, covered with surfaced boards at $25 per thousand, costs $2.50; 125 superficial feet of siding, at $40 per thousand, equals $5, allowing one-quarter for lap and waste. Thus we find the total coast of the frame wall to be $9.93. Add to this the cost of painting the same, one square at $3, we find the cost to be $12.93. Comparatively, therefore, we find the cost of 100 superficial feet of wall built of the three leading building materials of the country as follows:

Common brick	$27.00
Rubble stone	27.00
Frame	12.93

The cost of window and door frames, cornices, &c., may be estimated about the same in either building. In brick and stone buildings we find the additional cost of cut stone windows and door sills, water-table, &c., but the cost of these adjuncts does not enter into the first cost of the walls, and should rather be estimated on separately, or considered as additional items of cost that may be dispensed with if necessary.—*Journal of Commerce.*

Real Estate Assessment in Philadelphia.

According to the city's tax books the real estate of Philadelphia has increased in value only $7,688,439 in nine years. This is at the rate of about one-eighth of 1 per cent. per annum. Prior to 1877 the yearly increase in real estate valuations ranged from $9,000,000 to $26,000,000, and the total increase in real estate assessments in the nine years preceding 1877 was over $148,000,000. At the same rate of progression, after allowing for the difference in the gold standard, our real estate valuation for 1886 ought to have exceeded $740,000,000. The fact that it barely exceeded $600,000,000 should arouse inquiry. Our building operations have not been materially checked since 1877. Over 30,000 new houses have been built in this city since the Centennial period, and the value of these additions to our taxable property should swell the tax lists at least $120,000,000. The city's population has, it is estimated, increased 200,000 in the nine years, and a very large proportion of the property that was included in the assessment of 1877 has in the meantime appreciated in value.

In the face of these facts the return of the Board of Revision of Taxes exhibits an increase of less than $8,000,000. The accompanying table shows that there has been a marked increase in the assessed value of the outlying districts since 1877, and a notable reduction in all of the thickly settled portions of the city, excepting the strip lying between Spruce and Arch streets from Seventh street to the Schuylkill river. By Wards, the increase and decrease from 1877 to 1886 are as follows:

Decrease.

Wards.	
1	$710,073
2	1,489,875
3	719,150
4	782,836
5	2,189,494
6	6,600,295
7	1,800,250
10	2,078,591
11	1,095,100
12	927,050
13	1,246,550
14	1,741,950
15	2,402,267
16	367,150
17	106,100
30	306,335

Increase.

Wards.	
8	$1,540,300
9	3,931,142
18	178,319
19	2,475,520
20	593,375
21	1,509,325
22	874,670
23	318,707
24	3,137,215
25	3,084,129
26	2,597,234
27	1,052,358
28	7,980,053
29	2,801,333
31	177,825

The law governing the Board of Revision requires that it shall assess property as nearly as possible at its actual value, based on public sale after full public notice. There are established standards for the ascertainment of this value, and there is no reason why in justice to all property owners it should not be rigidly adhered to. It is explained by those who are conversant with the facts that the Board of Revision of Taxes has not been assessing property recently at full value, but at an average of 80 per cent. of the full value. It would then appear that the actual value of real estate in Philadelphia is about $750,000,000, and not $600,000,000. By what authority has the Board of Revision appraised property at $150,000,000 less than its value?

The members of that Board are reputable gentlemen, who try to administer their trust for the public good. But they have no discretion in the matter of assessment. If they uniformly assess at 80 per cent. of the full value of real estate then they violate the law, which requires assessments at actual value. If they do not uniformly assess at 80 per cent. then they unduly oppress some property owners.

It will be said that if the real estate were uniformly appraised at 80 per cent. every property owner would pay an equal proportion. This much is conceded. But if the assessment were made as the law says it must be, the burden would be just as equitably distributed, and the tax rate would appear as $1.48 on the $100 instead of $1.85, assuming that the latter rate is based on an 80 per cent. valuation. The one substantial advantage that would be gained by appraising real estate at its actual value would be that Philadelphia would by comparison rank far ahead of other American cities where property is assessed by the same standard, and the burdens of the taxpayers of this city would not be increased. Nothing is gained by making our tax rate appear larger than it really is; on the contrary, an injury is thereby done to the city's reputation, and capitalists who would otherwise be attracted here are repelled.—*Phila. Record.*

Recent Decisions in Relation to Matters Concerning Real Estate.

ADVERSE POSSESSION.

Adverse possession may ripen into a good title, notwithstanding it was begun under an alleged gift which was not sufficient to pass the property.

CONTRACTOR.

One who contracts merely to furnish materials towards the erection of a building, is not a contractor who can render the property liable to third parties by contracts with them, under the rule that a mechanic's lien may be entered for work performed or materials furnished under a contract either with the owner of the building or with the contractor, architect or builder.

It is the duty of one who deals with an alleged contractor to know what relation he bears to the owner of the building, failing in this, he furnishes labor or materials at his peril.

DEED.

The application of the courses in a deed to the land will not be controlled by an estoppel raised from admissions of the parties, unless some one has acted on the faith of the admissions to his injury.

Husband and wife being owners, each of "an undivided moiety of a farm, joined in a deed which conveyed" an undivided moiety of the farm to a third person, who immediately conveyed the same "undivided moiety" back to the husband. Held that in the absence of anything in these peculiar deeds specifying what sort of a moiety was conveyed, they must be construed as conveying the wife's moiety; and as vesting the entire farm in the husband alone.

LEASE.

Evidence that lessors in a written lease of a house and lot gave the lease upon the parol condition that one of them should have rooms and be supplied with board by a third person, in the house, offered in support of the right to occupy the reserved rooms, is competent; it does not violate the rule which forbids parol evidence to vary a written instrument.

LANDLORD AND TENANT.

A complaint in summary proceedings by a landlord under the Act of April 3d, 1830, against a tenant to obtain possession on the ground of non-payment of rent must show the nature and duration of the tenancy; if it does not, it is radically defective, and does not give jurisdiction to the magistrate.

This Act does not authorize proceedings against a tenant for life, nor a ground tenant in fee. It is restricted to a demise for years or at will.

MORTGAGE.

An agreement made simultaneously with or shortly after the giving of a deed, absolute in terms, by which the grantee binds himself to resell the land to the grantor, is not always sufficient to characterize the transaction as a mortgage. A deed given in consideration of the extinguishment of an existing indebtedness, and an agreement to resell by a fixed time, held to be an absolute conveyance and not a mortgage.

SALE.

The fact that a contract for sale of land and buildings was reduced to writing does not prevent the vendee, in an action by the vendor for balance of purchase money, from showing by parol that at the time of the execution of the agreement, there was an oral agreement as to their future relative interests in a policy of insurance then held by the vendor. The oral agreement was that the vendor should hold the policy of insurance, as security for the payment of balance of purchase money. The property was destroyed by fire before balance was due. The vendee was allowed to set off the amount which the vendor might have recovered against the insurance company, but which by his own negligence he failed to do.

F. R. SHATTUCK.

Estimates of City Departments for 1887.

The controller is in receipt of estimates for 1887 from the following different departments:

Coroner, expenses, $23,200.

City Ice Boats, receipts, $2,500; expenses, $42,500.

Port Wardens, receipts, $400; expenses, $13,850.

Electrical Department, receipts, $8,000; expenses, $178,114.

Divided as follows: salaries, $16,650; repairs and supplies, $8,000; batteries, acids and materials, $3,500. For the improvement and extension of the police and fire alarm telegraph, $10,000. For the rental of telephones, purchase of material and instruments and extension of the lines, $42,000. For electric lights now located and up, $70,664. For additional electric lights, $25,000. For electric lights on Broad street between Fairmount and Columbia avenue, $3,000. For materials, labor and the laying of electric light cables underground on Broad, between Fairmount and Columbia avenues, $3,500. For cables, conduits, manholes, materials and labor for underground electrical services, providing that no part of the item shall merge at the close of 1887, $25,000.

Highway Department, receipts, $56,000.

Expenditures, $1,270,000, distributed as follows: Salaries, 62,000; grading, $60,000; new and improved pavements, $150,000; new bridges, $130,000; repairs to bridges, $130,000; cleaning streets and removing garbage, $350,000; repairs to paved streets, $250,000; repairs to unpaved streets and macadamized roads, $60,000; repairs to sewers and inlets, $30,000; repairs to footways, $7,000; sundries, $41,000.

City Treasurer receipts, $15,000; expenses, $37,640.

Clerks of Councils' expenses, $33,836.

Commissioners of County Prisons, expenses, $102,000 and receipts, $12,000.

Markets and City Property, receipts, $100,500.

Register of Wills, expenses, $30,600, and receipts $94,000.

Sheriff, expenses, $57,500; receipts, $29,000.

Board of Education asks for $2,172,958.25, or some $300,000 more than the appropriation for 1886. The principal item is $1,347,840.50 for teachers' salaries; rent of school-houses, $29,265; printing and small expenses for the Central High School and the other thirty-one Sections, $7,050; clerk hire for the thirty-one Sections, $3,100; furnaces and stoves in old school-houses, $16,200; furnaces and stoves in new school-houses, $12,500; cleaning school-houses, $145,518; general repairs and alterations, including special furniture, $212,964; desks, blackboards and furniture in old school-houses, $14,300; removal of ashes, $2,000; furniture for new school-houses, $25,000; ground rents, $22,570.58; books and stationery, $110,000; fuel, $65,000; employment of additional teachers, $16,000; employment of additional housekeepers, $5,000; rent of additional buildings and furniture for the same, $7,000; insurance on school buildings, $2,000; printing annual report, etc., $7,500; salaries of officers, $8,900; carriage hire and car tickets, $600; porterage on books, $650; postage stamps, $750; curbing, grading, paving, culverts, etc., $7,500; blank books, stationery and incidentals for office, $1,200; salaries of architect and supervisor, assistants, inspectors of buildings and incidental expenses, $9,800; extraordinary and accidental repairs, $1,500; night schools, $35,000; industrial art schools, $6,500; salaries of Superintendent, assistants, and incidental expenses, $17,000; maintenance of kindergartens or sub-primary schools, $25,000; gas, Northern Liberties Gas Works, $200.

The estimate of Chief Inspector Overn, of the *Department of Steam Engines and Boilers*, places his receipts at $15,000, and the expenses at $13,000, of which $9,200 is for salaries. The Commissioners of the Sinking Fund ask for $629,600 as the annual contribution to the fund. This is $16,648 less than was required for the current year.

The Water Department's estimate is nearly four times greater than its appropriation for the present year. Chief Engineer Ogden thinks $2,444,000 would tide his department through the year 1887, and requests that that amount be appropriated, although Councils saw fit to allow but $569,458 for 1886. Mr. Ogden asks for $700,000 for the completion of the East Park Reservoir; $500,000 for building the Cambria Reservoir, which would not include the settlement of land damages, and $584,000 for the maintenance of the department. He also asks for $300,000 for 20,000 feet of a new 48-inch pumping main to connect the Spring Garden station with Ninth street and Lehigh ave.; $170,000 for 26,000 feet of a new 30-inch supply main from Wentz Farm Reservoir to Sixth street and Lehigh avenue; $100,000 for replacing useless pipe with larger pipe, and $90,000 for pumping and supply mains from East Park Reservoir. The estimated receipts for 1887 amount to $1,900,000.

Commissioner Dixey's estimate of the expenses of the *Department of Markets and City Property* amounts to $168,329, an increase of $21,727.35 over what he recived for 1886, and $67,829 over what the estimated receipts of the department will be during 1887. Mr. Dixey asks for $5,000 for repairing and furnishing the District Attorney's office and some of the court rooms; for erecting and

maintaining a permanent bath house on the property owned by the city, $8,500, and for furnishing the public squares with new settees, $500. He also asks for $20,000 for the improvement of Norris Square; $16,000 to lay a flag or improved pavement with granite curbing around Rittenhouse Square, and $8,000 for the same kind of work to be done on Race and Franklin streets around Franklin Square. Two items are inserted requesting that $3,600 and $1,900 be appropriated to pay for the gas and coal used by the military organizations during 1887. These amounts are divided as follows: First Regiment—Gas, $1,200; coal, $650. Second Regiment—Gas, $700; coal, $400. Third Regiment—Gas, $800; coal, $400. State Fencibles—Gas, $600; coal, $300. Battery A—Gas, $125; coal, $50. First City Troop—Gas, $25; coal, $100. Gray Invincibles—Gas, $50; coal, $50.

Secretary Floyd, of the *Board of Poor Guardians*, does not present an itemized estimate of the expenses of the Board for 1887, but states that he has been directed to notify the Controller that the needs of that department for 1887 will require $375,000, while the estimated receipts for that year would be but $8,000. Last year Councils appropriated $313,229 for this department.

Something New in Bridges.

A bridge of concrete 30ft. span, with a roadway 13ft. wide, and capable of supporting safely a load of 200 tons, is reported to have been built in Switzerland in a single day, under the direction of Professor Yetmaier, of Zurich. This bridge is described as a single arch, rising 6 ft. 6 in. from springing to crown, 20 in. thick at the crown and 40 at the springing, with abutments 10 ft. thick. The concrete used for the arch was composed of one part cement, mixed dry with two parts sand, and the whole then mixed with four parts of gravel, and water enough to cause a light sweating as the concrete set; for the abutments, three parts of sand and seven of gravel were used to one of cement. All the materials were made ready beforehand, and six o'clock in the morning the construction of the abutments was begun, and these being brought to the proper height, the centre was set in place, the arch turned, and tympanum walls built up on each face of the arch to the level of the roadway; gravel was then filled in over the arch, between the tympanum walls, to the roadway level, thus finishing the bridge. A period of some two months was allowed for the complete hardening of the concrete, after which a heavy traffic immediately began, without any apparent injury to the structure.

OILING WOOD.—Articles made of wood and kept in stock, can be saved from worms by oiling with linseed oil. Single trees, double trees, neck yokes, spokes and cross bars that are of white hickory, and are kept in stock for a year or more, will be eaten by worms if not kept in a dark place or otherwise protected. Coal and kerosene oil are good also, and the expense of applying is but little. Linseed oil is preferable, as it acts, to some extent, as a wood filler, filling the pores, and thus aiding the painting which follows in its proper place. Some manufacturers oil all their white hickory stock before shipping.

—Nearly 100 dwellings have been constructed at Bristol, Bucks county, during the present year.

—Drexel & Co., J. Lowber Welsh, James S. Newbold & Co., C. & H. Borie and W. P. Logan, all of Philadelphia, are stockholders in the Royal Natural Gas Company of Washington, Pa. The company owns over 200 acres of gas land and is now supplying many glass houses with gas at Steubenville, Mingo, and Brilliant, Ohio.

BUILDERS' ITEMS.

Building and Real Estate Notes.

PAUL L. LEVIS is building a fine brown stone dwelling house on Christian and Sixteenth streets, which will cost $1,500.

SCOTT & ROBERTS, 831 N. 16th street, report real estate somewhat slow, and also the sale of a property 1331 Atmore street for $1,300. They have on their books a number of profitable investments, more so than usual.

GEORGE LODGE, real estate broker, Third and Federal streets, reports business very encouraging and his business in mortgages considerable. Within the last ten days he has made sale of 14 ground rents on Seventeenth street, below Tasker, for $1,300.

RICE & GILBERT, 2150 Ridge avenue, real estate brokers, have just completed the sale of dwelling 2146 Jefferson street for $2,900; also 949 Marshall street for $3,600, and within the last ten days have placed several first mortgages. They speak of business generally as being for the season of the year, satisfactory.

CHARLES MATHEWS, JR., conveyancer and real estate broker, 15th and Columbia avenue, has just completed the sale of properties at the N. E. cor. 10th and Columbia avenue, for $8,000; also 1507 Columbia avenue for $11,000, and 1739 Camac street for $3,025, and 7 acres of land at Somers Point for $500. He reports the demand for real estate in small properties, both for rent and purchase, on the increase.

J. L. GALLOWAY, real estate broker, Eleventh and Washington ave., reports business with him a little slow. He reports that on the 18th of August the choice lots will be put up at auction at Prospect Park, Moore Station, five of which have already been purchased by Mr. Geo. W. P. Simpson, each lot being 25 ft. by 200 ft., for $1,500, on which he will shortly build himself a fine twelve-roomed dwelling.

P. H. SCHAEFFER, 1309 Columbia avenue, real estate broker and conveyancer, has just commenced extensive alterations in the properties 13th and 17th and Columbia ave., in enlarging the capacity of store rooms to meet the demands of tenants; he also reports that the demand for large stores on Columbia avenue is very great, and that larger properties are ruling more freely than they have been doing for some few months.

WILLIAM L. CRAVEN & SON, conveyancers and real estate brokers, 1546 N. Seventh street, has just completed the sale of six properties on Lawrence street above Cambria for $1,650; they contain five rooms and have all modern conveniences. This firm reports that renting houses, both large and small, within the last two weeks has greatly improved, and further report that houses that have been on their hands for some considerable time are now beginning to rent.

One of our prominent down-town real estate brokers report business in the South-western portion of the city as being in a healthy condition and properties selling at good prices. The demand for houses to both buy and rent in the neighborhoods of Broad street to Twenty-third and Washington ave. has greatly increased and houses as soon as empty are taken up. A noticeable fact is that our wide awake real estate speculators may be seen almost daily in the vicinity.

O'NEILL & JOHNSON, real estate agents, 734 Passyunk ave., report business in real estate with them very satisfactory and give as their opinion that when properties are wanted to be sold the best way is to put them under the hammer, it being a much quicker mode and in nearly all cases fetch all they are worth. Mr. O'Neill says that properties down town are increasing in value and realizing good prices, houses are renting freely with little changes and collections good.

S. E. GARDENER, real estate and insurance broker, Seventh and Washington ave., speaks of renting as being good, and has but five or six houses in all empty. He says that for this season of the year real estate business is very good and looks forward to a lively fall business. He has just completed the sale of six houses on Lancaster and Wheat streets for $7,100; also several ground rents, and also transacted several small mortgages. Mr. Gardiner says that his business never looked brighter.

GEORGE W. CARSON, 1916 Columbia ave., real estate agent and conveyancer, reports renting much easier than has been felt for some time; he further reports quite a boom for stores of very large size on Columbia avenue; those which are unoccupied, which are but few, are too small, and property owners are turning their attention to enlarging them to meet the demand. Mr. Carson has within the last ten days transacted several sales amongst which was a dwelling on Park avenue below Columbia.

THOMAS J. COSTELLO, real estate broker and conveyancer, 1008 Passyunk ave., reports his business on the increase and within the last few days completed the sale of four dwellings 1417-19-21-23 South Twenty-first street., for $1,625 each, also sold the property Southwest corner of Fox and Huntingdon streets for $2,500 clear; and also reports some heavy business in mortgages. Mr. Costello writes us as follows:

"I am very well pleased in becoming a subscriber to THE REAL ESTATE RECORD. It has cost me $5 for a subscription for one year. On carefully looking over the transfers of the last issue I discovered that a purchaser that I sent to look at property in the Northeastern part of city purchased same. I would not have known of the purchase otherwise, so I mailed my bill for commission, called second day and obtained my bill for $25."

New Buildings.

—The Quakertown Catholic Church is nearly finished.

—A fine depot is being built at Miners' Mills, Luzerne County.

—Landenburg, Chester Co., is to have a new match factory, and Allentown is to have a barbed wire works, at a cost of $125,000.

—Some of our city architects are having a good deal of outside work. Mr. Lindley Johnson is remodeling the Brighton Hotel, at Atlantic City.

—A handsome brick club house is to be erected on Sixteenth street, above Chestnut, for the Fencing and Sparring Club. The building will be basement, three floors, and a slanting slate roof. Frontage on Sixteenth street, 106 feet; depth, 64 feet. The ground floor front is occupied by 6 stores, 32 feet deep. Cope & Stewardson are the architects.

—The plans for building a school building at Fourth and Dauphin street, have to be revised, as they call for more than the appropriation of $40,000. Proposals will be shortly advertised for, to erect two school buildings in Germantown, and one in the Twenty-seventh Ward. One of the Germantown schools will be at the corner of Coulter and Morris streets.

THE Labor situation is satisfactory. Remarkably few strikes are in progress, either in the city or State. The Knights of Labor will meet in Richmond, October 4th, and declare officially its future striking policy. Employers feel more contented at the recent utterances of leaders on both wings of the great labor army. Peace means prosperity, and agitation means a check to enterprise.

A Party Wall.

A party wall in law is the wall dividing lands of different proprietors, used in common for the support of structures on both sides. At common law an owner who erects a wall for his own buildings which is capable of being used by an adjoining proprietor, cannot compel such proprietor, when he shall build next to it, to pay for any portion of the cost of such wall. On the other hand, the adjoining proprietor has no right to make any use of such wall without consent of the owner, and the consequence may be the erection of the two walls side by side, when one would answer all purposes. This convenience is often secured by an agreement to erect a wall for common use, one-half on each other's land, the parties to divide the expense; if only one is to build at a time, he gets a return from the other party of half what it costs him. Under such an agreement, each has an easement in the land of the other while the wall stands, and this accompanies the title in sales and descent. But if the wall is destroyed by decay or accident, the easement is gone, unless by a deed such a contingency is provided for. Repairs to the party walls are borne equally; but if one has occasion to strengthen or improve them for a more extensive building than was at first contemplated, he cannot compel the other to divide the expense with him. In some States there are statutes regulating the rights in party walls, and one may undoubtedly acquire rights by prescription on a wall built by another, which he has long been allowed to use for the support of his own structure.

Heat Without Fire.

Inventors and experimenters have been busy for several years in efforts to devise some practical method of producing heat without fire—by chemical action or by the mechanical action of friction. Such a device would be of great value for heating railroad cars especially, for the reason that many frightful accidents from the burning of cars by the heating stoves which they now carry might thereby be obviated. A contemporary says: "Of course if people could get along without fire there would be no conflagrations and no use for insurance companies. Nevertheless, underwriters will be interested in a recent invention which claims to generate heat without fire, and is said to have been successfully experimented with in Hookert Mills, N. H.

"The inventor is Prof. Webster Willis, of the Boston Institute of Technology, and he describes his 'friction heater' as simple in construction, consisting only of an iron cylinder, one foot long and one foot in diameter, having a fixed plate of hardened iron in one end, and a second plate attached to a revolving shaft and pressed lightly or tightly against the fixed plate, as circumstances require. The cylinder is filled with water, the shaft revolves, and from the friction of the plates the water in an incredibly short time is heated, and by means of pipes can be carried to great distances for heating purposes. The machine has been in practical operation for some months, and it is demonstrated that a machine with thirty-six square inches of friction surface will heat a room of 10,000 cubic feet better and quicker than coal, wood or steam can do it, and absolutely without expense, save the wear of the friction plates and the pittance for extra coal, under the boiler. By this apparatus there is no danger from fire or explosion, and whenever there is waste power which can be utilized in this way the heat is obtained for almost nothing. It is claimed that a heater requiring two-horse power to run it will amply heat a room containing 50,000 cubic feet, the heater costing $100. Of course, time and further experiment will determine how useful the invention will prove practically; but there are those who now believe in it, and a company has been organized in Boston, with a capital of half a million, to manufacture and introduce the apparatus. For cotton mills, steam cars and a variety of other purposes the security against fire will be a great consideration in favor of the invention."

Cheap Houses.

Mr. I. P. C. Steddon, of Webster, Ind., received the second prize in the *Mechanical News* house plan competition for houses costing from $500 to $1,500. The height of ceiling on the first floor is 9 feet. This floor contains a parlor, kitchen and living room, bedroom, hall, pantry and two closets. Thimbles are placed in the flue in the kitchen 2 feet below the ceiling, and through the partition between bed-room and parlor. A stove can be placed in the parlor and the heat conveyed through the partition to the bedroom.

The second story ceilings are 8 feet high. There are on this floor three bed-rooms, four closets and two halls. The stairs may be either open or enclosed, as desired, the former being decidedly preferable.

The cellar walls, which are of stone laid in lime mortar, are 18 inches thick and 6½ feet high. The chimney is started on a stone foundation level with the cellar floor. The veranda pillars are of brick; the plastering two coats of brown mortar and one white-wash or scum coat. The frame is of either hard wood or pine, all outside studding extending from sills to plates. The outer walls are finished outside with lap siding, and inside with inch lumber furred with lath and plastered. The floors are of common pine, tongued and grooved; the veranda floor of Southern pine tongued and grooved and driven up in paint. The inside wood work is plainly finished with seasoned pine. The window frames are of the "skeleton box" variety, which is found serviceable and less expensive than the ordinary box frame. The veranda roof is of tin, and that of the house, best pine shingles laid on lath 1½x2 inches, placed 5½ inches between centres.

The author of this plan says of it: "It may be objected to on account of its plainness, or lack of style, but the idea has been to get a house large enough and convenient for a good-sized family, with the least money. Such a house I built here lest season for a small farmer, who is well pleased with it."

Making Enamelled Bricks.

The obvious suitableness of enamelled brick for use in many places exposed to moisture, or where contaminating vapors might be present in the air, has doubtless suggested itself frequently to those who have noticed its growing introduction within a very few years past; the great superiority of such bricks to painted brickwork in kitchens, laundries, courts and cellar areaways does not admit of question, while they may also be used to advantage in many places for wainscoting in halls, as well as for ornamental fronts and trimmings. Such brick must not, however, be confounded with a cheap glazed one, which has sometimes been used, only to open up like a chestnut burr after the first winter's frost. This description is, of course, cheaper than a good enamelled brick, but the materials and workmanship that are necessary to make the latter are absolute requisites if one is looking for lasting qualities. But on account of the high cost and the difficulty of making a good quality of enamelled brick, enough of these inferior glazed ones have been used to impede the more rapid introduction of the best quality, and there are now but three or four establishments in the country which make them.

It was not until after many unsuccessful experiments that good enamelled brick were produced in this country, the recipes of English and German enamellers not working well with our clays; and it is always to be borne in mind that the various proportions of the different ingredients have to be slightly changed according to the amount of oxide of iron, lime, etc., that the clay may have. In one of the enamelling compounds used for building brick, the following proportions are used: Fluorspar, 150 parts; Paris white, 60 parts; lime, 50 parts; oxide of tin, 50 parts; kaolin, 50 parts. These ingredients are pulverized and triturated to an impalpable powder, reducing the whole to a homogeneous mass, which is calcined in a crucible. After cooling it is again reduced to a powder, water added, and the whole triturated to form an enamelling compound of about the consistency of cream, in which is to be dipped that portion of the brick to be enamelled, the latter to be then subjected to a sufficient temperature to fuse the enamel on the surface, this being done in seggars, or fire-clay cases holding four or five bricks each. The enamel is usually applied only to the one face or head which will be exposed after laying in the wall except with those intended to be used for corners and reveals or windows and door jambs, which have one face and head treated, and are termed "rights" and "lefts" when so moulded that they cannot be used for any corner. A black surface is made by adding to the above ingredients black oxide of cobalt, black oxide of manganese, and umber, previous to pulverizing and calcining; blue, by adding black oxide of cobalt; green, by adding sub-oxide of copper; red, by adding sub-oxide of copper and red oxide of iron.

These enamelling compounds may be used on the surface of ordinary red front brick, but pressed brick are better, that the surface may be as smooth as possible, while they should be free from sand, or the enamel will not adhere.

The amount of capital and the plant necessary to engage in a moderate way in the business of enamelling brick, as given by a contributor to the *Clay Worker*, recently, are as follows: "In the first place it is necessary to have a kiln adapted to this work. It is better to have a muffle kiln, but in the absence of this a kiln can be erected with a capacity of from 6,000 to 10,000 brick for about $600 to $800. Then come next in order the seggars; these are made to hold five bricks each. They are made of fire-clay, uniform in size, and burned hard, costing at the factory 16 cents each. Next we have mill or pulverizer to grind the enamel in. This will not exceed $20. Indeed, any one can make a first-class one that will not exceed half that amount, and be equally as good. Next in order we have the tubs, buckets, and cups. These will cost for an establishment of this capacity about $50. Here we have an establishment all complete, except the building and enameller to do the work, for less than $2,500. With a kiln of this capacity and the assistance of a man who understands burning, an enameller and two boys can produce on an average 40,000 enamelled brick per month."

HEATING SURFACE IN BOILERS.—Buying a boiler which figures up largely in heating surface is one thing, and getting good evaporative results from this surface is quite another thing. It was supposed by many persons some years back (and is supposed yet by some) that the more tubes you could crowd into a steam boiler, the better "steamer" it would be; but time and experience have proved to manufacturers that free circulation of water in the boiler is much more important It has been proved repeatedly that boilers having from six to ten tubes less than others, with a good open space in the centre of the cluster of tubes and also ample space between the tubes and shell of the boiler, evaporated more water per pound of coal, besides giving good room for cleaning and a freedom from expensive repairs. Practical illustrations bearing out the truth of this are not uncommon and have frequently taught good lessons.

Some New Inventions.

—A gate has been patented by Mr. Wm. Mason, of Puyallup, Wash. Ter. It is a sliding gate, with locking latches at its opposite ends, and sliding bars or rods on the top of the gate, an operating cord extending at opposite sides of the gate and connected to the sliding bars, so that a quick pull on either of its handles will unlatch and open or close the gate.

—A door hanger has been patented by Mr. Le Grand Terry, of North Elmira, N. Y. This invention covers a novel construction and arrangement of parts to adapt a hanger for sliding doors to be adjustable to doors of different thicknesses, and to permit the door to be swung outward without derailing the hanger or its main wheel.

—A metallic ceiling has been patented by Mr. John D. Ottiwell, of New York city. Sheet metal mouldings are formed with side flanges, to be nailed to the beams or to furring strips, and the mouldings are made to receive and hold the edges of the panels, avoiding the necessity of nailing them, and facilitating the work of putting up the ceiling.

—A roller gate hinge has been patented by Mr. George N. Crichton, of Parsons, Kansas. It consists of a bar or plate having a central socket, and provided with a laterally projecting pin near each end, grooved rollers on the pins, and a bolt having an upright arm fitting in the socket of the bar or plate.

—A brilliant black varnish for iron, as well as for some other substances, can be made by stirring up ivory black in ordinary shellac varnish. It ought to be applied when the article to be coated is cold. The varnish does well for stoves or fire places.

Building Permits.

A one-story back building, 6 ft. by 16 ft., 1311 Columbia ave., to John F. Green, 714 Poplar st.

A three-story dwelling, 19 ft. by 47 ft. south of Lemon st., west of Tenth st., to Lewis Honny, Eighth and Pine sts.

A two-story dwelling, 15 ft. by 40 ft., west of Tacony st., south of Bridge st., to Amos R. Crosta, 4621 Salmon st.

Six two-story houses, one with store, two south of and four east of Ninth and McKean sts., to Wm. J. Cox, 712 Mifflin st.

Three two-story dwelling, 14 ft. by 32 ft., south side of Herman st., between Twenty-ninth and Thirtieth sts., to William F. Albrecht, Twenty-ninth and York sts.

Four two-story dwellings, 13 ft. by 36 ft., south side of Herman st., between Twenty-ninth and Thirtieth sts., to William F. Albrecht, Twenty-ninth and York sts.

Two one-story stores, 20 ft. by 36 ft., north side of Lancaster ave, between Thirty-ninth and Fortieth sts., to Thomas C. Sloan, 51 N. Fortieth st.

Two two-story dwellings, 15 ft. by 42 ft., north side of Silverton ave., between Forty-ninth and Fiftieth sts., to Thos. C. Sloan, 51 N. Fortieth st.

Eleven two-story dwellings, 14 ft. by 28 ft., east and west sides of Wansley st., between Kensington ave. and Jasper st., to Joseph Shickey, 1832 Reed st.

Alteration and addition to planing mill, 33 ft. by 56 ft., north side of Lancaster ave., between Fifty-fourth and Fifty-fifth sts., to Chas. Christine, 5112 Paschall st.

Store and drug house, 20 ft. by 50 ft., southeast corner of Lancaster and Westminster avenues, to Charles Christine, 5112 Paschall street.

Drug house, 9 ft. by 9 ft., Bucks and Montgomery avenue, to Charles Christine, 5112 Paschall st.

Store and shop, 37 ft. by 30 ft., N. W. cor. Fifty-second st. and Lancaster ave., to Chas. Christine, 5112 Paschall st.

Alteration to meeting-house, 98 ft. by 30 ft., north side of Lancaster ave., between Fifty-sixth and Fifty-seventh sts., to Chas. Christine, 5112 Paschall st.

A schoolhouse, 24 ft. by 112 ft., Locust, above Albion st., to Henry Taylor, 922 Filbert st.

A two-story brick building, 21 ft. by 18 ft., east side of Royal, between Monahan and Seymour sts., to Peter Digent, 8 Branherst street.

Fourteen two-story houses, 15 ft. by 40 ft., Smedley street above Ontario, to Wm. H. Hamm, 2046 N. Twentieth st.

Five two-story houses, 15 ft. by 40 ft., Ontario street above Fifteenth street, to same party.

A one-story store, 18 ft. by 40 ft., Lancaster ave. above Thirty-seventh st., to Frank H. Vogdes, 3959 Lancaster ave.

One three-story house, 17 ft. by 47 ft., Eighteenth st., above Christian, to Wm. Blair, 2050 Reed st.

Twenty-two two-story houses, 17 ft. by 28 ft., Orkney st. above Columbia ave., to C. Bassert, 2114 Marshall st.

One two-story building, 12 ft. by 13 ft., 1637 N. Second st., to Robert Greyer, 2155 William st.

Alteration and new bulk, 16 ft. by 30 ft, 2226 N. Front st., to Chas. D. Hill, 2623 Poplar st.

Four two-story houses, 15 ft. by 32 ft., Philadelphia above York st., to Curtis Packer, 860 Franklin st.

Two three-story houses, 14 ft. by 42 ft., Cumberland st. above Main, to J. Reiber, 24 Laurel st.

One two-story house, 16 ft. by 38 ft, H st. below Levick, to Lukens & Biggin, 2358 Garden st.

Alterations and additions, 22 ft. by 12 ft., to church, Tioga, above Sixteenth, to F. W. Tweed, 2630 Brown st.

One three-story brick building, 18½ ft. by 42 ft., south side of Thompson, between Fifteenth and Sixteenth sts., to D. Horner, 634 N. Seventh st.

Two three-story houses, 14 ft. by 42 ft., Rockland, above Thirty-second st., to Chas. Adamson, 1502 Walnut st.

Four three-story houses, 15 ft. by 45 ft., Thirty-second, above Rockland st., to same party.

Five two-story houses, two with stores, 14 ft. by 38 ft., Seventh and Venango sts., to Hiram A. Miller, 1210 Ridge ave.

One two-story store, 16 ft. by 20 ft., 4050 Lancaster ave, to A. Gohn, 3744 Melon st.

Brownstone front, 2016 Green st., to James Madara, 414 N. Twenty-first st.

Sixteen two-story and two three-story houses, 10 ft. by 32 ft., Hancock, above High st., to David S. McNabb, 208 Mill st.

One three-story house, 18 ft. by 48 ft., Chelten ave., above Hancock st., to Broadbent & Meehan, 314 Haines st.

A one-story office, 7 ft. by 13 ft., 3505 Hamilton st., to T. E. Hurley, 3326 Wallace st.

Four three-story houses, 17 ft. by 42 ft., Conaroe st. and Manayunk ave., to Frank Gillett, 4707 Snick st.

One two-story house, 17 ft. by 50 ft., Woodvale, above Ridge ave., to same party.

ABBREVIATIONS.

Add.—Addition.
Alt.—Alteration.
Assn.—Association.
B. & L.—Building & Loan.
Bk.—Bank.
B.B.—Back Building.
Dwg.—Dwelling.
Est.—Estate.
E.J.—Ejectment Suit.
E.S.—Equity Suit.
Exr.—Executor.
Exrx.—Executrix.
K. & B.—Kitchen & Bath.
M L.D.—Mechanics' Lien Docket.
Nat. Bk.—National Bank.
Sav. Bk.—Savings Bank.
t. t.—Terre Tenant.
S.F.—Scire Facias to revive Judgment.

Sum C.—Summons in Case—A form of action invented to meet all civil cases, the form of which is not specially provided for.

Where there are no figures to indicate the amount of the judgment, the damages have not been assessed.

The first name in each line is that of the judgment debtor.

An asterisk (*) denotes judgment confessed or bond and warrant conditioned.

The figures 1 2 3 and 4 immediately after the name of the plaintiff indicates the number of the Court. The letters D. M. J. and S. after the number of the Court indicate the Term as D., December Term, M., March Term, as J., June term and S., September Term.

An examination as to the nature of judgments and suits will be made for subscribers without extra charge on application.

Real Estate at Auction.

James A. Freeman & Co., auctioneers, on Wednesday sold at public sale the following real estate:

—A new industry in Lehigh county is the manufacture of a very serviceable building brick out of slate dust.

—There are over thirty claimants for the $8,000,000 estate left by the late San Francisco millionaire, Thomas A. Blythe. Blythe, it is said, was the illegitimate son of Thomas H. Blythe and Sarah Savage, of Hampshire, England, and, according to the laws of California, the property of an illegitimate son who dies intestate inverts to the relatives of the mother.

—The Atlantic *Democrat*, in an article on the intended foreclosure of the Colwell mortgage in Atlantic county says: "We are inclined to believe that this foreclosure will be more advantageous than hurtful to the future prosperity and growth of our community, burying as it will, beyond resurrection the ghastly remains of the Gloucester Farm and Town Association, and clearing the title to much of the land which at present remains wild because of the same, thus inducing the purchase of and settlement on the land by new settlers."

ASBESTINE.—A new building material, called asbestine, is to be put on the British market, for which remarkable fire-resisting qualities are claimed, as well as superior hardness and adhesiveness and applicability at all temperatures. It is proposed to make it a substitute for plaster as at present mixed, because it requires no hair, and it is represented not to crack under the influence of fire, as ordinary plaster does, and will therefore prove a check to the spread of flames. Another advantage claimed is in dispensing with wooden laths, as the new material will be applied to thin sheets of corrugated iron, which alone will afford considerable protection.

GUARANTEE
Trust & Safe Deposit Co.

BOOTS and SHOES,
BUT NOT SLIPPERS.

We wish to call the attention of the public to the fact that the DAY SEWED SHOE does not mean any kind of slipper.

The process is not applied to any single sole foot-wear, but to the manufacture of all kinds of BOOTS, SHOES, GAITERS and LOW SHOES used for out-door or steady wear. The dainty luxury which many cannot, and many should not wear—the "pump-sole" or "turned-sole" slipper—is for sale at the Day Sewed Shoe Store, but it is not our make. This fact has been carefully impressed upon our sales-people, but they are not always reminded of it in making a sale. We therefore take this method of explaining and providing against any mistakes. WHEN YOU BUY A THIN-SOLED HOUSE-SLIPPER YOU DO NOT GET A DAY SEWED SHOE.

THE DAY SEWED SHOE

"CAMARET"

GUARANTEED ROOFING PLATES.

A maker's brand, controlled by us to the extent that we represent the manufacturers in the United States. We are thus enabled to keep up the standard quality of this brand, the makers being under contract with us to do so.

We guarantee the material of the "CAMARET" to be the best Martin-Siemens Steel (exactly the same material as the "Gilbertson's Old Method,") while many of the cheaper plates offered in competition with the "CAMARET" are made of Bessemer Steel, which can be bought at a less price, hence is of inferior quality.

For the information of the trade we repeat the Guarantees which have made our "CAMARET" Brand so famous throughout the country.

The following is our specific guarantee of all the plates purchased from us under the brand "CAMARET."

1. That the coating, though not quite so heavy as on the "Gilbertson's Old Method," is of the same quality, is evenly distributed and heavy, perfectly coating and protecting the iron.
2. That they will stand any strain encountered in working a Roofing Plate.
3. That each sheet is cut perfectly square, has an even surface and is free from ragged or beaded edges.
4. That each box contains 112 sheets of uniform gauge, and that each sheet is stamped with brand and gauge.
5. That every box of "CAMARET" is securely bound with IRON STRAPS.

There is no other Roofing Plate that we know of to which the above Guarantees can be applied.

We take the entire product of the Mill in this Brand of Roofing Plate; and the ***Works are under contract with us*** to keep up the Quality of Goods as Guaranteed by us, and agree not to furnish the "CAMARET" Roofing Plate to anyone else, either under ***this Brand or a Private Brand.***

DEVOTED TO REAL ESTATE, BUILDING, ARCHITECTURAL AND INSURANCE INTERESTS.

[ENTERED AT THE PHILADELPHIA POST OFFICE AS SECOND-CLASS MATTER.]

VOL. I.—NO. 31. PHILADELPHIA, MONDAY, AUGUST 9, 1886. PRICE 15 CENTS

OUT of the $14,473,900 appropriated by Congress under the River and Harbor bill, Pennsylvania obtains $439,650, of which amount $15,000 is to be expended in improving the ice harbor at Marcus Hook, $90,900 for continuing the improvement of the Monongahela river, $37,500 for beginning the construction of a dam at Herr's Island, Allegheny river, near Pittsburg; $30,000 for continuing the improvement of the Allegheny river, $18,750 for continuing the improvement of the Schuylkill river, $210,000 for continuing the improvement of the Delaware river from Trenton to its mouth, of which $30,000 shall be applied to improving the channels between Camden and Philadelphia, and $7,500, or so much as may be necessary, shall be expended on said river above Bridesburg. The Secretary of War is also directed at his discretion to cause examinations or surveys, or both, to be made and the cost of improvements to be estimated at Darby Creek. The bill now goes to the President.

IT is probable that sooner or later a reaction will set in against the buying of houses on the installment plan. The anxiety to be the owner of a home is no doubt leading hundreds of persons to enter into contracts for the purchase of homes, who either have not the financial ability to do so, or who have not properly considered the ultimate cost. The number of persons who have undertaken to buy houses on monthly payment is very large. There are block after block of houses in this city occupied by persons who are paying in this way. The interest on the unpaid debt, added to the taxes and to the necessary and perhaps unnecessary repairs, make up an average monthly payment which becomes tiresome to a great many after the novelty of imaginary ownership begins to wear off. Builders and investors should take note of this fact, in order that they may not be found building too many houses. A good many dealers say houses sell easier than they rent. This means that persons are found more ready to agree to pay $20, $30 or $40 per month on a house, than for a house. The statistics showing the number of failures would be of interest and of value. Our Real Estate Exchange might find this inquiry an interesting one to make. A good many persons have relinquished their contracts and have gone back to rent. Some of them remain in the houses they attempted to purchase, while many others prefer to drop the hot end of the poker and go elsewhere and pick up the cold end. These disappointments will produce a reaction. Some day it will be more difficult to find purchasers for houses. It would be perhaps better if these installment purchasers would keep up their courage. The responsibility of buying a house stimulates and enforces a rigid economy in other direction, but the fact remains that there are a lamentable number of failures.

THE movements in real estate have been quite liberal during the past few days, notwithstanding this is a very dull season. Real estate dealers are looking for some very important transactions to come to a head some time during this month. It is probable that some new tracts will be cut up into town lots and disposed of at low prices. Something of a speculative movement is likely to develop itself this fall and next spring in this direction. The opening of the Baltimore and Ohio Rrilroad will give a stimulus to this kind of enterprise. More properties are being offered for sale in the older section of the city and there is also more inquiry for it. It is probable that a number of dwelling houses on Arch street will be turned into stores this fall and winter. Arch street will be obliged to make way for the demands of business. Business houses are desecrating West Chestnut street and even West Walnut stands in danger of the invading goths and vandals from the East side of Broad street. The march of improvement will not be arrested by geographical boundries. The high prices asked for a good many up town properties is directing the attention of buyers and real estate dealers to the desirability of cheaper down town properties. There is no very general movement in this direction, but some brokers have had instructions to make inquiries with a view to purchase property for manufacturing and business purposses.

CORPORATIONS, large and small, are now giving a great deal of special attention to their books and bookkeepers and cashiers. The attention is necessary. The damage done is twofold: first, the actual loss to the parties concerned; second, the damage done to public faith in corporation management. People have come to seriously question whether corporation finances are properly looked after. This certainly does not apply to railroads, because the system of management there is complete, and dishonesty is practictically impossible; but not so in smaller corporations and individual firms. Managers make the mistake of presuming their subordinates to be honest. This presumption is too generally abused. It is not to be supposed that all the cases of dishonesty have been uncovered. Those who are in the meshes of ill-advised speculation will no doubt take warning, and try to reimburse before discovered; those who are tempted to speculate will also take warning and avoid it. The temptation to spend other people's money is very strong. The courts of justice owe it to themselves, and to the business community, to severely punish defalcations and abuses of trust. Sympathy should have no place whatever in the disposition of these cases; there is too much at stake. If such cases as those which have recently attracted public attention are permitted to pass by with light punisment, it will be equivalent to offering a premium on frauds, which will not be lost sight of. If trickery and dishonesty can go with light punishment, in high places, it will reappear in low places. If rich rascals can escape, poor rascals will be encouraged. We have hundreds and thousands of building and loan associations where dishonesty is possible; but, to the credit of the management of those concerns, cases of dishonesty are exceptionally rare, so rare indeed that it is almost impossible to recall instances.

THE workingmen in all parts of the country are satisfied with the rates of wages paid, provided work was regular. More or less disemployment exists among miners, but in other avocations work is abundant, and the prospects for the fall and winter are that there will be very little if any idleness.

WE are shortly to have a pneumatic tube for the transmission of messages and parcels. The Electro-pneumatic Transit Company is about beginning work, and has plenty of capital to push it through. Samuel I. Given will be the Manager. The motive power will be compressed air. Larger parcels can be moved as well as small ones. It is only a qustion of expense. The time will come when heavy merchandise will be moved in this way.

(REAL ESTATE PUB. CO.)

JOHN N. GALLAGHER, Prop'r.

Refers with permission to William M. Singerly, Proprietor of Phila. "Record."

PHILADELPHIA, MONDAY, AUGUST 9, 1886.

BRIDGE builders it is said do not like to work for the city because payments are not prompt. This ought not to be. The city has plenty of cash always on hand. When work is done, whether by an ash collector or a bridge builder, it ought to be promptly paid for. Delay is hurtful to the city's credit and name.

ONE million two hundred thousand dollars is the estimate, according to President Perkins, for the expenses of the Public Buildings for 1887. This is in addition to any balance that may be left over. The $21,637.26 asked for 1885, and $50,000 for 1886, for the roadway and pavement around the Public Buildings, and which were not granted, will be asked for again this year.

THE distribution of lumber during the past week or two has been restricted to actual building requirements, and a very limited number of orders have been placed among wholesalers. Freight rates from Southern ports are from $1 to $2 per M. higher than during the spring. This accounts for the restricted supplies from the South. The stocks of yellow pine are as large as the market calls for, and wholesalers are trying to get a little more for their lumber, especially as nearly all the business going is of a retail kind. The receipts of white pine have been falling off, and Eastern buyers are letting the market go for the present. There is no hurry manifested, as every one is satisfied the supply of lumber will be heavy and prices reasonable. Hemlock has been selling at as low as $10 for edge boards, and $12 for 12-inch stock. Fencing boards are $12.50, scantling, $11 to $12; 12-inch flooring boards, white pine, $30; 12-inch barn, $20; cargo lots of yellow pine edge board, $15 to $17.50; cedar shingles, $35; lath, $2.10 to $2.15.

THE Public Buildings, at Broad and Market streets, have done Market street a damage it will never get over. If that immense building had been put some place else, it would have made Market street a more desirable street for large business houses. As it is, that grand thoroughfare is simply a fenced off street. It was a mistake to spoil two of the finest thoroughfares in Philadelphia.

NEARLY 6600 puddling furnaces are now running double time in the city of Pittsburg, or nearly 200 more than in the same month last year. This is certainly indicative of prosperous times ahead, for there is no branch of trade more sensitive than iron There was more iron and steel made during the month of July than in any month during the last eight years. 51,000 tons more of the various grades of iron and steel have been made since the 1st of January last than during the same seven months of last year.

THERE is a rumor or two afloat that two or three more big buildings will go up on Market street like that at Eleventh and Market streets. It is a sign of our provincialism that the old-fashioned three-story buildings still stay. Land ought to be too dear there for anything but five-, six- and seven-story structures. It is probable that in the course of a few years the greater number of these old-fashioned tenements will disappear. Market street has numerous advantages; it is wide, should be better paved, can be much better lighted, and can be made one of the grandest avenues in the world.

CHARLES F. WARWICK, City Solicitor, rendered the following opinion on Monday last to the Chief Commissioner of Highways, in which he states in substance that street railway companies must keep the streets in repair from curb to curb. The inquiry was in reference to the Second and Third Street Passenger Railway Company—whether that company was obliged to repair the entire width of Second street between Pine and South streets and between Fairmount avenue and Poplar street, where they occupy with a single track one side of the street, the centre being occupied as the public market. The opinion is divided into eight sections, the last of which states:

"I am clearly of opinion, therefore, that the company is required to repair the whole width of the street from curb to curb, and that the fact that the market house stands in the middle of the street does not prevent their liability from extending to the curb beyond the market houses."

BUILDING operations throughout the leading cities of the country have not been uniform. Reports from eleven cities between Boston and San Francisco, leaving out Philadelphia and Baltimore, show that for the first six months of this year the expenditures were $67,714,000 against $53,385,000 for the same time last year, and against $100,000,000 for the first six months of each of the three preceding years. Philadelphia's figures might add from $10,000,000 to $12,000,000; New York's figures are $37,500,000; Chicago's, $7,000,000; Boston and San Francisco, $5,000,000. The falling away last year was very marked. In other words, in those cities, last year's building operations were only one-half those of the preceding years named. *Bradstreet's* gives a statement of the value of projected building operations in ten second and third-class cities for the first six months of this year at $20,853,000, against $22,000,000 for the first six months of last year. In a list of thirteen cities between New York and San Francisco, the records of new buildings show that 15,093 buildings were projected during the first half of this year against 16,319 for the first half of last year, and 26,871 buildings for 1884, and 24,854 for the first six months of 1883 and 19,916 for 1882. This year's record shows up the fullest of any. Philadelphia stands in the lead as regards number of new buildings projected, the number being given at 4,856; New York follows with 2,444, but of course the buildings were much larger; St. Paul comes third on the list with 1,901; Boston fourth with 1,822. Building has declined steadily in Chicago, the figures for the first six months of the past three years being 4,272, 2,020 and 1,617 respectively.

In New York city 700 more permits were granted this year than last so far, at an increased cost of $12,000,000. Of the $37,500,000 $14,500,000 goes for flats, $1,500,000 for factories and workshops, and $1,000,000 for office building. In Brooklyn 1,878 permits were taken out this year against 2,030 for the same time last year. In Boston it is estimated that 50 per cent. less will be spent this year than last. It is not likely that much more new building will be projected in that city this season. Pittsburgh has suffered very severely. The total cost of building operations for the first half of last year was $2,100,000; first half of this year $700,000. Cleveland will about hold its own; Columbus falls back. In Chicago the total number of buildings projected for the half year was 1,617 at a cost of $7,395,200; for same time last year 2,020 buildings were projected and about $1,000,000 more was expended. Matters have

been quite lively at Louisville, Ky. The expenditures of the first half of last year was $1,250,000, this year about $2,000,000. Operations were obstructed in Indianapolis and Evansville. In Kansas City, Mo., 1,789 buildings were projected at a cost of $3,689,071. In St. Paul 1,901 permits were taken out at a cost of $3,300,000. At Minneapolis, Minn., the expenditures this year are one-half more than last. In Baltimore the permits fell off this year to 1,485 from 2,073 last year. Unusual activity has manifested itself in that city recently. In Richmond, Va., 200 new buildings were begun, which will cost, when completed, about $1,000,000. Throughout several Southern cities there is considerable building activity, but it is impossible to gather reliable statistics because of the carelessness in preserving records or gathering the information. The sum total shows that the country has suffered quite severely from strikes. It also shows that the influences at work are pointing in the direction of greater building activity next year. A great deal will depend upon what organized labor will do. If there are to be fresh agitations for higher wages or shorter hours it is quite probable that enterprise will hold itself in check. There is plenty of money ready to go into building operations. Property rents and sells well and the supply of houses is not likely to be overdone at an early day.

THERE is a sameness about church architecture that is almost annoying. Of late years, there has been something of a protest against this. Still, the rebellion against the old gothic style is trifling. What we need is a master mind and master hand in church architecture, by which the uniformity and dullness will disappear and something attractive take their place. There is abundant room for genuine originality. There is a certain fashion in architecture, which changes from year to year, like fashion in dress. It lacks originality. It bears evidence of an anxiety to make things appear different without a real ability to do so. A great many of our modern churches are certainly evidences of a high degree of architectural ability. But after all the trained eye can detect a uniformity about them suggestive of ordinary talent. They do not suggest the idea of the old style temple. They rather suggest the idea of the crude structure of the middle ages; of two walls with a rough, cheap roof. Our finest churches are simply reduplications of this idea, with a scattering of stone work above and below as though the architectural genius was hunting in the dark after a new idea. The old time temple is no where seen. We borrow too much from the medevial times; too little from the ancient times, when religion and religious contemplations monopolized a larger share of the human mind. We could learn more from Ancient Grecian and Egyptian architecture than we do. It is true, we are drawing upon these sources more and more but we hang too much to the works of the latter ages when scholarship and statesmanship began to arouse the world from its sleep of centuries.

IT is to be regretted that, as matters now stand, there will likely be a long delay in the building of the Market street bridge. Contractor Maloney is ready and anxious to start. No special session of Councils, it seems, is likely to be called. The lawyers and Councils' work seems to have been very shabbily done. There should be no room for discussion or difference of opinion over what an ordinance means, or what it can be construed to mean. There has been enough delay already.

BEFORE a single step is taken towards the construction of the new Market Street Bridge something more definite than the present very ambiguous agreement as to what part of the expenses the Traction Company are to assume, should be arranged, so as to hold the Company legally bound to comply with its agreement in every particular. There should be manhood enough left in those representing our city government to exact a full measure of responsibility and a full compliance with its agreements from this many headed monster of monopoly.

So many concessions have been made to the Traction Company and so much indifference expressed as to its illegal exactions from the public and its free booter's way of doing things that the integrity of Councils can be very justly questioned.

The bridge across the Schuylkill, new or old, is the property of the city, and we question the right of the Traction Company to use it at all without special legislation upon the subject.

The Company now refuse to pay for any portion of the pavement around the Public Buildings; if there is a possibility of making it pay its full share, the city Solicitor should bring suit at once.

A GREAT many companies are being chartered for manufacturing and business purposes. The sums range from $10,000 to $500,000. Opportunities for investment of capital are multiplying. Opportunities for investment in railroad and other speculative quarters are declining. The greed of the American people to make money without care or work has resulted in the building up of the immense fortunes of men like Gould and the Vanderbilts. These men are not to be half as much blamed as their dupes. Tens of thousands of men with a little money have for years been rushing into Wall Street and other financial centres and flinging their money into stock speculation blindly. Shrewder and abler men have simply picked up their money thrown away and to-day we have a hundred or more millionaire railroaders. Of late years money has been seeking other channels of investment. It has been flowing into building enterprises all over the country. It has called for the transformation of our cities, from old-fashioned into new-fashioned cities. It has built up waste places, has stimulated manufacturing and has developed a spirit of enterprise which has given an impetus to building operations which will likely continue for months and possibly for two or three years to come.

WITHIN a few days past orders for between sixty and seventy locomotive engines have been placed; one order for twenty, at Scranton, and another order for twenty-five, of the largest pattern made, at Altoona. The car builders are similarly busy, and it is probable that all establishments engaged in manufacturing railway appliances will have about all they can do during the rest of the year.

A NATIONAL CONVENTION of architects would be a very good thing. All other professions have their annual convention. The bankers have theirs, the ministers of the Gospel meet in convention, doctors have their convention, manufacturers of every branch of industry have theirs, business men of all kinds have their conventions, but architects have none. In several of the Western States State Conventions are held every year, the proceedings of which are of the greatest interest. Nothing of the kind is heard of in the Eastern States. In the West there is a more fraternal spirit. In the East there is an exclusive spirit; jealousy prevails, sometimes manifesting itself to the verge of hostility. The experience of Western architects shows that a great deal of good can accrue to all concerned by the development of friendly relations. But there is something else than friendly relations to be developed. It is not saying too much to assert that if the architects met together and talked things over they could develop a higher order of ability. In saying this it is not intended to say that the order of ability among our architects is of a mediocre character. On the contrary, ability is manifested both of an original character and what might be termed, acquired. European architects can and do learn much from the American brotherhood in the field of originality. American architects learn much from those abroad. Foreign architects have the advantage of the instruction of ages. They have massive structures, centuries old, embodying the highest skill of what we might term the old masters in architecture. The foreign architect is great in the degree that he can imitate the works of the past, just as our American architects are great in proportion to their ability to create designs from their own resources. The two orders of ability are necessary for success. The past is a fountain deep with instruction. The American architects have the advantage of an independence and an originality which European architects do not possess. Their architectural triumphs are borrowed from the works of others. But this is not to the point. A more friendly commingling ought to be maintained between American architects. Architecture is in a transition state. The Western architects show that progress can be made by freely coming together and exchanging ideas. Greater benefits would accrue to the meeting of the architects of the country. Prizes might be offered for excellence. A spirit of emulation would be developed; professional pride, which is already very strong, could be further stimulated to the end that a higher order of architectural talent might be developed.

THE plumbers say business has a bright outlook. They have about as much business as they can comfortably handle. Inquiries and specifications are coming in for future work. All our wholesale plumbing supply houses are accumulating stocks to meet the anticipated demand. We feel there is no danger of stocking up too much. There is a great deal of active competition in the trade and prices are whittled down pretty low.

ARCHITECTS complain every now and then that builders use their plans and drawings for other work than that intended by the architects, and in this way rob the architects of business which properly belongs to them. This evil has grown to considerable dimentions. A good deal of building is done on plans, which are practically stolen. The builder is frequently quite willing to assume the responsibility which properly belongs to the architects, by using the architect's brains. He has no right to do so. The custom can be more easily denounced than arrested. There is a great deal of building which does not demand the service of architects. A large amount of building is simply the re-duplication of work with which any ordinary builder is perfectly familiar. But there is a great deal of work done by builders on plans adapted to suit the particular tastes. It is right here where the wrong is done the architects. It may result as it does frequently in the saving of a little money, but it may well be doubted whether the money is well saved. It is a poor economy for parties putting in large sums of money in building to demand architectural services from their builders, or even to accept them. A physician may be able to be a dentist, but tooth-pulling is better done by a dentist and a surgeon's work is better done by a surgeon. It is a mistake and it is an act of injustice for a builder to invade the domain of the architects, and architects ought to protect their interests by a little watchfulness. A builder who does this is liable in damages. The architect's plans and specifications are his own and he can be protected.

—The anarchists' trials at Chicago are developing very little that is of real importance. The anarchists seem to be weak-minded men rather than vicious men. They are ignorant of everything and imagine themselves oppressed. They have no knowledge of the principles of the government and no faith in government of any kind. Unless a severe example is made of such ignorance these troubles will be renewed when opportunity offers.

—During the past week or two a few real estate agents presumably acting under the advices of their principals, have been carelessly inquiring the prices of real estate in the southwestern section of the city and beyond the city limits. Nothing is known as to the meaning of it. It is supposed that their principals intend to make purchases on an expensive scale, if they can do so on reasonable terms. There is a great deal of land available for building purposes and with a good supply of accomodation trains at short intervals it will be possible to build up a few suburban villages.

Recent Decisions in Relation to Matters Concerning Real Estate.

Decided by the Supreme Court of Pennsylvania.

CO-TENANTS.

One who holds property in common with another cannot bind his co-tenant by any contract regarding the common property which is not authorized or ratified by the co-tenant.

DEED.

A purchaser's mistake as to the quantity of land sold, unaccompanied by fraud or breach of warranty on the part of the vendor, is no defence to an action for the price brought by vendor after delivery of a deed.

The execution of a conveyance is the consummation of a purchase, after which the parties have no recourse to each other except for imposition or fraud.

This rule as to closing of a contract by deed holds, even when the contract was for a sale by the acre.

There can be no allowance for a deficiency, nor can there be a recovery for an excess.

GRANT.

A grant to a religious society of a piece of land, "to hold for the only use and purpose of a church and churchyard and burying place," is a grant for a special purpose only, and when that fails it will revert to the grantor and his heirs.

Where the religious society was dissolved it could not convey a fee in such lands, even to a corporation or society formed to preserve the use of such land as a burying ground.

LEASE.

A covenant in a lease that lessee shall not use or occupy the premises other than as a dwelling-house, implies a condition or covenant on the part of the lessor that they are fit for occupancy as a dwelling, and proof of untenantable condition of the premises when leased will entitle lessee to a defence or offset against a claim for rent to the amount he was compelled to pay for repairs. So held where actual misrepresentations were asserted.

MORTGAGE.

A deed of all grantor's estate—real, personal and mixed—unto the grantee, to have and to hold, "his heirs and assigns forever, subject, nevertheless, to the right of redemption of the aforesaid property" by the grantor, was held to be a mortgage.

The grantee, in such a defeasible deed, must account for the rents, issues and profits of the mortgaged premises, so that the net proceeds thereof may be applied to the payment of the sum for which the property was pledged for security.

VENDOR AND PURCHASER.

Payment of purchase money and acceptance of a deed in advance of the day designated in the contract of sale for giving the purchaser possession, and in ignorance of an incumbrance or defect of title, does not impair his rights to relief, if when the day arrives the vendor cannot, on account of incumbrances, etc., give possession. Whether the deed contains any covenant relative to title is unimportant.

But if a purchaser, with knowledge of an incumbrance or defect of title, accepts a deed and gives his obligation for the purchase money, the incumbrance, etc., forms no defence to an action on the obligation; his only remedy is upon such covenant for title as the deed may contain.

F. R. SHATTUCK.

—The workingmen propose to erect a monument over the grave of W. H. Foster, Secretary of the National Federation of Trades.

Items of News.

—Tax Receiver Hunter has collected this year $8,397,455.80.

—There is a threatened strike among the Lehigh coal miners.

—The personal estate of John Blyden is appraised at $94,372.30

—The personal estate of George Crook is appraised at $142,123.70.

—An iron bridge is to be built across the Susquehanna at Harrisburg.

—The personal estate of Rachael M. Shoemaker is appraised at $20,184 75.

—A new jail is to be erected in Indiana county, Pa., at a cost of $50,000.

—It costs 13 cents per day to keep the inmates in the House of Correction.

—Alice Foster sold Edward H. Flood the property at 1923 Judson street for $8,200.

—It is intended to construct a brick sewer along the Wissahickon at a cost of $20,000.

—The Frankford people will discontinue their electric lights unless prices are reduced.

—It will cost our citizens next year $2.172,-958 to support the Public Schools of this city.

—The hod-carriers and bricklayers of Cincinnatti are idle, owing to a strike and lock-out.

—The property at the southwest corner of Fifth and Bainbridge streets was sold for $8,100.

—The present Police Force of Philadelphia consists of 1,457. An increase is wanted.

—New York city had during its second quarter 504 fires. Losses, $1,000,000; insurance, $7,000,000.

—The passenger railway companies seem determined to have their way in reference to disputed points.

—The city is expected to pay $26,956 for rent for buildings for the accomodation of the fire department.

—The new Jewish Synagogue of the Adath Jeshurum Congregation will cost, when completed, over $50,000.

—Business men of Philadelphia who have been recently interviewed report a larger volume of business than last year.

—According to the *New York Tribune*, the working men of New York City have deposited in the ssving banks $8,024,304.

—A new Methodist Episcopal Church is being built at Chester with a seating capacity of 500. P. A. Welsh is architect.

—Robert Hare Powel, Sons & Co., have given orders for the construction of a large furnace at Saxton within one year.

—The total amount of money received for taxes during 1885 was $10,402,885.45. This year's receipts will be about $500,000 more.

—A Philadelphia firm, McCombs & Dun, submitted the best plan in seventeen for a lodge entrance to the Allegheny Cemetery.

—Corcoran & Bichards have put in operation at Williamsport a saw-mill said to be capable of sawing 900,000 feet of logs per day.

—Only one vessel was detained during July because of improper sanitary condition. 150 were allowed to pass up on examination.

—The contest for letters of administration on the estate of Edward Simon has been settled, the Register of Wills issuing the necessary papers of the grandfather of the decedent's three children.

THE Citizens' Municipal Association are after the ash collectors. If the wind is in right direction the ash collectors do not care

REAL ESTATE is bound to improve in the southwestern section of the city, is the deliberate opinion of a well-posted dealer in that locality.

THE latest report from the slate region is that large orders have been received, for immediate delivery. This is welcome news for the slate men.

THERE are 5,766 pleasure carriages in Philadelphia, worth $790,576, owned by 3,776 persons; the average tax per carriage is $2.54; the revenue amounts to $14,625.

NEW developments of building stone are reported along the Schuylkill Valley Road. There are several excellent deposits there. All that is wanted is a little capital.

THE Railroad Companys are looking up considerable real estate to hold for future possible use. The managers recognize that real estate about Philadelphia must necessarly advance year by year and that it will be a good investment to anticipate the probable requirements of five or ten years.

REPORTS from building associations indicate increasing interest in this system. Outside of the State new associations are springing up rapidly. Pennsylvania experience is sought for in far-off Utah. In Wisconsin there is great progress. Throughout Oregan associations are prospering and new ones are springing up. Away down in Louisiana they are appreciated by planters, business and workingmen. They are good for all etates and times, and are destined to work a quiet revolution in the condition of the people.

THE first annual report of the Ohio State Forestry Bureau reveales a sad and dark picture for lumbermen, of Ohio in particular, to gaze upon. In 1853 there were 13,991,426 acres of forest land in Ohio, while in 1884 there were only 4,436,641, or less than one third as many acres. The percentage of all the land in the State which was covered with forests fell from 54.19 to 17.39. Since 1880 the forests have been cut away at the average rate of 100,000 acres a year, which would leave only 3,000,000 acres at the end of the century, and exhaust the whole of the supply in forty-five years. A large part of the timber land remaining is half cleared and covered with inferior trees and bushes. Prompt legislation is evidently needed in Ohio to encourage the preservation and improvements of forest lands.

A SIGNIFICANT feature of the business outlook during the past month has been the steadiness with which the volume of trade has been maintained and the healty condition of industrial affairs. A comparison of clearing house returns with the corresponding month last year shows a very considerable expansion in the volume of trade in progress, and the large absorption of supplies is fully attested by the very slight fluctuations in values that have taken place. Stocks are nowhere excessive, supply and demand have been very evenly adjusted, and the conservative manner in which all business operations have been carried forward is the best indication of their healthy character. The labor question is not wholly free from disturbing influences, but these have been of a local character, and not calculated to exert any important bearing upon the general condition of industrial enterprise.

A Mortgage Filed for Purchase Money.

A purchase money mortgage of $600,000 on the Valentine real estate and ore lands was filed in the Recorder's Office at Bellefonte, Pa., last week. It was issued to the Fidelity Insurance and Trust Company. The property consists of 12,000 acres of ore lands and some sixty houses, and has been in successful operation under the management of the Valentine family for over fifty years. A syndicate of Philadelphia capitalists are the purchasers. A lease has been made of a portion of the property to a corporation called the Bellefonte Iron Company, which is erecting a furnace which will have a capacity of 100 tons per day. The Pennsylvania Railroad Company has agreed to extend its lines to the different ore banks in order to facilitate shipments.

Plumbers' Notes.

HAINES, JONES & CADBURY in speaking of the effects of the labor agitations in the second quarter of the year, say that with all the disadvantages suffered, some few advantages have been realized. An oversupply of dwelling houses was prevented; business has been preserved within reasonable limits. While a good many orders were countermanded enough business has come to hand to satisfy all. Labor is fully employed throughout the city and neighboring towns. Prices of copper and brass which enter into the plumbing business have hardened from 10 to 20 per cent. This firm report a great increase in their business and have made connections in several other States which they think will be of advantage to them.

KLINE & BRO. have the plumbing contract for the Northwestern Bank, corner of Ridge and Girard avenues. They report an active business in sanitary plumbing and think a good deal of trade yet remains to be developed.

How New York is Doing.

Our summary of the official records for July of conveyances, mortgages and buildings projected shows that the interest in realty on the part of the investigating public is steadily increasing. Indeed the figures, not only for July but for the whole seven months of this year, show a most prosperous condition of things in the real estate market. It will be noticed that more than a million dollars over the expenditure of last year is to be put into new construction in the plans filed during the month of July. For the seven months up to the close of July the total expenditure for projected new buildings is in round numbers $41,500,000, against something less than $30,000,000 for the same period last year. This is within $4,000,000 of the total amount spent in the whole year of 1885 in constructing new edifices in this city. It is safe to say that from sixty to sixty-five million dollars will be put into new house property in New York in the year 1886, against some $45,000,000 last year. As our analysis shows the heaviest building is west of the Central Park, which, for the seven months just past, shows a contemplated expenditure of nearly $11,000,000, against $5,000,000 last year and some $4,000,000 the year before. The region north of the Park is also growing, but considering the extent of the territory and its attractions, there does not seem to be as much building north of the Harlem river as would have been expected in view of the public improvements under way. The conveyances also show an increase over last year. Indeed there are some 1,700 more than in the first seven months of 1885. The consideration goes to show the increasing investment in New York property, for the total for the seven months is $162,000,000, against $117,000,000 last year. The number of mortgages and amounts are also relatively larger.—*Record and Guide.*

Items of News.

—The commissioner of Agriclture is to start an experimental silk factory at Washington, D. C.

—Estimates are out for the erection of a fine Reform Episcopal Church at the corner of Thirty-third and Chestnut streets.

—Builder Holl, of Camden, on Thursday took out permits for the erection of eighteen three-story brick buildings on Sixth street, between Benson and Berkley streets.

—Edward Hirst Brown, 1430 South Penn Square, is erecting a fine house on Montgomery ave., Ardmore, Pa., for Mrs. M. N. De Haven. It will be in early colonial style and will cost about $5,000.

—It would be a good thing if the example set by Messrs. Childs and Drexel was followed by more employers and business men Mr. Drexel slowly acknowledges his election to the Philadelphia Printing Pressmen's Union.

—The State department has granted a charter to the "American Trust, Loan and Guaranteed Investment Co. of Philadelphia," capital, $250,000. Henry S. Loucheim, of 711 North Sixth street, is Treasurer.

—Percival Roberts has had a warrant issued for the arrest of the Supervisors of Lower Merion township, Montgomery county, for allowing the obstruction of a public road near Bella Station. One of the Supervisors is A. J. Cassatt.

—The valuation of New York county increased over sixty million dollars from 1866 to 1870. From 1870 to 1873 the increase was about thirty-two million dollars, and from 1880 to the present time the increase has been seventy million dollars.

—The valuation of New York is at the rate of 75 cents on the dollar, while in some counties in the State it is only from 32 to 36 cents. New Yorkers claim that they are robbed by the rural counties. They want a State all to themselves.

—Fifty carters employed by contractor Dunwoody at Sixteenth and Chestnut Street went on strike last Thursday because of a prodosed reduction in wages from fifty to forty cents per load. Work was soon after resumed at the former figures.

—The $35 interest due on each of the bonds of the Warren and Franklinville Railway Company is payable at the office of the Philadelphia and Erie Railroad. $1.50 is deducted to meet the State taxes, making the net interest on each bond $33.50.

—During the late session of Congress some good work has been done in restoring to the public domain forfeited railroad land grants. Over 30,000,000 acres have been restored to the national ownership. Three forfeiture bills passed by the House—the Gulf and Ship Island bill, to recover 652,800 acres; the Northern Pacific, to recover 36,907,741 acres, and the New Orleans Pacific, to recover 870,400 acres—did not receive the assent of the Senate. The Northern Pacific lobby appeared to be too strong for Senatorial virtue to cope with.—*Phila. Record.*

—The estimate of the amount of money required by the Board of Revision of Taxes for next year was received by Controller Dechert on Wednesday. The sum asked for is $24,250 for salaries. The sum asked for by Chief Engineer and Surveyor Smedley is $509,706. This amount includes $38,6.0 for salaries, $19,086 for surveys and revisions of street plans and topographical surveys, $125,000 for the Twenty-second ward sewer, which is to drain the Wissahickon Valley and Paper Mill Run into the intercepting sewer, and $50,000 for the intercepting sewer at Manyunk.

—A large number of bricklayers in Cincinnati, on strike, have made propositions to builders to let them complete the work in hand.

—James P. Momen has named his last land operation on the P., W. & B. Railroad after President Cleveland's wife's family name, "Folsom."

—The interior of the Protestant Episcopal Church at the corner of Mehl and Main street, Germantown, is being thoroughly renovated.

—A great many mortgages have been paid off in Philadelphia county during the past year, but about as many more have been recorded.

—The Baltimore and Philadelphia Railroad station, which is to be erected on Delaware avenue, in Wilmington, Del., will cost $18,900.

—Charles N. Apple, a real estate dealer, has been selected as Foreman of the Grand Jury for the August term. We congratulate Mr. Apple.

—Ex-Chief of Police Givin has left the American District Telegraph Company to become manager of the Electric Pneumatic Tube Company.

—Russel Fair is to have his salary as Park Superintendent increased from $3,000 to $4,500. This will allow him to devote all his time to park duties.

—Magistrate Severn returned $171.15; Magistrate Neall, $122 95, and Magistrate O'Brien, $211.65, to City Treasurer Bell as fees collected during the month of July.

—The New York banks show an increase in deposits during the past six months of a little over $8,000,000. This is one favorable indication of industrial prosperity.

—The condition of the streets is the subject of constant complaint. There are miles and miles of our streets not in proper condition, properly classified as "dirty."

—Clayton French, of the firm of French, Richards & Co., was stricken with paralysis on Monday last, and now lies seriously ill at his home, York road and Fisher's lane.

—On last Tuesday the Public Buildings Commissioners presented a letter to Controller Dechert, asking for $1,205,000 for the prosecution of their work for the ensuing year.

—Among the real estate transfers recently are 100 by 125 feet on Pine street, east of Twentieth, for $36,000; a lot, 35 by 90 feet, on Race street, east of Eleventh, for $13,500.

—Camden's new Board of Health has elected Septimus Knight, a Republican, Health Inspector, and Highway Supervisor R. C. Thompson, a Democrat, Assistant Inspector.

—The new Fourth Street National Bank was organized on Monday, August 9th, with a capital of $1,500,000. $2,000,000 was offered. Temporary quarters will be found in the Forest Building.

—John H. Goldbeck, the builder, of No. 3825 Spring Garden street, was thrown from his carriage on last Monday morning at Thirtieth and Rockland streets, and dislocated his shoulder. He was taken home.

—The United American Mechanics' Hall Asso'n receipts for the fiscal year ending in June were $10,447.66, including a balance on hand at the beginning of the year of $697.90. The expenditures were $10,189.80, leaving a balance on hand of $954.97. The indebtedness of the association was reduced $5,470.60 during the year.

—The coal yard, office, dwelling, etc., at the N. W. cor. Jefferson street and the Germantown and Norristown R. R., extending north and south about 100 feet, westward 90 feet, and eastward about 78 feet, was sold for $12,100 at auction.

—A good many judgment notes are hanging around. Business men of small means find them a welcome escape from threatened dangers; but, unfortunately, they shake hands with the sheriff when they give one.

—Recciver of Taxes Hunter on Monday informed Controller Dechert that the probable receipts of his office from August 1 to December 31 of the present year would be $2,290,000. The collection of State Taxes will amount to about $12,000.

—Mr. Jno. Batley, an expert electrician and inventor of 4050 Girard Ave., West Philadelphia, has just completed an electromotor designed for use on street cars, which will run with a smaller amount of current than other motors. A galvanic battery is used. The motor is in the rough, but it demonstrates a principle and shows that electricity can be utilized economically for the propulsion of street cars. The invention is worth the attention of those interested.

—L. R. Early, W. P. Bockel and P. Y. Hite have entered suit against Andrew Kadl and J. K. P. Hall to recover $300,000 damages. The plaintiffs allege that they are the owners of 3,000 acres of valuable timber land in Elk county, this State, and that the defendants have entered upon and cut timber from the property to the value of $100,000, for which the plaintiffs have been unable to recover any compensation. The suit was entered under an act of Assembly which permits the plaintiffs to recover treble damages.

—The case of C. K. Landis against John L. Burke has been dragging along many years, and has finally reached a conclusion. The Camden *Post* published a large amount of testimony taken under the examination of Henry S. Godshall, an expert accountant, who was appointed by Mr. Landis to go through the accounts The work of an expert accountant seems to have been very necessary. Mr. Godshall stated under oath that he believed it impossible for any accountant to make a correct balance-sheet from the Ledger marked Exhibit A, which was kept by Mr. Burke, and that he considered it impossible to make out a true statement of Mr. Landis' financial condition, according to Burke's bookkeeping. Mr. Landis has honestly endeavored to ascertain the actual business relations between himself and Mr. Burke, for the purpose of doing ample justice, and had the books been kept as books should be the trouble and delay would have been greatly lessened.

—A good deal has been said of late years about the disqualification of voters in States like Rhode Island and Delaware. Sensational magazine articles have been written on the subject. In New York State workingmen complain that they cannot sit on juries unless they are worth $250. The *New York Sun*, which has been looking into Rhode Island voting laws, says, that out of the total population of 304,284, the number of qualified voters is only 45,957, of whom, less than half, or 22,448 voted for Governor on the first of April of last year. Naturalized citizens are only allowed to vote when they are possessed of a freehold of $134 or renting for $7.00 a year. The non-voting males over twenty-one of no political condition are 12,678, the naturalized 3,411 and the aliens 23,681. Rhode Island keeps up an odious distinction between property holders and non-property holders. Such laws lay the foundation of trouble. Non-property holders believe they have an absolute right to vote in this republic and it will require a great deal of argument to convince them otherwise.

BUILDERS' ITEMS.

Building and Real Estate Notes.

FREDERICK LAMBERT is erecting 13 houses on Lawrence street below Lehigh avenue, they are of brick with brown stone trimmings, and will be very attractive.

P. A. WELSH, architect, 429 Walnut street, is erecting a fine stone church at Chester, Pa., for the M. E. congregation. Also, a fine stone stable at Village Green, Pa., for John B. Rhodes.

C. W. THOMAS, 3903 Lancaster avenue, has just completed the sale of a lot between Twenty-first and Twenty-second streets on Cathedral avenue, for $400. He reports renting as very satisfactory, and inquiries both for purchase and renting increasing day by day.

J. H. WINDRIM is making extensive alterations for Mrs. Joseph Moore, at her house 1821 Walnut street, at the cost of $25,000. Also, erecting several workman's houses at Bristol. Mr. Windrim thinks that the prospects for the fall building trade has a tendency to prosperity.

G. W. HANCOCK, Fortieth and Lancaster avenue, reports wanting of small houses still in great demand, especially between Twenty-second and Fortieth streets, West Philadelphia; larger properties are not receiving as much attention, but he reports inquiries more numerous both for purchase and rent than in previous years.

WILLIAM MATTICK, 3870 Lancaster avenue, Real Estate Agent, has within the last ten days made sale of the property 682 Brooklyn street (eight rooms) for $3,000; also a dwelling 4112 Warren street, for $1,700; also one on Aspen street, east of Thirty-seventh street on the north side, of six rooms for $2,100; and 517 N. Forty-sixth street, of six rooms for $1,550; also 4514 Wallace street, for $1,450. Mr. Mattick gives it as his opinion that real estate is looking much brighter, and the prospects for a good fall movement very encouraging.

J. H. WINDRIM, architect, 132 S. Third street, will finish the building for Hood, Bonbright & Co., according to contract by November 15th. The Market street front will be 160 feet, with an iron front, and will be painted white; the Girard street front will be of brick of the same dimension; the depth from Market street to Girard street is 180 feet. Four freight elevators and two passenger elevators will be used, traveling from the basement to the sixth floor; the whole building will be lighted by electric light. The total cost of the building will be about $300,000.

CULVER & ROGERS, 134 S. Ninth street, architects, are erecting a coal shed for J. S. Lowry & Son, on Lombard street wharf. The building will be 232 feet long and 70 feet wide; it will be entirely covered with corrugated iron sides and roof, and is constructed by twelve posts in such a manner as to enable them to drive a cart between any of the posts; it has forty-eight large bins which have a capacity of 5,000 tons; the bins are constructed with hopper bottoms, which allows the coals to screen themselves. It is connected to the wharf by a tunnel work 200 feet long, and crosses the B. & O. by a bridge of 78 feet span. The cost of the whole construction will be $20,000.

—Henry B. Worthington, the manufacturer of the Worthington pump, expects to sell Philadelphia a pump of 20,000,000 gallons capacity per day. A committee went last week to Medford, Mass., to see the operation of a pump at that place.

Estimate of Expenses of the Fire and Police Department and Fairmount Park for 1887.

Controller Dechert has received Mayor Smith's estimate for the Police Department for 1887. The total amount of the appropriation asked for is $1,613,254.73, an increase of $103,850.92 over the appropriation for the present year. This increase includes the pay and clothing for fifty patrolmen for the Twenty-fifth police district, amounting to $45,435; salary of the Superintendent of Wagon Service, $1500; for the purchase of additional vans and horses and service thereof for rural districts, $1500; for the extension of the police electric system in the northern part of the city, $35,000; for the relief of police officers disabled in the discharge of their duties, $2000; for altering and rebuilding the Third, Seventh, Thirteenth, Sixteenth, Twentieth and other police district stationhouses, $8,000; for the purchase of horses and the maintenance of fifteen mounted officers in the Fourteenth, Fifteenth and Twenty-second districts, $7500, and $500 for the maintenance of a horse and carriage for the Chief of Police. The Mayor in asking for the several amounts says:

"The omission of an approximate appropriation for an increase of several hundred men upon the police force is not because of the belief that the same is unnecessary. Having already officially asked for the same, I now prefer to leave the matter subject to the judgment of Councils when they reorganize the department. A comparison with other cities demonstrates that we are, notwithstanding a much greater economy in our items of police pay and expenditure, more inadequately provided for in numbers than any of the large cities, and the question may be asked, in view of recent events elsewhere, whether we are following a line which guarantees peace and protection to our people and their interests. The slight increase asked for is for the matters absolutely demanded and required for the benefit of the police service."

The Controller also received from the Fire Commissioners an estimate of the expenses of the Fire Department for next year. The Commission asks for $664,056, an increase of $94,640 over the appropriation for the present year. The largest item is for the pay of 366 hose and laddermen, and calls for $329,400. The salary list includes the pay of the Chief, $3,000; five Assistants, $1,500 each; Joseph T. Hammond, $1,500; storehouse clerk, $1,000; messenger, $700; supply wagon driver, $700; forty-one foremen, $49,200; thirty-four engineers, $34,000; thirty-four firemen, $30,600; forty-one drivers, $36,900; seven tillermen, $6,300. The Commission also asks $21,440 for uniforms, $20,000 for straw and feed, $26,956 for rents of buildings, $12,000 for the purchase of horses, and $10,000 for the purchase of new apparatus.

$524,462.50 is the amount asked for by the Fairmount Park Commission. This is an increase of $268,670 over the present year's appropriation. The salary of the Superintendent, Russell Thayer, is increased from $3,000 to $4,500. The important items are as follows: General maintenance of the Park, $100,000; care and maintenance of Horticultural Hall and Arboretum, $15,000; care of nurseries, $7,500; seventy-four Park guards, $821.25 each; extension and improvement of water supply, $10,000; improvements on Elm and Girard avenues, $5,000; construction of walks for pedestrians, $10,000; maintenance of Memorial Hall, $15,000; painting and repairing of Horticultural Hall, $5,000; new glass roof for Horticultural Hall, $30,000; construction of the Centennial Concourse and completion of improvements in the vicinity of the Welsh memorial, $50,000; continuing the repairing and resurfacing of Wissahickon road, $5,000; continuing the river wall, $25,000; care and maintenance of Hunting Park, including the construction of green-house for bedding plants, $10,000; continuing the filling of the marsh on the west side of the river south of Girard avenue, $10,000; purchase of settees, $7,000; flooring Lansdowne bridge, $5,000; construction of a walk from the boat-houses to Girard avenue, restoration of the grounds over the intercepting sewer and repair and improvement of the East Park drive, $20,000; construction of a pavilion for musical purposes in the old Park, with seating accommodations for the public, $10,000; construction and maintenance of a boat landing, $6,000, and the construction of a brick sewer along the Wissahickon, $20,000.

A New Kind of Real Estate.

OYSTER GROUNDS NOW BEING SURVEYED FOR THE PURPOSE OF SALE.

The New York *Sun* says that during six weeks past Engineer W. G. Ford, Jr., under direction of Fish Commissioner E. G. Blackford, has been at work surveying the oyster beds and grounds adapted to the cultivation of oysters in Prince's Bay and other places adjacent to Richmond county. There are there, it is estimated, nearly, if not quite, 10,000 acres suitable for oyster growing, but a small part of which is now utilized for that purpose. When the work of surveying down there is completed it will be extended to the Sound and waters adjacent to Long Island. During the winter the results of the surveys will be mapped and the grounds opened to purchasers at the low rate of $1 per acre.

It is expected that the establishment of the rights of ownership to oyster grounds will have the effect of greatly increasing the cultivation of oysters. Such has been the effect of the introduction of a similar system in the States of Rhode Island and Connecticut. The former had in 1865 only sixty or seventy acres of ground used for the cultivation of oysters. That year the law selling the oyster grounds was passed. In 1883 Rhode Island had 11,000 acres under oyster cultivation, and her production had risen from 71,000 bushels in 1865 to nearly 1,000,000 bushels in 1883. This statement of the amount of land under oyster culture does not include a great deal that is held on ancient grants by individuals and towns independent of the State, just as great tracts of such lands are held in the great South Bay and in other bays and harbors of Long Island.

Connecticut in 1880 had but 7,000 acres of cultivated oyster beds. That year the law authorizing the survey and sale of the oyster-growing lands was passed by the Legislature, and now there are nearly 100,000 acres, formerly the property of the State, but now of private individuals, devoted to oyster culture. Mr. Roe, of New Haven, has 25,000 acres of ground, under from 30 to 50 feet depth of Long Island Sound, planted with oysters. New York has fully 100,000 acres of ground under the Sound quite as good as any belonging to Connecticut for the growing of oysters. At present, except where they are held by right of ancient town and individual grants, the oyster grounds of New York are held by the uncertain tenure of custom, and disputes as to ownership are frequent. The mapping of them will put an end to all this, as the lines will be clearly established and titles as valid and clear as those for uplands will be given to their purchasers. The natural beds will not be sold.

Charters Granted.

The Chartier Oil Company, of Washington; capital, $250,000. Henderson Iron Company, of Sharpsville, Mercer county; capital, $80,000. Among the Directorf is Ralph Bagaley, of Pittsburg. The A. M. Collins Manufacturing Company, of Philadelphia; capital, $500,000.

New Buildings.

C. C. Moore will build 38 two-story dwellings, 14 by 42 feet, at Fourth and Somerset streets.

Thomas J. Milnamow is the contractor for four two-story dwellings at Nineteenth and Fernon streets.

W. R. Dougherty is the contractor for a three-story school-house, 40 by 70 feet, at Twelfth an Worcestter streets.

Arthur H. Williams is the contractor for a one-story church, 90 by 75 feet, on Norris street, between Park avenue and Broad street.

A new building has been erected at Saundres avenue, West Philadelphia, 30 by 35 feet, three stories high, for hospital purposes. The hospital authorities will shortly erect a children's pavilion, during the coming fall.

Charles O'Neil is the contractor for the three-story public school building to be erected at Twentieth and Catharine streets. It will be 98½ by 88½ feet. Mr. O'Neil will also build a three-story addition, 42 by 69 feet, to the public school at Jefferson and Twenty-fourth streets.

The addition to the Friends Central High School, on Race Street, west of 15th, will have a front of 50 feet and a depth of 36 feet, three stories high. The purpose is to furnish better accomodations to those in attendance rather then to increase the attendance. An addition is being put to the book store at the corner of Race and 15th, of 17 by 18 feet.

The University Hospital authorities are erecting sleeping quarters for their female nurses on the Southwest corner of Thirty-fourth and Spruce streets. The building will be of brick, two-and-a-half stories high, with a front of 50 feet on Spruce street and 33 feet deep. The main entrance will be on Spruce street. On one side will be a large sitting room.

The new flour warehouse in process of erection on the north side of Market street, below Eighteenth, is 84 feet front and 180 feet deep. It will hold 130,000 barrels of flour and will be five stories high. There will be four hoisting elevators and all other necessary appliances. The Merchant Storage Company is the name of the company which will lease it. The capital of the company is $120,000. James Hay is President. The building will be a pattern of solidity.

Messrs. Strawbridge & Clothier have leased the iron front building from 811 to 815 Market street, adjoining their present stores and now occupied by Hood, Bonbright & Co. The latter firm will vacate their present premises as soon as the new house at Eleventh and Market streets is finished. $100,000 will be expended in repairing and improving both properties. This is a portion of the Thomas H. Powers estate. The building has an iron front, five stories high, 65 feet on Market street and 105 feet deep to Filbert. The improvements will be of the very best character and especially adapted to the business carried on. The entire new structure will have a floor space of nearly 200,000 square yards. The business of this firm amounts to some four or five hundred millions per year. Their present establishment is 90 feet deep back to Filbert. Twenty-four years ago the business was conducted in an old-fashioned three-story brick building, 25 by 40 feet.

—The commissioner of highways has given the street railway companies an issue to quarrel over which has nothing to do with the real question at issue. They can quarrel over which one of them ought to do the paving on Ninth Street, where two companies occupy it.

THE demand for all kinds of building material continues fairly active, but there is no surplus of stocks to depress prices and the market is moving along in a quiet way. The demand for brick of all kinds is still quite heavy, but the pressure that existed a month ago has disappeared. All the yards are working full time. Portland cement is selling at from $2.60 to $3.00; rosendale bridge, $1.25 to $1.50; fire brick, $20; lime x. 23 to 25 cents per bushel and 90 cents to $1.00 per barrel; plaster, $1.25 to $1.50; plastering hair, $21 to $25. The general tendency is to an increase of supply. Everybody looks for an increasing demand for material. Nails are in quite active demand at $2.10 to $2.20. All the factories are running full time. Merchant bar iron is selling at $1.75 to $2.00. Builders hardware has been shaded a little for the fall. The supply of stone is more than equal to the building demands. The production of slate has been curtailed this season, in order that better prices could be realized. Notwithstanding that, prices have edged themselves down little by little.

THE shrinkage in prices has already reached its limit. For two or three years past the excuse has been made that prices were on the down grade, and for that reason large operations were not entered upon. The practical business and building world has now discarded this theory and for the past year has been engaged in large building operations, extending plants, constructing new works, and improving appliances of all kinds. Already it is rewarded by profitable returns and increasing trade. The wise way evidently is to anticipate the requirements of the market by a year. The panics of the past have taught this lesson. The country is growing at such a rate that it no longer answers to build a factory this month to fill the demand that next month will present. Capital is gaining confidence. The low rate of interest prevailing is a strong inducement to investors to anticipate probabilities.

Building Permits.

Two three-story houses, 17 ft. by 42 ft., Washington lane and Clearview st., to O. P. Fisher, Hennan and Hancock sts.

One two-story kitchen, 16 ft. by 10 ft., 1024 S. Front st., to Wm. Schenck, 624 S. Front street.

One two-story house, 16 ft. by 110 ft., Pine, above Sixtieth st., to Wm. Douglass, 330 N. Sixty-third st.

Five three-story houses, 16 ft. by 50 ft., Seventeenth and Monument sts., to G. F. Gibson, 2248 Master st.

A one-story office, 13 ft. by 14 ft., Frankford rd. and Oxford st., to Chas. Gross, same place.

One-story addition, 30 ft. by 32 ft., St. John, above Brown st., to John M. Guckes, 1315, N. Sixth st.

Four three-story houses, 10 ft. by 51 ft., Kensington and Lehigh aves., to John J. Tarpey, 2666 Kensington ave.

Five two-story houses, 16 ft. by 43 ft., Sixteenth, below Dickinson st., to Geo. A. Wagner, 1542 S. Sixteenth st.

A one-story store, 35 ft. by 62 ft., Eleventh and Christian sts., to Turkington & Bro., same place.

One three-story house, 18 ft. by 20 ft., Lehman and Godfrey sts., to John Breidling, 145 Lehman st.

One three-story back building, 11 ft. by 14 ft., 620 N. Eighteenth st., to Jas. Erwin, 1937 Brandywine st.

A two-story building, 10 ft. by 14 ft., 664 N. Thirty-fourth st., to Miller & Rossiman, 616 Orion st.

Two three-story houses, 16 ft. by 58 ft., Highland, above Twenty-seventh st., to Geo. S. Roth, Union ave. and Twenty-fourth street.

Front alteration, 15 ft. by 65 ft., 1014 Federal street, to James J. Hagan, 912 Christian street.

A one-story kitchen, 8 ft. by 10 ft., 1637 Passyunk ave., to Robert Moore, 1653 Passyunk ave.

One three-story building, 14 ft. by 32 ft., 125 Poplar st., to Andrew M. Conneen, 1302 N. Tenth st.

One three-story house, 19 ft. by 51 ft., Forty-ninth st. and Springfield ave., to Jas. D. Arthur, 223 Levant st.

A one-story church, 90 ft. by 75 ft., Norris st. above Park ave., to A. H. Williams, 404 Tennor place.

A one-story frame house, 32 ft. by 32 ft., Locust ave. below Wilson st., to Susan R. Steel, Germantown.

A two-story building, 11 ft. by 14 ft., 335 South st., to William T. Watson, 1335 Bancroft st.

Two two-story houses, 15 ft by 44 ft., Ninth above Dakota st., to John Webb, 904 Arizona st.

A three-story stable, 24 ft. by 47 ft., 1430 Brinton ave., to E. Schmid, 1733 Mascher street.

Front alteration, 1213 Wallace st., to same party.

Six two-story-houses, 16 ft. by 44 ft., Norris, above Queen st., to M. Pelshing, 4764 Main st.

A one-story factory, 32 ft. by 32 ft., 2229 and 2231 N. Twelfth st., to John Klebe, 2228 N. Twelfth st.

Four two-story houses, 16 ft. by 37 ft., Nineteenth and Fernon sts., to Thomas J. Milnamow, 1313 Washington ave.

A two-story warehouse, 60 ft by 90 ft., Swanson st., above Snyder avenue, to C. G. Blatchley, 308 Market st.

Three-story addition to school, 42 ft. by 69 ft., Jefferson, above Twenty-fifth st., to C. O'Neill, 620 S. Thirteenth st.

Three-story addition to school, 96 ft. by 88 ft., Twentieth, above Catharine st., to same party.

Two three-story stores, 17 ft. by 36 ft., Kensington ave., above Sixth st., to Elizabeth Lukens, 2728 Kensington ave.

Three-story addition, 14 ft. by 25 ft., 2208 Pine st., to John Leister, 2218 Pine st.

One-story building, 16 ft. by 42 ft., Goodin ave., above Queen st., to Frank Sheibig, 265 Diamond st.

A three-story school, 40 ft. by 70 ft., Southeast corner Twelfth and Wister streets, to W. R. Dougherty, 1419 Sansom street.

A one-story pavilion, 130 ft. by 105 ft., Broad and Huntingdon streets, to Joseph Bird 1106 Hunter street.

A one-story shop, 21 ft. by 90 ft., Berks, above Second street, to A. H. Neill, 1930 Hancock street.

A one-story warehouse, 45 ft. by 45 ft., Ridge Avenue and Scott's Lane, to John & James Dobson, 809 Chestnut street.

Thirty-eight two-story houses, 14 ft. by 42 ft., Fourth and Somerset streets, to C. C. Moore, 1801 North Broad street.

One two-story house, 10 ft. by 40 ft., Second, above Tioga street, to James H. Dorff, 48 Ellwood avenue.

Two two-story houses, 13 ft. by 42 ft., Marston, above Oxford street, to Smith & King, 2638 Oxford street.

Two two-story houses, 13 ft. by 42 ft., Twenty-seventh, above Oxford street, to same party.

Two two-story houses, 16 ft. by 28 ft., Jefferson, above Shalkop street, to William H. Sperry, 570 Lyceum avenue.

A three-story building, 16 ft. by 28 ft., Fawn, above Jefferson street, to S. Cudland, 1533 Amboy street.

Two two-story houses, 17 ft. by 47 ft., Twenty-second, above Rush street, to Henry Goodwin, Clearfield street.

One two-story store, 16 ft. by 46 ft., Twentieth, above Tasker st., to Simpson & Co., 1719 Christian st.

Three two-story houses, 16 ft. by 42 ft., Twentieth, above Fernon st., to same party.

One two-story store, 18 ft. by 46 ft., Twentieth, above Mountain st., to same party.

Front alteration, Twenty-sixth, below Parrish st., to W. Charlton, 2700 Girard ave.

A two-story building, 12 ft. by 14 ft, 2023 N. Fifth st., to Chas. Bossert, 2114 Marshall st.

One two-story house, 16 ft. by 45 ft., Wakeling, above William st., to Taylor & Roberts, 238 East Orthodox st., Frankford.

A two-story store, 18 ft. by 70 ft., Girard ave., above Thirtieth st., to Thos. E. Dey, 2307 Master st.

A three-story laundry house, 32 ft. by 62 ft., Huber, above Nineteenth st., to A. H. Williams, 404 Tenor Place.

Four two-story houses, 16 ft. by 42 ft., Thirty-third, above Fairview st., to B. P. Evans, Knox, below Manheim st.

Two two-story houses, 14 ft. by 50 ft., Thirtieth, above Poplar st., to J. L. Shoemaker, 3109 Powelton ave.

One-story addition, 20 ft. by 82 ft., 1308 Chestnut st., to Wm. Devett & Sons, 1125 Brown st.

Assn.—Association.
B. & L.—Building & Loan.
Bk.—Bank.
B.B.—Back Building.
Dwg.—Dwelling.
Est.—Estate.
E.J.—Ejectment Suit.
E.S.—Equity Suit.
Exr.—Executor.
Exrx.—Executrix.
K. & B.—Kitchen & Bath.
M.L.D.—Mechanics' Lien Docket.
Nat. Bk.— National Bank.
Sav. Bk. — Savings Bank.
t. t.—Terre Tenant.
S.F.—Scire Facias to revive Judgment.
Sum C.—Summons in Case—A form of action invented to meet all civil cases, the form of which is not specially provided for.

Where there are no figures to indicate the amount of the judgment, the damages have not been assessed.

The first name in each line is that of the judgment debtor.

An asterisk (*) denotes judgment confessed or bond and warrant conditioned.

The figures 1 2 3 and 4 immediately after the name of the plaintiff indicates the number of the Court. The letters D. M. J. and S. after the number of the Court indicate the Term as D., December Term, M., March Term, as J., June term and S., September Term.

An examination as to the nature of judgments and suits will be made for subscribers without extra charge on application.

CONVEYANCES.
